# Strategic report

The directors present their annual report and the audited financial statements for the year ended 30 June 2019.

## Business review

### Business model and strategy

The principal activity of Auction Finance Limited ('the Company') continues to be that of mortgage lender. The Company is a wholly-owned subsidiary of Together Financial Services Limited which, with its subsidiaries, operates as the Together Group of businesses ('the Group'). The Together Group conducts its new lending business through other subsidiaries. Accordingly, the Company has ceased to originate new loans but continues to service a closed loan portfolio.

### Results

As shown in the Company's statement of comprehensive income on page 9, profit before tax<sup>1</sup> has decreased to £1.1m (2018: £2.4m), which is a reflection of the reduction in loans and advances to customers described below. Net interest margin<sup>2</sup> decreased from 13.5% to 12.1% for the year ended 30 June 2019 due to increase in the proportion of non-securitised assets which are funded at a higher funding rate.

### Position

As shown in the statement of financial position on page 10, loans and advances to customers have decreased by 36.6% to £9.0m (2018: £14.2m) as new mortgages are now originated through other subsidiaries in the Together Group and the Company's existing mortgage portfolio is reducing as customers repay their loans. At the same time, equity has increased by 18.8% to £3.8m (2018: £3.2m) due to the retained profit for the year.

### Liquidity and funding activity

The Company is partly financed by its parent company, Together Financial Services Limited, which itself is party to a revolving credit facility and through another Group company has issued senior secured notes, the non-securitised assets of the Company being subject to a fixed and floating charge in respect of these facilities. In addition the activities of the Company are also financed by Group securitisation facilities including private revolving securitisation facilities Charles Street Conduit Asset Backed Securitisation 1 Limited ('Charles Street ABS') originated in November 2007 and Lakeside Asset Backed Securitisation Limited ('Lakeside ABS') originated in January 2015. These facilities are secured on specific loan assets of the Company ('securitised assets').

In September 2018, the Group increased the Charles Street ABS facility from £1,000m to £1,255m on improved terms, and added mezzanine funding to the structure to improve its capital efficiency.

The Company monitors its liquidity position against its business plan on a regular basis taking into consideration the level of redemption activity, recurring income levels, planned expenditure and new business advance levels. Any material deviations are identified and appropriate action taken to ensure that sufficient liquidity headroom exists at all times.

The Board of Together Financial Services Limited has confirmed that it will continue to provide funding to the Company for the foreseeable future.

### Macroeconomic conditions

The Company is impacted by general business and economic conditions in the United Kingdom. The UK's economic performance has been mixed for some years, and the outlook continues to be highly uncertain, primarily due to Brexit but also now because of increasing trade tensions.

Average house prices have continued to rise, but with some falls in London and the south east. Unemployment has fallen year on year and average wages are showing real growth, but increases in productivity remain low. GDP growth has been lower than historical averages, though some commentators expect it to outperform some major economies such as Germany and Japan, and whilst austerity has played a part in this, public finances are considerably more robust.

The Group's long-term strategy of low-LTV lending provides significant mitigation from uncertain economic times further supported by its strong financial position. The Company's approach to managing risks is explained in the principal risks and uncertainties section below.

---

<sup>1</sup> Note that 2019 profit before tax includes impact of IFRS 9, and therefore is not directly comparable to previous year.

<sup>2</sup> Net interest margin is calculated by dividing net interest income by the average of the opening and closing net loans and advances to customers.

# Strategic report (continued)

## Business review (continued)

### Regulatory and legal considerations

The Company's operations are affected by a number of laws and regulations. The Company also has to comply with the relevant UK and EU regulations including anti-money laundering regulations, the EU General Data Protection Regulation, and the EU Securitisation Regulations.

### Corporate governance

The Company is a wholly owned subsidiary of Together Financial Services Limited. The Company's Board provides leadership and oversight in line with legal and regulatory provisions. The Board has the responsibility for oversight of the risks set out in the principal risks and uncertainties section below.

## Principal risks and uncertainties

### Credit risk<sup>3</sup>

Credit risk is the risk arising as result of default by customers or counterparties due to failure to honour obligations when they fall due.

The Company is exposed to changes in the financial position of its customers, which may adversely impact their ability to make loan repayments. The level of this risk is driven both by macroeconomic factors and by factors relating to specific customers such as a change in the borrower's circumstances.

Credit risk is managed and mitigated by:

- Conservative loan-to-value (LTV) lending, providing mitigation to the risk of credit losses arising in the event of default and protection from the risk of falling collateral values.
- Monitoring of customer performance throughout the life of the loan, with regard to arrears, viability of exit-strategies, proactive collections strategies, application of forbearance measures, and macroeconomic sensitivity analysis.
- Monitoring of the characteristics of the loan portfolio, including, geographical concentration, and LTV.

Note 15 to the financial statements provides detailed financial disclosures relating to credit risk.

### Liquidity and funding risk<sup>3</sup>

Liquidity risk is the risk that the Company is unable to access sufficiently liquid financial resources to meet the Company's financial obligations as they fall due.

Funding risk is the risk of being unable to access funding markets or to only be able to do so at excessive cost. This includes the risk of reduced funding options due to adverse conditions in the wholesale funding market, potentially caused by political and economic uncertainty leading to the inability to secure additional funding or refinance existing facilities.

Liquidity and funding risk is managed and mitigated at a Group level by: monitoring the liquidity position against limits and triggers, utilising a range of funding sources, forecasting the liquidity and funding position under normal and stressed conditions and reporting against risk appetite. Surplus cash balances are placed on overnight deposit with institutions with sufficiently high long-term and short-term ratings.

An overview of the Group's sources of funding and activities during the year, which are applicable to this Company, are included within the Business Review.

---

<sup>3</sup> This section forms part of the IFRS 7 disclosures in respect of the financial statements on pages 9 to 28.

# Strategic report (continued)

## Principal risks and uncertainties (continued)

### Market risk<sup>4</sup>

Market risk is the risk arising from adverse movements in market values, including movements in interest rates.

The Company does not carry out proprietary trading or hold positions in assets or equities which are actively traded, and the key market risk faced by the Company is interest rate risk, the risk of loss through mismatched asset and liability positions sensitive to changes in interest rates.

