Objectives and activities

The principal object of the Foundation is to provide a community transport service for such of the inhabitants of Middlesex, Hertfordshire and the Boroughs of Greater London who have need of such a service because of youth, age, sickness or disability (mental or physical) or poverty or because of a lack of availability of adequate and safe public passenger services. The charity also makes a small number of grants to other charitable institutions.

In order to pursue its activities the charity has purchased a suitable minibus to provide both a general transport service as well as specific planned day trips to well known leisure and educational destinations. The service is used by the young, elderly and the disabled. No charges are made for the service provided which is free at point of use. In the opinion of the Trustees it is clear that the service provided is for the public benefit as shown by the fact that it is greatly appreciated by those who use it for whom it enriches their lives by providing both mobility and experiences which they otherwise might not gain. Applications for use of this service should be made to the principal address listed on the information page.

The Trustees have paid due regard to guidance issued by the Charity Commission in deciding what activities the charity should undertake.

All Trustees give freely of their time and no trustees remuneration or other benefits were paid in the year under review.

1.4 Income

Cash donations are recognised on receipt. Other donations are recognised once the charity has been notified of the donation, unless performance conditions require deferral of the amount. Income tax recoverable in relation to donations received under Gift Aid or deeds of covenant is recognised at the time of the donation.

(Continued)

1.6 Tangible fixed assets

Tangible fixed assets are initially measured at cost and subsequently measured at cost or valuation, net of depreciation and any impairment losses.

Depreciation is recognised so as to write off the cost or valuation of assets less their residual values over their useful lives on the following bases:

Motor vehicles	25% per annum on a reducing balance basis
----------------	-------------------------------------------

The gain or loss arising on the disposal of an asset is determined as the difference between the sale proceeds and the carrying value of the asset, and is recognised in net income/(expenditure) for the year.

1.7 Financial instruments

The charity only has financial assets and liabilities of a kind that qualify as basic financial instruments. Basic financial instruments are initially recognised at transaction value and subsequently measured at their settlement value.

Basic financial assets

Basic financial assets, which include debtors and cash and bank balances, are initially measured at transaction price including transaction costs and are subsequently carried at amortised cost using the effective interest method unless the arrangement constitutes a financing transaction, where the transaction is measured at the present value of the future receipts discounted at a market rate of interest. Financial assets classified as receivable within one year are not amortised.

Basic financial liabilities

Basic financial liabilities, including creditors and bank loans are initially recognised at transaction price unless the arrangement constitutes a financing transaction, where the debt instrument is measured at the present value of the future payments discounted at a market rate of interest. Financial liabilities classified as payable within one year are not amortised.

Debt instruments are subsequently carried at amortised cost, using the effective interest rate method.

Trade creditors are obligations to pay for goods or services that have been acquired in the ordinary course of operations from suppliers. Amounts payable are classified as current liabilities if payment is due within one year or less. If not, they are presented as non-current liabilities. Trade creditors are recognised initially at transaction price and subsequently measured at amortised cost using the effective interest method.
