The directors of the group have established objectives and policies for managing financial risks to enable the group and the company to achieve its long-term shareholder value growth targets within a prudent risk management framework. These objectives and policies are regularly reviewed.

Exposure to counterparty credit risk and liquidity risk arises in the normal course of the company's business and is managed within parameters set by the directors.

Counterparty credit exposures are monitored by individual counterparty and by category of credit rating, and are subject to approved limits. Exposure to credit risk is limited predominantly to exposures with other Centrica group companies or exposure to credit risk arises in the normal course of operations as a result of the potential for a customer defaulting on their payable balance. In the case of business customers credit risk is managed by checking a company's creditworthiness and financial strength both before commencing to trade and during a business relationship. For residential customers, creditworthiness is ascertained normally before commencing to trade by reviewing an appropriate mix of internal and external information. An ageing of receivables is monitored and used to manage the exposure to credit risk.

Cash forecasts identifying the liquidity requirements of the company are produced frequently and reviewed regularly to ensure there is sufficient financial headroom for at least a 12 month period.

Centrica KPS Limited

Notes to the financial statements for the year ended 31 December 2007

1 Statement of accounting policies

These financial statements are prepared on the going concern basis, under historical cost convention and in accordance with the Companies Act 1985 and the applicable United Kingdom accounting standards. The principal accounting policies are set out below.

Turnover

Turnover is recognised on an accruals basis and principally relates to the sale of power generation capacity to a fellow group undertaking during the year in accordance with the capacity tolling arrangement.

Tangible Fixed assets

Tangible fixed assets are stated at cost less accumulated depreciation. Depreciation is charged on all fixed assets, other than freehold land and gas turbine components in the course of a major overhaul and assets in the course of construction. Depreciation is provided at rates calculated to write-off the cost of each asset on a straight line basis over its expected useful life as follows for these asset classes:

- Power Station assets 20 years
- Other plant and machinery 3-6 years

For gas turbine components depreciation is provided to write off the cost of the assets over their operating lives on an equivalent operating hours basis.

Overhaul Costs

Contract work involved in replacing gas turbine components are capitalised and depreciated over their expected economic life, typically over the period to the next overhaul. Repairs and other costs that are not of a capital nature are charged directly to the profit and loss account as incurred.

Stocks

Stocks are stated at the lower of cost incurred in bringing each item to its present location and condition and net realisable value. Provision is made where necessary for obsolete, slow moving and defective stocks.

Deferred taxation

Current tax, including UK corporation tax, is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantially enacted by the balance sheet date.

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date. Timing differences are differences between the company's taxable profits and its results as stated in the financial statements.

Deferred tax is measured at the tax rates that are expected to apply in the years in which the timing differences are expected to reverse, based on the tax rates and laws that have been enacted or substantively enacted at the balance sheet date. Deferred tax is measured on a non-discounted basis.

Centrica KPS Limited

Notes to the financial statements for the year ended 31 December 2007 (continued)

1 Statement of accounting policies (continued)

Deferred taxation (continued)

Current tax, including UK corporation tax, is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantially enacted by the balance sheet date

Decommissioning provision

Provision is made for the net present value of the estimated cost of decommissioning the power station at the end of its useful life, based on price levels and technology at the balance sheet date

Changes in these estimates and changes to the discount rates are dealt with prospectively. When this provision gives access to future economic benefits, a decommissioning asset is recognised and amortised on a straight-line basis over the useful life of the facility. The unwinding of the discount on the provision is included in the profit and loss account within interest expense.

Operating leases

Rentals under operating leases are charged to the profit and loss account on a straight line basis over the lease term.

2 Cash flow statements and related party disclosures

The company is a wholly-owned subsidiary of GB Gas Holdings Limited and is included in the consolidated financial statements of Centrica plc, which are publicly available. Consequently, the company has taken advantage of the exemption from preparing a cash flow statement under the terms of financial reporting standard 1 "Cash Flow Statements".
