#### 2. ACCOUNTING POLICIES - continued

#### **TANGIBLE FIXED ASSETS**

Tangible fixed assets are stated at cost (or deemed cost) or valuation less accumulated depreciation and accumulated impairment losses. Cost includes costs directly attributable to making the asset capable of operating as intended.

Depreciation is provided on all tangible fixed assets, at rates calculated to write off the cost, less estimated residual value, of each asset on a systematic basis over its expected useful life as follows:

Plant and machinery - 10% on cost Fixtures and fittings - 10% on cost

Computer equipment - 33% reducing balance

#### **STOCKS**

Stocks are valued at the lower of cost and net realisable value, after making due allowance for obsolete and slow moving stock.

Cost is calculated using the first-in, first-out method and includes all purchase, transport and handling costs in bringing stocks to their present location and condition.

#### **DEFERRED TAX**

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date.

Timing differences arise from the inclusion of income and expenses in tax assessments in periods different from those in which they are recognised in financial statements. Deferred tax is measured using tax rates and laws that have been enacted or substantively enacted by the year end and that are expected to apply to the reversal of the timing difference.

Unrelieved tax losses and other deferred tax assets are recognised only to the extent that it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits.
