Strategic report for the year ended 31 December 2019

The Director presents his Strategic report for the year ended 31 December 2019.

Principal activities

The principal activity of the company is the development of biopharmaceutical products.

Review of business

The company is a wholly owned subsidiary of Allergan PLC. The company has continued to engage in research and development to develop biopharmaceutical products in accordance with Allergan's biologics strategy to strengthen the Group's biological product pipeline. During 2019, the company focused on the development of multiple early stage projects, alongside involvement with later stage biologics projects developed collaboratively with other Group sites.

Throughout 2019 the business continued to concentrate resources on progressing key Group projects including the high priority Abicipar project, using DARPin technology, preparing for and submitting the BLA leading to handoff of the product to the commercial organisation and nearing approval and release of the project. Alongside this the site continued to work on a purer of Abicipar under project name ABI012. The material created is being used in clinical trials the results of which show the purer form of the material reduces the incidence of ocular inflammation by a statistically significant amount, The method validation for the purer material from an analytical standpoint was also completed. Brazikumab was progressed via supervision of production batches at outsource partner Fujifilm and several batches were completed to demonstrate repeatability and reproducibility and to provide material for the ongoing clinical trials.

The progress of the Retrosense project required planning for site modifications and equipment purchases. The development difficulties of this complex project took the team in a new direction which was continued to be refined during the year,

Editas and Tropelatsin projects which were brought to site requiring additional resource, continued to be developed in 2019 in close collaboration with our wider corporate team. They were bolstered by the internal development of our internal platform and increased the know how in relation to advanced therapeutic areas.

The company continued to invest in capital assets during 2019 with £7.68m invested in equipment to increase the automation of laboratory activity and to ensure that latest technologies are being utilised.

The company's profit for the Financial Year is £3,681,000 (2018: £822,000). In January 2016 R&D agreements were established with other Group entities, facilitating the recharge of project related expenditure plus R&D uplift to the appropriate R&D project intellectual property holders within the Group. This is shown as turnover of £40,650,000 (2018: £28,545,000).

Net assets at 31 December 2019 totalled £34,195,000 (2018: net assets £29,856,000).

Future developments

Gene therapy/viral biological product market continues to be a particular area of focus in the wider life sciences environment and the company has continued to adapt the facility in 2019 to enhance the capability for developing multiple viral products. The Group has shown its continued commitment to the company by locating high priority projects and key project management roles at Allergan Biologics Limited and supporting further significant capital investment during 2019 and into 2020. Further the company has approved the potential site expansion programme due to take place over the next 4 years with an approximate cost of \$50m of which \$5.9m was approved in January 2019. During the year the design and development plans covered by the \$5.9m approved capex were developed for the site expansion and the site required additional resource to deliver this element of the programme. The end of the year approached finalisation of the design and development work and lead us into the next phase of the project, which would commence in 2020.

In 2020 the final costs for project management and the costs in relation to the construction company were negotiated. Ground was broken on the enabling works in April 2020 prior to the project being out on hold due the announcement of the divestment of the company made in May 2020. The overall capital plan for Liverpool was reduced to reflect that we are an asset held for sale. But the overall budget for the West Wing project was

Future developments (continued)

still approximately \$50m. Total West Wing spend in 2020 was \$1.6m. Funding will be provided for the development via the parent company.

Covid-19 has had a minimal impact on the business as we have continued to carry out research and development and progress with projects uninterrupted. The working pattern has led to more employees working at home, where they have been able too. The principle challenge had been securing an appropriate level of PPE which we have successfully navigated.

As of the 8th May 2020 Abbvie as the ultimate parent company made arrangements to divest the business and Allergan Biologics Limited was held as an asset for sale. The parent company is in exclusive negotiations with an interested buyer in respect of the purchase of the company.

Principal and Financial Risks and Uncertainties

The company's operations expose it to a variety of financial risks that include foreign exchange risk and interest rate risk.

Foreign Exchange Risk

Foreign exchange risk arises from transactions when goods and services are bought or sold in currencies other than Sterling. Exchange rate risk is minimised by routing significant foreign currency transactions through Group Treasury arrangements.

Interest Rate Risk

All of the company's funding has been provided via intergroup loans. These loans attract a fixed rate of interest, resulting in minimal interest rate cash flow risk.

As a subsidiary of Allergan PLC, further details of Group policies in relation to external financial risks can be found by reviewing financial information on the Allergan website.

Non-financial risks

The majority of R&D activity relates to early stage process development, carrying significant risk of failure due to the inability to develop an efficacious and commercially viable product. This risk is mitigated by recruiting highly skilled staff and investing in training and development as well as automating processes as much as possible. There is an inherent risk that products developed will not gain regulatory approval to enable them to progress to market. This risk is mitigated by undertaking significant levels of validation activity and engaging with regulatory bodies at an early stage.

Brexit

It is difficult to plan for Brexit without first understanding what it looks like. That said the company has identified principal risks and worked to mitigate them. The main risk relates to supply chain in this instance the procurement, development and analytical teams have worked to identify and minimise the potential risks involved. New trade rules will have to be adapted to where necessary but based on current position there will be minimal impact.

Key Performance Indicators ("KPIs")

The Director believes that analysis using key performance indicators is not necessary or appropriate for an understanding of the development, performance or position of the business of Allergan Biologics Limited.

