The Directors are responsible for preparing the Directors' Report and the financial statements in accordance with applicable law and regulations

Company law requires the Directors to prepare financial statements for each financial year. Under that law they have elected to prepare the financial statements in accordance with IFRSs as adopted by the EU and applicable law.

Under company law the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that period. In preparing these financial statements, the Directors are required to

- select suitable accounting policies and then apply them consistently,
- make judgements and estimates that are reasonable and prudent,
- state whether they have been prepared in accordance with IFRSs as adopted by the EU, and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The Directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006. 9 Financial instruments

Financial risks

A financial instrument is a contract that gives rise to a financial asset of one entity and a financial liability of another entity. The principal financial risks to which the Company is exposed are liquidity risk, market risk and credit risk, these are monitored on a regular basis by management. Each of these is considered below.

Liquidity risk

Liquidity risk is the risk that the Company is not able to meet its financial obligations as they fall due or can do so only at excessive cost. The Company's liquidity policy is to maintain sufficient liquid resources to cover imbalances and fluctuations in funding, to maintain solvency of the Company and to enable the Company to meet its financial obligations as they fall due. This is achieved through maintaining a prudent level of liquid assets and through rigorous management control of the growth of the business.

The following are contractual maturities of financial liabilities, including interest payments and excluding the impact of netting agreements.

	Carrying amount £000	Contractual cash flows £000	In not more than one month £000	In not more than 3 months £000	In more than 3 months but less than 1 year £000	In more than one year but not more than 5 years £000
Amounts owing to group companies	1,326	1,326	1,326	-	-	-
Total	1,326	1,326	1,326	-	-	-

There are no differences between the fair values of financial assets and liabilities and their carrying amounts showing in the Statement of Financial Position.

Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises two types of risk: interest rate risk and currency risk.

Currency risk

The Company is not exposed to any currency risk as all transactions are denominated in Sterling.

Interest rate risk

The Company has no external interest bearing liabilities, excluding intra-group loans. The Company monitors any exposure to interest rate risk on a continuous basis.

Credit risk

Credit risk is the risk of financial loss to the Company if a customer fails to meet its contractual obligations, and arises principally from the Company's receivables from customers or other group undertaking. As the Company does not trade it has limited exposure to credit risk.

Capital management

The Board's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. There were no changes in the Company's approach to capital management during the year. The Company is not subject to externally imposed capital requirements.
