NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 MAY 2019

1. STATUTORY INFORMATION

'Plane Training Limited is a private company, limited by shares, registered in England and Wales. The company's registered number and registered office address can be found on the Company Information page.

The presentation currency of the financial statements is the Pound Sterling (£).

2. STATEMENT OF COMPLIANCE

These financial statements have been prepared in accordance with Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" including the provisions of Section 1A "Small Entities" and the Companies Act 2006.

3. ACCOUNTING POLICIES

Basis of preparing the financial statements

The financial statements have been prepared under the historical cost convention.

Turnover

Turnover is measured at the fair value of the consideration received or receivable and represents amounts receivable services rendered, stated net of discounts and of Value Added Tax. When the consideration receivable in cash or cash equivalents is deferred, and the arrangement constitutes in effect a financing transaction, the fair value of the consideration is measured as the present value of all future receipts determined using an imputed rate of interest, normally the rate that discounts the nominal amount of consideration to the cash sales price.

The company recognises revenue when the amount of revenue can be measured reliably, when it is probable that future economic benefits will flow to the entity and when specific criteria have been met for each of the company's activities of the actual completion of a proportion of the total services to be rendered.

Tangible fixed assets

Fixed assets are stated at cost less accumulated depreciation.

Fixtures and fittings - 25% on reducing balance

Computer equipment - 33.33% on cost

At each reporting date fixed assets are reviewed to determine whether there is an indication that an asset may be impaired. If there is an indication of possible impairment, the recoverable amount of any asset or group of related assets, which is the higher of value in use and the fair value less cost to sell, is estimated and compared with its carrying amount. If the recoverable amount is lower, the carrying amount of the asset is reduced to its recoverable amount and an impairment loss is recognised immediately in profit or loss.

3. ACCOUNTING POLICIES - continued

Taxation

Taxation represents the sum of the tax currently payable and deferred tax.

The company's liability to tax is calculated using the tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax is recognised on all timing differences between the carrying amounts of the assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period to which the liability is settled or the asset realised, based on tax rates and laws that have been enacted or substantively enacted by the end of the reporting period.