Post balance sheet events

From the date of preparation to signing the directors are unaware of any impacts that would constitute an adjusting post balance sheet event. The Covid-19 pandemic has severely impacted many local economies around the globe. The company has determined that this event is a non-adjusting post balance sheet event. Accordingly, the financial position and results of operations as of and for the year ended 31 December 2019 have not been adjusted to reflect the impact. The company is unable to make a reasonable estimate of the financial impact of the non-adjusting event.

On 18 June 2020 the company entered into a Deed of Assignment whereby certain assets of Northwood Medical Innovation Limited, which is in the process of a voluntary liquidation, were transferred to the company. On 30 October 2020 the company sold all of its rights to these assets to Allergan Limited.

On 25 January 2021 the share capital of the company was reduced by £106,891,104 by cancelling and extinguishing 4 ordinary shares of £1 each and 100 A Ordinary shares of £1 each and cancelling the share premium account of the company.

Section 172 statement - Directors duties

The Director of the Company must act in accordance with a set of general duties. These duties are detailed in section 172 of the UK Companies Act 2006. As part of his on-going duties, the director is aware of his duties and can access professional advice on these either from the Company Secretary or, if he judges it necessary, from an independent adviser.

It is important to recognise that in a large organisation such as ours, the Director fulfils his duties partly through a framework that delegates day-to-day decision-making to employees of the Company who are best placed to take such decisions. The Director receives regular updates from all key business areas at regular briefings.

The following paragraphs summarise how the Director has fulfilled his required duties:

Decision-making and risk management

Our purpose is to research and develop innovation advanced therapeutic products on behalf of our assigned parent. The majority of R&D activity relates to early stage process development, carrying significant risk of failure due to the inability to develop an efficacious and commercially viable product. The director exercises significant skills and knowledge to ensure that this risk is mitigated by recruiting highly skilled staff and investing in training and development as well as automating processes as much as possible. There is an inherent risk that products developed will not gain regulatory approval to enable them to progress to market. This risk is mitigated by undertaking significant levels of validation activity and engaging with regulatory bodies at an early stage. The director receives regular updates on risks from the development teams and assesses and decides on action based on those updates.

Employees

Our employees are fundamental to the delivery of our plan. We aim to be a responsible employer in our approach to the pay and benefits our employees receive. We communicate regularly with our employees as explained further in the Director's Report on page 8.

Section 172 statement - Directors duties (continued)

Other stakeholders

Our other key stakeholders are critical to the success of our business.

Our suppliers, outsourced services and employment agencies are also critical to the success of our business, and we value our relationships with all of them, having multi-year agreements in place with all of our key providers, maintaining regular communication and reporting with them.

Finally, our membership of Bio Industry Association allows us to have a voice amongst our industry peers and enable key communication with relevant government bodies.

Community and environment

The Company's approach is to use our position to change people's lives within the communities that we interact with. We achieve this through the designation of a charity day for every employee to assist and support a charity or project of their choosing, as well as supporting local charity events near our Liverpool base.

Our impact on the environment is also an area that we consider as part of our responsibilities, for major capex projects an environmental assessment is done to consider the sustainability of the new equipment and its environmental impact. We always seek to reduce our carbon footprint where ever possible.

Business conduct

As Director, it is my responsibility to ensure that the Company is operating within the high standards of business conduct expected of a business of our size. To enable this, all employees are issued with the Code of Conduct outlining our expectations of them, as well as highlighting whistle-blowing pathways should they be required. Regular online training keeps employees informed of our various regulatory requirements. The company also operates training and compliance to cover wider areas of health and safety and ensure compliance with MHRA regulations.

Shareholders

As senior vice president of Biologics and small molecule API the director is an integral part of the decisions making process of the ultimate parent and Group in relation to all projects that fall within Liverpool's remit. The director ensures that there are regular updates with the group and the ultimate parent of all activities that are undertaken.

Member of the company

As Director, it is my intention to behave responsibly towards our members and treat them fairly and equally so that they too may benefit from the success of the business.

This report was approved by the board and signed on its behalf.

Crawford Brown

Dr Crawford Brown

Director 24/2/2021 Date

Director's report for the year ended 31 December 2019

The Director presents the Director's report and the audited financial statements of the company for the year ended 31 December 2019.

Business review and future developments

Please refer to the Strategic report on page 3.

Political contributions

No political contributions were paid (2018: £Nil).

Dividends

The Director does not propose payment of a dividend for the year (2018: £Nil).

Director

The Director of the company who was in office during the year and up to the date of signing the financial statements was:

Dr Crawford Brown

Director's indemnities

The company maintained through the year, and at the date of approval of the financial statements, liability insurance for its Director and Officer. This is a qualifying third party indemnity provision for the purposes of the Companies Act 2006.

Research and development

The company undertook significant levels of research and development activity during the year, working to develop biological products in accordance with Allergan's biologics strategy. These costs are charged back with margin to the appropriate IP holder.

Principal and Financial Risks and Uncertainties

Please refer to the strategic report on page 3-7.

