NOTES TO FINANCIAL STATEMENTS
For the year ended 31 March 2014

1. ACCOUNTING POLICIES

These financial statements are prepared on the going concern basis, and under the historical cost convention and in accordance with the Companies Act 2006 and applicable accounting standards. The principal accounting policies are set out below.

Turnover

A network contract typically covers the design, supply and installation of the network and thereafter the provision of Packaged Network Solutions. Revenue relating to the initial part of the contract is determined by the value of the component elements represented by the equipment installed and the time expended on this element of the contract, unless the implementation stage value is defined in the contract and apportioned during the year based on the period of implementation falling in the current period. The remainder of the contract value covering the provisions of Packaged Network Solutions is recognised evenly over the period of the contract.

To the extent that the recognition of revenue differs from the contractual billing terms, revenue billed in advance or arrears are treated as deferred or accrued income respectively.

Taxation

Current tax, including UK corporation tax and foreign tax, is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

Deferred taxation is recognised in respect of timing differences that result in an obligation at the balance sheet date to pay more tax, or a right to pay less tax, at a future date, at rates expected to apply when they crystallise based on current tax rates and law. Timing differences arise from the inclusion of items of income and expenditure in taxation computations in periods different from those in which they are included in financial statements. Deferred tax assets are recognised to the extent that it is regarded as more likely than not that they will be recovered. Deferred tax assets and liabilities are not discounted.

Foreign exchange

Transactions denominated in foreign currencies are translated into sterling at the rates ruling at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are translated at the rates ruling at that date. These translation differences are dealt with in the profit and loss account.

2. TURNOVER

Turnover represents amounts derived from the provision of services which fall within the Company's ordinary activities after deduction of trade discounts and value added tax. All of the turnover arise in the United Kingdom, are attributable to the provision of telecommunications services.

3. INFORMATION REGARDING DIRECTORS AND EMPLOYEES

During the year the Company had no employees other than the directors.
