2.1. BASIS OF PREPARATION

The financial statements are prepared on the historical cost basis.

KRF Management Limited

NOTES TO THE FINANCIAL STATEMENTS

For the year ended 31 July 2010

2.2. REVENUE

Revenue is measured at the fair value of the consideration received or receivable and represents fees receivable in respect of the company's principal activity, net of discounts, VAT and other sales related taxes

2.3. FINANCE COSTS

Interest payable is recognised in the income statement as it accrues, using the effective interest method

2.4. FINANCE INCOME

Interest income is recognised in the income statement as it accrues, using the effective interest method

2.5 TAXATION AND DEFERRED TAXATION

Tax on the profit or loss for the year comprises current and deferred tax. Tax is recognised in the income statement except to the extent that it relates to items recognised directly in equity, in which case it is recognised in equity.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantially enacted at the balance sheet date, and any adjustment to tax payable in respect of previous years.

Deferred tax is provided on temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The following temporary differences are not provided for: the initial recognition of goodwill and differences relating to investments in subsidiaries to the extent that they will probably not reverse in the foreseeable future. The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantially enacted at the balance sheet date.

A deferred tax asset is recognised only to the extent that it is probable that future profits will be available against which the asset can be utilised.

2.6 FINANCIAL ASSETS

2.6.1. Loans and receivables

Trade receivables, loans, and other receivables that have fixed or determinable payments that are not quoted in an active market are classified as loans and receivables. Loans and receivables are measured at amortised cost using the effective interest method, less any impairment. Interest income is recognised by applying the effective interest rate, except for short-term receivables when the recognition of interest would be immaterial.

2.6.2. Derecognition of financial assets

The company derecognises a financial asset only when the contractual rights to the cash-flows from the asset expire, or it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.