Interest rate risk is managed and mitigated at a Group level by monitoring interest rate risk exposures, including a forward-looking view under normal and stressed conditions, and reporting against risk appetite.

The Company's performance is not considered at material risk from changes in interest rates that are reasonably expected for the next 12 months.

### Operational risk

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. Operational risk includes conduct and compliance risk and the associated reputational damage that can arise, but given their significance, these risks are classified as separate principal risks.

Operational risk is managed and mitigated for the Group and Company by:

- A framework of systems, controls, policies and procedures.
- Frameworks to recruit, train and retain sufficient skilled personnel.
- Utilising a Risk and Control Self-Assessment approach to identify, manage and monitor key operational risks.
- Investment in IT infrastructure and cyber risk prevention systems.

### Conduct and compliance risk

Conduct risk is the risk arising from business activities that fail to deliver appropriate and consistent outcomes to customers and stakeholders. Compliance risk is the risk arising from the failure to comply with existing or new legislation, or regulations in the markets within which the Company operates.

Conduct and compliance risk is managed and mitigated by:

- The communication of the Group's 'Beliefs' set by the Group Board, which define our organisational culture and focuses on colleague conduct, respect, accountability and customer experience.
- Quality assurance reviews in operational areas supported by experienced risk and compliance departments.
- Annual training and awareness sessions for colleagues.
- Adherence to a system of processes and controls which mitigate conduct risk.
- Root cause analysis of complaints or failings focusing on continuous improvement aiming to identify where we could improve the outcome for customers and determine an appropriate resolution.
- Horizon scanning and impact assessments of potential regulatory and legal change.

The Company and the Group also consider risks arising in relation to other key stakeholders such as our shareholders, investors and banks, intermediaries, colleagues, and our community. This includes both the impact to our operations from their actions, or a failure of a key stakeholder, and also the impact of our actions on our relationship with stakeholders.

<sup>4</sup> This section forms part of the IFRS 7 disclosures in respect of the financial statements on pages 9 to 28.

# Directors' report

## Directors

The directors of the Company are set out on page 1.

## Directors' indemnities

The Company has made qualifying third party indemnity provisions for the benefit of its directors which were made during the year and remain in force at the date of this report.

## Results and dividends

The results for the year are set out in the Business Review within the Strategic Report. There was no dividend paid during the year (2018: £nil). The directors of the company do not recommend the payment of a dividend.

## Employees

The Company has no employees (2018: nil). Directors' emoluments and wages and salaries relating to employees of the Group are borne by a fellow subsidiary company of Together Financial Services Limited, Blemain Finance Limited, and recharged to the Company, in line with approved methodologies.

## Environment

As the Company operates in the financial services sector, its actions do not have a significant environmental impact. However, the Company does recognise the importance of the environment, and acts to minimise its impact on the environment wherever it can, including recycling and reducing energy consumption.

## Statement of going concern

As set out in the statement of directors' responsibilities, the directors are required to prepare the financial statements on the going-concern basis unless it is inappropriate to presume that the Company will continue in business.

The Company is reliant on its parent company, Together Financial Services Limited, for financial support. The Board of Together Financial Services Limited has confirmed that it is a going concern and that it will provide financial support to the Company for the 12 months from the date of signing the Company's accounts.

On the basis that the Company has adequate funding and support as detailed above, together with its current performance and financial position, the directors have a reasonable expectation that the Company will have sufficient funding and liquidity to ensure that it will continue in operational existence for the foreseeable future. Accordingly, the directors of the Company have adopted the going-concern basis in preparing the financial statements.

## Principal risks and uncertainties

A description of the principal risks and uncertainties facing the Company is contained in the Strategic Report.

## Audit information

In the case of each of the persons who is a director of the Company at the date when this report is approved:

- as far as each of the directors is aware, there is no relevant audit information of which the Company's auditor is unaware; and
- each of the directors has taken all the steps that he ought to have taken as a director to make himself aware of any audit information and to establish that the Company's auditor is aware of that information.

This statement is given and should be interpreted in accordance with the provisions of s418 (2) of the Companies Act 2006.

Approved by the Board of Directors  
and signed on behalf of the Board

MR Goldberg  
Director  
18 October 2019

# Statement of directors' responsibilities

The directors are responsible for preparing the annual report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law), including FRS 101 '*Reduced Disclosure Framework*'. Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that year. In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and accounting estimates that are reasonable and prudent;
- state whether applicable UK Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going-concern basis unless it is inappropriate to presume that the Company will continue in business.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Company's transactions and disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

# Independent auditor's report

## Independent auditor's report to the members of Auction Finance Limited

### Report on the audit of the financial statements

#### Opinion

In our opinion the financial statements of Auction Finance Limited (the 'Company'):

- give a true and fair view of the state of the Company's affairs as at 30 June 2019 and of its profit for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice including Financial Reporting Standard 101 '*Reduced Disclosure Framework*'; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

We have audited the financial statements which comprise:

- the statement of comprehensive income;
- the statement of financial position;
- the statement of changes in equity;
- the disclosures in the "Principal risks and uncertainties" section of the Strategic Report on pages 3 to 4 of the Annual Report and Financial Statements that are denoted as forming part of the financial statements; and
- the related notes 1 to 18.

The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards, including Financial Reporting Standard 101 '*Reduced Disclosure Framework*' (United Kingdom Generally Accepted Accounting Practice).

#### Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the auditor's responsibilities for the audit of the financial statements section of our report.

We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the Financial Reporting Council's (the FRC's) Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Conclusions relating to going concern

We are required by ISAs (UK) to report in respect of the following matters where:

- the directors' use of the going concern basis of accounting in preparation of the financial statements is not appropriate; or
- the directors have not disclosed in the financial statements any identified material uncertainties that may cast significant doubt about the Company's ability to continue to adopt the going-concern basis of accounting for a period of at least twelve months from the date when the financial statements are authorised for issue.

We have nothing to report in respect of these matters.

#### Other information

The directors are responsible for the other information. The other information comprises the information included in the annual report, other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in respect of these matters.

# Independent auditor's report (continued)

## Responsibilities of directors

As explained more fully in the statement of directors' responsibilities, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going-concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

## Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the FRC's website at: [www.frc.org.uk/auditorsresponsibilities](http://www.frc.org.uk/auditorsresponsibilities). This description forms part of our auditor's report.

