DISCLOSURE COPY

OF THE GROUP ACCOUNTS AS AT 31 DECEMBER 2019 AND THE GROUP MANAGEMENT
REPORT FOR THE FINANCIAL YEAR 2019

HEINRICH BAUER VERLAG BETEILIGUNGS GMBH

HAMBURG

DISCLOSURE COPY

OF THE GROUP ACCOUNTS AS AT 31 DECEMBER 2020 AND
THE GROUP MANAGEMENT REPORT FOR THE FINANCIAL YEAR 2020

(The following English language report on the examination of the financial statements is a translation from the preceding German language report. This report was prepared applying Germany accounting principles for use in that country only. Likewise, the following translation is designed for use in Germany only, since adjustments, if any, which would be necessary to conform the financial statements to accounting practices used in countries other than Germany have not been made.)

HEINRICH BAUER VERLAG BETEILIGUNGS GMBH, HAMBURG
GROUP BALANCE SHEET AS AT 31 DECEMBER 2020

ASSETS	31.12.2020 EUR	31.12.2019 EUR	LIABILITIES	31.12.2020 EUR	31.12.2019 EUR

Notes to Group Financial Statements for the Financial Year 2020

1. General notes

The company is based in Hamburg and registered there in the commercial register of the local court, department B under the number HRB 32176.

The group financial statements and the group management report of Heinrich Bauer Verlag Beteiligungs GmbH as of December 31, 2020 were prepared in accordance with the accounting regulations of HGB (German Commercial Code).

The income statement was prepared according to the total cost method.

2. Consolidation principles

The companies' financial statements included in the consolidation were prepared in accordance with the statutory regulations on a standardized basis as of December 31, 2020.

Up to and including the 2009 financial year, the capital consolidation was applied according to the book value method by offsetting the investment book values with the equity shares recorded at the subsidiaries at the time of acquisition or initial consolidation, allocating the underlying hidden reserves or charges. Since the 2010 financial year, initial consolidation is basically carried out with the values assumed at the time at which the companies became subsidiaries, using the revulsion method (Art. 301 HGB). Here, the valuation base of the shares belonging to the parent company is offset against the subsidiary's amount of equity attributed to these shares. Any difference remaining after offsetting is shown as goodwill if on the assets side, and if it arises on the liabilities side, it is shown under "Differences arising from capital consolidation" after equity.

The affiliated companies not included in the group financial statements are companies whose influence on the group's assets, financial and earnings situation – both individually and as a whole – is of minor importance. The inclusion in the group financial statements in accordance with Art. 296 Para. 2 HGB has therefore been waived. Use is made of the protective clause of Art. 313 Para. 3 HGB in the case of two affiliated companies.

For holdings in associated companies that are valued according to the equity method, the book value method is used. The holdings are included in the group with the proportionate book value of the equity. The accounting and valuation methods presented in the following section are also used for associated companies. There has been no presentation of a consolidated balance sheet and income statement for associated companies due to immateriality.

In the case of associated companies of minor significance, no equity valuation is carried out in accordance with Art. 311 Para. 2 HGB.

If, after obtaining control, further shares in a subsidiary are acquired, the transaction is accounted as an acquisition transaction.

Changes in the equity of the subsidiaries due solely to changes in exchange rates are assigned to the capital without any effect on income.

Receivables, liabilities, intra-group sales, expenses and income as well as interim results between the included, consolidated companies are eliminated.

In the year under review, the following companies were included for the first time due to acquisition or due to materiality criteria:

Company	Registered office
99.9 Radio Norwich Limited	Peterborough
Anglian Radio Limited	Peterborough
Bauer Media Audio LP	Peterborough
Bauer Radio (Andover) Ltd.	Peterborough
Bauer Radio (TRL) Limited	Peterborough
Compass Radio Limited	Peterborough

Zmarta Försäkringar AB	Ängelholm	Liquidation in 2020
Zmarta Sweden Group Kommanditbolag	Ängelholm	Liquidation on October 31, 2020

The Australian Publishing Group deconsolidated on July 15, 2020, the Polish Interia Group deconsolidated on June 30, 2020, and the Czech Profi SMS Group deconsolidated on September 30, 2020 reported the following figures in the group financial statements as of December 31, 2019 and in the group income statement until deconsolidation in 2020:

	kEUR	
ASSETS		
Fixed assets	60,859	
Current assets	59,328	
LIABILITIES		
Provisions	27,368	
Liabilities	19,798	
Deferred income	7,880	
Income statement items	2020 (until deconsolidation) kEUR	2019 kEUR
Sales revenues	74,003	163,584
Material expenditures	30,154	61,800
Personnel expenditures	27,372	57,816

The deconsolidation of the other listed subsidiaries had no material impact on the assets, financial and earnings situation.

Upon approval by the authorities in May 2021, several radio stations were acquired in Ireland for an amount in the range of high double-digit millions. On a pro rata basis for the 2021 financial year, it is expected to have a sales contribution from this purchase in an amount in the range of low double-digit millions and of low single-digit millions in operating profit contribution.

3. Accounting and valuation principles

In drawing up the group financial statements, the following accounting and valuation methods were essentially authoritative without any change. Accounting and valuation options were applied unchanged compared with the previous year's financial statements.

Intangible assets are shown at purchase costs minus planned depreciation over their probable term of use amounting from three to sixteen years. If a corresponding value adjustment is required, unscheduled depreciation is also carried out beyond the planned depreciation.

Acquired goodwill – including goodwill from initial consolidation of shares (Art. 309 Para. 1 HGB) – is capitalized at cost of acquisition and depreciated according to plan over the probable term of use of four years and/or subjected to unscheduled depreciation where there is a probable sustained value reduction. The term of use is based on the usability of the underlying publishing / broadcasting / title / trademark rights which were acquired for valuable consideration within the scope of the company takeover. If no term of use can be determined, a period of four years will be regularly applied according to commercial prudence.

Property, plant and equipment is shown at cost of acquisition or production costs minus planned usage-related depreciation and if necessary, unscheduled depreciation. Special tax depreciations were eliminated.

Shares in non-consolidated affiliated companies and holdings are shown at cost of acquisition or at lower attributable values. Additions regarding shares in associated companies include – in addition to acquired shares – capital contributions and prorated annual net profits. Prorated annual net losses and sold shares are recorded under disposals.

Securities held as fixed assets are shown at acquisition cost or at lower attributable values.

