The notes on pages 3–5 form part of these financial statements.

## **1. Accounting policies**

### **1.1 Basis of preparation of financial statements**

The financial statements are prepared under the historical cost convention and in accordance with the Financial Reporting Standards for Smaller Entities (Effective January 2005).

### **1.2 Turnover**

Turnover comprises the invoiced value of goods and services supplied by the company, net of Value Added Tax and trade discounts.

### **1.3 Tangible fixed assets and depreciation**

Tangible fixed assets are stated at cost less depreciation. Depreciation is provided at rates calculated to write off the cost of fixed assets, less their estimated residual value, over their expected useful lives on the following bases:

Motor vehicles	25% per annum straight line basis
Office equipment	33 1/3% per annum straight line basis
Furniture and fittings	33 1/3% per annum straight line basis

### **1.4 Hire purchase contracts**

Assets obtained under hire purchase contracts are capitalised as tangible fixed assets and are depreciated over their useful lives. Obligations under such agreements are included in creditors net of the finance charge allocated to future periods. The finance element of the rental payment is charged to the profit and loss account so as to produce a consistent periodic rate of charge on the net obligation outstanding in each period.

### **1.5 Stocks and work in progress**

Stocks and work in progress are valued at the lower of cost and net realisable value after making due allowance for obsolete and slow-moving stocks. Cost includes all direct costs and an appropriate proportion of fixed and variable overheads.

### **1.6 Deferred taxation**

The charge for taxation takes into account taxation deferred as a result of timing differences between the treatment of certain items for taxation and accounting purposes. In general, deferred taxation is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date. However, deferred tax assets are recognised only to the extent that the directors consider that it is more likely than not that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits. Deferred taxation is measured on a non-discounted basis at the average tax rates that would apply when the timing differences are expected to reverse, based on tax rates and laws that have been enacted by the balance sheet date.

### **1.7 Pensions**

The company operates a defined contribution pension scheme and the pension charge represents the amount payable by the company to the fund in respect of the year.