## Report on other legal and regulatory requirements

### Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of the audit:

- the information given in the Strategic report and the Directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the Strategic report and the Directors' report have been prepared in accordance with applicable legal requirements.

In the light of the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified any material misstatements in the Strategic report or the Directors' report.

### Matters on which we are required to report by exception

Under the Companies Act 2006 we are required to report in respect of the following matters if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

We have nothing to report in respect of these matters.

### Use of our report

This report is made solely to the Company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members as a body, for our audit work, for this report, or for the opinions we have formed.

# Notes to the financial statements

Unless otherwise indicated, all amounts are stated in £m

## 1. Reporting entity and general information

Auction Finance Limited is incorporated and domiciled in the UK under the Companies Act 2006. The Company is a private company, limited by shares, and registered in England (Company number: 04949929). The registered address of the Company is Lake View, Lakeside, Cheadle, Cheshire, SK8 3GW. The Company is primarily involved in financial services.

## 2. Significant accounting policies

The principal accounting policies are summarised below. They have all been applied consistently throughout the current year and the preceding year.

### **Basis of preparation**

The financial statements have been prepared in accordance with Financial Reporting Standard 101, *Reduced Disclosure Framework* (FRS 101). This applies the recognition and measurement requirements of International Financial Reporting Standards (IFRS) but provides certain exemptions from the disclosure requirements of IFRS.

The preparation of financial statements requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in applying the Company's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in the individual accounting policies and in Note 3 to the financial statements.

The Company's parent undertaking, Together Financial Services Limited, includes the Company in its consolidated financial statements. The consolidated financial statements of Together Financial Services Limited are available to the public and may be obtained from Lake View, Lakeside, Cheadle, Cheshire, SK8 3GW. In these financial statements, the Company has taken advantage of the disclosure exemptions under FRS 101 in relation to the presentation of comparative information in respect of certain assets, the presentation of a cash flow statement, standards not yet effective and related party transactions.

These financial statements are presented in pounds sterling because that is the currency of the primary economic environment in which the Company operates.

These financial statements have been prepared on the historical cost basis. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

### **Presentation of risk disclosures**

Disclosures under IFRS 7 *Financial Instruments: Disclosures* concerning the nature and extent of principal risks have been presented within the Strategic Report.

### **Adoption of new accounting standards, amendments and interpretations**

#### *IFRS 9 Financial Instruments*

The Company has adopted IFRS 9 *Financial Instruments* issued by the IASB in July 2014 with a date of application of 1 July 2018. The adoption of IFRS 9 represents a significant change from the requirements of IAS 39 *Financial instruments: Recognition and Measurement*, and has resulted in changes in accounting policies for recognition, classification and measurement of financial instruments, and the impairment of financial assets. It also significantly amends the disclosures relating to financial instruments.

#### *Classification of financial instruments*

IFRS 9 has replaced the classification categories of IAS 39, determining the appropriate classification of financial instruments based on the business model in which the assets are managed and the nature of the contractual cash flows, specifically whether they represent solely payments of principal and interest. In practice this change has no significant effect for the Company as all of its financial instruments continue to be held at amortised cost.

# Notes to the financial statements (continued)

Unless otherwise indicated, all amounts are stated in £m

## 2. Significant accounting policies (continued)

### Adoption of new accounting standards, amendments and interpretations (continued)

#### IFRS 9 Financial Instruments (continued)

##### *Measurement of financial instruments and impairment of financial assets*

IFRS 9 introduced a significant change in measurement of financial instruments, relating to non-substantial modifications of liabilities. Under IAS 39, the Company's policy for such modifications was to defer any related transaction costs as adjustments to carrying value that were charged to income over the liability's remaining life. Under IFRS 9 however, gains or losses on non-substantial modifications are recognised immediately in the income statement and the Company also considers qualitative factors in determining whether a modification is substantial. IFRS 9 replaces the 'incurred loss' model of IAS 39 with an 'expected loss' model that also applies to loan commitments. IFRS 9 therefore recognises credit losses earlier than IAS 39.

##### *Transition to IFRS 9*

Changes in accounting policies resulting from the adoption of IFRS 9 have been applied retrospectively. The Company has taken advantage of the exemptions allowing it not to restate comparative periods. Differences in the carrying amounts of financial instruments resulting from the adoption of IFRS 9 are recognised in retained earnings and reserves as at 1 July 2018. Accordingly, the information presented for the previous financial year does not reflect the requirements of IFRS 9 and therefore is not comparable to the information presented for the current year under IFRS 9.

##### *Reconciliation of statement of financial position from IAS 39 to IFRS 9*

The only financial instruments affected by transition from IAS 39 to IFRS 9 are loans and advances to customers. The following table reconciles the remeasurement changes in its carrying amount together with the impact on deferred tax and retained earnings on 1 July 2018 (all amounts measured in £m):

	IAS 39 30 June 2018	Expected credit losses	Total impact of adoption of IFRS 9	IFRS 9 1 July 2018
Loans and advances to customers	14.2	(0.4)	(0.4)	13.8
Deferred tax asset	0.2	0.1	0.1	0.3
<b>Total equity impact</b>		<b>(0.3)</b>	<b>(0.3)</b>	
<b>Total equity</b>	<b>3.2</b>	<b>(0.3)</b>	<b>(0.3)</b>	<b>2.9</b>

In addition on transition to IFRS 9, loans and advances to customers of £0.4m that were fully impaired were written off, with no net impact on amortised cost.

The accounting policies for the recognition, classification and measurement of financial instruments under IFRS 9 are detailed later in this note.

#### IFRS 15

IFRS 15 was issued in May 2014 and is effective for annual periods beginning on or after 1 January 2018. IFRS 15 has no impact on the Company's results as materially all of its income is recognised in accordance with IFRS 9.

#### Going concern

The directors have assessed, in the light of current and anticipated economic conditions, the Company's ability to continue as a going concern. The directors confirm they are satisfied that the Company has adequate resources to continue in business for the foreseeable future. For this reason, they continue to adopt the going-concern basis for preparing the financial statements.

