#### NOTES TO THE FINANCIAL STATEMENTS

#### YEAR ENDED 31 MARCH 2010

#### 1. ACCOUNTING POLICIES

#### Basis of accounting

The financial statements have been prepared under the historical cost convention, and in accordance with applicable UK accounting standards

The financial statements have been prepared on a going concern basis which is dependent upon the success of the Companies subsidiaries and on the continuing support of the shareholder

#### Consolidation

In the opinion of the directors, the company and its subsidiary undertakings comprise a small group. The company has therefore taken advantage of the exemption provided by Section 398 of the Companies Act 2006 not to prepare group accounts.

#### Cash flow statement

The directors have taken advantage of the exemption in Financial Reporting Standard No 1 (Revised 1996) from including a cash flow statement in the financial statements on the grounds that the company is small

#### Foreign currencies

Assets and liabilities in foreign currencies are translated into sterling at the rates of exchange ruling at the balance sheet date. Transactions in foreign currencies are translated into sterling at the rate of exchange ruling at the date of the transaction. Exchange differences are taken into account in arriving at the operating profit.

#### Financial instruments

Financial liabilities and equity instruments are classified according to the substance of the contractual arrangements entered into. An equity instrument is any contract that evidences a residual interest in the assets of the entity after deducting all of its financial liabilities.

Where the contractual obligations of financial instruments (including share capital) are equivalent to a similar debt instrument, those financial instruments are classed as financial liabilities. Financial liabilities are presented as such in the balance sheet. Finance costs and gains or losses relating to financial liabilities are included in the profit and loss account. Finance costs are calculated so as to produce a constant rate of return on the outstanding liability.

Where the contractual terms of share capital do not have any terms meeting the definition of a financial liability then this is classed as an equity instrument. Dividends and distributions relating to equity instruments are debited direct to equity
