Statement of Directors' responsibilities

The Directors are responsible for preparing the Directors' report and the financial statements in accordance with applicable law and regulations

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law). Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that year. In preparing these financial statements, the Directors are required to

- select suitable accounting policies and then apply them consistently,
- make judgements and estimates that are reasonable and prudent,

The Directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Company's transactions and disclose with reasonable accuracy at any time the financial position of the Company and to enable them to ensure that the financial statements comply with the Companies Act 2006. Our audit work has been undertaken so that we might state to the Company's shareholder those matters we are required to state to them in an auditor's report and for no other purpose. This includes an assessment of whether the accounting policies are appropriate to the Company's circumstances and have been consistently applied and adequately disclosed, the reasonableness of significant accounting estimates made by the Directors; and the overall presentation of the financial statements. In addition, we read all the financial and non-financial information in the Directors' report to identify material inconsistencies with the audited financial statements. Trading Stocks

The investments held in traded endowment life policies represent the estimated fair value of endowment life policies, being the surrender value as notified by the underlying life offices. The risks that attach to these trading stocks include market risk, credit risk and liquidity risk. As the value is based on inputs other than quoted prices, the traded endowment policies fall within the level 2 classification under FRS 26

The fair value of financial assets and liabilities that are not traded in an active market is determined by using valuation techniques. The fair value of endowment life policies held by the Partnership is stated at the surrender value of these policies as at the year end. The surrender values are sourced from the respective life houses. These valuations are monitored by the administrator to the Partnership, qualified actuaries and the General Partner to the Partnership on a six monthly basis

7. Financial risk management (continued)

The Partnership measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1)
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as active market data) or indirectly (that is, derived from active market data) (level 2)
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (level 3)

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety

The determination of what constitutes 'observable' and assessing the significance of a particular input to the fair value measurement in its entirety requires significant judgement by the General Partner considering factors specific to the asset or liability. The Partnership considers observable to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. The following table analyses within the fair value hierarchy the Partnership's financial assets and liabilities (by level) measured at fair value

Credit risk

Credit risk is the risk that one party to financial asset will cause a financial loss for the other party by failing to discharge an obligation. This includes counterparty and issuer risk which arises from each life house as issuer of each endowment policy held by the Partnership. This is monitored by the General Partner in consultation with the administrator to the Partnership and qualified actuaries, with the review performed on a six monthly basis.

Market risk

The surrender values of the underlying endowment policies are sourced from the issuing life houses. These valuations are in part dependent on to the market performance and credit ratings of each associated life house. This is monitored by the General Partner in consultation with the administrator to the Partnership and qualified actuaries, with the review performed on a six monthly basis.

Liquidity risk

The Partnership holds investments in endowment life policies, each having a range of maturity dates. A risk arises that the Partnership may not be able to meet its loan repayments depending on the cash flow on the sale and maturity on underlying endowment policy investments. This is monitored by the General Partner in consultation with the administrator to the Partnership and qualified actuaries, with the review performed on a six monthly basis. The Partnership has a loan agreement in place with UniCredit AG as at the year-end which secures credit facilities until 30 June 2015.