# Notes to the financial statements (continued)

Unless otherwise indicated, all amounts are stated in £m

## 2. Significant accounting policies (continued)

### Interest income and expense

Interest income and expense are recognised in the statement of comprehensive income for all instruments measured at amortised cost using the effective interest rate method. The effective interest rate method calculates the amortised cost of a financial asset or a financial liability and allocates the interest income or interest expense over the expected life of the instrument. The effective interest rate is the rate that, at inception of the instrument, discounts its estimated future cash payments or receipts to the net carrying amount of the financial instrument. When calculating the effective interest rate, the Company takes into account all contractual terms of the financial instrument but does not consider future credit losses except for credit-impaired assets. For credit-impaired assets a credit-adjusted effective interest rate is calculated using estimated future cash flows including expected credit losses. The calculation includes all fees, transaction costs and other premiums or discounts that relate to the origination of the instrument.

Interest on impaired financial assets is recognised at the original effective interest rate applied to the carrying amount as reduced by an allowance for impairment.

### Taxation

Tax on the profit or loss for the year comprises current and deferred tax. Tax is recognised in the income statement except to the extent that it relates to items recognised directly in equity, in which case it is recognised in other comprehensive income.

Current tax is the expected tax payable on the taxable profit for the year. Taxable profit differs from profit before tax as reported in the income statement because it excludes items of income and expense that are taxable or deductible in other years, and items that are never taxable or deductible. The Company's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the reporting date.

Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amounts of the assets and liabilities in the financial statements and the corresponding amounts used for taxation purposes, and is accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised.

Deferred tax is calculated at the tax rates that are expected to apply in the year when the liability is settled or the asset is realised based on tax laws and rates that have been enacted or substantively enacted at the reporting date.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and the Company intends to settle its current tax assets and liabilities on a net basis.

### Cash and cash equivalents

Cash comprises cash in hand, demand deposits and bank overdrafts. Cash equivalents comprise highly liquid investments which are convertible into cash with an insignificant risk of changes in value with a maturity of three months or less at the date of acquisition, including short-term highly liquid debt securities.

# Notes to the financial statements (continued)

Unless otherwise indicated, all amounts are stated in £m

## 2. Significant accounting policies (continued)

### Financial assets & liabilities

#### *Financial assets*

All the Company's financial assets are initially recognised at fair value plus, for assets measured at amortised cost, any directly attributable transaction costs.

From 1 July 2018, all the Company's financial assets are classified as measured at amortised cost, being the gross carrying amount less expected impairment allowance, using the effective interest rate method, as they meet both of the following conditions:

- The assets are held within a business model whose objective is to hold the assets to collect contractual cash flows, and
- The contractual terms of the financial assets give rise to cash flows at specified dates that are solely payments of principal and interest on the principal amounts outstanding.

The Company's business model for its financial assets is to hold them to collect contractual cash flows, with sales of mortgage loans and advances to customers only made internally to consolidated special purpose vehicles for the purpose of collateralising the issuance of loan notes. The loans' cash flows are consistent with a basic lending arrangement, the related interest only including consideration for the time value of money, credit and other basic lending risks, and a profit margin consistent with such an arrangement. Cash and cash equivalents also meet these conditions and accordingly management has classified all of the Company's financial assets as measured at amortised cost.

Prior to 1 July 2018, all of the Company's financial assets were categorised as loans and receivables, and subsequent to initial recognition were measured at amortised cost using the effective interest rate method. The definition of amortised cost prior to 1 July 2018 excluded impairment allowances (which were subsequently deducted), in contrast to the definition of amortised cost applied after 1 July 2018 where impairment allowances are included.

Financial assets are derecognised when the contractual rights to the cash flows from the financial asset have expired or where substantially all the risks and rewards of ownership have been transferred.

The Company sometimes renegotiates or otherwise modifies the contractual cash flows of loans to customers. The Company then assesses whether the new terms are substantially different from the original ones. If the terms of an asset are substantially different, it is derecognised and a new asset recognised at its fair value using its new effective interest rate. If the terms are not substantially different, the Company recalculates the gross carrying amount using the original effective interest rate and recognises a modification gain or loss in the income statement. Such modifications typically arise from forbearance because of financial difficulties of the borrower, with allowance already made for impairment. Any modification gain or loss is included in interest income. From 1 July 2018, a modified loan's credit risk is assessed to see if it remains higher than on initial recognition for the purposes of calculating expected credit losses.

#### *Financial liabilities*

The Company's financial liabilities, which largely consist of borrowings, are all classified as measured at amortised cost for both the current and prior period. All of the Company's financial liabilities are recognised initially at fair value, less any directly attributable transaction costs.

Financial liabilities are derecognised when their contractual obligations are discharged, cancelled or have expired. An exchange of financial liabilities with substantially different terms or a substantial modification to the terms of an existing financial liability is treated as an extinguishment of the original liability and the recognition of a new one. It is assumed that terms are substantially different if the discounted present value of the cash flows under the new terms is at least 10% different from the discounted present value of the remaining cash flows of the original liability. From 1 July 2018, all gains or losses on non-substantial modifications, calculated as a change in the net present value of future cash flows, are recognised immediately in the income statement. The Company may also consider qualitative factors in determining whether a modification is substantial. Prior to 1 July 2018, the Company's policy for such modifications was to defer related transaction costs as adjustments to the carrying value of the instrument, amortised over its remaining expected life.

# Notes to the financial statements (continued)

Unless otherwise indicated, all amounts are stated in £m

## 2. Significant accounting policies (continued)

### Impairment of financial assets

#### *Policy applicable from 1 July 2018*

From 1 July 2018, the Company recognises loss allowances for Expected Credit Losses (ECLs) on loans and advances to customers and any exposures arising from loan commitments. ECLs are a probability-weighted estimate of the present value of credit losses discounted over the expected life of an instrument at its original effective interest rate (EIR). Credit losses for financial assets are the difference between the contractual cash flows, including the amount of undrawn elements of existing facilities, which are expected to be drawn down, and the cash flows expected to be received.

The Company considers whether financial assets are credit impaired at each reporting date. A financial asset is credit impaired when one or more events that have a detrimental impact on its estimated future cash flows have occurred. Evidence of credit impairment includes:

- Significant financial difficulty of the borrower
- Breach of contract such as default, or becoming past due
- The granting of concessions to the borrower that the Company would not otherwise consider
- It becoming probable that the borrower will enter bankruptcy or other financial reorganisation.