Employee statement

During the year employees have been systematically provided with information on matters which concern them through regular local and global 'Town Hall' meetings, as well as a annual conference for all employees. The company also provides an opportunity for employees to communicate directly with members of the site leadership team through the use of "Brunch sessions" where any matter can be discussed in on open and honest forum that also provides confidentiality for everyone attending. Communications are also provided more regularly through online platforms.

There are also regular benefits reviews and key employees are incentivised to participate in the success of the business through the company's employee share schemes.

Director's report for the year ended 31 December 2019 (continued)

Employee statement (continued)

The company has a strong Culture of inclusiveness and insists on appropriate behaviour of all employees. In addition, when a new employee joins the company they are required to attend a diversity and dignity at work seminar as part of their induction, which promotes inclusion and treating everyone with dignity and respect at work. This training is part of the overall company approach to ensure equal opportunities for all which also includes policies with respect to non-discrimination. In instances of disability the company takes all reasonable steps to ensure that there in continued employment and support for any affected individual.

Statement on engagement with suppliers, customers and others in a business relationship with the company

The relationship with and the engagement with these stakeholders are managed by employees who hold regular meetings and dialogue with our suppliers and out sourced service suppliers. Part of this conversation is to understand their needs and concerns in doing business with Allergan.

Future Developments

On 8 May 2020, Abbvie Inc announced that it had completed its acquisition of Allergan plc. Allergan shareholders received 0.8660 Abbvie shares and \$120.3 in cash for each Allergan share for a total consideration of \$193.23 per Allergan share (based on the closing price of Abbvie common stock of \$84.22 on 7 May 2020). Allergan common stock ceased trading on the New York Stock Exchange as of close of trading on the 8 May 2020. There is no impact on the overall parent of the company.

As of the 8th May 2020 Abbvie as the ultimate parent company made arrangements to divest the business and Allergan Biologics Limited was held as an asset for sale. The parent company is in exclusive negotiations with an interested buyer in respect of the purchase of the company.

Going concern

The Director believes that preparing the financial statements on the going concern basis is appropriate. The Director has considered current trading and the budgets and forecasts for a period of more than one year following the approval of these financial statements. The director has assessed the status of the ongoing discussions in respect of the sale of the company and received confirmation that interested parties have sufficient resources to continue to support the company if the sale proceeds. The director has also received a letter of support from AGN Sundry LLC, the parent company for a period of 12 months from the date of approval of these financial statements should a sale not complete.

Director's report for the year ended 31 December 2019 (continued)

Statement of director's responsibilities in respect of the financial statements

The director is responsible for preparing the Annual Report and the financial statements in accordance with applicable law and regulation.

Company law requires the director to prepare financial statements for each financial year. Under that law the director has prepared the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards, comprising FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland", and applicable law). Under company law the director must not approve the financial statements unless he is satisfied that they give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period. In preparing the financial statements, the director is required to:

- select suitable accounting policies and then apply them consistently;
- state whether applicable United Kingdom Accounting Standards, comprising FRS 102, have been followed, subject to any material departures disclosed and explained in the financial statements;
- make judgements and accounting estimates that are reasonable and prudent; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The director is also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The director is responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006.

Director's confirmations

In the case of each director in office at the date the Director's report is approved:

- so far as the director is aware, there is no relevant audit information of which the company's auditors
 are unaware; and
- he has taken all the steps that he ought to have taken as a director in order to make himself aware of any relevant audit information and to establish that the company's auditors are aware of that information

Independent auditors

Pursuant to Section 485 of the Companies Act 2006, Grant Thornton UK LLP have been appointed as auditors after the year end and are deemed to be reappointed under section 487(2) of the Companies Act 2006.

On behalf of the Board

Crawford Brown

24/2/2021

Dr Crawford Brown Director

Registered number: 04543737

Independent auditors' report to the members of Allergan Biologics Limited

Opinion

We have audited the financial statements of Allergan Biologics Limited (the 'company') for the year ended 31 December 2019, which comprise the Statement of comprehensive income, the Balance sheet, the Statement of changes in equity and notes to the financial statements, including a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards, including Financial Reporting Standard 102 'The Financial Reporting Standard applicable in the UK and Republic of Ireland' (United Kingdom Generally Accepted Accounting Practice).

In our opinion, the financial statements:

- give a true and fair view of the state of the company's affairs as at 31 December 2019 and of its profit for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice;
- have been prepared in accordance with the requirements of the Companies Act 2006.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the 'Auditor's responsibilities for the audit of the financial statements' section of our report. We are independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

The impact of macro-economic uncertainties on our audit

Our audit of the financial statements requires us to obtain an understanding of all relevant uncertainties, including those arising as a consequence of the effects of macro-economic uncertainties such as Covid-19 and Brexit. All audits assess and challenge the reasonableness of estimates made by the directors and the related disclosures and the appropriateness of the going concern basis of preparation of the financial statements. All of these depend on assessments of the future economic environment and the company's future prospects and performance.

Covid-19 and Brexit are amongst the most significant economic events currently faced by the UK, and at the date of this report their effects are subject to unprecedented levels of uncertainty, with the full range of possible outcomes and their impacts unknown. We applied a standardised firm-wide approach in response to these uncertainties when assessing the company's future prospects and performance. However, no audit should be expected to predict the unknowable factors or all possible future implications for a company associated with these particular events.

