NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2016

1. ACCOUNTING POLICIES

Basis of preparation of financial statements

The financial statements are prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

The company is dependent on continuing finance being made available by its shareholder. Continuing finance is required both to enable the company to meet its liabilities as they fall due and to continue operating without immediate realisation of all its assets.

The director believes that continuing finance will be available and that it is therefore appropriate to prepare the financial statements on a going concern basis. However, should continuing finance not be available, the going concern basis would be invalid and adjustments would have to be made to reduce the value of assets to their realisable amount, to provide for any further liabilities which might arise and to reclassify fixed assets as current assets.

Turnover

Turnover comprises the invoiced value of services supplied by the company during the year, net of value added tax and trade discounts.

Tangible fixed assets and depreciation

Tangible fixed assets are stated at cost less depreciation. Depreciation is provided at rates calculated to write off the cost of fixed assets, less their estimated residual value, over their expected useful lives on the following bases:

Office Equipment	-	30% per annum reducing balance basis
Furniture and Fittings	-	25% per annum reducing balance basis

Deferred taxation

The charge for taxation takes into account taxation deferred as a result of timing differences between the treatment of certain items for taxation and accounting purposes. In general, deferred taxation is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date. However, deferred tax assets are recognised only to the extent that the director considers that it is more likely than not that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits. Deferred taxation is measured on a non-discounted basis at the average tax rates that would apply when the timing differences are expected to reverse, based on the tax rates and laws that have been enacted by the balance sheet date.

2. LOSS ON ORDINARY ACTIVITIES BEFORE INTEREST

2016

2015

The loss on ordinary activities before interest is stated after charging:

Depreciation of tangible fixed assets:

- owned by the company