For financial instruments on which credit risk has not increased significantly since initial recognition, the Company measures loss allowances at an amount equal to the 12-month ECL, i.e. the portion of lifetime ECL of those default events expected to arise within 12 months of the reporting date, weighted by probability of that event occurring. For all other financial instruments loss allowances are measured at an amount equal to the full lifetime ECL, i.e. the lifetime ECL arising from all default events that may occur over the life of the instrument, probability weighted. The latter category of instruments includes those that have objective evidence of impairment at the reporting date.

Besides instruments that become credit impaired on entering default, lifetime ECLs are also used for any that are credit impaired on origination. In the ordinary course of business the Company does not purchase or originate credit-impaired financial assets; management therefore considers any such balances to be immaterial.

If, due to the financial difficulties of the borrower, the terms of a financial asset are renegotiated or modified, or the asset is replaced with a new one, then an assessment is made of whether the asset should be derecognised. A loan to a borrower granted such concessions due to forbearance is considered to be credit impaired unless there is evidence that the risk of not receiving contractual cash flows has reduced significantly and there are no other indicators of impairment. In the latter case, the measurement of the loss allowance on the new asset will generally be based on a 12-month ECL.

Interest income is recognised at the effective rate on the gross carrying amount of a financial asset, i.e. before allowance for impairment, except for those assets which are credit impaired, for which interest income is recognised on the carrying amount net of the allowance for impairment.

Loans are written off when the Company expects no further recovery and the amount of the loss has been determined. The Company may continue to apply enforcement activities to loans written off and any subsequent recoveries are recognised as impairment gains in the income statement.

Loss allowances for ECL are presented in the statement of financial position as a deduction from the gross carrying amount of financial assets measured at amortised cost and as a provision in the case of loan commitments.

#### *Policy applicable before 1 July 2018*

Financial assets were impaired and impairment losses incurred if, and only if, there was objective evidence of impairment as a result of one or more loss events that occurred after the initial recognition of the assets and prior to the reporting date and that had an impact on the estimated future cash flows of the financial asset that could be reliably estimated.

For loans and receivables, the amount of the loss was measured as the difference between the loan's carrying amount and the present value of estimated future cash flows, excluding future credit losses that had not been incurred, discounted at the original effective interest rate. All impairment losses were reviewed at least at each reporting date. If subsequently the amount of the loss decreased as a result of a new event, the relevant element of the outstanding impairment loss was reversed. Impairment losses and any subsequent reversals were recognised in the income statement.

# Notes to the financial statements (continued)

Unless otherwise indicated, all amounts are stated in £m

## 2. Significant accounting policies (continued)

### Impairment of financial assets (continued)

#### *Policy applicable before 1 July 2018 (continued)*

Impairment losses were assessed individually for financial assets that were individually significant and individually or collectively for assets that were not individually significant. In making collective assessment of impairment, financial assets were grouped into portfolios on the basis of similar risk characteristics.

Future cash flows in a group of financial assets that were collectively evaluated for impairment were estimated on the basis of the contractual cash flows of the asset group and historical loss experience for assets with similar credit risk characteristics. Historical loss experience was adjusted on the basis of current observable data to reflect the effects of then-current conditions. In addition, the Company used its experienced judgement to correct model deficiencies and systemic risks where appropriate and supported by historic loss experience data. The use of such judgements and reasonable estimates was considered by management to be an essential part of the process and improved reliability.

Where a loan was uncollectable, it was written off against the related provision. Such loans were written off after all the necessary procedures had been completed and the amount of the loss determined. Subsequent recoveries of amounts previously written off were taken through the income statement.

### Securitisation

Where the Company securitises its own financial assets, this is achieved via the sale of these assets to a special purpose entity (SPE), which in turn issues securities to investors.

Financial assets transferred to SPEs under securitisation agreements are not derecognised by the Company because it retains the risks and rewards of ownership. The Company recognises a deemed loan liability to the SPE against which it offsets the subordinated notes in the securitisation which it holds. The amount of the loan notes reported represents the Company's net liability.

## 3. Critical accounting estimates and judgements

In applying the accounting policies set out above, the Company makes significant estimates and assumptions that affect the reported amounts of assets and liabilities. The critical judgements which have a significant impact on the financial statements are described in the relevant Note to the financial statements. These include:

- the determination of whether credit risk has increased significantly (described in Note 8);
- establishing if a substantial modification has occurred when refinancing our borrowing facilities (described in Note 2).

Our critical estimates are:

### a) Loan impairment allowances

The Company recognises loss allowances on loans and advances to customers using an ECL model approach. Key areas of estimation within the ECL models include those regarding the probability of default (PD), probability of possession given default (PPGD), loss given default (LGD) and forward-looking macroeconomic scenarios. Sensitivities included in the section below were performed by recalculating the impairment allowance by changing only those assumptions stated, and with all other variables unchanged.

# Notes to the financial statements (continued)

Unless otherwise indicated, all amounts are stated in £m

## 3. Critical accounting estimates and judgements (continued)

### *Loss given default*

The Group has an LGD model, which includes a number of estimated inputs including probability of possession given default, forced-sale discounts, discount periods and property valuations. The LGD is sensitive to property values, which are updated at each reporting date by indexing using established regional house price indices (HPI) to estimate the current security value and in some cases they are updated to reflect a more recent valuation of the security.

The LGD model uses current security values and forecast HPI assumptions to project property values for each of the economic scenarios. An immediate and sustained 10% relative reduction in forecast house prices, applied in each scenario, would result in an increase in the impairment allowance of £0.1m at 30 June 2019; conversely a 10% relative increase, would result in a decrease in the impairment allowance by £0.1m at 30 June 2019.

### *Multiple economic scenarios*

IFRS 9 contains a requirement that multiple economic scenarios are incorporated into the expected loss calculation. In practice, incorporating the effect of multiple economic scenarios is achieved by modelling an ECL for each scenario and taking a probability-weighted total. The Company has used a minimum of three probability weighted scenarios, including base, upside and downside scenarios. The most significant macroeconomic assumptions used for the ECL estimate are shown in Note 8. If, at 30 June 2019 a 100% weighting was applied to the downside scenario, an incremental £0.4m of impairment allowance would be required.