Conclusions relating to going concern

We have nothing to report in respect of the following matters in relation to which the ISAs (UK) require us to report to you where:

- the director's use of the going concern basis of accounting in the preparation of the financial statements is not appropriate; or
- the director has not disclosed in the financial statements any identified material uncertainties that may
 cast significant doubt about the company's ability to continue to adopt the going concern basis of
 accounting for a period of at least twelve months from the date when the financial statements are
 authorised for issue.

In our evaluation of the director's conclusions, we considered the risks associated with the company's business, including effects arising from macro-economic uncertainties such as Covid-19 and Brexit, and analysed how those risks might affect the company's financial resources or ability to continue operations over the period of at least twelve months from the date when the financial statements are authorised for issue. In accordance with the above, we have nothing to report in these respects.

However, as we cannot predict all future events or conditions and as subsequent events may result in outcomes that are inconsistent with judgements that were reasonable at the time they were made, the absence of reference to a material uncertainty in this auditor's report is not a guarantee that the company will continue in operation.

Other information

The directors are responsible for the other information. The other information comprises the information included in the annual report, other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of the audit:

- the information given in the strategic report and the director's report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the strategic report and the director's report have been prepared in accordance with applicable legal requirements.

Matter on which we are required to report under the Companies Act 2006

In the light of the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified material misstatements in the strategic report or the director's report.

Matters on which we are required to report by exception

We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

Responsibilities of directors for the financial statements

As explained more fully in the statement of director's responsibilities set out on page 10, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Use of our report

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Accounting policies for the year ended 31 December 2019

General information

Allergan Biologics Limited is a private company limited by shares, incorporated in England, United Kingdom. The address of its registered office and principal place of business is 12 Estuary Banks, Speke, Liverpool, England, L24 8RB.

The principal activity of the company is the development of biopharmaceutical products.

Statement of compliance

The individual financial statements of Allergan Biologics Limited have been prepared in compliance with United Kingdom Accounting Standards, including Financial Reporting Standard 102, "The Financial Reporting Standard applicable in the United Kingdom and the Republic of Ireland" ("FRS 102") and the Companies Act 2006.

Summary of significant accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

Basis of preparation

These financial statements are prepared on a going concern basis, under the historical cost convention and in accordance with the Companies Act 2006 and applicable accounting standards in the United Kingdom.

The preparation of financial statements in conformity with FRS 102 requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the company's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in note (0).

(a) Going concern

The Director believes that preparing the financial statements on the going concern basis is appropriate. The Director has considered current trading and the budgets and forecasts for a period of more than one year following the approval of these financial statements. The director has assessed the status of the ongoing discussions in respect of the sale of the company and received confirmation that interested parties have sufficient resources to continue to support the company if the sale proceeds. The director has also received a letter of support from AGN Sundry LLC, the parent company for a period of 12 months from the date of approval of these financial statements should a sale not complete.

(b) Exemption for qualifying entities under FRS 102

FRS 102 allows a qualifying entity certain disclosure exemption, if certain conditions have been complied with, including notification of and no objection to, the use of exemptions by the company's shareholders. A qualifying entity is defined as a member of a group that prepares publicly available financial statements, which give a true and fair view, in which that member is consolidated. The company is a qualifying entity as its results are consolidated into the financial statements of Allergan Plc which are publicly available.

As a qualifying entity, the company has taken advantage of the following exemptions:

- (i) from the requirement to prepare a statement of cash flows as required by paragraph 3.17(d) of FRS 102;
- (ii) from the requirement to present certain financial instrument disclosures, as required by sections 11 and 12 of FRS 102;
- (iii) from the requirement to present a reconciliation of the number of shares outstanding at the beginning and end of the period as required by paragraph 4.12(a)(iv) of FRS 102; and

Accounting policies for the year ended 31 December 2019 (continued)

(c) Foreign currency

(i) Functional and presentation currency

The company's functional and presentation currency is the pound sterling, rounded in thousands.

(ii) Transaction and balances

Foreign currency transactions are translated into the functional currency using the spot exchange rates at the dates of the transactions.

At each period end foreign currency monetary items are translated using the closing rate. Non-monetary items measured at historical cost are translated using the exchange rate at the date of the transaction and non-monetary items measured at fair value are measured using the exchange rate when fair value was determined.

Foreign exchange gains and losses resulting from the settlement of transactions and from the translation at periodend exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the statement of comprehensive income.

(d) Turnover

Turnover represents the value of the intellectual property provided in the development of projects recharged to other Group companies during the year. Turnover is generally recognised as the service is performed and expenditure incurred and is stated excluding value added tax.

(e) Employee benefits

The company provides a range of benefits to employees and a defined contribution pension plan.

(i) Short term benefits

Short term benefits, and other similar non-monetary benefits, are recognised as an expense in the period in which the service is received.

(ii) Defined contribution plans

The company operates a defined contribution pension scheme. A defined contribution plan is a pension plan under which the company pays fixed contributions to a separate entity. Once the contributions have been paid the company has no further obligations. The contributions are recognised as an expense when they are due. Amounts not paid are shown in accruals in the balance sheet. The assets of the scheme are held separately from those of the company in independently administered funds. Contributions payable for the year are charged to the statement of comprehensive income.

