2. Significant accounting policies (continued)

2.2 Functional and presentational currency

The company's functional and presentational currency is pound sterling.

2.3 Non-derivative financial instruments

Debtors

Debtors are recognised initially at fair value. Subsequent to initial recognition they are measured at amortised cost using the effective interest method, less any impairment losses.

2.4 Impairment of financial assets

A financial asset not carried at fair value through the profit and loss account is assessed at each reporting date to determine whether there is objective evidence that it is impaired. A financial asset is impaired if objective evidence indicates that a loss event has occurred after the initial recognition of the asset, and that the loss event had a negative effect on the estimated future cash flows of that asset that can be estimated reliably.

An impairment loss in respect of a financial asset measured at amortised cost is calculated as the difference between its carrying amount and the present value of the estimated future cash flows discounted at the asset's original effective interest rate. For financial instruments measured at cost less impairment an impairment is calculated as the difference between its carrying amount and the best estimate of the amount that the company would receive for the asset if it were to be sold at the reporting date. Interest on the impaired asset continues to be recognised through the unwinding of the discount. When a subsequent event causes the amount of impairment loss to decrease, the decrease in impairment loss is reversed through the profit and loss account.

2.5 Called up share capital

Ordinary shares are classified as equity.

3. Profit and loss account

The company has not presented a profit and loss account as there was no revenue or expenditure during the current or previous financial year.
