Accounting policies

B Basis of preparation The financial statements are presented in euros, the functional currency of the Company

The preparation of financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods. The most significant techniques for estimation are described in the accounting policies below.

The accounting policies set out below have been applied consistently to all periods presented in these financial statements.

C Priority Profit Share Revenue comprises priority profit share from Limited Partnerships 3i Europartners Va LP and 3i Europartners Vb LP, and is recorded on an accruals basis.

D Operating expenses Operating expenses include the management fee paid by the Company to its parent company.

E Revenue recognition Revenue is recognised on an accrual basis.

F Financial instruments Financial instruments are made up of other payables, other receivables and cash and cash equivalents. The Directors consider that the fair value of other payables and other receivables approximate their carrying value. The Directors do not believe that the Company is exposed to significant credit risk, liquidity risk, currency risk or interest rate risk and has not taken any specific actions to mitigate these financial risks (see note 11). There are no other financial instruments.

G Cash and cash equivalents Cash and cash equivalents in the statement of financial position comprise cash at bank and in hand and short-term deposits with an original maturity of three months or less. For the purposes of the statement of cash flows, cash and cash equivalents comprise cash and short term deposits as defined above.

H Other receivables Assets, other than those specifically accounted for under a separate policy, are stated at their cost less impairment losses. They are reviewed at each statement of financial position date to determine whether there is an indication of impairment. If any such indication exists, the asset's recoverable amount is estimated based on expected discounted future cash flows. Any change in the level of impairment is recognised directly in the statement of comprehensive income. An impairment loss is reversed at subsequent statement of financial position dates to the extent that the asset's carrying amount does not exceed its original cost.

Accounting policies

I Other payables Liabilities, other than those specifically accounted for under a separate policy, are stated based on the amounts which we consider to be payable in respect of goods or services received up to the statement of financial position date

J Income taxes Income taxes represent the sum of the tax currently payable, and deferred tax. Tax is charged or credited in the statement of comprehensive income, except when it relates to items charged or credited directly to equity, in which case the tax is also dealt with in equity

The tax currently payable is based on the taxable profit for the year. This may differ from the profit included in the statement of comprehensive income because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Company's liability for current tax is calculated using tax rates and laws that have been enacted or substantively enacted by the statement of financial position date

Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit ('temporary differences'), and is accounted for using the statement of financial position liability method

Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised

The carrying amount of deferred tax assets is reviewed at each statement of financial position date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered

Deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition of goodwill or other assets and liabilities in a transaction that affects neither the tax profit nor the accounting profit

Deferred tax is calculated at the tax rates that are expected to apply in the year when the liability is settled or the asset is realised using tax rates and laws that have been enacted or substantively enacted by the statement of financial position date