(iii) Share based payments

Restrictive share awards granted to company employees in the ultimate parent Company, Allergan Plc, are treated as equity share options. Restricted share unit awards are grants that entitle the holder the right to receive an ordinary share subject to certain terms, vesting over a one to four year vesting period. The total of the award cost is calculated based on closing market price per share on the grant date with the charge amortised over the applicable vesting period, ending on the date on which the relevant employees become entitled to the award.

At each balance sheet date before vesting, the cumulative expense of unvested awards is calculated, representing the extent to which the vesting period has expired and management's best estimate of the number of units that will ultimately vest. The movement in cumulative expense since the previous balance sheet date is recognised in the statement of comprehensive income, with a corresponding entry in Capital Contribution reserve. The cost of awards vesting during the year is calculated with respect to the closing market price at the date of vest, which is reimbursed in full to the ultimate parent Company. This cost is fully expensed during the year, reduced by the release of the balance held to the previous balance sheet date in the Capital Contribution reserve with respect to the vest.

Recharges from the ultimate parent company in respect of options granted to the company's employees are recorded as a capital contribution directly in profit as loss reserves.

Employer National Insurance ("NI") contributions are recognised on the outstanding share options that are expected to be exercised at the date of the Balance Sheet. The amount of NI provided is determined by applying the latest enacted rate of NI to the difference between the market value of the underlying

Accounting policies for the year ended 31 December 2019 (continued)

(iv) Share based payments (continued)

shares at the Balance Sheet date and the option exercise price and then allocated over the period from the date of the grant to the end of the performance period: from that date to the date of actuals exercise the provision is adjusted using the current market value of the shares at each reporting year end.

(f) Taxation

Taxation expense for the period comprises current and deferred tax recognised in the reporting period. Tax is recognised in the statement of comprehensive income, except to the extent that it relates to items recognised directly in equity. In this case tax is also recognised directly in equity respectively.

Current or deferred taxation assets and liabilities are not discounted.

(i) Current tax

Current tax is the amount of income tax payable in respect of the taxable profit for the year or prior years. Tax is calculated on the basis of tax rates and laws that have been enacted or substantively enacted by the period end. Corporation tax is provided on the assessable profits of the company at the appropriate rates in force

(ii) Deferred income tax

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date, where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date.

A net deferred tax asset is recognised as recoverable and therefore recognised only when, on the basis of all available evidence, it can be regarded as more likely than not that there will be suitable taxable profits against which to recover carried forward tax losses and from which the future reversal of underlying timing differences can be deducted.

Deferred tax is measured at the average tax rates that are expected to apply in the periods in which the timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

(g) Research and development

Research and development expenditure is written off in the statement of comprehensive income in the period in which it is incurred. Drug development projects are considered to be in their development phase until stage 3 clinical trials and process validation stages are complete. Only Abicipar and Brazikumab are at stage 3 with trials in progress. All other Allergan Biologics are pre-stage 3 clinical trials completion with the majority of projects.

(h) Tangible fixed assets

Fixed assets are carried at cost less accumulated depreciation and accumulated impairment losses. Cost includes the original purchase price of the asset and the costs attributable to bringing the asset to its working condition for its intended use. Depreciation is calculated to write off the cost of tangible fixed assets, less their residual values, over their expected useful lives using the straight line basis.

Buildings 40 years

Plant & equipment 3-5 years

Land is not depreciated.

Assets in the course of construction are stated at cost. These assets are not depreciated until they are available for use. The expected useful lives of the assets to the business are reassessed periodically in the light of experience. Repairs, maintenance and minor inspection cost are expensed as incurred.

Tangible assets are derecognised on disposal or when no future economic benefits are expected. On disposal, the difference between the net disposals proceeds and the carrying amount is recognised in profit or loss

Accounting policies for the year ended 31 December 2019 (continued)

(i) Leases

At inception the company assesses agreements that transfer the right to use assets. The assessment considers whether the arrangement is, or contains, a lease based on the substance of the arrangement.

(i) Operating leased assets

Leases that do not transfer all the risk and rewards of ownership are classified as operating leases. Costs in respect of operating leases are charged to the statement of comprehensive income on a straight line basis over the lease term

(ii) Lease incentives

Incentives received to enter into an operating lease are credited to the statement of comprehensive income, to reduce the lease expense, on a straight-line basis over the period of the lease.

(j) Impairment of non-financial assets

At each balance sheet date non-financial assets not carried at fair value are assessed to determine whether there is an indication that the asset may be impaired. If there is such an indication the recoverable amount of the asset is compared to the carrying amount of the asset.

The recoverable amount of the asset is the higher of the fair value less costs to sell and value in use. Value in use is defined as the present value of the future cash flows before interest and tax obtainable as a result of the asset's continued use. These cash flows are discounted using a pre-tax discount rate that represents the current market risk-free rate and the risks inherent in the asset.

If the recoverable amount of the asset is estimated to be lower than the carrying amount, the carrying amount is reduced to its recoverable amount. An impairment loss is recognised in the statement of comprehensive income, unless the asset has been revalued when the amount is recognised in other comprehensive income to the extent of any previously recognised revaluation. Thereafter any excess is recognised in the statement of comprehensive income.

