1 Accounting policies

Basis of preparation

The full financial statements, from which these abbreviated accounts have been extracted, have been prepared under the historical cost convention

Cash flow statement

The accounts do not include a cash flow statement because the company, as a small reporting entity, is exempt from the requirements to prepare such a statement

Going concern

These financial statements have been prepared on a going concern basis

Turnover

Turnover represents amounts invoiced, net of value added tax, in respect of the sale of goods and services to customers

Depreciation

Depreciation is provided on tangible fixed assets so as to write off the cost or valuation, less any estimated residual value, over their expected useful economic life as follows

Equipment	33% straight line basis
-----------	-------------------------

Deferred taxation

Deferred tax is provided in full on timing differences which represent a liability at the balance sheet date, at rates expected to apply when they crystallise based on current tax rates and law. Timing differences arise from the inclusion of items of income or expenditure in tax computations in periods different from those in which they are included in the financial statements. Deferred tax assets and liabilities are not discounted.

Hire purchase and finance lease contracts

Assets held under finance leases, which are leases where substantially all the risks and rewards of ownership of the asset have passed to the company, are capitalised in the balance sheet and are depreciated over their useful lives. The capital elements of future obligations under the leases are included as liabilities in the balance sheet. The interest element of the rental obligation is charged to the profit and loss account over the period of the lease and represents a constant proportion of the balance of capital repayments outstanding.

Assets acquired under instalment finance agreements are treated as tangible fixed assets and depreciation is provided accordingly. The capital element of future finance payments is included within creditors. Finance charges are allocated to accounting periods over the length of the contract.
