Notes to the abbreviated accounts for the year ended 31 March 2014

1 Accounting policies

a) Basis of accounting

The financial statements are prepared on the historical cost basis of accounting and have been prepared in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

The company has taken advantage of the exemption, conferred by Financial Reporting Standard 1, from presenting a cash flow statement as it qualifies as a small company.

b) Turnover

Turnover represents invoiced sales of goods and services, excluding value added tax. Turnover is attributable to the continuing principal activity of the company and arose wholly within the United Kingdom.

c) Consolidation

In the opinion of the directors, the company and its subsidiary undertakings comprise a small group. The company has therefore taken advantage of the exemption provided by Section 398 of the Companies Act 2006 not to prepare group accounts.

d) Depreciation of tangible fixed assets

Depreciation is provided on all tangible fixed assets at rates calculated to write off the full cost or valuation less estimated residual value of each asset over its estimated useful life. The principal rates in use are:

Motor vehicles	20% reducing balance
Equipment, fixtures and fittings	15% reducing balance

e) Financial instruments

Financial instruments are classified and accounted for, according to the substance of the contractual arrangement, as financial assets, financial liabilities or equity instruments. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities. Where shares are issued, any component that creates a financial liability of the company is presented as a liability in the balance sheet. The corresponding dividends relating to the liability component are charged as interest expense in the profit and loss account.

f) Stocks

Stock is valued at the lower of cost and estimated net realisable value.

g) Deferred taxation

Deferred taxation is accounted for in respect of all material timing differences that have originated but not reversed at the balance sheet date. Timing differences arise from the inclusion of gains and losses in tax assessments in periods different from those in which they are recognised in the financial statements. Deferred tax is calculated at the rate at which it is anticipated the timing differences will reverse and is measured on a non-discounted basis. Deferred tax assets are only recognised to the extent that they are regarded as recoverable.

h) Operating lease transactions

Rentals under operating leases are charged to the profit and loss account as they fall due.