Loans are entered with the nominal amount or the lower cash value.

Items in inventories were evaluated in consideration of the lowest value principle at cost of acquisition or production costs, or depreciated to a lower market value.

Unfinished and finished products are valued at production costs based on individual calculations, whereby, in addition to directly attributable individual material costs and production wages, manufacturing and material overhead were taken into account. All cases were valued loss-free.

All identifiable risks in inventories resulting from above-average storage duration and reduced usability are taken into consideration through appropriate write-downs.

Receivables and other assets are basically shown at the nominal value. Risks are taken into consideration through appropriate individual or lump-sum value adjustments.

Securities of current assets are stated at acquisition cost or at lower attributable values.

Cash on hand and credit balances with banks are shown at the nominal value.

Provisions for pensions and similar obligations are shown with the part values and/or cash values for ongoing pensions which are determined using actuarial principles (projected unit credit method). Discounting is carried out at the average market interest rate based on an assumed term of 15 years. In addition, increases in wages and salaries are also taken into account. The disclosure of the difference in accordance with Art. 253 Para. 6, sentence 1 HGB is waived due to insignificance - i.e. between the provisions for pension obligations in accordance with the corresponding average market interest rate from the past ten financial years and the provisions in accordance with the corresponding average market interest rate from the past seven financial years.

Tax provisions are created in the amount of the probable tax charge.

Other provisions are listed in the sum of the repayment amount – i.e. including future costs and price increases – which is necessary on the basis of a reasonable commercial assessment to take into account all contingent losses on the balance sheet date on pending transactions and uncertain liabilities.

Liabilities are shown with their repayment amount.

Deferred tax assets and liabilities are recognized in the group financial statements for temporary differences between the book values of assets and liabilities in the trade statement and the tax statement and for tax loss carryforwards using the individual tax rate of the respective subsidiary. Differences resulting from consolidation measures in accordance with Sections 300 to 307 HGB (German Commercial Code), in particular in the context of capital consolidation based on the valuation of publishing rights and licenses for broadcasting rights, are also taken into account, but not differences resulting from the initial recognition of goodwill. The calculation is based on the company-specific tax rate that is valid at the time the differences are eliminated. Deferred tax assets and liabilities are offset. The capitalization of any remaining balance of deferred taxes is not undertaken in exercising the option to recognize them.

Foreign currency receivables and liabilities are entered with the relevant transaction rate and valued subsequently at the mean spot exchange rate. Exchange rate losses arising up to the balance sheet date through the realization or valuation at the mean spot exchange rate on the financial statement date are taken into account as affecting profit or loss. Non-realized exchange rate profits from currency conversion are only considered to affect profit or loss in the case of remaining terms of up to one year.

4. Currency conversion of foreign currency financial statements by included subsidiaries

The modified reporting date method is used for the conversion of individual financial statements prepared in foreign currency. In this case, all balance sheet items of the included foreign subsidiaries were converted into euros at the respective mean spot exchange rate of the balance sheet date – except for equity which was converted at historical rates. The differences from the conversion of equity resulting from the change in exchange rates versus the previous year were entered, without any effect on income, into the equity difference from currency conversion.

Expenditures and revenues were converted at the average rate. The annual result of the converted income statement was adopted in the balance sheet and the difference was entered, without any effect on income, into the equity difference from currency conversion.

Differences due to the mutual offsetting of receivables and liabilities between the companies included in the group financial statements due to currency conversion were handled as affecting profit and loss within the framework of debt consolidation.

5. Notes on the balance sheet

The development and breakdown of assets is shown in the schedule of assets.

Intangible assets

Radio licenses resulting from the initial consolidation in the amount of kEUR 103,461 were capitalized in the year under review and will be written off as planned over a useful life of 12 years.

The goodwill item includes capitalized differences arising from capital consolidation according to Art. 301 Para. 3 HGB as goodwill:

	<u>kEUR</u>
As of January 1, 2020	120,054
- Difference from additions, disposals (including exchange rate differences)	-952
- Depreciations (including exchange rate differences)	-73,508
As of December 31, 2020	<u>45,595</u>

Initial consolidations in 2020 resulted overall in a difference in the amount of kEUR 0 capitalized as goodwill.

The goodwill shown in addition in the group balance sheet does not result from capital consolidation.

Financial assets

Shares in affiliated companies shown relate to companies which are of minor importance overall for the group or which are in liquidation and were not consolidated. According to the equity method, none of the associated companies are consolidated (previous year: 3).

Receivables and other assets

The trade receivables reported in the balance sheet have a remaining term of less than one year except for kEUR 682 (previous year: kEUR 319). Receivables from affiliated companies in the amount of kEUR 2,497 (previous year: kEUR 1,533) have a remaining term of more than one year and include trade receivables of kEUR 0 (previous year: kEUR 0) and receivables from financial transactions less liabilities from the profit and loss transfer agreement of kEUR 244,526 (previous year: kEUR 81,390).

Receivables from affiliated companies include receivables from the sole shareholder Heinrich Bauer Verlag KG, Hamburg, in the amount of kEUR 235,604 (previous year: kEUR 77,170).

Other assets include kEUR 526 (previous year: kEUR 402) with a remaining term of more than one year, which are based on deposits, among other things.

Deferred taxes

Deferred tax assets and liabilities were determined in the group financial statement resulting from temporary differences between the commercial balance sheet and the tax balance sheet. Deferred tax assets result in particular from differences in fixed assets, for provisions and from tax loss carryforwards. Deferred tax liabilities were determined in particular for unrealized currency gains in connection with foreign currency bank balances or receivables, receivables and deferred income. However, tax loss carryforwards were generally only taken into account when calculating deferred tax assets to the extent that the tax relief from the loss carryforward is expected to be realized within the next five years. The deferred taxes from the annual financial statements of the consolidated subsidiaries were calculated using the individual tax rates applicable to the companies, which range between 13.228 % and 32.275 % (previous year: 13.228 % and 32.275 %).

Deferred taxes were also calculated on capital consolidation measures in accordance with Sections 300 to 307 HGB (German Commercial Code); in particular, deferred tax liabilities arose in connection with capital consolidation due to the valuation of publishing rights and licenses for broadcasting rights. In addition, deferred tax assets arose as part of the elimination of intercompany profits due to temporary differences in the balance sheet approach regarding fixed assets. The calculation was based on individual company tax rates that are expected to apply at the time the differences are reduced, which range between 19.0 % and 32.023 % (previous year 19.0 % and 32.023 %). Overall, the consolidation measures resulted in deferred tax liabilities, which summed up with deferred tax assets from temporary differences and tax loss carryforwards as defined in Section 274 of the HGB, resulting in an excess of deferred tax liabilities (previous year: deferred tax assets).

