Strategic Report

The directors present their Strategic Report, Directors' Report and financial statements for The Nero Group Ltd and its subsidiaries (collectively referred to as 'the Group') for the year ended 31 May 2022.

Principal activity and background to the Group

The Nero Group Ltd is a holding Company for four coffee brands trading as Caffè Nero, Harris + Hoole, Coffee #1 and Aroma, and it also owns and operates a high-quality coffee roasting facility. The Group is present in 10 markets. The principal market in which these brands operate is the U.K. Caffè Nero also operates in Ireland, USA, Poland, Turkey and Sweden and has franchises in the United Arab Emirates and Cyprus, as well as within major airports in Croatia and Oman.

The Nero Group principally operates through cafes. However, it is additionally active in "non-bricks and mortar" channels, namely digital channels. Caffè Nero has substantially grown its delivery service in the U.K., USA, Sweden and Poland allowing customers to order its in-store product range, and have these orders delivered to the customer's chosen location.

The Group also continues to develop its Consumer Packaged Goods (CPG) range or "Coffee at Home", including whole beans, ground coffee and Nespresso-compatible capsules available directly through the Caffè Nero App, Caffè Nero website and third party retailers.

Business review

Key developments in the year

Overview

The business of the Group for most of the year was dominated by the impact of Covid throughout the territories where we trade and the respective government restrictions put in place to cope with Covid. The pandemic and government restrictions meant the Group's business was hampered for the first three quarters of the financial year. Management spent considerable time and energy coping with these external circumstances. Two more factors also affected the year: (1) a hostile takeover attempt against the company which was also linked to a High Court case, and (2) the refinancing of the Group's debt. Both of these pressures made an already challenging situation even more difficult. However, by the last quarter of our year (March-May 2022), many of these factors had dissipated or disappeared and the trading and operations of the Group was returning to normal.

Covid-19 and trading

At the start of the Group's financial year in June 2021, there were still significant government restrictions on trading and gatherings in all the countries in which the Group operated (with the exception of Sweden). At the end of the previous financial year May 2021, sales in the UK had reached 60% of pre-Covid levels. As restrictions were lifted following the UK government's step plan and vaccine roll out programme in the summer and autumn 2021, sales increased from 60% to 88% of pre-Covid levels. The outbreak of the Omicron variant, in December 2021, paused the progress of growing sales. New U.K. government restrictions were put in place and were not removed until March 2022. Once these restrictions were removed, namely by April and May 2022, sales began growing again. In May 2022, sales in the UK had reached 100% of pre-Covid levels. For the Group as a whole, as an average across the 10 territories, sales by the end of the financial year had returned to pre-Covid levels. The results for the financial year and comparisons to the previous financial year therefore need to be read and understood in the context of a recovering trading environment which did not return to normal pre-Covid levels until the last quarter of the financial year.

A full review of performance is included below within the trading overview section and in the KPI section of this report.

Strategic Report (continued)

CVA and Challenge

In the previous financial year, the Group's main UK subsidiary, Nero Holdings Ltd ("NHL"), proposed a Company Voluntary Arrangement ("CVA") to its stakeholders and creditors in November 2020. The details of the CVA and its terms were set out in the Group's Strategic Report for the year ended 31 May 2021. The CVA was approved by a strong majority of creditors (in excess of 92%), but was however subject to a legal challenge process on behalf of one landlord. This challenge was dismissed in a High Court verdict published on 29 September 2021 with NHL winning the court case, resulting in the CVA remaining in full force. The challenger did not appeal the verdict and agreed a settlement to pay the majority of NHL's legal costs in defending the challenge.

Further developments arose when it emerged that there was a private backer financing the landlord and High Court case and had bought part of the Group's debt in a hostile takeover attempt. The hostile takeover consumed a great amount of management time. However, once the court case finished and the refinancing (mentioned below) was completed, management was able to return to a strong focus on operational issues.

Refinancing

In January 2022, the Group completed a full refinancing of all of its loan facilities. Details of the new loan facilities are set out in note 23. The Group's new debt structure is for five and six year terms and provides the Group with additional covenant headroom, flexible interest payments and significant growth capital.

Coffee #1

In February 2022, the Group acquired an additional 33% of its subsidiary Coffee #1 from SA Brain. SA Brain had been the previous owner, and had retained a 33% minority stake upon selling the majority to the Group. This new development takes the Group's ownership of Coffee #1 to 76.5%. (The results of Coffee #1 are fully consolidated in these financial statements with a non-controlling interest shown).

Trading overview

In the Group's financial year ending 31 May 2022, its revenue increased by 69% to £349.1m (FY21 - £206.5m) as a result of the easing of U.K. government restrictions and a steady return to normal trading levels. Gross profit increased by 65% to £120.3m (FY21 - £72.9m) although as a percentage of sales this represented a reduction to 34% (FY21 - 35%) due to the withdrawal of VAT support by the U.K. government during COVID 19.

Operating profit and pre-tax earnings were also significantly impacted by the recovery from Covid-19. Operating profit increased to £30.4m (FY21 - £13.3m) and pre-tax earnings moved from a loss of £16.7m to a loss of £7.6m. The improvement in profitability was driven principally by the recovery in sales but also by ongoing cost restraint in every country (including the CVA in the UK) this was partially offset through a reduction in Government support. For example, VAT in the UK at the start of the year was 5%. This rose to 12.5% in October 2021 and returned to pre-Covid levels of 20% in April 2022.

The Group incurred exceptional costs of £11.1m (FY21 - £24.7m), which were reduced by exceptional income of £2.2m (FY21 - £21.5m).

Exceptional costs were mostly comprised of professional fees incurred by the Group in relation to finalisation of the CVA process and an impairment of goodwill relating to the investment in Turkey. This was offset by a settlement figure reached with opposing parties in the CVA challenge which was concluded in April 2022.

Brands, stores and products

Across the four brands (Caffè Nero, H+H, Coffee #1 and Aroma) the Group had in total 1,018 stores at the year end operating in 10 countries.

Strategic Report (continued)

Brands, stores and products (continued)

Caffè Nero, the largest of the Group's four brands, is a brand of high-quality Italian style coffee houses operating in ten countries, serving a range of premium hand-crafted espresso-based coffees and filter coffee as well as an array of pastries, baked goods, freshly made panini, sandwiches, salads, pastas, cakes and biscotti. Typically, Caffè Nero would expect to open 70-90 new sites worldwide in a year, but this expansion strategy was halted by the disruption and temporary closures forced by the onset of Covid-19. As a result only 20 Caffè Nero stores were opened during the year, while 19 stores were closed as a result of pandemic. At the year end, there were 875 Caffè Nero stores trading worldwide, including transport hubs where the business trades as Nero Express.

Harris + Hoole (H+H) is a speciality artisan coffee house brand operating in high streets, supermarkets and airports in the UK. No new sites were opened during the financial year, and the total number of stores in the UK at the year end remained at 40. With its recovery in trading during the year, H+H returned to profitability and the directors believe it has strong potential alongside Caffè Nero.

Coffee #1 is a distinctive and successful coffee brand operating solely in the U.K., and principally in Wales and the south west of England. It is seen as one of the leading coffee brands in that region. Coffee #1 opened two new stores during the financial year and closed one, bringing its total number of stores to 101 at the year end.

Aroma is a brand of premium quality coffee products for sale to third parties via licensing or wholesaling. There is one Aroma Limited store in the UK and one Aroma store in the USA.

The Group has continued to develop its CPG, "Coffee at Home", market during the year. This product range allows customers to order coffee on-line and have it delivered straight to their home. The range offers bags of Caffè Nero's signature Classico blend as both whole bean and ground coffee, as well coffee products in Nespresso-compatible capsules. All the capsules are fully recyclable and the six-capsule range includes the signature Classico blend, several single-origin coffees and decaffeinated coffee. This range is available in store, on the Group's own App and website and through third party retailers.

Key performance indicators

The Board has assessed that the following KPIs are the most effective measures of progress towards achieving the Group's strategies and as such towards fulfilling the Group's objectives:

Like for like sales

The Group defines like-for-like sales as the growth in sales of stores open for more than 12 months compared to the previous year. The Group usually targets an annual range of 3-5% growth in worldwide like-for-like sales. Following the forced temporary store closures and ongoing trading restrictions throughout both the years ended May 2021 and May 2022, the Group did not use like-for-like sales as a key performance measure in FY22. Instead, it assessed trading by comparing sales in FY22 to the year prior to the pandemic (FY19) in order to derive a sales percentage versus a "normal foundation". In the UK, this figure averaged 87% trading vs normal for the year (compared to 56% in FY21), but by year end FY22 gross sales had reached 100% of FY19. Other territories varied in their FY22 trading vs normal, from Ireland at the low end at 80+% by the May yearend versus normal FY19 sales to Poland at the high end with 120+% FY22 sales in May 2022 versus normal FY19 sales.

Store profit (gross profit)

The success of the Group in its store opening programme and like-for-like sales growth is ultimately displayed by increasing store profit in absolute terms. However, the impact of Covid-19 and variations in the rate of VAT in the UK made this measure irrelevant for the year.

Strategic Report (continued)

Store Expansion

A key part of the Group's strategy is to increase revenue by increasing in scale through opening new stores. However, this strategy was put on hold during the Covid-19 crisis due to government restrictions and the need to preserve cash. As a result, only 23 stores were opened in the year. However, all brands and territories are now returning to a more typical level of openings as trading returns to normal levels.

Trading Results

Operating profit and pre-tax earnings were also significantly impacted by the recovery from Covid-19. Operating profit increased to £30.4m (FY21 - £13.3m) and pre-tax earnings moved from a loss of £16.7m to a loss of £7.6m. The improvement in profitability was driven principally by the recovery in sales but also by ongoing cost restraint in every country (including the CVA in the UK) this was partially offset through a reduction in Government support. For example, VAT in the UK at the start of the year was 5%. This rose to 12.5% in October 2021 and returned to pre-Covid levels of 20% in April 2022.

EBITDA

The Group uses Brand EBITDA (Earnings Before Interest, Tax, Depreciation and Amortisation, adjusted for non-brand income and expense) as a key measure of its progress and success in each of the countries in which it operates. This measure is shown in the Group financial statements in order to assist readers of the financial statements. Following the introduction of IFRS 16 in FY20, requiring very significant non-cash adjustments to the financial statements, the directors consider that reporting Brand EBITDA separately provides much greater clarity and understanding of the underlying performance of the Group and its component brands.

Brand EBITDA is reconciled to the Statement of Comprehensive Income in note 3.