### *Probability of default and probability of possession given default*

In order to link the macroeconomic scenarios with the ECL calculation, it is necessary to determine which economic indicators are predictive of changes in credit performance and then develop a modelling approach which links these indicators to the calculations in our ECL. The Group's approach to modelling the probability of default is based on analysis of historical data, which is done in two stages, firstly to calculate raw PDs using a roll-rate approach, and secondly to apply scalars to the PDs to reflect the different macroeconomic scenarios.

The PPGD is the probability of the property being possessed post default. Historical experience of possessions are used to derive a probability, which is applied to the LGD within the calculation of the overall ECL. This probability reduces the expected losses for the proportion of accounts that we expect to cure or to redeem and will therefore not go into possession.

A 10% relative worsening of both PDs and PPGDs simultaneously would drive an increase in total impairment allowance by £0.1m at 30 June 2019. A 10% relative improvement of both PDs and PPGDs simultaneously would result in a decrease in the impairment allowance by £0.1m at 30 June 2019.

## **b) Revenue**

### *Interest income*

The effective interest rate method applies a rate that discounts estimated future cash payments or receipts relating to a financial instrument to its net carrying amount. The estimated future cash flows take into account all contractual terms of the financial instrument including transaction costs and all other premiums or discounts but not future credit losses. Models are reviewed at least annually to assess expected behavioural lives of groups of assets based upon actual repayment profiles.

# Notes to the financial statements (continued)

Unless otherwise indicated, all amounts are stated in £m

## 4. Interest receivable and similar income

	2019	2018
<b>Interest on loans and advances to customers</b>	<b>1.9</b>	<b>4.3</b>

Included within interest on loans and advances to customers is £0.1m (2018: £0.2) relating to impaired loans.

## 5. Interest payable and similar charges

	2019	2018
Interest payable on borrowings	0.1	0.5
Interest payable to parent company	0.4	0.3
<b>Interest payable and similar charges</b>	<b>0.5</b>	<b>0.8</b>

## 6. Administrative expenses

	2019	2018
<b>Administrative costs</b>	<b>0.4</b>	<b>0.8</b>

Company overheads, including directors' emoluments, wages and salaries, office administration costs, and auditor remuneration are borne by a fellow subsidiary company of Together Financial Services Limited, Blemain Finance Limited and are recharged to companies within the Group based on operational and financial drivers.

The audit fee borne by Blemain Finance Limited (a separate group company) in respect of the Company in 2019 was £2,000 (2018: £2,000).

## 7. Income tax

	2019	2018
<b>Current tax</b>		
Corporation tax	0.1	0.4
<b>Total current tax</b>	<b>0.1</b>	<b>0.4</b>
<b>Deferred tax</b>		
Origination and reversal of temporary differences	0.1	-
<b>Total deferred tax (Note 10)</b>	<b>0.1</b>	<b>-</b>
<b>Total tax on profit</b>	<b>0.2</b>	<b>0.4</b>

Corporation tax is calculated at 19.00% (2018: 19.00%) of the estimated profit for the year.

The differences between the Company tax charge for the year and the amount calculated by applying the standard rate of UK corporation tax to the profit before tax are as follows:

	2019	2018
<b>Profit before tax</b>	<b>1.1</b>	<b>2.4</b>
Tax on profit at standard UK corporation tax rate of 19.00%	0.2	0.5
<b>Effects of:</b>		
Adjustment in respect of prior years	-	(0.1)
<b>Tax charge for year</b>	<b>0.2</b>	<b>0.4</b>

A reduction in the UK corporation tax rate from 20% to 19% (effective from 1 April 2018) was substantively enacted on 26 October 2015, and an additional reduction to 17% (effective from 1 April 2020) was substantively enacted on 6 September 2017. This will reduce the Company's current tax charge accordingly. The deferred tax asset at 30 June 2019 has been calculated based on these rates.

# Notes to the financial statements (continued)

Unless otherwise indicated, all amounts are stated in £m

## 8. Loans and advances to customers

2019 – IFRS 9					2018 IAS 39
	Stage 1:	Stage 2:	Stage 3:	Total	
Gross loans and advances	-	6.3	3.2	9.5	14.9
Loss allowance	-	(0.1)	(0.4)	(0.5)	(0.7)
	-	6.2	2.8	9.0	14.2

Comparative amounts for 2018 reflect the measurement basis under IAS 39. On transition to IFRS 9, loans and advances to customers of £0.4m that were fully impaired were written off, with no net impact on amortised cost due to a change in our accounting policy for write-offs from 1 July 2018.

Gross loans and advances are contractually repayable:

	2019	2018
Due within one year	9.4	13.6
Due within 1-5 years	0.1	1.3
Due after five years	-	-
	9.5	14.9

### Measurement of expected credit losses (ECL)

#### *ECL model*

The Company considers whether financial assets are credit impaired at each reporting date. For these purposes, it considers default to occur, and such loans are considered to be credit impaired, in any of the following circumstances relating to a loan:

- It becomes 90 days or more past due
- Its security has been taken into possession
- The appointment of receivers
- There is evidence of fraud

The Company calculates its ECL using a statistical model based on probability of default (PD), loss given default (LGD) and exposure at default (EAD):

- PD is an estimate of the likelihood of default over a given time horizon, estimated at a point in time. The calculation is based on statistical models that utilise both market and internal data, based on current conditions adjusted to take into account estimates of future conditions that will impact PD.
- LGD is an estimate of the likely loss in the event of a default. The expected loss amounts vary according to loan-to-value (LTV) ratios and future collateral prices. The estimates are based on the Group's history of recovery rates, calculated as forced-sale discounts, and the probability of possession given default, discounted at the original effective interest rate of the loan for the average period for recovery of sale proceeds. The LGD calculation includes floors, i.e. minimum losses, which are assigned based on the LTV of the loan and the type of security and have been developed from historical data.
- EAD is an estimate of the expected gross carrying amount at a future default date. EAD is based on the current loan amount adjusted for expected repayments of principal, contractual drawdowns of loan commitments, and the impact of missed payments which would be expected for an account in default.