Deferred tax assets and liabilities developed as follows in the year under review:

	Deferred tax assets	Deferred tax liabilities	Balance
	kEUR	kEUR	kEUR
December 31, 2019	36,105	28,386	-7,719
Development	-7,751	13,377	21,128
December 31, 2020	28,354	41,763	13,409

In the previous year, the excess in deferred tax assets resulting from the group-wide consideration was not shown in the group balance sheet, by exercising an accounting option.

Subscribed capital

The share capital entered in the commercial register amounts to DM 5,100,000.00 (EUR 2,607,588.61).

Other provisions

Other provisions are essentially obligations to accept returns, advertising rebates, obligations in the personnel area, purchase price obligations arising from earn-out agreements, legal disputes, as well as outstanding invoices received.

Liabilities

	Liabilities total EUR	Remaining term up to 1 year EUR	Remaining term 1 to 5 years EUR	Remaining term > 5 years EUR
Due to banks	33,755,375 (prev. yr. 41,420,502)	21,913,826 (prev. yr. 8,293,932)	11,841,549 (prev. yr. 33,126,570)	0 (prev. yr. 0)

Amounts owed to affiliated companies include liabilities to the sole shareholder Heinrich Bauer Verlag KG, Hamburg, of kEUR 0 (previous year: kEUR 0).

Amounts owed to affiliated companies include trade accounts payable in the amount of kEUR 1,063 (previous year: kEUR 4,578), as well as liabilities from the profit-and-loss transfer agreement less receivables from financial transactions in the amount of kEUR 0 (previous year: kEUR 0).

6. Contingent liabilities and other financial obligations

Contingent liabilities

As of the balance sheet date, contingent liabilities from guarantees existed in the amount of kEUR 2,117 (previous year: kEUR 1,619).

Utilization is not expected based on the assets, financial and earnings situation of the companies.

Other financial obligations

As of the balance sheet date, rental and leasing obligations existed totaling kEUR 45,849 (previous year: kEUR 79,398), thereof kEUR 0 (previous year: kEUR 0) to affiliated companies.

Furthermore, there are financial obligations due to printing contracts to the extent customary in the trade.

7. Notes on the income statement

Sales revenues after reductions of proceeds:

Breakdown by areas

	2020 kEUR	2019 kEUR
Distribution	561,032	668,578
Radio	453,612	472,300
Advertising	65,763	121,114
Digital	178,697	209,036
Printing	18,125	21,196
Other revenues from publishing business	18,510	26,168
	<u>1,295,739</u>	<u>1,518,392</u>

Breakdown by regions

	2020 kEUR	2019 kEUR
Germany	9,310	17,811

	<u>1,295,739</u>	<u>1,518,392</u>

Unscheduled depreciations

In intangible assets, unscheduled depreciations were made in the amount of kEUR 516 (previous year: kEUR 7,627) which are mainly due to the lower profitability of internally generated intangible assets in the OCP area (previous year: broadcasting rights or magazines).

Income of exceptional magnitude

Income of exceptional magnitude results in the year under review from the sale of the Czech ProfiSMS Group (kEUR 4,229) and the Polish Interia Group (kEUR 43,751).

Income unrelated to accounting period

Other operating income includes income from the reversal of provisions in the amount of kEUR 4,772 (previous year: kEUR 2,367).

Expenses of exceptional magnitude

In the year under review, expenses of exceptional magnitude were incurred for the deconsolidation of the Australian publishing companies as well as for the sale of the not consolidated shares in the Russian publishing companies in the amount of kEUR 46,088 (previous year: closure of the publishing business in New Zealand in the amount of kEUR 10,011).

Notes to the cash flow statement

The cash flow statement was prepared in accordance with DRS 21. Financial resources include cash on hand and checks, credit balances at banks available at short notice, as well as securities of current assets and receivables from cash pooling versus Heinrich Bauer Verlag KG.

Composition and remuneration of Management

In the financial year, the Management of Heinrich Bauer Verlag Beteiligungs GmbH, Hamburg, was made up as follows:

Mr. Heinz H. Bauer, Hamburg, Publisher
Mrs. Yvonne Bauer, Hamburg, Managing Director
Mr. Harald Jessen, Hamburg, Managing Director (until November 8, 2020)
Mr. Veit Dengler, Zollikon, Switzerland, Managing Director
Mr. Steven Kotok, New York, New York/USA, Managing Director
Mr. Bill Houston, Haddon Heights, New Jersey/USA, Managing Director

Management does not receive any remuneration from the companies included in the subgroup for their work as managing directors.

Controlling and profit and loss transfer agreement

A profit and loss transfer agreement exists between the sole shareholder Heinrich Bauer Verlag KG, Hamburg, and Heinrich Bauer Verlag Beteiligungs GmbH, Hamburg.

Group membership

All company shares are held by Heinrich Bauer Verlag KG, Hamburg. As the group parent company, Heinrich Bauer Verlag KG prepares group financial statements according to the provisions of the German Disclosure Act. These are published in the electronic Federal Gazette.

Supplementary report

With the acquisition of the Communicorp Group, Ireland, the Bauer Media Group is expanding its radio business activities in an additional European country. Full approval by the authorities was granted in May 2021. Bauer Media Group is thus expanding its growing position as Europe's commercial radio operator.

Schedule of share ownership

A. Notes on the schedule of share ownership and the scope of consolidation

In 2020, a total of 283 companies (previous year: 238 companies) formed part of the share ownership of the Heinrich Bauer Verlag Beteiligungs GmbH group.

The group financial statements as of 31 December 2020 covered, in addition to Heinrich Bauer Verlag Beteiligungs GmbH (parent company), a total of 157 (previous year: 191) German and foreign companies (direct and indirect holdings) and three (previous year: four) associated companies.

One (previous year: two) company is included without a voting rights majority by way of full consolidation since the parent company has the possibility of control pursuant to Art. 290 HGB.

For two affiliated companies, use is made of the exception rule in Art. 313 Para. 3 HGB.