	2022 £000	2021 £000
Brand EBITDA		
Caffe Nero UK*	46,730	39,293
Caffe Nero International*	(304)	(6,082)
Harris & Hoole*	828	(52)
Coffee #1*	10,404	5,354
Total Brand EBITDA	57,658	38,513

**In the year ended May 2021 Brand EBITDA was materially impacted by forced closures and government restrictions as a result of Covid-19 as described earlier.*

Strategic Report (continued)

Business review

The Group's performance is summarised below:

	2022	2021
	£000	£000
Revenue	349,083	206,478
Store profit	120,265	72,857
Operating profit/(loss)	30,368	13,272
Profit / (loss) before tax	(7,551)	(16,679)

Expansion

Caffè Nero worldwide new store openings	20	19
Harris + Hoole new store openings	-	-
Coffee#1 new store openings	2	-
Aroma new store openings	1	-
Total worldwide stores at the year end	1,018	1,015
Countries	10	10

	<i>New stores in the year</i>	<i>Total stores at close</i>	
UK & Ireland	6	635	16 stores handed back to landlords, largely as a result of the CVA, resulting in a net decrease of 10 stores
Turkey	7	68	2 stores closed or relocated.
Poland	1	69	1 store closed. The brand is known as Green Caffè Nero in Poland.
USA	1	37	New site opened in Massachusetts.
Sweden	1	7	All stores acquired from Coffeeshouse by George were converted to Caffè Nero during prior years. 1 new store opened. Sweden continues to make a strong recovery from Covid-19.
Franchises	4	59	The Group has a number of franchises operating around the world. The revenue from these franchises are included in these financial statements.
Caffè Nero worldwide	20	875	
Harris + Hoole	-	40	
Coffee #1	2	101	
Aroma	1	2	
Total worldwide stores	22	1,018	

The Group has a number of franchises operating in the Arabian Gulf, Cyprus and airport locations in Croatia and Oman. The revenues from these franchise agreements are included in these financial statements. Below is a summary of the stores within each location:

Strategic Report (continued)

	<i>New stores in the year</i>	<i>Total stores at close</i>
UAE	1	34
Cyprus	3	20
Croatia	-	2
Oman	-	3
Total stores	4	59

Taxation

The Group has made the following UK tax payments to UK government entities in the year:

	<i>2022</i>	<i>2021</i>
	<i>£000</i>	<i>£000</i>
VAT	8,748	(424)
Employment taxes	17,088	13,549
Business rates	14,950	(58)
Corporation tax	1,753	413
Total tax paid and due	42,539	13,480
Tax paid per store	56	18

The Group paid a total tax bill of £40.8m (2021 - £13.0m) in the UK in the year. This was made up of VAT, employment taxes (including PAYE & apprenticeship levy) and business rate taxes. The group paid and owed corporation tax in total of £1.8m at year end (2021 - £0.4m) both tax paid and tax due represent 12% of total UK sales (2021 - 7%) for the Group or £56k per store (2021 - £18k per store). This represent the tax paid and due for the average number of stores over the year.

The increase is a combination of the furlough scheme halting during the year as restrictions relation to COVID 19 were eased, increase in trade and hence VAT bill larger and corporate tax being paid in subsidiary companies at a higher level than before.

Due to its significant finance charges and the considerable impact of Covid-19 throughout the year, the Group had a loss before taxation of £7.6m (2021 - £16.7m), reducing its tax liability for the year.

Interest due to third party banks (charged at an arm's length basis) was in isolation greater than the Group's operating profit, see note 7. This interest bill and the financial impact of Covid-19 resulted in a loss before tax.

It should be noted that the Group does not have any interest due to shareholders or any related parties, only to third party banks. Therefore, only the interest due to these third party banks is included in the Group's corporation tax computations. The Group's UK tax computations do not contain any overseas profits or losses or transfer payments.

Tax Policy

All funds and cash profit generated by the business throughout its 10 territories in the year were reinvested in the Group to create further jobs, pay employees, pay creditors and drive growth. No dividend has been paid to shareholders in the year (nor in its 26-year history). In other words, Caffè Nero reinvests all of its money in the business

In an environment of increased tax transparency, the UK Group aims to demonstrate responsible tax management, including paying all UK taxes the business is eligible to pay, which has been determined

Strategic Report (continued)

through our regular dialogue with HMRC. The Group's approach to tax is in line with our ethical approach, which is to think responsibly about our business and everything we do.

Tax Policy (continued)

The Board of Directors is accountable for how we approach our tax affairs and our Group Finance Director, who sits on the Board, is responsible for ensuring that the approach set by the Board is implemented within our business. We are committed to paying the correct amount of tax and at the correct time, in accordance with the tax laws in which we operate.

Further detailed information regarding our approach to tax in the UK is located on our website at: <https://Caffènero.com/company/uk-tax-policy/>. This detail forms part of our Directors' report.

Ethics, Sustainability and Supporting Communities

Caffè Nero was founded in 1997 with a clear principal of making a positive difference in the lives of the people where the business operates. That principal has governed decision making ever since and covers people and communities, meaning the people who work for Caffè Nero and are customers of Caffè Nero, the communities which are impacted by Caffè Nero, and the world around us.

Our People

Diversity and Inclusiveness

The Group strives for an inclusive and open culture. We believe in hiring diverse and talented individuals who share our values of fairness, decency, warmth, kindness and the pursuit of excellence. We are fully committed to equality and believe that all individuals, regardless of gender and race, can build a successful career within the Group. All employees are remunerated according to their job role, and salaries are determined by bench marking roles against similar positions at comparable organisations. At the year end, the Group operated in 10 countries and employed over 8,385 individuals worldwide from 116 different countries.

In the financial year, The Group trained 4,762 people during the current financial year. This consisted of role refresher training for all store teams and ongoing barista skills and development training. The Group also continued to make existing e-learning courses available to all employees throughout the year which included technical job skills, business skills, leadership and team development skills as well as behavioural development training.

The business continued to provide a mental health first aid programme for all employees regionally in the UK.

Supporting Local Communities

In the UK, the Group runs a charity funding programme called "Make A Difference". This programme involves The Caffè Nero Foundation matching funds raised by employees for good causes and distributing these funds into local communities. Baristas submit applications to support causes they are passionate about, and the Foundation supports as many as of those as possible. Examples of the types of charities supported are: Action Mental Health, Mind and Meningitis Now. Caffè Nero has a track record of working to support the homeless as well. It has provided support to St. Mungo's, Centrepoint and Albert Kennedy Trust as well as other homeless charity organisations. It also provided funds to the Stroke Association in the financial year. Caffè Nero, through its employees and Foundation, have given over £300,000 for good causes over the last seven years.

Supporting Coffee Farmers and their Communities

The Group likewise supports coffee farmers and the surrounding communities where it sources its green beans. We buy coffee directly from the farmers who grow coffee beans and support their communities to ensure they have essential facilities. The Group runs a program whereby in specific locations it creates a "farmers fund", paying above the market price for our coffee beans, to ensure our partner farmers can survive difficult times and to fund their sustainability projects. Our project 'LIFT' is dedicated to funding

Strategic Report (continued)

farming quality improvements and supporting schools and clean water programmes, primarily operating in Central and South America.

Supporting Coffee Farmers and their Communities (continued)

The Group has provided even greater support in some communities. For example, over the years in the La Esmeralda region of Nicaragua we have not only funded clean water projects for five schools, but we have partnered with the 'Seeds for Progress charity' to support the La Esmeralda school development programme. We have doubled the size of the current primary school, created a school library and begun the construction of a high school. Caffè Nero has also provided funding for the ongoing expansion of the teaching staff. We are happy to report that over 300 pupils are now enrolled in the school.

In Ethiopia, we partner with local coffee farmers to assist them to buy bee keeping kits and the training required to use them. This allows the coffee farmers to have income in the off-season.

The Group, throughout the world, works closely with Rainforest Alliance in buying its green beans, and in doing so gives support to farmers who are working in a sustainable and environmentally friendly way.

Supporting Humanitarian Projects

Historically, Caffè Nero has also supported humanitarian good causes around the world. These have included:

- Medecins San Frontieres – Helping fund the construction of a hospital for Syrian refugees in Lebanon.
- Room to Read – Following an earthquake in Nepal, funding the rebuilding of a school.
- Spinal Research UK – Providing funding to support important research concerning the rehabilitation of individuals who have suffered devastating spinal injuries.
- Humanitarian relief for children and those displaced in the Ukraine. During FY22, the Group began fundraising to support children and families in the Ukraine impacted by the war. Fundraising consisted of shareholder contributions and team member donations. The target is €100,000. In June 2022, the fundraising campaign expanded to include a donation from every cup of coffee sold on a designated Saturday, generating even further funds.

The Environment - The World Around Us

Cups, Recycling and Landfill

The Group is committed to taking a lead in the industry on managing the disposal and recycling of takeaway cups by being responsible for our cups throughout their lifecycle: from how they are sourced and made, to taking responsibility for them in store, and, finally, to the recycling of paper cups after they are used.

We also encourage minimising the use of paper cups by selling "Keep Cups" and offering refills with double loyalty points for doing so.

In the UK, Caffè Nero recycles all its paper cups in store. It collects, separates and recycles all paper cups left in its stores so they can be sent for recycling, and it has also introduced the 'R-Cup', a "Keep Cup" option made from recycled paper cups, alongside its regular 'Keep Cup' range.

Further, Caffè Nero has completed the rollout of a new "plant based" lining to all of its takeaway cups, replacing the previously "oil based" lining, resulting in a significant reduction of our carbon footprint and reducing the fossil fuel content of our cups to zero.

Strategic Report (continued)

Cups, Recycling and Landfill (continued)

Caffè Nero also financially supports the Valpak scheme in the UK which sees brands overpay per tonne for waste collection to ensure paper cups reach recycling facilities capable of recycling them properly, and it also participates in the important First Mile project (a project that recycles paper cups in the City of London).

Finally, in the UK Caffè Nero has sought to reduce the number of paper cups in its business. Glassware is offered at the in-store free water stations, which has helped to reduce the number of paper cups in the business by over 6 million.

In the UK, Caffè Nero has tried to tackle the issue of food waste as well. We have signed up to the government “Step up to the Plate” programme, a commitment to reducing food waste. In the financial year Caffè Nero continued its partnership with ‘Too Good To Go’ across all UK stores, offering end of line food to customers at a significantly reduced cost to avoid it being put in the bin at the end of the day. The company has now saved over 131,000 meals in the UK as a result of the partnership. The programme is also in at least three countries where the Group operates, including the U.K., Sweden and Poland. This has proven to be a very effective way of reducing food waste.

Another important recycling programme for the Group is that we recycle leftover coffee grinds. Our coffee grinds in the UK are collected and turned into biomass fuel.

The Group also strives to minimise landfill. Indeed, Caffè Nero UK has been zero to landfill across the vast majority of its stores since 2010.

Principal risks and uncertainties

The directors continually identify, evaluate and manage material risks and uncertainties faced by the Group, which could adversely affect the Group’s business, operating results and financial condition. The directors consider the principal risks and uncertainties facing the business to comprise the following:

Group and Company specific risks

Risk	Mitigation
<p>Covid-19 (risk of further waves)</p> <ul style="list-style-type: none"> • Risk of reduced staff levels due to a resurgence of infection levels. • Risk of falling customer confidence in safety due to rising infections, leading to reduced footfall. 	<ul style="list-style-type: none"> • Operational processes developed and rolled out to react to any Covid-19 infections among team members. • All stores able to reactivate in-store Covid safety measures to protect staff and customers quickly. Including social distancing, Perspex screens, PPE for teams, hand sanitiser stations, enhanced cleaning regimes and clear signage for customers. • High-level plans able to be activated to manage local or national closures if necessary. Covenants with lenders can be temporarily halted if a lockdown is initiated. • Strong cash management processes and cost cutting at group level to mitigate any further national lockdowns.
<p>Brand reputation</p> <ul style="list-style-type: none"> • Damage to the brand image due to failures in environmental health in the stores or contamination of products. • Risk of guests suffering from failure to deliver our allergens policies and procedures, or inaccurate or insufficient information provided to guests concerning allergens. 	<ul style="list-style-type: none"> • Strict cleaning and store maintenance procedures continuously reviewed and enforced at store level in conjunction with the business Health and Safety officer and with review by the business primary authority. • Clear Allergen policies and procedures established across all brands.

