The Directors do not consider the Company to be a financial institution under FRS 102

Transition to FRS 102 and FRS 103

These Financial Statements for the year ended 31 December 2015 are the first Financial Statements that comply with FRS 102 and FRS 103. The date of transition is 1 January 2014. There is no impact on the opening Balance Sheet and Profit and Loss Account and therefore there is no requirement to restate comparative figures.

Going concern

The Company participated in insurance business as an underwriting member of various syndicates at Lloyd's and all years of account on which the Company participated have closed

The Directors are of the opinion that the Company has access to adequate resources to meet its operational obligations, as these fall due, for the foreseeable future. Accordingly, the going concern concept has been adopted in the preparation of these Financial Statements.

Basis of accounting

The Financial Statements are prepared under the historical cost basis of accounting modified to include the revaluation through profit and loss of certain financial instruments held at fair value, through profit or loss

The Company has ceased underwriting and all years of account on which the Company participated have closed. There are no syndicate transactions required to be reported in the general business technical account for the year ended 31 December 2015 and there are no assets or liabilities arising as a result of the underwriting activities that are required to be reported in the Balance Sheet at 31 December 2015.

Notes to the Financial Statements (continued) for the year ended 31 December 2015

2. Accounting policies (continued)

Taxation

Current tax is the amount of income tax payable in respect of the taxable profit for the year or prior years. Tax is calculated on the basis of tax rates and laws that have been enacted or substantially enacted by the period end. Current tax is recognized in the Profit and Loss Account.

Deferred taxation

Deferred tax is provided in full on timing differences which result in an obligation at the Balance Sheet date to pay more tax, or a right to pay less tax, at a future date, at rates expected to apply when they crystallise based on current tax rates and law

Deferred tax assets are recognised to the extent that it is regarded as more likely than not that they will be recovered

Deferred tax assets and liabilities have not been discounted

Cash and cash equivalents and cash flow statement

Cash and cash equivalents include deposits held at call with banks, other short-term liquid investments with original maturities of three months or less and cash in hand

Share capital

Ordinary share capital is classified as equity. The difference between fair value of the consideration received and the nominal value of the share capital being issued, is taken to the share premium account. Incremental costs directly attributable to the issue of new ordinary shares are shown in equity as a deduction, net of taxes, from the proceeds

Dividend distributions to shareholders

Dividend distributions to the Company's shareholders are recognised in the Financial Statements in the period in which the dividends are approved by the shareholders. These amounts are recognised in the Statement of Changes in Shareholders' Equity