The companies listed in Section D are not included in the group financial statements due to materiality criteria according to Art. 296 Para. 2 HGB. This covers a total of 123 (previous year: 43) German and foreign companies, including twelve (previous year: seven) associated companies.

B. Scope of consolidation

Companies included in the 2020 group financial statements in addition to Heinrich Bauer Verlag Beteiligungs GmbH

HEINRICH BAUER VERLAG BETEILIGUNGS GMBH, HAMBURG

GROUP MANAGEMENT REPORT 2020

1. Fundamentals of the company

1.1 Business model and segments of the group

In the 2020 financial year, Heinrich Bauer Verlag Beteiligungs GmbH as holding company of the international business of Bauer Media Group held direct and indirect interests in companies in Great Britain, Sweden, Denmark, Finland, Norway, France, Spain, Austria, Poland, Slovakia, the Czech Republic, Russia, Romania, Australia, New Zealand and the U.S.A. Heinrich Bauer Verlag Beteiligungs GmbH and its subsidiaries (hereinafter also referred to as Bauer Media Group in this Group Management Report) are an internationally operating diversified group of companies with the business areas of publishing, audio, OCPs – i.e. online comparison platforms – as well as SME services – i.e. marketing and distribution services for small and medium-sized enterprises.

More than 400 magazines, over 100 digital products and over 150 radio and TV stations reach millions of people around the globe.

With sales of about € 685 million, publishing is the most important business area of the Bauer Media Group. It comprises the magazine business, online activities, print houses and publishing services.

The business area audio contributes with about € 455 million to sales. We are one of the largest commercial broadcasting services in Europe and weekly reach an audience of about 55 million listeners. In addition, we provide digital platforms and operate podcasts.

Meanwhile, the business area comparison platforms contributes about € 117 million to total sales. About 10 million people are using our service in Scandinavia, Spain and in Eastern Europe.

The area of marketing and distribution services for small and medium-sized enterprises (SMEs) – with sales of about € 30 million – was added in 2018 and is still being developed.

With its takeover of the Communicorp Group in Ireland in the spring of 2021, Bauer Media Group enters the audio market of the Republic of Ireland and thus expands its audio business to eight countries in order to further develop its position as Europe's leading commercial radio broadcaster with weekly more than 55 million listeners. In addition to its growth through acquisitions, the Group strategy consists of advancing and pushing ahead the continuing digital development in the entire segment of the industry. In May 2021, Bauer Media Group obtained the authorities' full approval for the takeover of Communicorp Group.

1.2 Objectives and strategies

It is the objective of Bauer Media Group to increase long-term and sustainably the Group's corporate value.

Bauer Media Group is one of the most successful enterprises in the publishing sector worldwide. Our editorial processes as well as the quality of our journalistic products provide the basis for our success.

However, due to the further progressing digitization and thus accordingly changed media consumer patterns, the publishing business is subject to tremendous changes. We will be successful in that environment if we rely on our traditional strength, i.e. of anticipating market changes and consistently adjusting to them. As a result of developments consistently below expectations in the publishing business in New Zealand, Australia, Romania and Russia – as well as the additional negative impact due to the coronavirus pandemic in these markets – corporate management decided to divest itself from those units. In New Zealand, closing of the operative business was announced in early April 2020. Businesses in Australia, Romania and Russia were sold until end of July 2020.

With our move into the radio broadcasting business in 2008, we started to expand the focus of our Group from a pure and simple publishing house to an increasingly more diversified group of companies.

Overall, our radio business developed very positively. In April 2020, the British Competition and Markets Authority (CMA) approved our takeover of local wireless broadcasting stations, Celador Radio, the Lincs FM Group and the UKRD Group in Great Britain, and an essential component of our group strategy could thus be implemented. The Group strategy consists of advancing and pushing ahead the continuing digital development in the entire segment of the industry and supporting a powerful and sustained future for the commercial local radio sector.

Our entry into the business with comparison platforms in 2015 marked our successful continuation of further diversification. In December 2020, Bauer Media Group took over Acierto – a leading provider in the Spanish online comparison market for insurance products, enabling consumers to compare the prices of more than 30 auto insurances, as well as motorcycle, health, life and home insurances. This acquisition supports Bauer Media Group's leadership position in Europe's innovative OCP industry.

In terms of strategy, we pressed ahead in 2020 with the transformation of our corporate group to a more widely diversified enterprise with several business areas; and, at the same time, we also invested in our mainstay, our publishing business. In the future as well, Bauer Media Group will continue to invest further with the objective of making us stronger in more stable business segments but also to make divestments in niche markets or in weaker segments and markets.

At the same time, we rely on a continuous expansion of our growing audio segment; and, additionally, we develop new business areas to set up our corporate group in a sustained and broader manner, making our group more resilient in view of the further downtrend to be expected in the publishing area.

1.3 Steering system

We oriented our internal steering system on our group strategy and defined financial performance indicators (which at the same time present our control parameters) which enable us to make the success of our strategy measurable.

An essential module of our internal steering and control system are detailed monthly reports. They include the monthly results of our most important activities. Based on these reports, we compare actual values with budget or target values; and in case of deviations, we conduct further analyses and suitable corrective measures.

Our focus is on the sustained increase of our profitability. In this respect, sales and the operating result are the most important target and control parameters.

1.4 Shareholders and group structure

Heinrich Bauer Verlag Beteiligungs GmbH is the parent company with its registered office in Hamburg and has to prepare group financial statements according to Art. 290 Para. 1 HGB (German Commercial Code). Consolidated holdings are presented in the Notes to the group financial statements. The group financial statements include subsidiaries in Germany, Denmark, Finland, France, Great Britain, Norway, Poland, Sweden, Slovakia, Spain, the Czech Republic, as well as the U.S.A., Australia (for the last time in 2020) and New Zealand.

2. Economic report

2.1 Macroeconomic framework conditions

In 2020, the global economy came under severe pressure as a result of the coronavirus pandemic and the more stringent infection prevention and control measures. Following a historic economic slump in spring, the global economy registered a significant recovery during the summer, yet increasingly slackened again towards the end of the year. Especially Europe and North America suffered, during the winter months, under another wave of infections which stopped any economic upswing. All in all, global economic activities dropped by 3.5 percent in the year 2020, following a growth of 3.0 percent in 2019.

In the 2020 fall season, the second wave of infections actually impacted most European countries but with varying degrees of intensity. Following a robust rebound of the economy in the summer, economic activities were declining again in the final quarter. In the eurozone, the real gross domestic product (GDP) was reduced by 6.8 percent after an increase of 1.2 percent in the previous year.

