- make judgments and accounting estimates that are reasonable and prudent;

2 Significant accounting policies

Basis of preparation

The company meets the definition of a qualifying entity under FRS 100 (Financial Reporting Standard 100) issued by the Financial Reporting Council. The financial statements have therefore been prepared in accordance with FRS 101 (Financial Reporting Standard 101) 'Reduced Disclosure Framework' as issued by the Financial Reporting Council. This transition was effected prior year and did not have a material impact on the financial statements.

As permitted by FRS 101, the company has taken advantage of the disclosure exemptions available under that standard, for all periods presented, in relation to business combinations, financial instruments, capital management, presentation of comparative information in respect of certain assets, share based payments, presentation of a cash-flow statement and standards not yet effective.

Where relevant, equivalent disclosures have been given in the group financial statements of SEGRO plc. The group financial statements of SEGRO plc are available to the public and can be obtained as set out in note 13.

The financial statements have been prepared on the historical cost basis, except for the revaluation of certain properties and financial instruments that are measured at revalued amounts or fair values at the end of each reporting period, as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for the goods and services. The principal accounting policies adopted are set out below.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement purposes in these financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of IFRS 2, leasing transactions that are within the scope of IAS 17, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in IAS 2 or value in use in IAS 36.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

Brixton (Trafford Point, Trafford Park) Limited

Notes to the Financial Statements for the Year Ended 31 December 2015 (continued)

Going concern

The Company's business activities, together with the factors likely to affect its future development and position, are set out in the Strategic Report on page 2 and 3.

The financial statements have been prepared on a going concern basis, as the Directors intend the Company to maintain the same level of activity during the forthcoming year. The Company is funded via an inter-company non-current account provided by the Company's ultimate parent, SEGRO plc, which has confirmed its continuing financial support and therefore the directors consider the Company is in a position to meet its liabilities as they fall due.

The Directors, having assessed the responses of the Directors of the Company's ultimate parent SEGRO plc to their enquiries have no reason to believe that a material uncertainty exists that may cast significant doubt about the ability of the SEGRO plc group to continue as a going concern or its ability to continue with the current banking arrangements.

On the basis of their assessment of the Company's financial position and of the enquiries made of the Directors of SEGRO plc, the Company's Directors have a reasonable expectation that the Company will be able to continue in operational existence for the foreseeable future. Thus they continue to adopt the going concern basis of accounting in preparing the annual financial statements.

Trade creditors

Trade and other creditors are initially measured at fair value, net of transaction costs and subsequently measured at amortised costs using the effective interest method.

Taxation

Tax is recognised in profit or loss, except that a change attributable to an item of income or expense recognised as other comprehensive income is also recognised directly in other comprehensive income.

Income tax on the profit for the year comprises current and deferred tax. Current tax is the tax payable on the taxable income for the year and any adjustment in respect of previous years.

Deferred tax is provided in full using the balance sheet liability method on temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is determined using tax rates that have been enacted or substantively enacted by the reporting date and are expected to apply when the asset is realised or the liability is settled.

No provision is made for temporary differences (i) arising on the initial recognition of assets or liabilities, other than a business combination, that affect neither accounting nor taxable profit and (ii) relating to investments in subsidiaries to the extent that they will not reverse in the foreseeable future.

Deferred tax assets are recognised to the extent that it is probable that suitable taxable profits will be available against which deductible temporary differences can be utilised.

Preference Share Capital

Redeemable preference shares are classified as financial liabilities and have been presented as non current liabilities within the balance sheet.

3 Critical accounting judgements

Summary of significant accounting policies and key accounting estimates

Management are required to make judgements, estimates and associated assumptions about the carrying amount of the assets and liabilities that are not readily apparent from other sources.

The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates is revised if the revision affects only that period, or in the period of the revisions and future periods if the revision affects both current and future periods.

The principal accounting policies applied in the preparation of these financial statements are set out above. These policies have been consistently applied to all the years presented, unless otherwise stated.

4 Administrative expenses

Employees

There were no employees directly employed by the Company in either year.

Audit fees

A notional charge of £2,000 (2014: £2,000) per Company is deemed payable to Deloitte LLP in respect of the audit of the financial statements. The actual amounts payable to Deloitte LLP are paid at group level by SEGRO plc.

Fees payable to Deloitte LLP and their associates for non-audit services to the Company are not required to be disclosed because the consolidated financial statements of the parent company are required to disclose such fees on a consolidated basis.

Directors' remuneration

The Directors received no remuneration in respect of their services to the Company during the year (2014: £nil). Some of the Directors are also Directors of SEGRO plc, the Company's ultimate holding company, and the remuneration of these Directors is disclosed in the financial statements of that Company.

As a result, no UK corporation tax should be due on future income or capital gains in respect of investment properties within the REIT group, of which the Company is a member.