If an impairment loss is subsequently reversed, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, but only to the extent that the revised carrying amount does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised in prior periods. A reversal of an impairment loss is recognised in the statement of comprehensive income.

(k) Stocks

Stocks are stated at cost. Stocks represent the cost price of consumables, which are carried forward in the balance sheet and taken to the statement of comprehensive income as they are consumed.

Cost is determined on the first-in, first-out (FIFO) cost method. Cost includes the purchase price, including taxes and duties and transport and handling directly attributable to bringing the stock to its present location and condition. Any obsolescence is written off when it is identified.

(l) Cash and cash equivalents

Cash and cash equivalents includes cash in hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less, and bank overdrafts.

(m) Financial instruments

The company has chosen to adopt the sections 11 and 12 of FRS 102 in respect of financial instruments.

(i) Financial assets

Basic financial assets including trade and other debtors and cash and bank balances are initially recognised at transaction price, unless the arrangement constitutes a financing transaction, where the transaction is measured at the present value of the future receipts discounted at a market rate of interest.

Such assets are subsequently carried at amortised cost using the effective interest method.

Accounting policies for the year ended 31 December 2019 (continued)

(m) Financial instruments (continued)

(i) Financial assets (continued)

At the end of each reporting period financial assets measured at amortised cost are assessed for objective evidence of impairment. If an asset is impaired the impairment loss is the difference between the carrying amount and the present value of the estimated cash flows discounted at the asset's original effective interest rate. The impairment loss is recognised in the statement of comprehensive income.

If there is a decrease in the impairment loss arising from an event occurring after the impairment was recognised the impairment is reversed. The reversal is such that the current carrying amount does not exceed what the carrying amount would have been had the impairment not previously been recognised. The impairment reversal is recognised in the statement of comprehensive income.

Financial assets are derecognised when (a) the contractual rights to the cash flows from the asset expire or are settled, or (b) substantially all the risks and rewards of the ownership of the asset are transferred to another party or (c) control of the asset has been transferred to another party who has the practical ability to unilaterally sell the asset to an unrelated third party without imposing additional restrictions.

(ii) Financial liabilities

Basic financial liabilities, including trade and other creditors and loans from fellow group companies are initially recognised at transaction price, unless the arrangement constitutes a financing transaction, where the debt instrument is measured at the present value of the future receipts discounted at a market rate of interest.

Finance costs are charged to the Statement of Comprehensive Income over the term of the debt using the effective interest method so that the amount charged is at a constant rate on the carrying amount.

Debt instruments are subsequently carried at amortised cost, using the effective interest rate method.

Trade creditors are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Accounts payable are classified as current liabilities if payment is due within one year or less. If not, they are presented as non-current liabilities. Trade creditors are recognised initially at transaction price and subsequently measured at amortised cost using the effective interest method.

Financial liabilities are derecognised when the liability is extinguished, that is when the contractual obligation is discharged, cancelled or expires.

The Company does not hold or issue derivative financial instruments.

(iii) Offsetting

Financial assets and liabilities are offset and the net amounts presented in the financial statements when there is an enforceable right to set off the recognised amounts and there is an intention to settle on a net basis or to realise the asset and settle the liability simultaneously.

(n) Related party transactions

The Company has taken advantage of the exemption under paragraph 33.1A of FRS 102, 'Related Party Disclosures', on the grounds that it is a wholly owned subsidiary of a Group headed by Allergan Plc, whose financial statements are publicly available (see note 19).

(o) Critical judgements and estimates in applying the accounting policies

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the application of the accounting policies and the reported amounts of assets and liabilities, revenue and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are reasonable under the circumstances. Revisions to

Accounting policies for the year ended 31 December 2019 (continued)

accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

(o) Critical judgements and estimates in applying the accounting policies (continued)

The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are addressed below.

(i) Useful economic lives of tangible assets

The annual depreciation charge for tangible fixed assets is sensitive to changes in the estimated useful economic life and residual value of assets. To ensure the efficient use of limited space in our facility the useful economic life and residual value of our assets is assessed annually. Values are amended when necessary to reflect current estimates, based on technological advancements, future investments, economic utilisation and the physical condition of assets. Items not required for current projects can be stored off site until required or until deemed obsolete and therefore disposed of. See note 9 for the carrying value of tangible fixed assets and accounting policies relating to the useful economic life of each class of asset.

(ii) Share Based Payment

The company issues equity-settled share-based payments to certain employees. Equity-settled share-based payments are measured at fair value at the date of grant. The fair value determined at the grant date of the equity-settled share-based payments is expensed over the vesting period, based on the company's estimate of the awards that will eventually vest. Fair value is measured by use of the Black-Scholes pricing model. Employer National Insurance (NI) contributions are recognised on outstanding share options at the prevailing enacted rate of NI.

(iii) Research and Development Tax Credit

The RDEC provision is based on a best estimate based on the prior experience and any difference in the claim is reflected in the following years accounts.

