## NOTES TO THE ABBREVIATED ACCOUNTS

YEAR ENDED 31st MARCH 2015

---

### 1. GOING CONCERN

The company incurred a loss before tax for the year of £67,500 which has resulted in net deficit of £474,847 (2014: £407,347). The accounts have been prepared on the going concern basis, the validity of which depends upon the continued support of the loan provider, Bet365 Group Limited.

The day to day working capital requirements are funded by the directors who are satisfied that the realisation of the companies investment will ultimately be able to repay creditors.

If the going concern basis proved not to be valid, adjustments would have to be made to restate the value of the assets to their recoverable amounts, to provide any further liabilities that may arise and reclassify fixed assets as current assets and long term liabilities as current liabilities.

### 2. ACCOUNTING POLICIES

#### **Basis of accounting**

The financial statements have been prepared under the historical cost convention, and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

#### **Deferred taxation**

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events have occurred at that date that will result in an obligation to pay more, or a right to pay less or to receive more tax, with the following exceptions:

Provision is made for tax on gains arising from the revaluation (and similar fair value adjustments) of fixed assets, and gains on disposal of fixed assets that have been rolled over into replacement assets, only to the extent that, at the balance sheet date, there is a binding agreement to dispose of the assets concerned. However, no provision is made where, on the basis of all available evidence at the balance sheet date, it is more likely than not that the taxable gain will be rolled over into replacement assets and charged to tax only where the replacement assets are sold.

Deferred tax assets are recognised only to the extent that the directors consider that it is more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax is measured on an undiscounted basis at the tax rates that are expected to apply in the periods in which timing differences reverse, based on tax rates and laws enacted or substantively enacted at the balance sheet date.
