NOTES TO THE FINANCIAL STATEMENTS **Year ended 31 December 2015**

1. ACCOUNTING POLICIES

The principal accounting policies are summarised below.

Basis of Accounting

The financial statements have been prepared under the historical cost convention in accordance with Financial Reporting Standard 102 (FRS 102) issued by the Financial Reporting Council.

FRS 102 is mandatory for accounting periods beginning on or after 1 January 2015. The company is applying the exemption under FRS102 section 35.10 (m) relating to dormant companies, and has elected to retain its accounting policies for reported assets, liabilities and equity at the date of transition to FRS102 until there is any change to those balances or the company undertakes any new transactions

The directors are of the opinion that the Company has adequate resources to continue in operational existence for the foreseeable future. Accordingly they continue to adopt the going concern basis in the financial statements,

Taxation

Current tax is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date. Timing differences are differences between the Company's taxable profits and its results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in periods different from those in which they are recognised in the financial statements.

A net deferred tax asset is regarded as recoverable and therefore recognised only when, on the basis of all available evidence, it can be regarded as more likely than not there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax is measured at the average tax rates that are expected to apply in the periods in which timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantively enacted by the balance sheet date. Deferred tax is measured on a non-discounted basis.

Revenue recognition and segmental information

Interest income and interest expense is recognised on an accruals basis in the profit and loss account.