Notes to the financial statements for the year ended 31 December 2019

1 Turnover

Turnover comprises the invoice value of goods and services supplied exclusive of value added tax and may be analysed as follows:

Geographical analysis of turnover by destination	2019 £'000	2018 £'000
United Kingdom	-	-
Rest of the world	40,650	28,545
	40,650	28,545
Analysis of turnover by class of business	2019 £'000	2018 £'000
Development	40,650	28,545
	40,650	28,545

Notes to the financial statements for the year ended 31 December 2019 (continued)

2 Director's Remuneration

3 Staff information

The average monthly number of persons (including the Director) employed by the company during the year was:

	2019	2018
·	Number	Number
Consultancy, development and production	107	101
Administration	28	25
	135	126
	2019	2018
	£'000	£,000
Staff costs during the year (including Directors)		
Wages and salaries	9,927	6,947
Social security costs	1,074	844
Other pension costs (Note 16)	819	529
Share based payments	679	417
	12,499	8,737

The individuals that are considered by the company to be key management personnel have received remuneration totalling £1,047,216 (2018: £728,408).

4 Other operating income

Other operating income comprises a Research and Development Expenditure Credit (RDEC) tax credit calculation, equating to 12% (2018: 12.00%) of qualifying R&D costs. RDEC is designed to increase the visibility and certainty of UK R&D tax relief and provide greater financial and cash flow support to companies with no corporation tax liability:

	2019 £'000	2018 £'000
Other operating income - RDEC	1,364	1,217

Adjustments in respect of prior years	(199)	583
Effects of changes in tax rates	(113)	(40)
Total deferred tax	765	1,192
Tax on profit	708	1,375

Notes to the financial statements for the year ended 31 December 2019 (continued)

8 Tax on profit (continued)

The tax charge for the year is higher (2018: higher) than the standard rate of corporation tax in the UK 19% (2018: 19%). This is explained as follows:

•	2019	2018 Restated*
	£'000	£'000
Profit before taxation	4,389	3,445
Profit before taxation multiplied by standard rate in the UK of 19% (2018: 19%)	834	655
Effects of:		
Expenses not chargeable to tax	210	35
Deferred tax not recognised	399	
Adjustments in respect of prior years	(257)	583
Tax rate changes -	(113)	(40)
Origination and reversal of timing differences	-	-
Share options timing differences	(364)	142
Other	(1)	
Total tax charge for the year	708	1,375

As at 31 December 2019 there is a recognised deferred tax asset of £959,000 relating to tax losses brought forward (2018: £898,000). As the company benefits from RDEC and returned minimal profit during the year, the Directors are certain that the asset will be utilised through future taxable profits in the next year. As such, the Directors consider it appropriate to recognise the deferred tax asset in these financial statements.

In the Spring Budget 2020, the Government announced that from 1 April 2020 the corporation tax rate would remain at 19% (rather than reducing to 17%, as previously enacted). This new law was substantively enacted on 17 March 2020. As the proposal to keep the rate at 19% had not been substantively enacted at the balance sheet date, its effects are not included in these financial statements. However, it is likely that the overall effect of the change, had it been substantively enacted by the balance sheet date, would be to increase the tax expense for the period by £103,000, and to increase the deferred tax asset by £144,000 and increase the deferred tax liability by £247,000.

Notes to the financial statements for the year ended 31 December 2019 (continued)

103 (2018:103) ordinary shares of £1 each	103	103

Notes to the financial statements for the year ended 31 December 2019 (continued)

14 Called up share capital (continued)

There is a single class of ordinary shares. There are no restrictions on the distribution of dividends and the repayment of capital.

15 Share based payment transactions

The company operates a restrictive share award scheme. These awards entitle certain employees to receive free shares in the ultimate parent company, Allergan Plc. (formerly Watson Pharmaceuticals, Inc.) in a one to four year time period, provided the employee remains in service. Awards are generally granted annually as part of the employee remuneration review process.

The company accounts for share based compensation under the fair value recognition and measurement provisions under FRS102. The company's share based compensation cost is measured at the grant date, based on the fair value of the award, and is recognised as expense over the requisite service period.

Fair value is determined with reference to the closing value of the market share price at the date of issue of the awards. In valuing equity transactions, no account is taken of any vesting conditions, other than conditions linked to the price of the shares of the company (market conditions). As awards are linked to service, no expense is recognised for unvested shares relating to employees who have since left the company.

At each balance sheet date before vesting, the cumulative expense of unvested awards is calculated, representing the extent to which the vesting period has expired and management's best estimate of the number of units that will ultimately vest. The movement in cumulative expense since the previous balance sheet date is recognised in the statement of comprehensive income, with a corresponding entry in Capital Contribution reserve. The cost of awards vesting during the year is calculated with respect to the closing market price at the date of vest, which is reimbursed in full to the ultimate parent Company. This cost fully expensed during the year, reduced by the release of the balance held to the previous balance sheet date in the Capital Contribution reserve with respect to the vest.

The financial effect of unvested awards issued by the ultimate parent company to the employees of subsidiary undertakings is recognised by the parent company in its individual financial statements. In particular the parent company records an increase in its investment in subsidiaries with a credit to equity equivalent to the FRS102 cost in the subsidiary undertakings.

