Interest rate risk

The Company's policy is to avoid interest rate risk. Any movement in interest rates associated with the financing of the lease is charged or credited to the lessee.

Credit risk

Credit risk is the risk arising from the possibility that the Company will incur losses from the failure of lessees to meet their obligations. Credit risk is managed through The Royal Bank of Scotland plc Group Credit Risk Management Framework to enable the Group to achieve appropriate risk versus reward performance whilst maintaining credit risk exposure in line with approved risk appetite on a Group basis. The Framework encompasses credit risk assessment prior to the approval of any credit exposure, and the control and monitoring of these exposures against approved limits. The Company has credit exposure to one finance lessee. The gross investment in the lease less unearned finance income represents the maximum credit exposure.

The Company follows the policy and practice on payment of creditors determined by The Royal Bank of Scotland Group plc ('RBSG'), as outlined below

RBSG is committed to maintaining a sound commercial relationship with its suppliers Consequently, it is RBSG's policy to negotiate and agree terms and conditions with its suppliers, which includes the giving of an undertaking to pay suppliers within 30 days of receipt of a correctly prepared invoice submitted in accordance with the terms of the contract or such other payment period as may be agreed

NOTES TO THE FINANCIAL STATEMENTS

1 SIGNIFICANT ACCOUNTING POLICIES

a BASIS OF ACCOUNTING

The financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as adopted for use in the EU

The financial statements have been prepared on the historical cost basis. The principal accounting policies are set out below

b INCOME UNDER FINANCE LEASES

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee

Finance lease income, which includes the amortisation of the investment in the lease, is allocated to accounting periods so as to reflect a constant periodic rate of return on the net investment outstanding in respect of the leases

c BORROWING COSTS

All borrowing costs are recognised as an expense in the period in which they are incurred

d TAXATION

Provision is made for taxation at current enacted rates on taxable profits, arising in income or in equity, taking into account relief for overseas taxation where appropriate

Deferred taxation is accounted for in full for all temporary differences between the carrying amount of an asset or liability for accounting purposes and its carrying amount for tax purposes, except in relation to overseas earnings where remittance is controlled by the Group, and goodwill

Deferred tax assets are only recognised to the extent that it is probable that they will be recovered

e AMOUNTS RECEIVABLE UNDER FINANCE LEASES

A lease is recognised when there is a contractual right to the asset's cash flows and derecognised when all contractual rights and obligations expire. Amounts due from lessees under finance leases are recorded as receivables at the amount of the net investment in the leases. The difference between the gross receivable and the present value of the receivable is recognised as unearned finance income.

Progress payments made prior to the commencement of the primary lease are included at cost together with the amount of any interest charged on such payments

f TRADE RECEIVABLES

Trade receivables are measured at initial recognition at fair value, and are subsequently measured at amortised cost using the effective interest rate method. Appropriate allowances for estimated irrecoverable amounts are recognised in profit or loss when there is objective evidence that the asset is impaired. The allowance recognised is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the effective interest rate computed at initial recognition.

a CASH AND CASH EQUIVALENTS

Cash and cash equivalents comprise cash on hand and demand deposits, and other short-term highly liquid investments that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value

h BANK BORROWINGS

Interest-bearing bank loans and overdrafts are recorded at the proceeds received, net of direct issue costs. Finance charges, including premiums payable on settlement or redemption and direct issue costs, are accounted for on an accruals basis in the profit or loss using the effective interest rate method and are added to the carrying amount of the instrument to the extent that they are not settled in the period in which they arise