Strategic Report (continued)

Risk	Mitigation
<p>Brand reputation (continued)</p>	<ul style="list-style-type: none"> • Detailed database built up by ingredient/supplier and testing of database including physical verification. • Allergen training continuously reviewed and regularly completed by all restaurant employees across all businesses. • Constantly updated Allergen manual and information available to all customers both on the company website and in physical form in each store.
<p>People attraction and retention</p> <ul style="list-style-type: none"> • Failure to attract, retain, or develop store teams and key head office individuals. • Availability of baristas 	<ul style="list-style-type: none"> • Implementation of robust recruitment process to ensure the quantity of hires is sufficient but to also protect the quality of hiring. • Continual review and updating of onboarding and induction process focused on core skills and employee engagement. • Career pathway plans discussed with all above store level employees. • Competitive employment propositions
<p>Supply chain management</p> <ul style="list-style-type: none"> • Risk of loss of key suppliers, jeopardising supply and availability. • Risk that the distribution network is unable to meet the demands of our stores. • Brexit risk to supply chain due to product shortages and/or delays causing loss of revenue, customer's satisfaction and reputation. • Risk that the effects of climate change will disrupt the supply of coffee from overseas. 	<ul style="list-style-type: none"> • Products are sourced from multiple suppliers to mitigate risk. • Regular communication and dialogue with all logistics partners and key suppliers to review performance and assess risk. • Supply contracts in place with all key suppliers. • Regular supplier visits by Group Technical and Buying teams to check operations and procedures. • Contingency planograms and menus to mitigate for adjusted availability and to protect core product availability for customers.
<p>Breakdowns in internal controls through fraud or error</p>	<ul style="list-style-type: none"> • Strong internal control processes in place throughout the business. • Regular review of processes and systems to ensure a robust control environment is maintained. • Designated members responsible for communicating instances of fraud including how these were prevented and actions taken to ensure no repeat offences. • Regular team updates with the internal audit team to further highlight instances of fraud/error in the business and necessary actions taken.
<p>Increases in costs</p> <ul style="list-style-type: none"> • Risk of inflationary pressure on the Group's costs and the current cost of living crisis and rising inflation. 	<ul style="list-style-type: none"> • Work collaboratively with our suppliers to find effective cost savings. <p>Revision of range of products being sold and ways to reengineer pricing of those products whilst maintaining brand standard.</p> <p>Increase in price of products where appropriate.</p>

Strategic Report (continued)

Broader sector or macroeconomic risks

- Adverse economic conditions in the UK markets;
- Inflation, principally on energy and cost of good sold;
- Increased competition in the markets in which Caffè Nero brands operate;
- A rise in interest rates which will affect the amount of interest payable on the Group's loans; and

The Group continually monitors exposure to these risks and has developed policies and appointed qualified personnel to mitigate exposure to these risks.

Financial risk management objectives and policies

The Group uses various financial instruments including joint venture investments, cash, trade & other debtors, bank, Group balances, loans, trade & other creditors and derivatives. The parent company is also exposed to risk in respect of its holding of investments in subsidiary undertakings. Existence of these financial instruments exposes the Group and parent company to a number of financial risks, which are described in more detail below.

The main risks arising from the Group's financial instruments are interest rate risk, credit risk liquidity risk and investment impairment risk. The directors review and agree policies for managing each of these risks and they are summarised below. These policies have remained unchanged from previous years.

Interest rate risk

The Group borrows in pound Sterling at floating rates of interest. The Group's policy is to keep at 40-60% of its borrowings at fixed interest rates. This is achieved by entering into interest rate swaps which are designed to hedge underlying debt obligations. The Group classifies interest rate swaps as derivative financial instruments and measures them at fair value. These instruments do not qualify for hedge accounting. The Group refinanced its loan facilities during the year and put in place a long-term swap for 25% of its borrowings during the year with a further 20% swapped post year end.

Credit risk

The Group monitors its exposure to third party credit risk through detailed checks on customers and regular review of outstanding receivables. The Group mitigates its exposure to related party credit risk by only lending to undertakings from the same Group of which it is a member.

Liquidity risk

The Group's objective is to maintain a balance between continuity of funding and flexibility through the use of bank loans, other loans and facilities. The Group regularly reviews its exposure and ensures funds are available as required. The Group refinanced its facilities during the year and this has provided access to a Revolving Credit Facility as well as a Capex Facility.

Investment Impairment risk

The directors understanding of the risks associated with the investments held by the entity relate to the potential impairment of those investments. To identify any risk of impairment in a timely manner, the Group reviews the financial performance of its investments on a regular basis. The directors are satisfied with the performance of the investments. This is expected to continue for the foreseeable future.

Capital Management

Capital comprises shareholders' equity and financing from third party loans and the Company's parent undertakings. The primary objective of the Group's capital management policy is to ensure that the Group has adequate capital to support the business. The Group monitors the cost of the various sources of capital on an ongoing basis and manages cost through planning future alternative sources of capital. No changes in these factors were made during the year. The Group has no externally imposed capital restrictions. To the extent derivatives impact the financial statements they do not impact decision making options.

Strategic Report (continued)

Section 172 statement

Section 172 of the Companies Act 2006 requires Directors to act in a way they consider would be most likely to promote the success of the Group for the benefit of its members as a whole, and in doing so have regard, to broader matters including:

- a. The likely consequences of any decision in the long term
- b. The interests of the Group's employees
- c. The need to foster the Group's business relationships with suppliers, customers and others
- d. The impact of the Group's operations on the community and the environment
- e. The desirability of the Group maintaining a reputation for high standards of business conduct, and
- f. The need to act fairly as between members of the Group.

The table below summarises how the directors have met their obligations:

Material Stakeholders	What is important to the stakeholder	Methods of Engagement	Consideration and impact FY22
Shareholders / Lenders	<ul style="list-style-type: none"> Long-term profitability Sustainable growth, including entry to new markets and technology development to match consumer trends. Receiving accurate and reliable information on the business Maintaining high brand standards and reputation 	<ul style="list-style-type: none"> Lenders receive monthly financial updates and regular meetings. A lender representative sits as an Observer on the Group Supervisory Board Regular calls are held with shareholder groups by the CEO to gain direct feedback and to maintain clear dialogue. 	<ul style="list-style-type: none"> The Group maintained weekly/regular reporting to lenders to provide cash forecasts as well as monthly updates on trading and progress of the CVA and the challenge to it.
Employees	<ul style="list-style-type: none"> Regular quality communication and engagement. Up to date information on the business. Feeling valued by the business and part of the community. 	<ul style="list-style-type: none"> Regular weekly and monthly newsletters in addition to an internal social media platform. Regular store manager engagement through listening groups, and regular Store Manager conference calls with Q&A sessions. Weekly calls at board level with each territory in the group to provide business support and ensure key decision making in each country is visible and overseen. 	<ul style="list-style-type: none"> Weekly CEO Company calls are maintained each Monday. CEO update video calls have also taken place at regular intervals throughout the year with Store Managers. Focus group meetings were also held across the country to gain feedback on satisfaction and focus areas for Store Managers and teams. Company communications documents provide key ops focuses on a weekly and monthly basis. Culture communications channels including print magazines and internal social media channels are utilised daily to engage all levels of teams.

Suppliers (including Landlords)	<ul style="list-style-type: none"> ▪ Regular and timely payment. ▪ Communication on business status, objectives, growth strategy and cash position. 	<ul style="list-style-type: none"> ▪ Designated point of contact for all suppliers ▪ Proactive and regular communication through the supply chain. 	<ul style="list-style-type: none"> ▪ Regular supplier communication calls and forums. ▪ Open channel communication maintained with all suppliers to: ▪ Find effective cost savings and revised service levels. ▪ Support and reassure during the transition between distribution partners in June 2021 (moved to greencore) ▪ To advise and inform of updates and conclusion to the court challenge connected to the CVA process.
Community & Environment		<ul style="list-style-type: none"> ▪ This section is covered in the "Ethics, Sustainability and supporting the Community" section on page 8. 	<ul style="list-style-type: none"> ▪ Caffè Nero and Caffè Nero employees continued to fundraise for and support local causes and the business supported good causes in Ukraine caused by the war. ▪ Caffè Nero continued to push forward sustainability with the completion of the roll out of a plant lined paper cup across the group and continued support for key recycling schemes. ▪ Caffè Nero further expanded its partnership with "Too Good To Go" saving over 131,000 meals from going to waste. ▪ Further information can be found in the "Ethics, Sustainability and supporting the Community" section on page 8.

Principal Decisions

We have outlined above, examples of how the Directors of the Group have had regard to the matters set out in section 172, including considering the Group's employees and other stakeholders when discharging their duties under section 172 and the effect on the principal decisions taken by them.

Decisions related to Covid-19

It has been an unprecedented period of difficulty for the hospitality sector and the wider economy. Covid-19 also caused an extraordinary and dramatic impact upon the Caffè Nero business, including the forced closure of all stores by the government and the resulting catastrophic impact on sales for significant periods of the financial year.

The board acted to ensure the health and safety of the group's employees and customers and to best protect the future of the business. Swift and decisive action was taken in response to the pandemic and the

Strategic Report (continued)

Decisions related to Covid-19 (Continued)

imposed lockdown and trading restrictions, as well as significant exceptional costs. Key decisions included:

- The continued reduction and management of fixed costs during lockdown
- Continuing the agreed temporary pay cuts with employees
- Continued accessing of government support where appropriate, including Business Rates and VAT holidays and the Coronavirus Job Retention Scheme ('CJRS')
- Taking the decision to launch a CVA to best protect creditors and the business
- Maintaining strict social distancing and PPE measures in store to protect staff and customers from Covid-19.
- The repayment of our liquidity facility to our banking syndicate and refinancing of the Group.

Additional decisions taken by the Caffè Nero board in response to Covid-19 for the impacted months of this financial year and further forward can be found on in the Strategic Report.

In taking these decisions, the Board was mindful of the long-term interest of the Group and its stakeholders, including employees, customers, shareholders, suppliers, landlords and strategic partners.

On behalf of the Board

Ben Price

Director

10 October 2022

Directors' Report

The directors present their report and financial statements for the year ended 31 May 2022.

Results and dividends

The Group generated a loss before taxation but after finance charges of £7.6m (2021 – loss of £16.7m). No dividend is proposed (2021 – £nil).