# Notes to the financial statements (continued)

Unless otherwise indicated, all amounts are stated in £m

## 8. Loans and advances to customers (continued)

### *Measurement of expected credit losses (ECL) (continued)*

#### *ECL model (continued)*

ECL is calculated at an individual loan level as the product of probability of default (PD), loss given default (LGD) and exposure at default (EAD), discounted at the original effective rate to the reporting date. It is measured using the risk of default over the maximum contractual period adjusted for expected customer prepayment behaviour.

In accordance with IFRS 9, the Company uses a three-stage model for impairment based on changes in credit quality since initial recognition:

- A financial instrument not credit-impaired on initial recognition is classified in stage 1. The loss allowance for such instruments is calculated as the portion of lifetime ECL of those default events expected to occur within 12 months of the reporting date, weighted by the probability of that default occurring.
- An instrument moves to stage 2 if there is an increase in its credit risk that is significant but not such that the instrument is considered credit impaired. The loss allowance for stage 2 instruments is calculated as the lifetime ECL. The determination of significant increases in credit risk is explained further, later in this section.
- Stage 3 instruments are credit impaired and the loss allowance calculated as the lifetime ECL.

Improvements in credit quality may result in instruments moving categorisation, from stage 3 to stage 2 where they are no longer considered credit impaired or to stage 1 where the credit risk is no longer significantly increased compared with initial recognition. Such transitions occur only after the completion of probationary periods.

#### *Incorporation of forward-looking information*

The Company uses forward-looking information in its measurement of ECL and in identifying significant increases in credit risk, which is discussed in the next section. The Company's statistical analysis of historical data has confirmed that the key economic variables that drive credit risk, and the ECL for the Company's financial instruments, are unemployment, Bank Rate<sup>5</sup>, economic activity as measured by Gross Domestic Product (GDP), and changes in house prices. The Company uses a range of forecast economic scenarios, drawing on external forecasts where appropriate, and calculates ECL using a base case, an upside and a downside scenario, weighted 40%, 30% and 30% respectively. The base case is aligned to the Company's internal planning assumptions.

The most significant assumptions used for the ECL estimate as at 1 July 2018 and 30 June 2019 are in the following ranges for the next ten years:

At 30 June 2019	Minimum	Average	Maximum
Annual GDP growth (%)	(1.1)	1.6	3.6
Bank Rate (%)	0.00	1.50	2.75
Unemployment rate (%)	3.2	4.1	6.2
Annual change in house-price index (%)	(8.7)	2.6	10.4

At 1 July 2018	Minimum	Average	Maximum
Annual GDP growth (%)	(0.6)	1.7	3.3
Bank Rate (%)	0.25	2.00	3.5
Unemployment rate (%)	3.0	4.3	6.0
Annual change in house-price index (%)	(6.2)	3.0	8.7

To project the economic variables for the remaining term of each instrument, it is assumed that the forecasts used in all scenarios revert to our long-term base case forecast beyond a ten year horizon.

<sup>5</sup> Bank Rate refers to Bank of England Bank Rate

# Notes to the financial statements (continued)

Unless otherwise indicated, all amounts are stated in £m

## 8. Loans and advances to customers (continued)

### Measurement of expected credit losses (ECL) (continued)

#### Significant increase in credit risk

The Company monitors all financial instruments that are subject to credit risk to assess whether there has been a significant increase in credit risk since initial recognition. If there has been a significant increase then the Company measures the loss allowance based on a lifetime rather than a 12-month ECL.

To determine whether credit risk has increased significantly the Company uses quantitative criteria, such as increases in lifetime PD and LTV, and qualitative criteria such as a borrower's status or credit quality. A 'backstop' criterion is also applied such that all loans more than 30 days past due are considered to have undergone a significant increase in credit risk.

#### Movement in loss allowance

##### Loss allowance

A loss allowance is derived from the application of the accounting policies for measurement of ECL as explained in Note 2. The following table analyses the movement of the loss allowance during the year. Comparative amounts for 2018 represent the allowance for credit losses and reflect the measurement basis under IAS 39.

	2019 (IFRS 9 basis)			Total
	Stage 1: 12-month ECL	Stage 2: Lifetime ECL not credit impaired	Stage 3: Lifetime ECL credit impaired	
<b>Loss allowance</b>				
<b>Loss allowance at beginning of year</b>	(0.1)	(0.3)	(0.3)	(0.7)
Transfer to lifetime ECL not credit impaired	0.1	(0.1)	-	-
Transfer to lifetime ECL credit impaired	-	-	(0.1)	(0.1)
Other changes in credit risk during the year	-	0.1	-	0.1
Impairment of interest income on stage 3 loans	-	-	(0.1)	(0.1)
Financial assets derecognised including write-offs	-	0.2	-	0.2
<b>Impairment losses for the year charged to income statement</b>	<b>0.1</b>	<b>0.2</b>	<b>(0.2)</b>	<b>0.1</b>
Unwind of discount (recognised within interest receivable)	-	-	0.1	0.1
<b>At end of year</b>	<b>-</b>	<b>(0.1)</b>	<b>(0.4)</b>	<b>(0.5)</b>

Transfers between stages are presented to show the change in ECL, including any remeasurement, on the transition of loans between stages. Changes in credit risk include the development or cure of loan arrears and other changes in status.

## Notes to the financial statements (continued)

Unless otherwise indicated, all amounts are stated in £m

### 8. Loans and advances to customers (continued)

#### *Movement in loss allowance (continued)*

#### *Loss allowance (continued)*

Allowance for impairment losses on an IAS 39 basis	2018
At beginning of year	(0.6)
Charges to the income statement	(0.3)
Unwind of discount	0.2
At end of year	(0.7)

Loan and redemption receipts of £5.4m resulted in a release of ECLs totalling £0.2m.

#### *Impairment losses for the year*

	2019	2018
Movements in impairment allowance, charged to income	0.1	(0.3)
Charge to income statement	0.1	(0.3)

### 9. Other assets

	2019	2018
Amounts owed by group undertakings	-	0.1
	-	0.1

Amounts owed by group undertakings are repayable on demand.