Aside from establishing measures for dealing with the covid-19 pandemic, our 2020 management agenda was strongly affected by global trends which we cannot ignore and which are thus increasingly reflected in our results and planning. The most eminent trend is the progressing digitalization and the concomitant transformation of the (media) industry. For us, this will accordingly offer risks and opportunities at the same time.

Opportunities are provided in the new, rapidly growing and profitable business prospects, such as – in our case – in the areas of digital radio, comparison platforms or marketing and distribution services for small and medium-sized enterprises.

There is a risk in the steadily and increasingly faster transformation of our publishing segment – our traditional field of business activities. Major digital platforms, such as Google and Facebook, continue to profit from huge user growth rates; accordingly, advertising accounts transfer large parts of their budgets to them. This dramatic digital shift also has additional consequences, especially in the dropping print runs of magazines and the resulting deterioration of conventional distribution channels. Digital revenues can mitigate sales declines in the classical magazine business only to a limited extent.

We generally established that the trends observed in the past concerning the use of media and media-related services were considerably accelerated due to the coronavirus crisis.

However, our full attention is required not only with regard to globally social, political and economic change processes but also and especially regarding the growing dynamics of this change. In this climate and environment, we can only continue to be successful if we are able to continuously increase the flexibility and agility of the Bauer Media Group, as well as strengthen existing businesses consistently and in a focused way, adjust to the changing environment, diversify our business and also continue to enter new business areas. On all levels of the enterprise, it is essential that we recruit and retain employees in order to enable us to successfully shape and structure the transition.

The following description is focused on markets and regions which, from the group's viewpoint, not only are adequate in size but strategically important as well.

2.1.1. Development in Germany

Due to the coronavirus pandemic, the German national economy went through a severe recession in the past year, comparable to the 2008 and 2009 financial and economic crisis. In 2020, gross domestic product decreased by 5.0 percent. As a consequence of the partial lockdown in November and its subsequent tightening and further extension, the economic output was stagnant in the final quarter – after a strong recovery of 8.5 percent in the third quarter.

Despite the partial lockdown, the labor market showed a stable development. Gainful employment decreased only slightly in November, and unemployment figures – adjusted for seasonal effects – markedly decreased again in December. However, ads for short-time work indicate an increasing number of people in short-term work.

On the 2020 annual average, consumer prices in Germany increased by 0.5 percent versus 2019 and were thus markedly lower than in the previous year (2019: +1.4 percent). One reason for the low annual rate of price increases was the temporary reduction of value-added tax rates. This measure of the stimulus package by the German federal government was implemented as of July 1, 2020 and, in the second half of the year, had a dampening effect on consumer prices overall and it had a varying effect on the individual groups of products.

2.1.2 Development in Great Britain

According to reports by the national bureau of statistics, the British economy dwindled by 9.9 percent last year. In 2020, the British economy was thus hit significantly harder yet by the coronavirus pandemic than even the eurozone or Germany. The rate of inflation was again significantly reduced with 0.9 percent in 2020 versus the previous year (1.8 percent).

2.1.3 Development in Poland

The well diversified Polish economy is among the ones least affected by the COVID-19 pandemic in Europe. Nonetheless, in 2020, GDP dropped by 2.7 percent – the first production decline for over 20 years.

The COVID crisis, increased uncertainty and the impact of lower consumer confidence dampened private consumption (-3.1 percent). In 2020, inflation was 3.4 percent on the annual mean –

especially due to lower international fuel prices and food prices – and was thus approx. 1.1 percent higher than in 2019.

2.1.4 Development in the U.S.

The U.S. economy could not escape the worldwide negative development due to the coronavirus pandemic and – after more than 2 percent growth in 2019 – recorded a decline by 3.5 percent of its gross domestic product in 2020. At 1.2 percent, the rate of inflation was below that of 1.8 percent for the previous year.

2.1.5 Development in Sweden

The Swedish economy also showed a negative development in 2020; however, compared with other European countries or even the U.S., its decline could be kept comparatively low with a minus of 2.8 percent. The rate of inflation was only at 0.7 percent – after 1.7 percent in the previous year.

2.1.6 Development in the Czech Republic

In 2020, the Czech economy had to accept a decline of its real gross domestic product by 5.6 percent. At the same time, the rate of inflation of 2.6 percent in the previous year further increased perceptibly to 3.3 percent in the current year.

2.1.7 Development in France

Although the decline by 8.1 percent in France's gross domestic product was not quite as significant as in Great Britain, it was still significantly higher than in Germany or in the Eastern European countries. The rate of inflation declined however; it was calculated at 0.5 percent for 2020, after 1.3 percent in the previous year.

2.2 Sector-specific framework conditions and 2020 course of business

The year 2020 was greatly affected by the impacts of the coronavirus pandemic. Especially in the second quarter of the year, our markets were substantially affected not only by government measures taken in many countries, such as curfews and contact bans, but also by the loss of income suffered in parts of the population due to short-time work or job losses, and by the overall decline in economic output and performance, as well as by the high level of uncertainty among advertising companies regarding the future economic development.

Thus, circulation reductions to be observed since the early 2000s in the traditional publishing business accelerated dramatically: When they dropped, for example, by -5 percent annually in Germany from 2012 to 2019, the loss in 2020 was nearly -10 percent versus the previous year. Due to the circulation losses and the considerable uncertainty concerning the future economic development, advertising revenues in the magazine business dropped industry-wide to the historically lowest level, with a decline by -11 percent versus the previous year. It was generally established that the trends observed in the past concerning the use of media and media-related services were considerably accelerated due to the coronavirus crisis.

Changes in consumer habits by the population and the increasing importance of the internet as a medium continue to cause structural upheavals. Advertising as a major source of earnings is

increasingly shifted to the internet. Accordingly, in 2020 as well, magazine markets were characterized by further declining advertising markets. In this respect, both the weakened economic activity in Europe due to the coronavirus pandemic, and the uncertainties resulting from the Brexit process negatively impacted the advertisement demand in the publishing and the audio segments.

In the year 2020, the radio markets had to cope with similar losses as the publishing business. During the crisis, the listeners' use of the services remained stable or even increased; however, in all regions, advertising sales took a sharp downturn in the second quarter. Fortunately, they recovered in parts again in the fourth quarter. In terms of the year as a whole, for 2020, a rate of contraction of approx. -9 percent results for the markets in which we are active.