Restrictive share awards granted between 2010 and 2012 were issued under the terms of the 'Watson 2001 Incentive Award Plan'. Under this scheme, awards vest equally on the second and fourth anniversaries following the date of grant, i.e. 50% after 2 years and 50% after 4 years. Awards granted after 2012 were issued under the terms of the 'Actavis restricted stock unit award agreement', which vest according to the terms held in individual employee 'Notice of Grant' documentation. Generally, shares vest equally on each of the four anniversaries following the date of grant, i.e. 25% after 1 year, 2 years, 3 years and 4 years. All schemes entitle award holders to receive shares in Allergan Plc, subject to being employed by the Company at the date of vest.

Awards expire 4 years after the date of grant, unless the employee leaves the company before then, thus terminating unvested awards. On the date of vesting, no payment or formal exercise is required by employees as shares allocated according to the terms of the 'notice of grant' will automatically be issued to the employee within 75 days of the vesting date.

The company's employees participate in a share option plan. Options are exercisable at a price equal to the market price of the underlying shares on the date of grant. Options generally vest over four years with 25% of the option vesting on each anniversary of the date of grant. Options granted since the beginning of 2006 have a contractual life of ten years. Options are generally forfeited if the employee leaves the Allergan plc group before the options vest.

The company recognised total expenses of £1,430,880 and £1,171,382 related to equity-settled share-based payment transactions (including restricted stock units) in 2019 and 2018 respectively.

Notes to the financial statements for the year ended 31 December 2019 (continued)

15 Share based payment transactions (continued)

A reconciliation of share option movements over the year to 31 December 2019 is shown below:

		2019		2018

²⁰¹⁸ has been amended to include stock options as per the prior year restatement

16 Pension commitments

The company operates a defined contribution scheme. Total contributions for the year ending 31 December 2019 are £819,000 (2018: £529,000). At 31 December 2019 the company owed £72,984 relating to December pension contributions (2018: £nil).

17 Capital and other commitments

At 31 December 2019 the Company had committed nil in respect of future capital expenditure not provided in the financial statements (2018: £61,387).

Notes to the financial statements for the year ended 31 December 2019 (continued)

18 Operating lease commitments

At 31 December the company had total future minimum lease payments under non-cancellable operating leases expiring as follows:

2019	2018
£'000	£,000
37	104
3	41
-	-
40	145
	£'000 37 3

Lease payments expensed to the Statement of Comprehensive Income in 2019 were £112,013 (2018: £104,000).

19 Ultimate parent undertaking

The company is a wholly owned subsidiary of AGN Sundry LLC, which is in turn a wholly owned subsidiary of Allergan Sales LLC, the ultimate parent company is Allergan Plc, a company incorporated in Ireland. Copies of Allergan Plc. consolidated financial statements are publicly available by accessing the Allergan website at www.allergan.com.

Notes to the financial statements for the year ended 31 December 2019 (continued)

20 Post balance sheet events

From the date of preparation to signing the directors are unaware of any impacts that would constitute a post balance sheet event. The Covid-19 pandemic has severely impacted many local economies around the globe. The company has determined that this event is a non-adjusting post balance sheet event. Accordingly, the financial position and results of operations as of and for the year ended 31 December 2019 have not been adjusted to reflect the impact. The company is unable to make a reasonable estimate of the financial impact of the non-adjusting event.

On 18 June 2020 the company entered into a Deed of Assignment whereby certain assets of Northwood Medical Innovation Limited, which is in the process of a voluntary liquidation, were transferred to the company. On 30 October 2020 the company sold all of its rights to these assets to Allergan Limited.

On 25 January 2021 the share capital of the company was reduced by £106,891,104 by cancelling and extinguishing 4 ordinary shares of £1 each and 100 A Ordinary shares of £1 each and cancelling the share premium account of the company.

21 Restatements

a) Cost of sales vs admin expenses

The comparatives in the statement of comprehensive income have been restated to correct an error in the classification of expenditure amounting to £15,885k between cost of sales and administration costs. There has been no impact on the reported profit for the year and the net assets at 31 December 2018.

b) Fair value of share options

Previously, share options have not been reported as the impact on the reported profit on an annual basis was not deemed to be material. However, on a cumulative basis the fair value of the share options at 31 December 2018 is material to the net asset position. Due to this error a prior year adjustment has been included for the cumulative valuation at 31 December 2018 amounting to £589k.

The change has resulted in a reduction to the reported profit for the year ended 31 December 2018 by £589k and a capital contribution reserve increase of £589k

c) Stock write off / Adjustment of opening tax balance

Due to an error the stock written off to the statement of comprehensive income during the year ended 31 December 2018 was for the full value of the provision against the closing stock balance and not the difference in the provision during the year. This has reduced the reported profit for the year by £1,004k. There is no impact on the net assets at 31 December 2018 as the stock figure reported in the balance sheet was correct.

d) Adjustment of opening tax balance

The corporation tax debtor at 31 December 2018 was incorrect due to an error and has been corrected. There is no profit impact but the debtors balance at 31 December 2018 is reduced by £1,004k.

Notes to the financial statements for the year ended 31 December 2019 (continued)

21 Restatements (continued)

e) Opening tax 2016 and 2017 differences

These payments had been provided for on the balance sheet but these have now been identified as not due for payment to HMRC, this was due to an error which was not identified when the corporation tax position for 2016 and 2017 was settled with HMRC. As a result there has been an increase in the reported profit for the year ended 31 December 2018 of £348k and an increase in debtors of £472k offset by an increase in creditors of £124k.