Future Developments

Following a return to normal levels of sales after the Covid-19 pandemic, the Group is cautiously returning to its store growth schedule with a roll-out programme for FY23 of over 90 stores worldwide.

Financial Instruments

Further details explaining the Group's use of financial instruments are set out in the Strategic Report.

Going concern

The financial statements have been prepared on a going concern basis which assumes that the Group and Parent Company will be able to meet its liabilities as they fall due for the foreseeable future. The directors have looked out to November 2023 to make their going concern assessment, being the period over which there is the most visibility. The directors have prepared detailed forecasts and cash flow projection models which have been stress tested to allow them to assess the going concern assumption. These forecasts indicate that the Group can continue as a going concern under a base case scenario and after stress tests are applied. These stress tests factored in current economic conditions including inflationary adjustments. As at the date of signing these accounts, sales had reached approximately 110% of pre-Covid 19 levels, which is on target with our forecasts.

Material uncertainties were identified in the FY21 annual report. In the 12 months that have since elapsed, each of these material uncertainties has been either closed or considered as normal business risk and not material:

1. Regarding trading and Covid-19, sales have now reached 110% of pre-Covid levels (compared to 80-85% a year ago). This is in line with the Group's latest forecasts. Although Covid-19 and associated restrictions could return the Group considers that the risk of this is significantly reduced compared to a year ago.
2. The CVA challenge was dismissed just prior to signing the accounts last year although some uncertainty remained as to whether the judgement could be appealed. Since then, the challenger declined to appeal and indeed made a settlement as to the Group's costs. The case is now closed.
3. The Group successfully refinanced all of its facilities in January 2022. The relevant details are set out later in these financial statements but in summary additional headroom and flexibilities were negotiated which puts the Group in a firmer financial position than was the case under the previous debt structure.

Having made due and careful enquiry, the directors have satisfied themselves that the Group and Parent Company should continue to adopt the going concern basis in preparing its financial statements.

Directors' Report (continued)

Directors of the company

The directors at the date of approving this report and those who served during the year are set out on page 1. During the year, the directors' interests in the share capital of The Nero Company, the most senior parent Company of the Group of which The Nero Group Ltd is a member, were as follows:

	<i>At 31 May 2022 £20 each</i>	<i>At 31 May 2021 £20 each</i>
G W Ford (1) Ordinary Shares	16,150	17,150
G W Ford (1) Preference Shares	745	-
B J Price (2) Ordinary Shares	310	310

(1) G W Ford's interest in ordinary shares is registered as follows:

G W Ford 15,203
Paladin Partners 1 947

(2) B J Price's interest in ordinary shares is registered as follows:

Paladin Partners 1 310

During the year G W Ford acquired 745 Preference Shares in The Nero Company.

Additionally, B J Price has 495 shares in Rome Intermediate Holdings Sarl (the immediate parent of which is The Nero Company) held on his behalf through an Employee Benefit Trust. G W Ford also holds 157 ordinary shares directly in Rome Intermediate Holdings Sarl.

Creditor payment policy and practice

It is the Group's policy that payments to suppliers are made in accordance with those terms and conditions agreed between the Group and its suppliers, provided that all trading terms and conditions have been complied with.

Employees

The Group provides employees with information concerning trading, development and other appropriate matters through formal and informal briefings. Employees are consulted on a regular basis to ensure their views are taken into account in making decisions likely to affect their interests. Among the forums used to gather information are "village meetings" and "listening groups".

The Group gives full and fair consideration to the employment of disabled people, including the continuation in employment of employees who have become disabled. All employees are given equal opportunities for training and promotion, having regard to their particular aptitudes and abilities.

The Group has a very extensive training program, benefiting the entire group's employee base. This consisted of role refresher training for all UK store teams when stores reopened post the COVID 19 lockdowns. The Group also continued to make existing e-learning courses available to all employees throughout the year which included technical job skills, business skills, leadership and team development skills as well as behavioural development training. The Group believes in developing its people and provides courses in coffee making, customer service and business management to provide employees with the skills necessary to pursue a career both inside and outside the Group.

Directors' Report (continued)

Donations and Charities

Extensive details of charitable activities are set out in the 'Ethics, Sustainability and Supporting Communities' section of the Strategic Report. In addition, the UK Group contributes to The Nero Foundation which distributes money to charities in the UK and overseas, including fundraising in this financial year for good causes in Ukraine, created due to the war. Local charities are selected by store teams and funds raised by the team are matched by The Nero Foundation.. The Group's Make A Difference Programme (which funded the Marfan Trust, Action Mental Health, Mind & Meningitis Now), and the Group's Festive Campaign (which funded the building of a Nicaraguan school in a coffee growing area) were supported in this way.

Energy Consumption and Carbon Emissions

The Companies Act 2006 (Strategic Report and Directors' Report) Regulation 2018 requires disclosure of annual UK energy consumption and Greenhouse Gas (GHG) emissions from SECR regulated sources. Energy and GHG emissions have been independently calculated by The Utility Buyers Ltd for the reporting period 1 June 2021 to 31 May 2022.

Reported energy and GHG emissions data is compliant with SECR requirements and has been calculated in accordance with the GHG Protocol and SECR guidelines. Energy and GHG emissions are reported from buildings and transport where operational control is held – this includes electricity, natural gas, and business car travel. The table below details the regulated SECR energy and GHG emission sources from the current and prior reporting period.

	June 2020 - May 2021	June 2021 - May 2022
Energy Type		kWh
Natural Gas	29,483	148,114
Electricity	39,367,444	38,732,293
Transport	498,796	428,504
Total Energy	39,895,724	39,308,911
Emissions Type		tCO₂e
Natural Gas	5.42	27.13
Electricity	9,178.13	8,224.03
Transport	537.23	468.87
Total SECR Emissions*	9,720.78	8,720.03
Intensity Metric		
SECR Emissions per Intensity Metric (tCO ₂ e / £1m revenue)	0.0097	0.0087

Energy Consumption and Carbon Emissions (continued)

The Group is committed to reducing environmental impact and contribution to climate change through increased energy management and awareness and changes to operational procedures. During the reporting period, detailed energy audits, as part of the ESOS regulations, were commissioned to establish an energy-saving action plan.

The Group has also introduced a number of energy saving measures, including the installation of Smart meters, an energy bureau and the development of bespoke energy management reporting.

Data Records & Methodology

GHG emissions have been calculated using emissions factors published by BEIS in 2020. Electricity emissions are reported using location-based factors. Location-based emissions have been calculated using emissions factors published by BEIS in 2020.

Electricity and natural gas emissions has been calculated using metered kWh consumption taken from supplier fiscal invoices and half hourly data, where available, direct from the Data Collector. Where fiscal

Directors' Report (continued)

Energy Consumption and Carbon Emissions (continued)

supplier invoices have not been available for the entire period, the average consumptions have been calculated from invoices held.

Transport emissions have been calculated using the contracted annual mileage of the vehicle using the average car type. The annual mileage was converted into GHG emissions based upon the fuel type of the vehicle. Conversion to GHG emissions was completed using the most recent emissions factors published by BEIS in 2020.

Section 172 statement

With the exception of our statement on corporate governance arrangements, which is set-out below, all other information in respect of our reporting requirements under S172 of the Companies Act is included in the Strategic Report.

Statement of corporate governance arrangements

Effective corporate governance is a key guideline for The Caffè Nero Group for the year ending 31 May 2022. The Group has applied the Wates Corporate Governance Principles for Large Private Companies as its framework for disclosure regarding its corporate governance arrangements.

Principle 1 – Purpose and Leadership

Caffè Nero was founded in 1997 with the purpose 'Making a Positive Difference in the Lives of the People With Whom We Come In Contact'. This principle has governed the decision making of the business since the Group was founded and still sits at its foundation. The Group aspires to be the world's leading European Coffee House Brand, but its real purpose is to make a positive difference along the way.

The four key areas of focus to uphold this purpose are:

- **Our own teams** – Training our own people to understand our values and encourage them to engage with their peers, customers and communities in a positive, caring way.
- **Local communities** – positively impact the customers and communities where our stores are located
- **Coffee farmers** – Work with and treat with respect the coffee farmers and their communities where we source our coffee beans
- **Humanitarian Projects** – assist and embrace goodwill projects that make a positive difference around the world

Further details of these areas of focus can be found in the Ethics, sustainability and supporting communities section of the strategic report on page 8.

Caffè Nero also publishes a clear behavioural code in the employee handbook which applies to all employees and also runs training and support services for all employees on how to manage difficult or challenging situations in stores with customers.

Directors' Report (continued)

Principle 2 – Board Composition

The Caffè Nero's Board structure consists of a Supervisory Board or Main Board. It is chaired by the Founder and Group CEO and other members include the Group CFO, the U.K. CEO and U.K. MD as well as independent financial lender representation, independent shareholder representation and independent non-executives with wide industry experience to provide oversight. The Board meets regularly to preside over business issues, Company performance, strategic direction and future activity for the Group. The CEO and CFO each have over 20 years of experience in the coffee industry and are among the longest serving and most experienced coffee industry executives in the world.

Below the Group Supervisory Board, each country has its own Executive Management Board, which oversees the management and operations of the business in the respective territory. The CEO of each territory is appointed by the Supervisory Board. These country operating Boards are responsible for the day to day running of the business in each country and are accountable to the Supervisory Board.

Principle 3 – Director responsibility

The Supervisory Board/Main Board maintains effective oversight of the Company's business with the founder and Group CEO and has ultimate responsibility for any decisions on policy and finance. Some decisions are taken by members of the Board with specific functional knowledge and experience, but such decisions are taken with Board awareness to ensure the correct safeguards and review processes are in place.

The Main Board delegates day to day management of each territory to the Executive Management Board of each country and decisions are made with the support of the senior Group leadership team, consisting of expert department heads and subject experts. Recommendations are made by the senior leadership team, which are reviewed and approved by each Management Board.

Each territory Management Board meets weekly (more regularly where circumstances dictate), while the Supervisory Board meets at regular intervals throughout the year.

External legal advice is taken by the territory Boards and directors on key specific issues to ensure impartial and expert information is provided to help guide decision making.

Principle 4 – Opportunity and Risk

Opportunities

These are identified through a robust business planning process which has the senior leadership teams in each territory identify and propose strategic plans to each country's Executive Board. These annual territory business plans are then sent to the Supervisory Board which, through discussion, aligns them with the Group's wider strategic annual, 3 year and 5 year plans.

Risk Management

Directors and senior leaders are responsible for identifying potential risks within their area of responsibility. All identified risks are assessed against any possible impact on the business plan, business continuity and business success. Identified risks are managed via a designated risk or crisis committee which reports directly to the Main Board. Key risks are documented along with response/management strategies, and these are constantly reviewed by the committee and Main Board in line with updated or changing information.

Through the financial year, specific issues including Covid-19 were identified as significant risks to the business and specific action was taken:

Weekly Executive directors meetings take place to discuss and action any remaining risk from COVID-19 and to navigate the way forward.

Directors' Report (continued)

A weekly cashflow meeting is held involving the Group CEO, Group CFO and key finance personnel within the business.