The OCP business was also marked by the coronavirus crisis. While certain areas, *inter alia* travel insurances and consumer loans, in parts had substantial declines, the business showed growth especially in the area of other insurances (e.g. for cars).

The SME Services area had a predominantly positive development – despite the fact that small and medium-sized enterprises (SMEs) were hard hit by the coronavirus crisis. Various measures on our part and the necessity of many SMEs to strengthen their own online presence brought about that we were able to record a positive development in this area.

2.2.1 Development in Great Britain

According to estimates by the AA WARC market study (Q3/2020), the internet dominates the advertising market in Great Britain with a share of approx. 65 %, while the growth of approx. 11 % essentially resulted due to search and online display advertisements. The advertising market in the magazine area was declining by about 8 %. The companies of Bauer Media Group in Great Britain were also unable to escape this declining market trend. In accordance with the latest expenditure report (Q4/2020), the decline of the advertising market by 7.2 percent in 2020 will be balanced out by an expected increase of about 15 percent in 2021; yet, the report forecasts for the magazine market that the 2020 losses can only be made up again in 2022.

Since Great Britain was hard hit economically by the coronavirus crisis, Bauer Media Group had to accept the sharpest downturns in the publishing area in Great Britain. It was possible to alleviate impacts on results through support measures and adjustments in print runs. Some special interest magazines were sold or discontinued due to their low level of profitability.

2.2.2 Development in Poland

In Poland as well, Bauer Media Group recorded coronavirus-related sales declines in the magazines and portal business which resulted in discontinued titles and personnel reductions.

The same applies to the audio area of Bauer Media Group with a decline of about 7 percent. Greatly affected advertising sales also suffered here from severe slumps in important advertising industries, such as automotive, leisure, consumer electronics and restaurants. Sales from SMS games could not compensate for the drop in advertising sales.

In contrast, the OCP business of Bauer Media Group in Poland was able to hold its ground comparatively well with only slight declines in a comparison with the previous year. Increases with car

insurances, home and life insurances nearly balanced out the decrease in the business with private loans. New bank loan products also mitigated the decline in the loan business.

In 2020, the development of the digital business in Poland – essentially comprising agencies for search engine optimization (SEO)/ search engine marketing (SEM) – was accordingly affected by the sale of Grupa Interia.

2.2.3 Development for the group in other selected countries

In 2020, the magazine market in France was characterized by sharply decreasing advertising sales and a significant decline in the distribution market while the digital market in France showed strong growth. The new TV-magazine TéléCable Sat acquired in 2019 was included in the Group for the first time on a full-year basis (acquisition: July 1, 2019) and exceeded expectations in sales and EBIT.

The OCP business in the Czech Republic held its ground at the previous year's level. Growths in car insurances were able to compensate the decline in travel insurances and in the private loan business.

In Sweden, the OCP business recorded declining sales revenues. Business with private loans weakened significantly. This effect outweighed the growth in the insurance business.

The industry trend on the U.S. market for press distribution and for the advertising market is further declining in 2020 as well. Nonetheless, the magazine business of Bauer Media Group in the U.S. held its ground well – with sales slightly above the previous year's level. The major driver in this respect was the successful special interest segment in 2020.

In Australia as well, a general downward trend in the area of press distribution and advertising market is to be registered which Bauer Media Group could not escape. In June 2020, this consolidation resulted in the decision to sell the business in Australia.

In 2020, Bauer Media Group in New Zealand also experienced the downward trend in the publishing market which was reflected by a low double-digit percentage range in the sales decline. This and the continuing sales and earnings slump resulting from the corona pandemic outbreak since the beginning of the year 2020 then lead to the decision – early in the second quarter of 2020 – to close the operative business establishment in New Zealand.

2.3 Earnings situation

The earnings situation of the group financial statements is to be taken from the following economic performance summary:

<i>Amounts shown in kEUR</i>	2020	2019	in kEUR	in %
Sales revenues	1,295,739	1,518,392	-222,653	-14.7%
Inventory changes and other operating income	20,255	13,748	6,508	47.3%
Material expenditures	-547,557	-626,568	79,011	-12.6%
Personnel expenses	-298,328	-326,118	27,790	-8.5%
Depreciations	-131,026	-156,046	25,020	-16.0%
Other operating expenses	-270,835	-299,259	28,425	-9.5%
Operating result	68,249	124,149	-55,899	-45.0%
Financial result (Interest and investment result)	5,787	-11,682	17,469	n/a
Special factors	-22,779	-14,638	-8,141	55.6%
Taxes on earnings	-30,882	-35,610	4,728	-13.3%
Group result before third-party interest and profit and loss transfer	20,375	62,219	-41,844	-67.3%

Comparisons with the previous year are particularly characterized by the effects of the 2020 disinvestments of the publishing business performed in Australia (sale in July 2020) as well as in New Zealand (discontinuance of the business operation: April 2, 2020). These effects could only partly be compensated by the initial consolidations from the audio area.

The decline in sales revenues by 14.7 % is due, in particular, to the lack of sales revenues from the business operations sold or discontinued in 2020 as well as due to the COVID 19-related decline in advertising sales. It was possible to realize sales increases in the lower double-digit millions not only in the audio area due to the takeover of local wireless broadcasting stations, Celador Radio, the Lincs FM Group and the UKRD Group in Great Britain as of May 2020, as well as price increases in the publishing business.

The decline in the area of materials expenditures is due, on one hand, to the sales decline; furthermore, there were cost savings in the audio and publishing market in individual countries, such as due to the reduction of production costs for example, as well as due to savings in broadcasting and transmission costs. The disproportionate decrease for costs of logistics had an opposite effect, as well as the increase in expenditures for services compared to the previous year so that the materials expenditure in total was reduced by 12.6 % - disproportionately with regard to sales revenues.

Depreciations essentially comprised depreciations of capitalized goodwill (EUR 74 million; previous year: EUR 94 million) as well as disclosed hidden reserves in case of broadcasting, trademark and title rights (EUR 29 million; previous year: EUR 31 million). The reduction of depreciations essentially results from the lower scheduled depreciations of intangible assets.

Other operating expenses decreased disproportionately despite savings and disinvestments, especially due to higher value adjustments on current assets as well as increased expenditures for the shareholder's group charges.

The reduction in sales revenues with a disproportionately low decrease in operational expenditures brought about an operating result lower by EUR 55.9 million versus the previous year.

