These financial statements were prepared in accordance with Financial Reporting Standard 102 *The Financial Reporting Standard* applicable in the UK and Republic of Ireland ("*FRS 102*") as issued in August 2014. The presentation currency of these financial statements is sterling.

In the transition to FRS 102 from old UK GAAP, the company has made measurement and recognition adjustments. An explanation of how the transition to FRS102 has affected financial position & financial performance of the company is provided in note 14.

In these financial statements, the company is considered to be a qualifying entity (for the purposes of this FRS) and has applied the exemptions available under FRS 102 in respect of the following disclosures:

- Reconciliation of the number of shares outstanding from the beginning to end of the period;
- Cash Flow Statement and related notes; and
- Key Management Personnel compensation.

The accounting policies set out below have, unless otherwise stated, been applied consistently to all periods presented in these financial statements.

Judgements made by the directors, in the application of these accounting policies that have significant effect on the financial statements and estimates with a significant risk of material adjustment in the next year are discussed in note 13.

1.1 Measurement convention

The financial statements are prepared on the historical cost basis.

1.2 Going concern

The financial statements have been prepared on the going concern basis which the directors believe to be appropriate.

In relation to the Company's short term working capital requirements, the directors have prepared cash flow forecasts which indicate that the Company should continue to have sufficient resources available to it to enable it to continue in operational existence by meeting its day to day liabilities as they fall due for payment for a period of at least twelve months from the date of approval of these financial statements.

In light of the foregoing, the directors continue to believe that it remains appropriate to prepare the financial statements on a going concern basis.

1.3 Basic financial instruments

Trade and other debtors / creditors

Trade and other debtors are recognised initially at transaction price less attributable transaction costs. Trade and other creditors are recognised initially at transaction price plus attributable transaction costs. Subsequent to initial recognition they are measured at amortised cost using the effective interest method, less any impairment losses in the case of trade debtors.

Investments in Jointly controlled entities

Investments in jointly controlled entities are carried at cost less impairment in accordance with FRS 102.17.15 E-F.

Notes (continued)

1.4 Taxation

Tax on the profit or loss for the year comprises current and deferred tax. Tax is recognised in the profit and loss account except to the extent that it relates to items recognised directly in equity or other comprehensive income, in which case it is recognised directly in equity or other comprehensive income.

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the balance sheet date, and any adjustment to tax payable in respect of previous years.

Deferred tax is provided on timing differences which arise from the inclusion of income and expenses in tax assessments in periods different from those in which they are recognised in the financial statements. The following timing differences are not provided for: differences between accumulated depreciation and tax allowances for the cost of a fixed asset if and when all conditions for retaining the tax allowances have been met. Deferred tax is not recognised on permanent differences arising because certain types of income or expense are non-taxable or are disallowable for tax or because certain tax charges or allowances are greater or smaller than the corresponding income or expense.

Deferred tax is measured at the tax rate that is expected to apply to the reversal of the related difference, using tax rates enacted or substantively enacted at the balance sheet date.

Unrelieved tax losses and other deferred tax assets are recognised only to the extent that it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits.

Auditors' remuneration is paid by a fellow subsidiary company, Miller Developments Limited.

3 Staff numbers and costs

There were no employee costs during the year (2014: nil)

Critical accounting judgements in applying the Company's accounting policies

The Company believes that the major judgement applied is the use of the going concern principle which supports the valuation of investments included in the Balance Sheet.

Investments in property related joint venture undertakings are stated at cost less any impairment adjustment for permanent diminution in value.

The Company reviews the carrying value of its investments on a continuing basis taking into consideration development progress and future anticipated market conditions to assess net realisable value. There is a degree of uncertainty in making such assessments.

14 Explanation of transition to FRS 102 from old UK GAAP

As stated in note 1, these are the Company's first financial statements prepared in accordance with FRS 102.

The accounting policies set out in note 1 have been applied in preparing the financial statements for the year ended 31 December 2015 and the comparative information presented in these financial statements for the year ended 31 December 2014.

In preparing its FRS 102 balance sheet, the Company has made one transitional adjustment. The impact has been to reallocate amounts due to the parent company from creditors in more than one year to creditors due in less than one year. The impact on 31 December 2014 is £211,671 and 1 January 2014 is £131,671. This adjustment has no impact on profit or net assets and is due to the classification of basic financial instruments under FRS102.