The principal risks and uncertainties which are reviewed by the Main Board are listed on pages 10 to 12.

Principle 5 – Remuneration

Remuneration decisions for each territory are delegated to each country Board, with decisions taken against the relevant pay structure.

Due to the impact of Covid-19 on the business, our standard remuneration review processes were suspended. This was reinstated in the FY 22 financial year.

In the UK, each employee receives a twice-yearly performance review as well as an annual pay review, and an annual bonus review, which assesses an individual against personal performance and Company performance. During the Covid-19 crisis, those employees above store level in the UK were asked to take a temporary and proportionate pay reduction to help ensure the employee pool could retain their jobs and income for the duration of the crisis. This process was halted in September 2021, and since then all applicable employees are back to their original pay.

Principle 6 – Stakeholder relationships and Engagement

Information addressing the Board's engagement with stakeholders is contained in the section 172 statement on pages 13 to 16.

Statement of disclosure of information to the auditor

The directors who were members of the Board at the time of approving the Directors' report are set out on page 1. Having made enquiries of fellow directors and the Group auditor, each of these directors confirms that:

- a) to the best of each director's knowledge and belief, there is no relevant audit information of which the Group auditors are unaware; and
- b) each director has taken all the steps a director might reasonably be expected to have taken to be aware of the relevant audit information and to establish that the Group auditors are aware of that information.

Reappointment of auditor

In accordance with section 487 of the Companies Act 2006, the Company has elected to dispense with the obligation under section 485 of the Companies Act 2006 to appoint auditors annually. Ernst & Young LLP are deemed to continue in office until further notice.

On Behalf of the Board

Ben Price

Director

10 October 2022

Directors' Responsibilities Statement

The directors are responsible for preparing the Report and the financial statements in accordance with in accordance with applicable UK law and regulations and International Accounting Standards (IFRS's) in conformity with the requirements of the Companies Act 2006.

Under Company Law the directors must not approve the financial statements unless they are satisfied that they present fairly the financial position, financial performance and cash flows of the Group and Company for that period. In preparing those financial statements the directors are required to:

- select suitable accounting policies in accordance with IAS 8: Accounting Policies, Changes in Accounting Estimates and Errors and then apply them consistently;
- present information, including accounting policies, in a manner that provides relevant, reliable, comparable and understandable information;
- provide additional disclosures when compliance with the specific requirements in IFRSs is insufficient to enable users to understand the impact of particular transactions, other events and conditions on the Group's and Company's financial position and financial performance;
- state that the company has complied with IFRSs, subject to any material departures disclosed and explained in the financial statements; and
- make judgements and estimates that are reasonable and prudent

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Group's and Company's transactions and disclose with reasonable accuracy at any time the financial position of the Group and Company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the Group and Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF THE NERO GROUP LIMITED

Opinion

We have audited the financial statements of The Nero Group Limited ('the parent company') and its subsidiaries (the 'group') for the year ended 31 May 2022, which comprise the group statement of comprehensive income, group and company statements of financial position, group and company statements of cash flows, group and company statements of changes in shareholders equity, and the related notes 1 to 28, including a summary of significant accounting policies.

The financial reporting framework that has been applied in their preparation is applicable law and UK adopted International Accounting Standards and as regards the parent company financial statements, as applied in accordance with section 408 of the Companies Act 2006.

In our opinion:

- the financial statements give a true and fair view of the group's and of the parent company's affairs as at 31 May 2022 and of the group's loss for the year then ended;
- the group financial statements have been properly prepared in accordance with UK adopted International Accounting Standards;
- the parent company financial statements have been properly prepared in accordance with UK adopted International Accounting Standards as applied in accordance with section 408 of the Companies Act 2006; and
- the financial statements have been prepared in accordance with the requirements of the Companies Act 2006.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the group in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard as applied to other entities of public interest, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate. Our evaluation of the directors' assessment of the group and parent company's ability to continue to adopt the going concern basis of accounting included:

- An assessment of the risk around going concern at the planning and year-end phases of the audit
- Confirming our understanding of the group's going concern assessment process as well as the review process over the going concern model
- Obtaining cash flow models used by management in their assessment, checking their arithmetical accuracy and assessing the group's historical forecasting accuracy to determine its bearing on the going concern assessment
- Assessing whether the sales and cost growth assumptions included within cash flow models were within a reasonable range.
- Assessing management's ability to execute feasible mitigating actions available to respond to their downside scenarios based on our understanding of the group and sector
- Considering the adequacy of headroom and applying sensitivities

- Reconsidering the material uncertainties identified when the FY21 financial statements were authorised for issue and determining whether those material uncertainties still exist
- Obtaining evidence to support the removal of material uncertainties that existed when the FY21 financial statements were authorised for issue, which included obtaining the new loan agreement and reviewing correspondence from the Group legal advisors.
- Assessing the adequacy of the going concern review period to the end of November 2023 and considering whether a longer review period would be appropriate
- Assessing the group's forecast banking covenant compliance and other obligations through to the end of the review period
- Assessing the appropriateness of the going concern disclosures in describing the risks associated with the group's ability to continue as a going concern

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the group and parent company's ability to continue as a going concern for the period from when the financial statements are authorised for issue, to 30 November 2023.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the group's ability to continue as a going concern.

Other information

The other information comprises the information included in the annual report, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the annual report.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in this report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact.

We have nothing to report in this regard.

Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of the audit:

- the information given in the strategic report and the directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the strategic report and directors' report have been prepared in accordance with applicable legal requirements.

Matters on which we are required to report by exception

In the light of the knowledge and understanding of the group and the parent company and its environment obtained in the course of the audit, we have not identified material misstatements in the strategic report or directors' report.

We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept by the parent company, or returns adequate for our audit have not been received from branches not visited by us; or
- the parent company financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- *we have not received all the information and explanations we require for our audit.*

Responsibilities of directors

As explained more fully in the directors' responsibilities statement set out on page 23, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the group's and the parent company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the group or the parent company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Explanation as to what extent the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect irregularities, including fraud. The risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

The extent to which our procedures are capable of detecting irregularities, including fraud is explained below. However, the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the entity and management.

- We obtained an understanding of the legal and regulatory frameworks that are applicable to the Group and Parent Company and determined that the most significant are those that relate to the reporting framework (UK adopted International Accounting Standards and the Companies Act 2005), the relevant direct and indirect tax compliance regulation in the United Kingdom, employment laws in the relevant jurisdictions and reporting obligations in the UK including the

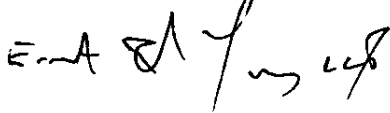

Modern Slavery Act. In addition, the group has to comply with laws and regulations relating to its operations, including health and safety, data protection and anti-bribery and corruption.

- We understood how the Group and Parent Company comply with those frameworks by making enquiries of management and those charged with governance to understand how the group maintains its policies and procedures in these areas and corroborated this by reviewing supporting documentation such as the Code of Conduct and correspondence from group legal advisors.
- We obtained the Fraud and Corruption Perceptions Index rating for all in-scope international components. We identified a component in a higher risk location and instructed our local EY office to perform specific procedures around bank payments. The audit engagement partner visited the higher risk location, and met with local management and the local audit team
- We communicated our identified fraud risk to all component teams and evaluated the sufficiency of their procedures
- We assessed the susceptibility of the financial statements to material misstatement, including how fraud might occur by considering the risk of management override and by assuming revenue to be a fraud risk.
- We incorporated data analytics into our testing of revenue and manual journals. We performed audit procedures to address the fraud risk, including testing manual journals which were designed to provide reasonable assurance that the financial statements were free from material misstatement, whether due to fraud or error. We tested specific transactions back to source documentation or independent confirmations as appropriate.
- Based on this understanding we designed our audit procedures to identify noncompliance with such laws and regulations. Our procedures involved reviewing minutes from the Board of Directors, enquiries of management and journal entry testing, with a focus on manual journals and journals indicating significant unusual transactions identified by specific risk criteria based on our understanding of the business

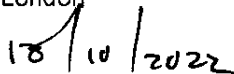

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at <https://www.frc.org.uk/auditorsresponsibilities>. This description forms part of our auditor's report.

Use of our report

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Zishan Nurmohamed (Senior statutory auditor)

Notes to the financial statements

at 31 May 2022

1. Accounting policies

Authorisation of financial statements and statement of compliance with IFRSs

The Group and Company financial statements were authorised for issue by the Board of Directors on 10 October 2022. The Nero Group Ltd is a private limited Group incorporated and domiciled in England and Wales.

The Group and Company financial statements have been prepared in accordance with International Accounting Standards in conformity with the requirements of the Companies Act 2006.

Going concern

The financial statements have been prepared on a going concern basis which assumes that the Group and Parent Company will be able to meet its liabilities as they fall due for the foreseeable future. The directors have looked out to November 2023 to make their going concern assessment, being the period over which there is the most visibility. The directors have prepared detailed forecasts and cash flow projection models which have been stress tested to allow them to assess the going concern assumption. These forecasts indicate that the Group can continue as a going concern under a base case scenario and after stress tests are applied. These stress tests factored in current economic conditions including inflationary adjustments. As at the date of signing these accounts, sales had reached approximately 110% of pre-Covid 19 levels, which is on target with our forecasts.

Material uncertainties were identified in the FY21 annual report. In the 12 months that have since elapsed, each of these material uncertainties has been either closed or considered as normal business risk and not material:

1. Regarding trading and Covid-19, sales have now reached 110% of pre-Covid levels (compared to 80-85% a year ago). This is in line with the Group's latest forecasts. Although Covid-19 and associated restrictions could return the Group considers that the risk of this is significantly reduced compared to a year ago.
2. The CVA challenge was dismissed just prior to signing the accounts last year although some uncertainty remained as to whether the judgement could be appealed. Since then, the challenger declined to appeal and indeed made a settlement as to the Group's costs. The case is now closed.
3. The Group successfully refinanced all of its facilities in January 2022. The relevant details are set out later in these financial statements but in summary additional headroom and flexibilities were negotiated which puts the Group in a firmer financial position than was the case under the previous debt structure.

Having made due and careful enquiry, the directors have satisfied themselves that the Group and Parent Company should continue to adopt the going concern basis in preparing its financial statements.

Basis of preparation

The Company has taken advantage of the exemption provided under section 408 of the Companies Act 2006 not to publish its individual statement of comprehensive income. Total comprehensive loss for the year was £6.6m (2021 – loss of £2.3m).

The financial statements are presented in Sterling and all values are rounded to the nearest thousand pounds (£000) except as otherwise indicated.

Changes in accounting policies

There were no changes in accounting policies, presentation and methods of computation in these financial statements.