The better financial result is essentially due to depreciations lower by EUR 16.2 million on financial assets.

Special factors essentially comprise balanced foreign currency losses in the net amount of EUR 22.2 million. The sale of the Australian and Russian publishing business negatively affected the group result with EUR 46.1 million while the sales of the Czech ProfiSMS group as well as of the Polish Interia group increased the group result by EUR 36.0 million (after taxes).

The current development of sales revenues and the operating result corresponds with the forecast from the previous year.

2.4 Assets and financial situation

2.4.1 Assets situation

<i>Amounts shown in kEUR</i>	2020	2019	Change	
			in kEUR	in %
Medium- and long-term tied up assets (fixed assets)	458,007	443,320	14,687	3.3%
Short-term tied up assets (Current assets including prepaid expenses)	837,837	837,301	536	0.1%
Total assets	1,295,844	1,280,621	15,223	1.2%
Equity capital	905,587	839,302	66,285	7.9%
Medium- and long-term debt capital (Pension provisions and medium-term liabilities)	14,705	36,771	-22,065	-60.0%
Short-term debt capital (Provisions and liabilities including deferred income)	375,552	404,548	-28,997	-7.2%
Total liabilities	1,295,844	1,280,621	15,223	1.2%

Total assets increased by 1.2 % compared with the previous year.

The increase in medium- and long-term tied up assets essentially results from the increase in intangible assets capitalized within the scope of initial consolidation (as of May 1, 2020) of the local radio stations acquired in Great Britain in 2019, as well as from the increase in shares in affiliated companies in financial assets which are not fully consolidated on the ground of immateriality in the 2020 group financial statements.

The increase in equity capital is to be essentially attributable to the change in equity capital difference from currency translation as well as to a capital increase by the parent company in the amount of EUR 66 million; the consolidated net loss had the opposite effect.

The decrease in medium- and long-term debt relates to a bank loan in Scandinavia that expires at the end of 2021.

The decrease in short-term outside capital is particularly due to the deconsolidations of the Australian companies.

2.4.2 Financial situation

The development of the financial situation is to be taken from the cash flow statement in a summary presentation:

<i>Amounts shown in kEUR</i>	2020	2019	Change in kEUR
Financial resources at the beginning of the year	505,772	894,912	-389,140
Inflow (+) / outflow (-) of funds from			
current business activities	200,962	184,568	16,394
investment activities	-41,512	-145,786	-269,335
financing activities	-56,778	-432,511	375,733
Addition arising from changes in the group of consolidated companies	1,008	4,589	-3,581
Financial resources at the end of the year	609,451	505,772	103,679

Investment activity in intangible assets decreased by approximately EUR 16 million while investments in financial assets increased by approximately EUR 14 million. Changes in the scope of consolidation had an impact of EUR 50 million on the investment area. This is to ensure that the group companies have adequate liquidity at their disposal for investments. With regard to the financing activity, the addition of equity capital by the parent company in the amount of EUR 66 million had its effects (previous year: repatriation of equity capital in the amount of EUR 189 million), and an opposite effect had the balancing of the profit and loss transfers from the previous year.

2.5 Development of the number of employees

The number of employees of the companies included in the group financial statements amounted to 6,564 employees on the annual average (previous year: 7,115 employees). The decrease essentially results from the sale of the Australian business and the discontinuation of the business operation in New Zealand.

2.6. Overall statement

Sales of Bauer Media Group did, in fact, fall significantly behind the previous year's figures; however, to a lesser extent than expected at the beginning of the covid-19 crisis. Particularly the publishing business area lost versus the previous year due to the business sold or, respectively, discontinued in Australia and New Zealand in the middle of the financial year.

3. Outlook report, opportunities and risks report

3.1 Outlook report

The International Monetary Fund (IMF) expects that the global economy will grow by 6.0 percent in the current year; then, in 2022, still by 4.4 percent. Thus, the global economy would recover more dynamically than anticipated. Driving forces, in this respect, will be the U.S. and China. For instance, the American economy is to grow by 6.4 percent or, respectively, 3.5 percent in 2021 and 2022. The sluggish rate of vaccination in Europe hampers the growth of the local economy. According to the IWF, the economic performance in the eurozone is to increase by 4.4 percent in 2021 and by 3.8 percent in 2022.

The recovery of trade and commerce in the euro area – in combination with improved confidence and an upswing in private consumption and investments – is expected to support a moderate recovery of about 3.3 percent in 2021. The outlook takes into account the vagaries and uncertainties resulting from the covid-19 mutations and the current rate of vaccination campaigns throughout Europe. It is expected that the extraordinary political support measures in the EU and even worldwide will be continued by extension until 2021, including the key interest rates close to zero.

Overall, and taking into account the realized and intended investments, the subgroup Heinrich Bauer Verlag Beteiligungs GmbH plans worldwide sales revenues in 2021 slightly above the previous year's level as well as a slightly disproportionately increasing operating result.

The management agenda for 2021 provides for the following focal points:

- In publishing, we will further strengthen our market positions by way of an active portfolio management. In order to keep the business profitable for as long as possible, we are investing, on the sales side, in quality improvements of our products and new marketing approaches (not only to maintain our market shares but also gain additional market shares); and, on the cost side, we are investing in continuous improvements of our processes and systems.
- The focus in the audio business area is based on the integration of newly acquired radio stations in Ireland as well as on further digitization.
- The OCP business area is to make additional investments in the areas of employees, technology and marketing which had been done only very cautiously in prior years; it will also be concerned with the integration of the newly acquired subsidiary Acierto in Spain.
- The SME business area will continue to establish the direct business with small and medium-sized enterprises.
- We will strive to further improve our work in assessing and managing the increasing market and business risks as well as in professionalizing our processes and systems.

Finally, we would like to point out that in case of future-oriented statements, any actual results might significantly deviate from our expectations regarding the anticipated development.

3.2 Opportunities and risks report

3.2.1 Opportunities

Below, the greatest opportunities for the 2021 financial year are listed in the order of their significance:

- Growth opportunities due to the continuous development and introduction of new digital products and services for our customers
- With the upswing of markets after the covid lockdowns, a swifter than expected recovery of the advertising markets, and in the OCP business, higher demand for travel insurances and consumer loans
- Use of synergies and efficiency gains through acquisitions
- Decline in cost of production, especially paper and energy prices
- Productivity improvements / automation of processes and procedural flows as a consequence of the coronavirus pandemic
- Innovative capabilities of our Group.

