### **Notes to the abbreviated financial statements for the year ended 31 August 2012**

#### **1. Accounting policies**

##### **1.1. Accounting convention**

The accounts are prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008)

##### **1.2. Turnover**

Turnover represents sales at invoice value less trade discounts allowed and excluding value added tax

##### **1.3. Tangible fixed assets and depreciation**

Tangible fixed assets are stated at cost less depreciation. Depreciation is provided at rates calculated to write off the cost less residual value of each asset over its expected useful life, as follows

Fixtures and equipment	-	15% reducing balance
Computer equipment	-	33 33% reducing balance

##### **1.4. Stock**

Stock is valued at the lower of cost and net realisable value, after making due allowance for obsolete and slow moving items

##### **1.5. Deferred taxation**

The charge for deferred taxation takes into account taxation deferred as a result of timing differences between the treatment of certain items for taxation and accounting purposes. In general, deferred taxation is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date. However, deferred tax assets are recognised only to the extent that the directors consider that it is more likely than not that there will be suitable taxable profits from which the reversal of the underlying timing differences can be deducted. Deferred taxation is measured on a non-discounted basis at the tax rates that are expected to apply in the periods in which the timing differences reverse, based on tax rates and laws enacted or substantively enacted at the balance sheet date.

##### **1.6. Going concern**

The company ceased trading on 30 April 2012. It is the directors' intention that the company pays its remaining creditors, collects its debts and is then wound up.
