Historic Cost Convention

The financial statements have been prepared in accordance with applicable accounting standards and in accordance with the historical cost convention. A summary of the company's accounting policies, which have been applied consistently, is set out below.

Foreign Currencies

All transactions denominated in foreign currencies are translated at the actual rate of exchange ruling on the date of the transaction. Current assets and liabilities in foreign currencies are translated into sterling at rates of exchange ruling at Balance Sheet date. All exchange differences are dealt with in the profit and loss account.

Turnover

Turnover represents the value of charges to customers for the year, net of any credits issued and before any charges for value added tax.

Deferred Tax

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that have resulted in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date. Timing differences are differences between the company's taxable profits and its results as stated in the financial statements.

Deferred tax is measured at the average tax rates that are expected to apply in the periods in which timing differences are expected to arise, based on tax rates and laws that have been enacted or substantially enacted by the balance sheet date. Deferred tax is measured on a non-discounted basis.