Notes to the financial statements

at 31 May 2022

1. Accounting policies (continued)

New standards and interpretations not yet adopted

At the date of the authorisation of these financial statements, the Group has not applied the following new and revised IFRSs that have been issued but are not yet effective and had not yet been adopted by the Board:

- Property, plant and equipment: Proceeds before intended use – Amendments to IAS 16 (effective date 1 January 2022)
- Classification of Liabilities as Current or Non-Current – Amendments to IAS 1 (effective date 1 January 2023)
- Disclosure of Accounting Policies - Amendments to IAS 1 and IFRS Practice Statement 2 (effective date 1 January 2023)
- Disclosure of Accounting Estimates - Amendments to IAS 8 (effective date 1 January 2023)
- Deferred Tax related to Assets and Liabilities arising from a Single Transaction- Amendments to IAS 12 (effective date 1 January 2023)

The Directors do not expect that the adoption of the standards listed above will have a material impact on the financial statements.

New standards effective for the current financial year

There was no material impact on the Financial Statements as result of:

- IBOR Phase 2 (effective date 1 January 2021)

No 2021 amounts have been restated as a result of these standards becoming effective nor have the current year figures changed as a result of their application with the exception of covid-19 related rent concessions.

Key sources of estimation uncertainty and accounting judgement

The preparation of financial statements requires management to make estimates and assumptions that affect the balances reported for assets and liabilities at the balance sheet date and the amounts reported for revenues and expenses during the year. The nature of estimation means that actual outcomes could differ from those estimates.

In the application of the Group's accounting policies, management is required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Judgements

The following are the critical judgements (apart from those involving estimations), that management has made in the process of applying the entity's accounting policies and that have the most significant effect on the amounts recognised in financial statements:

Legal claims and contingency liabilities

Management judgement along with legal counsel advice is required to determine the risk of any claims brought against the Group crystallising into a future liability. When it is more likely than not that a claim will be lost by the Group and a material liability will crystallise, a provision is recorded in the financial

Notes to the financial statements

at 31 May 2022

1. Accounting policies (continued)

statements. Where there is a risk of losing a material case but it is more likely than not to crystallise the Group discloses a contingent liability in its financial statements.

Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of the assets and liabilities within the next financial year, are described below. The Group based its assumptions and estimates on parameters available when these financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising beyond the control of the Group. Such changes are reflected in the assumptions when they occur.

Timing of revenue recognition and allowance for expected credit losses

The Group operates a customer loyalty programme that carries an entitlement to free coffee (note 19). A contract liability is recognised for entitlements awarded but not yet redeemed. The Group estimates the standalone selling price of points awarded under the customer loyalty programme based on the value of the points to the customer adjusted for expected redemption rates. As points issued under the programme do not expire, such estimates are subject to uncertainty. At 31 May 2022, the estimated liability for unredeemed points was approximately £2.6m (2021 – £1.6m), which is presented within deferred income (in current liabilities) in note 19.

Fixed asset useful lives

An annual review of the fixed asset register to ensure residual values, useful lives and depreciation methodologies are appropriate requires management to estimate useful lives, which can have a material impact on how the capital cost of equipment is expensed to the income statement and therefore on the results of the business. Further details on property plant and equipment are provided in note 12 and later on in note 1.

Impairment of non-financial assets

Impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The value in use calculation is based on a DCF model. The cash flows are derived from the budget for the next five years and do not include restructuring activities that the Group is not yet committed to or significant future investments that will enhance the performance of the assets of the CGU being tested. The recoverable amount is sensitive to the discount rate used for the DCF model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes. These estimates are most relevant to goodwill and other intangibles with indefinite useful lives recognised by the Group (see note 14).

Leases – estimating the incremental borrowing rate

The company cannot readily determine the interest rate implicit in its leases, therefore it uses its incremental borrowing rate (IBR) to measure its lease liabilities. The IBR is the rate of interest that the Group would have to pay to borrow over a similar term and with a similar security, the funds necessary to obtain an asset of similar value to the right of use asset in a similar economic environment. The IBR reflects what the Group would have paid which requires estimation when no observable rate is available.

The Group estimates its IBR using observable inputs such as market interest rates, the borrowing rate of the Group and is required to make certain specific estimates and judgements. Further details on the resultant right of use asset and lease liability are provided in note 13

Basis of consolidation

The consolidated financial statements comprise the financial statements of the group and its subsidiaries at 31 May 2022. Control is achieved when the group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the group controls an investee if and only if the group has:

Notes to the financial statements

at 31 May 2022

1. Accounting policies (continued)

- power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee)
- exposure, or rights, to variable returns from its involvement with the investee; and
- the ability to use its power over the investee to affect its returns.

When the group has less than a majority of the voting or similar rights of an investee, the group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual agreement with the other vote holders of the investee
- Rights arising from other contractual agreements
- The group's voting rights and potential voting rights

The group re-assesses whether or not it controls an investee, if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the group obtains control over the subsidiary and ceases when the group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the statement of comprehensive income from the date the group gains control until the date the group ceases to control the subsidiary.

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the group's accounting policies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the group are eliminated in full on consolidation.

Interests in joint ventures

The group has contractual arrangements with other parties, which represent joint ventures. These take the form of an agreement to share control over another entity. Where the joint venture is established through an interest in a company, partnership or other entity (a jointly controlled entity), the group recognises its interest in the entity's assets and liabilities using the equity method of accounting. Under the equity method, the interest in the joint venture is carried in the balance sheet at cost plus post-acquisition changes in the group's share of its net assets, less distributions received and any impairment in value of individual investments. The group statement of comprehensive income reflects the share of the joint ventures-controlled entity's results after tax. Any goodwill arising on the acquisition of a jointly controlled entity, representing the excess of the cost of the investment compared to the group's share of the net fair value of the entity's identifiable assets, liabilities and contingent liabilities, is included in the carrying amount of the jointly controlled entity and is not amortised. To the extent that the net fair value of the entity's identifiable assets, liabilities and contingent liabilities is greater than the cost of the investment, a gain is recognised and added to the group's share of the entity's profit or loss in the period in which the investment is acquired.

Business combinations

The acquisition of subsidiaries is accounted for using the purchase method. The cost of the acquisition is measured at the aggregate of the fair values, at the date of exchange, of assets given, liabilities incurred or assumed, and equity instruments issued by the group in exchange for control of the acquiree, plus any costs directly attributable to the business combination. The acquiree's identifiable assets, liabilities and contingent liabilities that meet the conditions for recognition under IFRS 3 are recognized at their fair value at the acquisition date.

Goodwill

Goodwill acquired in a business combination is initially measured at cost being the excess of the cost of the business combination over the group's interest in the net fair value of the acquiree's identifiable assets,

Notes to the financial statements

at 31 May 2022

1. Accounting policies (continued)

liabilities and contingent liabilities at the date of acquisition. If after reassessment, the group's interest in the net fair value of the acquiree's identifiable assets, liabilities and contingent liabilities exceeds the cost of the business combination, the excess is recognised immediately in the statement of comprehensive income. Following initial recognition, goodwill is measured at cost less any accumulated impairment losses. Goodwill is not amortised but reviewed for impairment annually or more frequently if events or changes in circumstances indicate the carrying value may be impaired. Further details are set out in note 14. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to the group of stores at which goodwill is monitored internally.

Intangible assets

Intangible assets are carried at cost less accumulated amortisation and accumulated impairment losses. Intangible assets acquired separately from a business are carried initially at cost. Expenditure on internally developed intangible assets is taken to the statement of comprehensive income in the year in which it is incurred. Following initial recognition, the historic cost model is applied, with intangible assets being carried at cost less accumulated amortisation and accumulated impairment losses. Intangible assets with a finite life are amortised on a straight-line basis over their expected useful lives, as follows:

Software	–	3 years
Brand	–	10-20 years or indefinite useful life as applicable
Trademarks	–	Indefinite useful life
Lease premium	–	Over the lease term

The carrying value of intangible assets is reviewed for impairment whenever events or changes in circumstances indicate the carrying value may not be recoverable.

Property, plant and equipment

Property, plant and equipment is stated at cost less accumulated depreciation and any impairment in value. Cost comprises the aggregate amount paid and the fair value of any other consideration given to acquire the asset and includes costs directly attributable in making the asset capable of operating as intended.

Depreciation

Depreciation is provided on property, plant and equipment at rates calculated to write off the cost, less estimated residual value based on prices prevailing at the balance sheet date of each asset evenly over its expected useful life, as follows:

Leasehold improvements	–	over the lease term
Furniture, fittings and equipment	–	over 3 to 5 years

The carrying values of property, plant and equipment are reviewed for impairment if events or changes in circumstances indicate the carrying value may not be recoverable immediately and are written down to their recoverable amount. The asset's residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each financial year end.

An item of property, plant and equipment is derecognised on disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on derecognition of the asset is included in the statement of comprehensive income in the period of derecognition.

Leases

IFRS 16 distinguishes leases from service contracts on the basis of control of an identified asset. For lessees, it removes the previous accounting distinction between (off-balance sheet) operating leases and (on-balance sheet) finance leases and introduces a single model recognising a lease liability and corresponding right of use asset for all leases except for short-term leases and leases of low-value assets. For lessors, IFRS 16 substantially retains existing accounting requirements and continues to require classification of leases either as operating or finance in nature.

Notes to the financial statements

at 31 May 2022

1. Accounting policies (continued)

Group as lessee

The Group recognises a right of use asset and a lease liability at the lease commencement date. The right of use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose any covenants other than security interests in the leased assets that are held by the lessor. Leased assets may not be used as security for borrowing purposes.

a) Right of use assets

Right of use assets are initially measured at the value of the corresponding lease liability and subsequently adjusted for depreciation and for any remeasurement of the lease liability as noted above. As is the case for other categories of assets, they may be assessed for impairment where required by IAS 36. As described later in this note, applicable pre-existing rent accruals and prepayments were included in assets on transition to IFRS 16. The right of use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right of use asset or the end of the lease term. The estimated useful lives of right of use assets are in line with the remaining lease term.

b) Lease liabilities

Lease liabilities under IFRS 16 are initially recorded at the present value of future lease payments (discounted using the Group's incremental borrowing rate, which we estimate with reference to our debt facilities and observed bond yields). Lease liabilities include the net present value of fixed payments (including in-substance fixed payments), less any lease incentives receivable and variable payments, which might be linked to sales generated. Variable lease payments that do not depend on an index or a rate but depend on sales or usage of the underlying asset are excluded from the lease liability measurement and recognised as expenses in the period in which the event or condition that triggers the payment occurs. Liabilities are subsequently adjusted for deemed interest charges and payments. Variable payment terms are used for a variety of reasons and dependent on turnover levels. Lease liabilities may be recalculated in some situations as stipulated by IFRS 16, including where the terms of a lease are modified, which can also result in a separate lease being recognised. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Group's estimate of the amount expected to be payable under a residual value guarantee, or if the Group changes its assessment of whether it will exercise a purchase, extension or termination option. Such changes to the amount of the lease liability will be also reflected in the corresponding right of use asset, except where a reduction in the asset would result in a negative outcome, in which case the asset's value is reduced to nil and the residual credit recorded in profit or loss.

c) Short-term leases and leases of low-value assets

The Group has elected not to recognise right of use assets and lease liabilities for short-term leases that have a lease term of 12 months or less and leases of low-value assets, including IT equipment. The Group recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term. The Group operates a number of freehold sites but its estate is predominantly leasehold and the implementation of IFRS 16 has therefore led to a substantial change in balance sheet outcomes, with material new assets and liabilities being recorded to reflect rental agreements that were previously not recorded in the Group's consolidated balance sheet. Although the great majority of rental payments to landlords are now accounted for as payments to reduce lease liabilities, there remain some circumstances where rental payments continue to be accounted for as rental costs in the same fashion as previously; these include variable or turnover-contingent rents and also rentals for leases with a term of less than 12 months, in line with the requirements of IFRS 16. In determining the lease term and assessing the length of the non-cancellable period of a lease, an entity shall apply the definition of a contract and determine the period for which the contract is enforceable. A lease is no longer enforceable when the lessee and lessor each has the right to terminate the lease without permission from the other party with no more than an insignificant penalty.

