##### Taxation

Tax on the profit or loss for the year comprises current tax. Tax is recognised in the profit and loss account except to the extent that it relates to items recognised directly in equity or other comprehensive income, in which case it is recognised directly in equity or other comprehensive income.

Current tax is the expected tax payable or receivable on the taxable income or loss for the year using tax rates enacted or substantively enacted at the Balance Sheet date, and any adjustment to tax payable in respect of previous years.

##### Provisions

Provisions are made when an obligation exists for a future liability in respect of a past event and where the amount of the obligation can be reliably estimated.

##### Foreign currencies

Transactions in foreign currencies are recorded at the rate ruling at the date of the transaction or at the contracted rate if the transaction is covered by a forward currency contract. #### Financial instruments

In accordance with IAS 39 'Financial Instruments - Recognition and Measurement', financial instruments are recorded initially at fair value. Subsequent measurement of those instruments at the Balance Sheet date reflects the designation of the financial instrument. The Company determines the classification at initial recognition and re-evaluates this designation at each period end except for those financial instruments measured at fair value through the Income Statement.

#### a Debtors

Debtors are stated at cost less allowances made for doubtful receivables, which approximates fair value given the short dated nature of these assets. A provision for impairment of receivables (allowance for doubtful receivables) is established when there is objective evidence that the Company will not be able to collect all amounts due according to the original terms of the receivable.

#### b Interest receivable

Interest income on debtors is recognised as interest accrues using the effective interest method.

#### Key accounting estimates and judgements

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. These estimates and associated assumptions are based on historical experience and various other factors believed to be reasonable under the circumstances. Actual results could differ from these estimates. These underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if these are also affected.