### 10. Deferred tax asset

	2019	2018
At beginning of the year	0.2	0.2
Charge to income statement	(0.1)	-
IFRS 9 transition adjustment	0.1	-
At end of year	0.2	0.2

The deferred tax asset consisted of the following:

Short-term timing differences	0.2	0.2
-------------------------------	-----	-----

## Notes to the financial statements (continued)

Unless otherwise indicated, all amounts are stated in £m

### 11. Borrowings

	2019	2018
Amounts owed to Charles Street ABS	0.1	2.0
Amounts owed to Lakeside ABS	1.3	4.1
Amounts owed to Delta ABS	-	0.4
<b>Total borrowings</b>	<b>1.4</b>	<b>6.5</b>

The loan notes are provided through revolving securitisation vehicles provided by Charles Street ABS and Lakeside ABS, in which the Company and a number of fellow Group subsidiaries participate. Under the facilities, the participants sell beneficial title to certain mortgage assets to the securitisation vehicles. The Company recognises a corresponding deemed loan liability against which it offsets the subordinated notes it holds in the securitisation. The amount of the liability reported represents the Company's net liability. Amount owed to Delta ABS in 2018 was repaid during the year.

### 12. Other liabilities

	2019	2018
Accruals and deferred income	0.4	-
Amounts owed to group undertakings	4.2	5.1
	<b>4.6</b>	<b>5.1</b>

Amounts owed to group undertakings are repayable on demand.

### 13. Share capital

All amounts are stated in pounds.

<b>Authorised, called-up, allotted and fully paid</b>	2019	2018
1 ordinary share of £1 each	<b>1</b>	<b>1</b>

# Notes to the financial statements (continued)

Unless otherwise indicated, all amounts are stated in £m

## 14. Financial instruments and fair values

All the Company's financial assets and liabilities are held at amortised cost. The carrying value is a reasonable approximation of fair value for all financial instruments other than for loans and advances to customers and for borrowings. For loans and advances to customers and for borrowings, fair value is calculated based upon the present value of future principal and interest cash flows, discounted at the market rate of interest at the reporting date. The fair value of financial assets is adjusted for expected credit losses under IFRS 9 in the current year, and incurred losses under IAS 39 in prior years.

The following table summarises the carrying and fair values of loans and advances and of borrowings as at the year end, analysing the fair values into the three different valuation levels:

**Level 1:** Quoted prices in active markets for identical assets or liabilities;

**Level 2:** Measurements derived from observable data, such as market prices or rates;

**Level 3:** Measurements rely on significant inputs not based on observable market data.

	Level 1	Level 2	Level 3	Fair value	Carrying value
<b>2019</b>					
<b>Financial assets</b>					
Loans and advances to customers	-	-	9.0	9.0	9.0
<b>Financial liabilities</b>					
Borrowings	-	1.4	-	1.4	1.4
<b>2018</b>					
<b>Financial assets</b>					
Loans and advances to customers	-	-	15.3	15.3	14.2
<b>Financial liabilities</b>					
Borrowings	-	6.5	-	6.5	6.5

The Company ceased to originate new loans but continues to service a closed loan portfolio. The majority of the loans and advances are due to mature within one year and are in stages 2 and 3; therefore the carrying value of the loans and advances to customers is deemed to be a reasonable approximation of fair value of the assets.

Borrowings are made up principally of the deemed loans, which are provided through a securitisation vehicle and are secured on specific loan assets of the Company and the fair value has been calculated with reference to the estimated fair value of the corresponding loan notes issued by the securitisation vehicles.

## Notes to the financial statements (continued)

Unless otherwise indicated, all amounts are stated in £m

### 15. Credit risk

Credit risk is the risk arising as result of default by customers or counterparties due to failure to honour obligations when they fall due.

#### Maximum exposure to credit risk

The Company's maximum exposure to credit risk after allowance for impairment is as follows:

	2019	2018
Gross loans and advances	9.5	14.9
Allowance for impairment	(0.5)	(0.7)
<b>Loans and advances to customers</b>	<b>9.0</b>	<b>14.2</b>
Other assets:		
Amounts owed by group undertakings	-	0.1
Cash and balances at bank	0.7	0.5
	<b>9.7</b>	<b>14.8</b>

An impairment allowance is held against the gross exposures on loans and advances to customers. Prior to 1 July 2018, this was measured on an incurred loss basis under IAS 39. Since 1 July 2018, this has been measured on an expected credit loss basis under IFRS 9. Further details on the Company's expected credit loss methodology, and the movement in impairment losses through the year, are shown in Note 8 to the financial statements.

#### Collateral held

A key measure the business uses in assessing credit risk is the ratio of the loan amount to the value of the underlying security (LTV). Prior valuations are indexed using established regional house price indices to estimate the current security value. The table below shows gross customer balances by indexed LTV banding:

	2019	2018
60% or less	5.4	8.3
60-85%	3.8	5.8
85-100%	0.2	0.6
More than 100%	0.1	0.2
<b>Gross loans and advances</b>	<b>9.5</b>	<b>14.9</b>

## Notes to the financial statements (continued)

Unless otherwise indicated, all amounts are stated in £m

### 15. Credit risk (continued)

#### Concentration of credit risk

The Company's lending portfolio is geographically diversified across the UK as shown below:

	2019 %	2018 %
East Anglia	1.0	3.0
East Midlands	3.3	2.5
London regions	27.5	22.8
North East	2.6	1.8
North West	22.2	25.0

#### Forbearance

The Company offers forbearance to assist customers who are experiencing financial distress. The Company considers an account as forbore at the time a customer in financial difficulty is granted a concession. The offer of forbearance is considered separately for each customer dependent on their individual circumstances.

## Notes to the financial statements (continued)

Unless otherwise indicated, all amounts are stated in £m

### 16. Related party transactions

#### Relationships

The Company has the following related parties:

Entity	Nature of transactions
Charles Street Commercial Investments Limited (CSCIL)	The Company and CSCIL collect payments from customers they have in common and transfer any sums belonging to the other entity.

Balances due to or from the above entities are interest-free and repayable on demand, unless otherwise stated.

#### Transactions

The amount receivable from and payable to related party by the Company are disclosed in Notes 9 and 12 to the financial statements. The Company had no other transactions during the year apart from movement in related party balance.
