**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 MARCH 2011**

1. ACCOUNTING POLICIES

The following accounting policies have been applied consistently in dealing with items which are considered material in relation to the company's financial statements

1.1 Basis of preparation of financial statements

The financial statements have been prepared under the historical cost convention as modified by the revaluation of investment properties and in accordance with applicable accounting standards

1.2 Cash flow

The company, being a subsidiary undertaking where 90% or more of the voting rights are controlled within the group whose consolidated financial statements are publicly available, is exempt from the requirement to draw up a cash flow statement in accordance with FRS 1

1.3 Turnover

Turnover represents rents receivable during the year from the letting of commercial properties at invoiced amounts less value added tax

1.4 Investment properties

Investment properties are included in the balance sheet at their open market value at the balance sheet date, on the basis of an annual valuation. Aggregate surpluses or deficits arising on valuation are transferred to the revaluation reserve. Permanent diminutions in the value of the properties are charged directly to the profit and loss account.

Additions to investment properties include only costs of a capital nature. Costs such as interest and other property outgoings are treated as revenue expenditure and are written off as incurred.

In accordance with SSAP 19 (as amended), no depreciation or amortisation is provided in respect of long leasehold investment properties. This treatment is a departure from the requirements of the Companies Act 2006 concerning depreciation of fixed assets. However, the company's investment properties are held not for consumption but for investment and the directors consider that systematic annual depreciation would be inappropriate. The accounting policy is therefore necessary for the accounts to give a true and fair view. Depreciation or amortisation is only one of the factors reflected in the annual valuation and the amount which might otherwise have been shown cannot be separately identified or quantified.

- The recognition of deferred tax assets is limited to the extent that the company anticipates to make sufficient taxable profits in the future to absorb the reversal of the underlying timing differences

Deferred tax balances are not discounted

1.6 Head lease rentals

Head lease rentals that are obligations of the company are charged to the profit and loss account on a straight line basis over the term of the lease