3.2.2 Risks

Below, the greatest risks for the 2021 financial year are listed in the order of their significance:

- Weak or no recovery of the global economy, affecting all of the Group's business areas and resulting in lower sales and subsequent risks, such as loss of receivables due to insolvencies
- Risks disrupting operative business processes, such as cyber attacks, technology failures and natural disasters
- Increasing competition for spending on advertising by very large digital platforms whose growth accelerated due to covid-19
- The advertising market's dependence on the economy, and the possible loss of key customers in the advertising sector who will change to other, especially digital media
- Changes in legal, fiscal and regulatory framework conditions
- Transaction risks regarding the selection of investment objects and the allocation of investment funds, as well as lower synergies from acquisitions than expected
- Increasing manufacturing and logistics costs in printing, as well as dependence on individual suppliers
- Losses or problems regarding the extension of licenses or obtaining new licenses in the audio area.

There are currently no indications of further special risks which might negatively influence the development of the company, its subsidiaries and holdings. Also, there are no developments threatening the continued existence of the company or other risks particularly affecting the assets, finances and earnings situation. In the future as well, the companies will be able to meet their payment obligations on time.

Independent Auditor's Report

To the Heinrich Bauer Verlag Beteiligungs GmbH, Hamburg

Opinions

We have audited the consolidated financial statements of Heinrich Bauer Verlag Beteiligungs GmbH, Hamburg, and its subsidiaries (the Group), which comprise the consolidated statement of financial position as at 31 December 2020, the consolidated statement of profit and loss, consolidated statement of changes in equity and consolidated statement of cash flows for the financial year from 1 January 2020 to 31 December 2020, and notes to the consolidated financial statements, including the recognition and measurement policies presented therein. In addition, we have audited the group management report of Heinrich Bauer Verlag Beteiligungs GmbH for the financial year from 1 January 2020 to 31 December 2020.

In our opinion, on the basis of the knowledge obtained in the audit,

- the accompanying consolidated financial statements comply, in all material respects, with the requirements of German commercial law and give a true and fair view of the assets, liabilities, and financial position of the Group as at 31 December 2020, and of its financial performance for the financial year from 1 January 2020 to 31 December 2020 in compliance with German Legally Required Accounting Principles, and
- the accompanying group management report as a whole provides an appropriate view of the Group's position. In all material respects, this group management report is consistent with the consolidated financial statements, complies with German legal requirements and appropriately presents the opportunities and risks of future development.

Pursuant to Section 322 (3) sentence 1 HGB [Handelsgesetzbuch: German Commercial Code], we declare that our audit has not led to any reservations relating to the legal compliance of the consolidated financial statements and of the group management report.

Basis for the Opinions

We conducted our audit of the consolidated financial statements and of the group management report in accordance with Section 317 HGB and in compliance with German Generally Accepted Standards for Financial Statement Audits promulgated by the Institut der Wirtschaftsprüfer [Institute of Public Auditors in Germany] (IDW). Our responsibilities under those requirements and principles are further described in the "Auditor's Responsibilities for the Audit of the Consolidated Financial Statements and of

the Group Management Report” section of our auditor’s report. We are independent of the group entities in accordance with the requirements of German commercial and professional law, and we have fulfilled our other German professional responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinions on the consolidated financial statements and on the group management report.

Responsibilities of Management for the Consolidated Financial Statements and the Group Management Report

Management is responsible for the preparation of the consolidated financial statements that comply, in all material respects, with the requirements of German commercial law and that the consolidated financial statements, in compliance with German Legally Required Accounting Principles, give a true and fair view of the assets, liabilities, financial position, and financial performance of the Group. In addition, management is responsible for such internal control as they, in accordance with German Legally Required Accounting Principles, have determined necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group’s ability to continue as a going concern. They also have the responsibility for disclosing, as applicable, matters related to going concern. In addition, they are responsible for financial reporting based on the going concern basis of accounting provided no actual or legal circumstances conflict therewith.

Furthermore, management is responsible for the preparation of the group management report that, as a whole, provides an appropriate view of the Group’s position and is, in all material respects, consistent with the consolidated financial statements, complies with German legal requirements, and appropriately presents the opportunities and risks of future development. In addition, management is responsible for such arrangements and measures (systems) as they have considered necessary to enable the preparation of a group management report that is in accordance with the applicable German legal requirements, and to be able to provide sufficient appropriate evidence for the assertions in the group management report.

Auditor’s Responsibilities for the Audit of the Consolidated Financial Statements and of the Group Management Report

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and whether the group management report as a whole provides an appropriate view of the Group’s position and, in all material respects, is consistent with the consolidated financial statements and the knowledge obtained in the audit, complies with the German legal requirements and appropriately presents the opportunities and risks of future development, as well as to issue an auditor’s report that includes our opinions on the consolidated financial statements and on the group management report.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Section 317 HGB and in compliance with German Generally Accepted Standards for Financial Statement Audits promulgated by the Institut der Wirtschaftsprüfer (IDW) will always detect

a material misstatement. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements and this group management report.

We exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements and of the group management report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinions. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls.
- Obtain an understanding of internal control relevant to the audit of the consolidated financial statements and of arrangements and measures (systems) relevant to the audit of the group management report in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of these systems.
- Evaluate the appropriateness of accounting policies used by management and the reasonableness of estimates made by management and related disclosures.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in the auditor's report to the related disclosures in the consolidated financial statements and in the group management report or, if such disclosures are inadequate, to modify our respective opinions. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to be able to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements present the underlying transactions and events in a manner that the consolidated financial statements give a true and fair view of the assets, liabilities, financial position and financial performance of the Group in compliance with German Legally Required Accounting Principles.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express [audit] opinions on the consolidated financial statements and on the group management report. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our [audit] opinions.
- Evaluate the consistency of the group management report with the consolidated financial statements, its conformity with [German] law, and the view of the Group's position it provides.
- Perform audit procedures on the prospective information presented by management in the group management report. On the basis of sufficient appropriate audit evidence we evaluate, in particular, the significant assumptions used by management as a basis for the prospective information, and evaluate the proper derivation of the prospective information from these assumptions. We do

not express a separate opinion on the prospective information and on the assumptions used as a basis. There is a substantial unavoidable risk that future events will differ materially from the prospective information.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
