NOTES TO THE FINANCIAL STATEMENTS

YEAR ENDED 31 MARCH 2007

1. Accounting policies

Basis of accounting

The financial statements have been prepared under the historical cost convention, and in accordance with applicable accounting standards

The principal accounting policies of the company are set out below. The policies have remained unchanged from the previous year.

Cash flow statement

The directors have taken advantage of the exemption in Financial Reporting Standard No 1 (Revised 1996) from including a cash flow statement in the financial statements on the grounds that the company is wholly owned and its parent publishes a consolidated cash flow statement.

Turnover

Turnover represents rental income and the proceeds from the sale of trading properties and developments. Income from the sale of properties is included in the profit and loss account when, in the opinion of the directors, a binding contract of sale exists. Profit recognised but not received is carried forward in trade debtors.

Stocks

Stocks are stated at the lower of cost and net realisable value. Long-term contract balances included in stock are stated at cost, after provision has been made for any foreseeable losses and the deduction of applicable payments on account.

Deferred taxation

In accordance with FRS19 the Company makes full provision for timing differences which are primarily in respect of capital allowances on plant and machinery and industrial buildings allowances.

Deferred tax assets and liabilities provided for under FRS19 are discounted to reflect the time value of money between the balance sheet date and the dates that it is estimated that the underlying timing differences will reverse. Following the sale of a property, any deferred tax provisions not required will be released to the profit and loss account.

Deferred tax assets are recognised only when recovery of those assets is reasonably certain. No deferred tax liability is recognised in respect of the revaluation surplus on investment properties in accordance with FRS19.

Financial instruments

Financial instruments are classified and accounted for, according to the substance of the contractual arrangement, as either financial assets, financial liabilities or equity instruments. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities.