Notes to the financial statements

at 31 May 2022

1. Accounting policies (continued)

All the leasehold contracts that the Group enter into are for a finite and fixed period of time, however some of the contracts have break dates which unilaterally permit the Group to terminate the contract at a date that is earlier than normal contractual term end date, based on an estimate of lease term on inception. For the purposes of the preparation of the IFRS 16 numbers, the Group have identified a number of leases where use of the break date can be utilised based on an estimate of lease term on inception and notice period. The reason for the option to utilise the break date and potentially terminate the contracts early is due to the underlying trading performance of the identified coffee shops which don't fulfil the commercial viability required by the Group. The impact of a decision to end leasehold contracts earlier than the contractual term would be to reduce the recognised IFRS 16 right of use asset and liability, as the future contractual payments, and subsequent discounting to present value, are curtailed in term.

Investments in subsidiaries

Investments are stated at cost less provision for impairment. The carrying value is reviewed for impairment if events or changes in circumstances indicate the carrying value may not be recoverable.

Impairment of non-financial assets

The group assesses at each reporting date whether there is an indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the group makes an estimate of the asset's recoverable amount. An asset's recoverable amount is the higher of an asset or cash-generating unit's fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. Impairment losses of continuing operations are recognised in the statement of comprehensive income in those expense categories consistent with the function of the impaired asset. An assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognised impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such a reversal is recognised in the statement of comprehensive income. After such a reversal, the depreciation charge is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life. Any impairment recognised in relation to goodwill cannot be reversed.

Cash and cash equivalents

Cash and cash equivalents comprise cash at banks and in hand and short-term deposits with an original maturity of three months or less. For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and cash equivalents as defined above, net of outstanding bank overdrafts.

Monies held in restricted accounts and deposits represent cash held by the Group in accounts with conditions that restrict the use of these monies by the Group and therefore do not meet the definition of cash and cash equivalents.

Financial assets

Financial assets are recognised when the company becomes party to the contracts that give rise to them and are classified as financial assets at fair value. The company determines the classification of its financial assets at initial recognition and re-evaluates this designation at each financial year end. Financial assets are classified, at initial recognition and subsequently measured at amortised cost, fair value through other comprehensive income (OCI), or fair value through profit or loss.

Notes to the financial statements

at 31 May 2022

1. Accounting policies (continued)

The classification of financial assets on initial recognition depends on the financial asset's contractual cash flow characteristics and the Company's business model for managing them. With the exception of Trade Receivables which does not have a significant financing component, the company measures its financial assets at fair value plus, in case of financial assets not at fair value, through profit and loss, transaction costs.

In order for a financial asset to be classified and measured at amortised cost or fair value through OCI, it needs to give rise to cash flow that are 'Solely payments of principal and interest (SPPI)' on the principal amount outstanding. The assessment is referred to as SPPI test and is performed at instrument level. Financial assets with cash flows that are not SPPI are classified and measured at fair value through Statement of profit and loss account (called the Statement of Comprehensive income in these accounts), irrespective of business model.

The Group and Company's business model for managing financial assets refers to how it manages its financial assets to generate cash flows. The business model determines whether cash flows will result from collecting contractual cashflows, selling the financial asset, or both. Financial assets classified and measured at amortised cost are held within a business model with the objective to hold financial assets in order to collect contractual cash flows while financial assets classified and measured at fair value through OCI are held within a business model with the objective of both holding to collect contractual cash flows and selling.

Subsequent measurement

Financial assets at amortised cost - Loans and receivables

Financial assets at amortised cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired.

The Group and Company's financial assets at amortised cost include trade receivables, and loans to other group companies included under non-current financial assets.

Trade receivables

Trade receivables are non-interest bearing and are recognised initially at fair value, and subsequently at amortised cost using the effective interest rate method, less provision for impairment.

Financial assets at fair value through profit or loss

Financial assets classified as held for trading and other assets designated as such on inception are included in this category. Financial assets are classified as held for trading if they are acquired for sale in the short term. This category includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships as defined by IFRS 9. Derivatives, including separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Impairment and collectability of financial assets

An assessment is made at each reporting date to determine whether there is objective evidence that a specific financial asset may be impaired. If such evidence exists, an impairment loss is recognised as an expense in the statement of comprehensive income. Impairment is determined as follows;

- For assets carried at fair value, impairment is the difference between cost and fair value, less any impairment loss previous recognised in the statement of comprehensive income;
- For assets carried at cost, impairment is the difference between the carrying value and the present value of future cash flows discounted at the current market rate of return for a similar financial asset; and

Notes to the financial statements

at 31 May 2022

- For assets carried at amortised cost, impairment is the difference between the carrying amount and the present value of future cash flows discounted at the original effective interest rate.
- For trade and other receivables, the Company applies the simplified approach permitted by IFRS 9, with lifetime expected credit losses (ECLs) recognised from initial recognition of the receivable. These assets are grouped, based on shared credit risk characteristics and days past due, with ECLs for each grouping determined, based on the Company's historical credit loss experience. Adjustments are made for factors specific to each receivable, general economic conditions and expected changes in forecast conditions.

Derecognition of financial assets

A financial asset (or, where applicable as part of a financial asset or part of a group of similar financial assets) is derecognised when the right to receive cash flows from the asset have expired or the company has transferred its rights to receive cash flows from the asset.

Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts, lease liabilities and derivative financial instruments.

Subsequent measurement

For purposes of subsequent measurement, financial liabilities are classified in two categories:

- Financial liabilities at fair value through profit or loss
- Financial liabilities at amortised cost (loans and borrowings)

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss.

Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Group that are not designated as hedging instruments in hedge relationships as defined by IFRS 9. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments. Gains or losses on liabilities held for trading are recognised in the statement of profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss, with the exception of derivative financial instruments, are designated at the initial date of recognition, and only if the criteria in IFRS 9 are satisfied. The Group has not designated any financial liability as at fair value through profit or loss.

Financial liabilities at amortised cost (loans and borrowings)

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit or loss. This category generally applies to interest-bearing loans and borrowings.

Notes to the financial statements

at 31 May 2022

1. Accounting policies (continued)

Trade payables

Trade payables are non-interest bearing and are recognised initially at fair value and subsequently measured at amortised costs using the effective interest rate method.

Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

Derivative financial instruments

As part of its investment in joint ventures, the Group entered into call and put options in respect of its right to future ownership of shares. Derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as assets when the fair value is positive and as liabilities when the fair value is negative. The fair values of the call and put options are calculated by reference to recognised option pricing models. The fair values of interest rate swaps are calculated by reference to market valuations.

Borrowing costs

Borrowing costs are recognised as an expense when incurred. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

Inventories

Inventories are stated at the lower of cost and net realisable value. Inventories comprise food, coffee beans and packaging goods for resale. The Group applies a weighted average cost method of valuing inventory.

Provisions

Provisions are recognised when the group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Capital instruments

Ordinary shares are classified as equity instruments. Other instruments are classified as liabilities if they contain an obligation to transfer economic benefits and if not they are included in equity.

Group as lessor

Leases taken by the Group are assessed individually as to whether they are finance leases or operating leases. Leases where the lessor retains substantially all the risks and benefits of ownership of the asset are classified as operating leases. Operating lease rental payments, other than contingent rentals, are recognised as an expense in the statement of comprehensive income on a straight-line basis over the lease term. The benefit of lease incentives is spread over the term of the lease.

Contingent rentals, which are determined by revenue of individual stores, are charged when incurred. Where a minimum guarantee exists, a charge is made to the statement of comprehensive income, based on planned performance, to the extent that the individual store is expected to exceed minimum guarantee levels, or at the minimum guarantee level if there is a projected shortfall in performance.

Where lease premiums are paid, these are depreciated over the lease terms, which range between 6 and 20 years.

Notes to the financial statements

at 31 May 2022

1. Accounting policies (continued)

Income taxes

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities, based on tax rates and laws that are enacted or substantively enacted by the balance sheet date.

Deferred tax is recognised on all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements, with the following exceptions:

- where the temporary difference arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss;
- in respect of taxable temporary differences associated with investments in subsidiaries, associates and joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future; and
- deferred income tax assets are recognised only to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, carried forward tax credits or tax losses can be utilised.

Deferred tax assets and liabilities are measured on an undiscounted basis at the tax rates that are expected to apply when the related asset is realised or liability is settled, based on tax rates and laws enacted or substantively enacted at the balance sheet date.

The carrying amount of deferred tax assets is reviewed at each balance sheet date. Deferred tax assets and liabilities are offset only if a legally enforceable right exists to set off current tax assets against current tax liabilities, the deferred taxes relate to the same taxation authority and that authority permits the group to make a single net payment.

Revenue recognition

Revenue is income arising from the sale of goods and services in the ordinary course of the group's activities, net of value added taxes. Revenue is recognised when performance obligations are satisfied and control has transferred to the customer. For the majority of revenue streams, there is a low level of judgement applied in determining the transaction price or the timing of transfer of control, which is typically at the point of sale. The Group is typically the principal in its revenue arrangements.

Sale of goods (store and e-commerce sales)

The sale of goods represents the vast majority of the group's revenue. The performance obligation is satisfied upon transfer of control to the customer which is at the point of sale in store or at the point of delivery to the customer.

Customer loyalty programme

The Group operates a loyalty points programme which entitles customers to a point for each cup of coffee purchased from its stores. Nine points can then be redeemed for a free coffee. The loyalty points issued by Caffè Nero are a separate performance obligation providing a material right to a future discount. The total transaction price (sales price of goods) is allocated to the loyalty points and the goods sold based on their relative standalone selling prices, with the points standalone price based on the value of the points to the customer, adjusted for expected redemption rates (breakage). The amount allocated to loyalty points is deferred as a contract liability within accruals and deferred income. Revenue is recognised as the points are redeemed by the customer.

Royalty fee income

The Group has franchise agreements in place with third parties and joint ventures allowing them to operate coffee bars overseas under the Caffè Nero brand. In exchange for the use of the Caffè Nero brand a sales-

Notes to the financial statements

at 31 May 2022

1. Accounting policies (continued)

based royalty is charged. The Group recognises revenue for these sales-based royalties in the period the overseas sale occurs.

Management and handling fee income

As part of the agreements in place between the Group and its overseas subsidiaries, franchisees and joint ventures, the Group manages the ordering and shipment of coffee and other goods from the UK to its international operations. Revenue is received in the form of management and handling fees for the rendering of these services. The performance obligation to arrange the shipment of goods is satisfied upon delivery of the goods at the customer's overseas location. Payment is generally due within 30 to 60 days from delivery.

