NOTES TO THE FINANCIAL STATEMENTS

1 SIGNIFICANT ACCOUNTING POLICIES

a BASIS OF ACCOUNTING

The financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as adopted for use in the EU for the first time. The disclosures required by IFRS 1 concerning the transition from UK GAAP to IFRS are given in Note 19.

The financial statements have been prepared on the historical cost basis. The principal accounting policies are set out below.

b INCOME UNDER FINANCE LEASES

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee.

Finance lease income, which includes the amortisation of the investment in the lease, is allocated to accounting periods so as to reflect a constant periodic rate of return on the net investment outstanding in respect of the leases.

c TAXATION

Provision is made for taxation at current enacted rates on taxable profits, arising in income or in equity, taking into account relief for overseas taxation where appropriate.

Deferred taxation is accounted for in full for all temporary differences between the carrying amount of an asset or liability for accounting purposes and its carrying amount for tax purposes, except in relation to overseas earnings where remittance is controlled by the Group, and goodwill.

Deferred tax assets are only recognised to the extent that it is probable that they will be recovered.

d AMOUNTS RECEIVABLE UNDER FINANCE LEASES

A lease is recognised when there is a contractual right to the asset's cash flows and derecognised when all contractual rights and obligations expire. Amounts due from lessees under finance leases are recorded as receivables at the amount of the net investment in the leases. The difference between the gross receivable and the present value of the receivable is recognised as unearned finance income.

Progress payments made prior to the commencement of the primary lease are included at cost together with the amount of any interest charged on such payments.

e TRADE RECEIVABLES

Trade receivables are measured at initial recognition fair value, and subsequently measured at amortised cost using the effective interest rate method. Appropriate allowances for estimated irrecoverable amounts are recognised in profit or loss when there is objective evidence that the asset is impaired. The allowance recognised is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the effective interest rate computed at initial recognition.

f CASH AND CASH EQUIVALENTS

Cash and cash equivalents comprise cash on hand and demand deposits, and other short-term highly liquid investments that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value.

g BANK BORROWINGS

Interest-bearing bank loans and overdrafts are recorded at the proceeds received, net of direct issue costs. Finance charges, including premiums payable on settlement or redemption and direct issue costs, are accounted for on an accruals basis in the profit or loss using the effective interest rate method and are added to the carrying amount of the instrument to the extent that they are not settled in the period in which they arise.

The change to both finance lease receivables and revenue is partly attributable to the move from the actuarial after tax to actuarial before tax method of valuing finance lease receivables and finance income as detailed by IAS 17

The change to administrative expenses is due to fees previously expensed as incurred under UKGAAP, which now are spread over the life of the lease under IFRS as detailed in IAS 17. The spread fees are disclosed within revenue as amortisation. All fee expenses under IFRS are capitalised within finance lease receivables. The movement in trade and other receivables is because under UKGAAP, fees that were not expensed as incurred were capitalised as a debtor.

The change to trade and other payables and other operating income, is due to fee income, which was previously credited as incurred within other operating income under UKGAAP, and is now spread over the life of the lease under IFRS as detailed in IAS 18. The spread fee income is disclosed within other operating income and the accrued liability within trade and other payables.

The movement in trade and other payables, deferred taxation and the tax charge is due to the taxable changes in the valuation method and expense treatment.
