Financial risk management

The company's operations mean that it is exposed to a variety of financial risks that include the effects of changes in credit risk, liquidity risk and interest rate risk. Statement of accounting policies

The following accounting policies have been applied consistently in the company's financial statements

Basis of preparation

The financial statements have been prepared on the going concern basis in accordance with applicable UK accounting standards and UK company law and under the historical cost accounting rules

The company is exempt by virtue of section 400 of the Companies Act 2006 from the requirement to prepare group financial statements on the grounds that it is included in the consolidated financial statements of a parent undertaking. These financial statements present information about the company as an individual undertaking and not about its group.

Under Financial Reporting Standard 1 'Cash flow statements' (revised 1996) the company is exempt from the requirement to prepare a cash flow statement on the grounds that a parent undertaking includes the company in its own publicly available consolidated financial statements.

As the company is a wholly owned subsidiary of Priory Group No. 1 Limited, the company has taken advantage of the exemption contained in Financial Reporting Standard 8 'Related party disclosures' and has therefore not disclosed transactions or balances with entities which form part of the group.

Investments

Investments held as fixed assets are shown at cost less provision for impairment.

Deferred taxation

The charge for taxation is based on the profit for the period and takes into account taxation deferred.

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date, where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date.

A deferred tax asset is recognised as recoverable and therefore recognised only when, on the basis of all available evidence, it can be regarded as more likely than not that there will be suitable taxable profits against which to recover carried forward tax losses and from which the future reversal of underlying timing differences can be deducted.

Deferred tax is measured at the average tax rates that are expected to apply in the periods in which the timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantively enacted by the balance sheet date. Deferred tax is measured in a non-discounted basis.

Group relief

Payment is generally made for group relief at the current tax rate at the time of first estimating the tax provision. To the extent that amendments are subsequently made to the group relief plan, there is generally no payment or receipt in respect of the change.

Priory Securitisation Limited

5 Tax on profit on ordinary activities (continued)

The standard rate of tax for the year, based on the UK standard rate of corporation tax is 26.49% (2010: 28%)
The actual tax charge for the year is higher (2010: lower) than the standard rate for the reasons set out in the following reconciliation

	2011	2010
	£'000	£'000
Profit on ordinary activities before tax	9,819	269,976
Tax on profit on ordinary activities at standard rate	2,601	75,593
Factors affecting charge for the year

Transfer pricing adjustments	905	
Amounts written off investments	-	47,804
Income from shares in group undertakings	-	(123,397)
Total current tax charge for the year	3,469	37

The standard rate of corporation tax in the UK changed from 28% to 26% with effect from 1 April 2011. A further reduction in this corporation tax rate effective on 1 April 2012 from 26% to 25% was substantively enacted for the purposes of FRS 19 on 5 July 2011. Accordingly, the Company's profits for this accounting period are taxed at an effective rate of 26.49% and deferred taxation has been calculated based on a rate of 25%.

In addition to the changes in rates of corporation tax disclosed above a number of further changes to the UK corporation tax system were announced in the March 2012 UK Budget Statement. Changes to the corporation tax rate on 1 April 2012, substantively enacted for the purposes of FRS 19 on 26 March 2012, will reduce to 24%, a 1% reduction from the rate substantively enacted on 5 July 2011. Further reductions to the main rate are proposed to reduce the rate by 1% per annum to 22% by 1 April 2014. These further changes had not been substantively enacted at the balance sheet date and, therefore, are not included in these financial statements.

The proposed reductions of the main rate of corporation tax by 1% per year to 22% by 1 April 2014 are expected to be enacted separately each year. The overall effect of the further changes from 25% to 22%, if these applied to the deferred tax balance at the balance sheet date, would be immaterial.
