Going concern

On 29 April 2012 the company's ultimate parent (FSHC (Guernsey) Holdings Limited) entered into a conditional sale and purchase agreement ("SPA") for the sale of the entire issued share capital of FSHC (Jersey) Holdings Limited and that company's subsidiary undertakings (together, the "FSHC Jersey Group"), to Elli Capital Limited. The sale was completed on 12 July 2012.

As part of the acquisition by Elli Capital Limited, all debt-related liabilities owed by FSHC Jersey Group were repaid in full on 12 July 2012. Elli Capital Limited and its subsidiary undertakings (together, the "Elli Group") entered into a £525 million debt facility as part of the acquisition. Of this, £350 million pays interest at 8.75% and is due for repayment in 2019 and £175 million pays interest at 12.25% and is due for repayment in 2020. This provides the group with a more stable and secure financial structure.

Statement of Directors' responsibilities

The directors are responsible for preparing the Directors' Report and the financial statements in accordance with applicable law and regulations

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law). Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and the profit or loss of the company for that period.

In preparing these financial statements, the directors are required to

- select suitable accounting policies and then apply them consistently,
- make judgments and accounting estimates that are reasonable and prudent,
- state whether applicable UK Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements,
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Notes

(forming part of the financial statements)

1 Accounting policies

The following accounting policies have been applied consistently in dealing with items which are considered material in relation to the financial statements

Basis of preparation

The financial statements have been prepared in accordance with applicable accounting standards, under the historical cost accounting rules and within the requirements of the Companies Act 2006

Going concern

In presenting the financial statements on a going concern basis, the directors have considered the company's business activities together with factors likely to affect future performance and financial position. These include cash flows, and the risks and uncertainties relating to the company's business activities.

On 29 April 2012 the company's ultimate parent (FSHC (Guernsey) Holdings Limited) entered into a conditional sale and purchase agreement ("SPA") for the sale of the entire issued share capital of FSHC (Jersey) Holdings Limited and that company's subsidiary undertakings (together, the "FSHC Jersey Group"), to Elli Capital Limited. The sale was completed on 12 July 2012.

As part of the acquisition by Elli Capital Limited, all debt-related liabilities owed by FSHC Jersey Group were repaid in full on 12 July 2012. Elli Capital Limited and its subsidiary undertakings (together, the "Elli Group") entered into a £525 million debt facility as part of the acquisition. Of this, £350 million pays interest at 8.75% and is due for repayment in 2019 and £175 million pays interest at 12.25% and is due for repayment in 2020. This provides the group with a more stable and secure financial structure.

At 31 December 2011 the company is dependent on funding provided by group companies. For this reason the funding position of the company is dependent on that of the Elli Group as a whole.

The group has carefully considered its cash flows and financial covenants for at least twelve months from the date of signing the financial statements. These have been appraised in light of the uncertainty in the current economic climate and, as such, conservative assumptions for working capital performance have been used to determine the level of financial resources available to the company and the Elli Group.

The Elli Group's forecasts and projections, sensitised to take into account all reasonably foreseeable changes in trading performance, show that the Elli Group has sufficient funding and covenant headroom within its current financing arrangements.

After making appropriate enquiries, the directors have a reasonable expectation that the company and the Elli Group have adequate resources to continue in operational existence for the foreseeable future. Accordingly, they continue to adopt the going concern basis in the preparation of these financial statements.

Related party transactions

The directors have taken advantage of the exemption in FRS 8, Paragraph 3(c) and as the company is a wholly owned subsidiary of FSHC (Jersey) Holdings Limited have not disclosed related party transactions with parent and fellow subsidiary undertakings.

Cash flow statement

The company is exempt from the requirement of FRS 1 to prepare a cash flow statement as at 31 December 2011 it was a wholly owned subsidiary undertaking of FSHC (Jersey) Holdings Limited, and its cash flows are included within the consolidated cash flow statement of that company.

Notes (continued)

1 Accounting policies (continued)

Tangible fixed assets and depreciation

Depreciation is provided to write off the cost less the estimated residual value of tangible fixed assets by equal instalments over their estimated useful economic lives as follows

Short leasehold assets	- over life of the lease
Equipment and fixtures	- 20% per annum

No depreciation is charged on assets under construction

Taxation

Current tax, including UK corporation tax and foreign tax, is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date

Deferred tax is provided in full on timing differences which result in an obligation at the balance sheet date to pay more tax, or a right to pay less tax, at a future date, at rates expected to apply when they crystallise based on current tax rates and law. Timing differences arise from the inclusion of items of income and expenditure in taxation computations in periods different from those in which they are included in the financial statements. Deferred tax is not provided on timing differences arising from the revaluation of tangible fixed assets where there is no commitment to sell the asset. Deferred tax assets are recognised to the extent that it is regarded as more likely than not that they will be recovered. Deferred tax assets and liabilities are not discounted.

Guarantees

Where the company enters into financial guarantee contracts to guarantee the indebtedness of other related parties which are subsidiaries of its ultimate parent, the company considers these to be insurance arrangements and accounts for them as such. In this respect, the company treats the guarantee contract as a contingent liability until such time as it becomes probable that the company will be required to make payment under the guarantee.

Leases

Operating lease rentals are charged to the profit and loss account on a systematic and rational basis over the period of the lease.

2 Turnover

Turnover represents the amounts net of VAT derived from the provision of healthcare services to customers and all arose in the United Kingdom.

Factors affecting the tax charge for the current period

The current tax charge for the year is higher (2010 higher) than the standard rate of corporation tax in the UK (26.5%, 2010 28%) due principally to the availability of current year losses in other group companies. The differences are explained below.

	2011 £000	2010 £000
<i>Current tax reconciliation</i>		
Loss on ordinary activities before tax	(114)	(514)
	<u>(114)</u>	<u>(514)</u>

Group relief given for nil consideration	14	147
	<u>26</u>	<u>144</u>
Total current tax charge (see above)	<u>-</u>	<u>-</u>

Factors that may affect future current and total tax charge

On the 23 March 2011 the Chancellor announced that the main rate of UK corporation tax will reduce from 26% to 25% with effect from 1 April 2012. This change became substantively enacted in July 2011 and therefore the effect of the rate reduction on the deferred tax balances has been included in the figures above.

On 21 March 2012 the Chancellor announced a further reduction in the main rate of UK corporation tax to 24% with effect from 1 April 2012. This change became substantively enacted on 26 March 2012. As this rate was not substantively enacted at the balance sheet date it has not been reflected in the above figures.

The Chancellor has also proposed changes to further reduce the main rate of UK corporation tax by 1% per annum to 22% by 1 April 2014. These reductions have not been substantively enacted; the changes are not reflected in the above figures.