Interest income

Interest income is recognised as interest accrues applying the effective interest method.

Grant income

Government grants are recognised when there is reasonable assurance that the grant will be received and all attached conditions will be complied with. If conditions are attached to the grant which must be satisfied before the Company is eligible to receive the contribution, the recognition of the grant as income will be deferred until those conditions are satisfied.

Government grants received as a result of the COVID-19 pandemic are recognised in the Statement of Comprehensive Income so as to match with the related costs they are intended to compensate for.

Government assistance packages from which the Company has benefitted included the Retail, Hospitality and Leisure Grant Fund and the Job Retention Scheme. There are no unfulfilled conditions or other contingencies attached to these grants.

Foreign currency translation

The Group's financial statements are presented in sterling, which is also the company's functional currency. Transactions in foreign currencies are initially recorded in the entity's functional currency by applying the spot exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency rate of exchange ruling at the balance sheet date. All differences are taken to the income statement. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

Exceptional items

Exceptional items are separately classified in the statement of comprehensive income and are defined as those items that, by virtue of their unusual nature or size, warrant separate additional disclosure in the financial statements in order to fully understand the performance of the Group. Adjusted performance measures are also used and are reconciled to the statement of comprehensive income.

Deferred consideration

Deferred consideration is recognised on the acquisition of subsidiaries at discounted present value. Subsequently deferred consideration is unwound as a finance cost through profit or loss in the period it arises.

Pensions

The Company operates a defined contribution plan for its employees. A defined contribution plan is a pension plan under which the Company pays fixed contributions into a separate entity. Once the contributions have been paid the Company has no further payment obligations. The contributions are recognised as an expense in the Statement of Comprehensive Income when they fall due. Amounts not

Notes to the financial statements

at 31 May 2022

1. Accounting policies (continued)

paid are shown in accruals as a liability in the Balance Sheet. The assets of the plan are held separately from the Company in independently administered funds.

Notes to the financial statements

at 31 May 2022

2. Revenue

Revenue, which is stated net of value added tax, represents amounts received from the sale of goods from the Group's principal continuing activity, being the operation of high-quality Italian coffee bars.

All of the revenue is derived in the United Kingdom.

Set out below is the disaggregation of the Group's revenue from contracts with customers:

	2022	2021
	£000	£000
Store sales	330,401	195,525
Customer loyalty programme	14,731	8,254
Royalty fees	1,142	857
Management and handling fee income	533	244
E-commerce sales	2,276	1,598
Total revenue from contracts with customers	349,083	206,478

All revenue from contracts with customers is recognised on transfer of goods and services at a point in time.

Performance obligations for all revenue streams are explained within the revenue accounting policy. Contract liabilities of £2.6m (2021 – £1.6m) exist in respect of the customer loyalty programme and are presented within deferred income (in current liabilities – see note 19.1). Revenue related to the customer loyalty programme has increased due to increase in store sales due to the removal of Covid-19 related government restrictions in the year. Trade / contract receivables arising from e-commerce sales are included within trade receivables (see note 17).

A portion of the Group's revenue is derived from fully controlled subsidiaries operating in Turkey, USA and Sweden. The Group also derives revenue from sales of coffee to the Group's joint venture in Poland and revenue from franchisees operating in other international territories.

Set out below is the disaggregation of the Group's revenue by geographic area:

	2022	2021
	£000	£000
UK and Ireland	314,977	187,136
Turkey	12,793	6,876
USA	17,788	10,007
Sweden	2,078	1,429
Poland	98	66
Oman	28	19
Croatia	77	17
UAE	848	603
France	-	19
Cyprus	396	306
	349,083	206,478

Notes to the financial statements

at 31 May 2022

3. Operating Profit

Operating profit is stated after charging/(crediting):

	2022	2021
	£000	£000
Auditor's remuneration– audit of group financial statements	216	164
– audit of financial statements of subsidiaries	134	101
– tax compliance and advisory	-	23
Costs relating directly to opening new sites	-	16
Exceptional items – see note 3.3	8,890	3,123
Government grants – see note 3.1	(3,357)	(41,667)
Depreciation of property, plant and equipment	15,219	18,058
Impairment of property, plant and equipment	220	6,481
Loss on disposal of property, plant and equipment	147	3,905
Gain on disposal of right of use assets	(2,554)	(20,013)
Movement in fair value of share options	(3,555)	(10,422)
Movement in fair value of interest rate swaps	1,290	(1,140)
Movement in fair value of currency contracts	601	(792)
(Gain)/Loss on foreign exchange	(7,270)	(2,310)
Amortisation of intangible assets	3,457	3,680
Amortisation of lease premiums	67	80
Depreciation of right of use assets	21,864	32,458
Impairment of right of use assets	348	-
Finance charges payable on lease liabilities	5,409	10,384

3.1 Government grants and assistance

During the year the Group recognised grant income from the UK Government to mitigate the impact of COVID-19.

Government assistance packages from which the Company benefitted included:

- The Coronavirus Job Retention Scheme (CJRS)
- The Retail, Hospitality and Leisure Grant Fund (RHLGF)
- The Temporary Wage Subsidy Scheme (TWSS) – Republic of Ireland
- The COVID restrictions support scheme (CRSS)

Amounts received and receivable during the year are disclosed below:

	2022	2021
	£000	£000
Grant income in respect of CJRS included in cost of sales	-	24,576
Grant income in respect of CJRS included in administrative expenses	-	2,756
Grant income in respect of RHLGF included in administrative expenses	2,343	11,298
Grant income in respect of TWSS included in cost of sales	1,014	941
Grant income in respect of CRSS included in cost of sales	-	239
Grant income in respect of the US Paycheck Protection Programme	-	1,857
	3,357	41,667

Notes to the financial statements

at 31 May 2022

3. Operating Profit (continued)

3.1 Government grants and assistance (continued)

At 31 May 2022, receivables in respect of the CJRS of £268k (2021 - £1.1m) were included in prepayments and other debtors. Payables of £-m (2021 - £0.1m) in respect of TWSS overpayments are included within other payables.

3.2 Reconciliation to reported EBITDA

	2022 £000	2021 £000
Loss before taxation	(7,551)	(16,679)
Interest receivable and similar income	(1,293)	(1,200)
Finance costs and similar charges	35,547	38,602
Depreciation and amortisation of intangible assets	18,676	21,716
Unadjusted EBITDA	45,379	42,439
¹ Reversal of IFRS 16	(3,013)	(489)
² Foreign exchange differences	6,858	(2,602)
³ Movement in fair value of derivatives	(2,955)	(10,422)
⁴ Impairment	220	6,481
⁵ Gain / loss on disposal	147	3,977
⁶ Fees and exceptionals	8,890	(1,934)
⁷ Share of loss before tax of joint ventures	110	2,971
⁸ Caffè Nero Poland (Green Coffee Sp.z.o.o.)	1,252	(1,441)
⁹ Royalties and group overheads	770	(467)
Brand total EBITDA	57,658	38,513

¹ Foreign exchange movements pre-IFRS 16 is added back to align with how management view EBITDA.

²⁻⁷ These items are all excluded from Brand EBITDA as they are non-cash and non-operational items

⁸ These items relate to Caffè Nero Poland, an integral part of the Group. The adjustments replace its loss before tax with its EBITDA

⁹ The Group monitors Brand EBITDA before royalty income and Group overhead.

3.3 Exceptional items

Amounts recognised within exceptional items in the statement of comprehensive income during the year are as follows:

	£'000 2022	£'000 2021
Costs and income arising from the CVA		
Net gain on disposal of right of use assets and lease liabilities	-	20,013
Reimbursement of CVA professional fees	2,591	-
Professional advisory fees	(6,095)	(6,279)
Release of other compromised creditors	-	1,526

Notes to the financial statements

at 31 May 2022

3. Operating Profit (continued)

	£'000	£'000
Costs and income arising from the CVA	2022	2021
Store impairments resulting from significant trading disruption due to the Covid-19 pandemic	-	(18,383)
Impairment of Goodwill in Turkey	(5,114)	-
Store closure costs	(272)	-
Exceptional items (pre-tax)	(8,890)	(3,123)
Tax impact of exceptional items	(1,689)	(1,077)
Exceptional items (post-tax)	(10,578)	(4,200)

The Directors have concluded these costs are material to the financial statements and are non-recurring in nature. The exceptional costs arose as a result of the severe impact of Covid-19 on the business and the wider hospitality industry, which resulted in the Groups main trading entity, Nero Holdings Limited entering into a CVA (described in more detail in the strategic report) and multiple creditors being compromised as a consequence. Professional fees were also incurred in entering into the CVA. The disposal of right of use assets and lease liabilities arose as rental costs are now based on store-level revenues rather than being fixed in nature.

4. Directors' remuneration

	2022	2021
	£000	£000
Amount paid in respect of qualifying services	-	-
Aggregate directors' remuneration	800	542
Aggregate directors' pension scheme contributions	1	1

The directors of the Group were remunerated by Nero Holdings Limited, a Group undertaking, in respect of their services to the UK Group. The directors were paid remuneration and pension contributions of £0.8m (2021 – £0.5m) in the year. It is not possible to identify the proportion of these remunerations that relate to services to each individual company within the Group.

The highest paid director was paid remuneration of £491k (2021 – £331k). No pension contribution was paid due to the director opting out of his pension membership during the year.

Directors of other Group companies also remunerated by Nero Holdings Limited were paid £0.4m (2021 – £0.4m) for their services. Directors remunerated by Coffee #1 Limited were paid £0.2m (2021 – £0.1m) for their services.

At the year end, the Company owed a director Gerry Ford £186k (2021 – £174k) in respect of business use of a personal car and £344k in respect of pensions (2021 – £322k).

Movement in fair value of currency options	-	792
	<u>35,547</u>	<u>38,602</u>

Notes to the financial statements

at 31 May 2022

8. Income tax

Other taxation, excluding corporation tax

The Group has paid a total tax bill of £41m in the UK this year. This is made up of VAT, employment taxes (including PAYE and apprenticeship levy) and business tax rates, representing 13% of total UK sales of £40k per store (2021 - £17k per store). Corporate tax affairs are evaluated at this group level.

Corporation tax

The Group generated a loss before taxation of £7.6m (2021 - £17m). The reduced loss was driven from Government support including Grants of £3.4m (2021 - £41.7m) and a temporary reduction in the standard rate of VAT from 20% to 5% & 12.5% for the hospitality industry resulting in increased cash margins on sales during the year. The Group also benefitted from favourable movement in the fair value of options of £3.6m and incurred net exceptional costs of £8.9m.

	2022 £000	2021 £000
Current tax:		
Current tax on profits for the year	1,638	418

Origination and reversal of timing difference	-	11,737
Other	(51)	(346)
Deferred tax asset at 31 May	166	8,566

Deferred tax assets are recognised once it is considered more likely than not that they will be recoverable against future taxable trading profits arising in the Group.

On 23 September 2022 the Chancellor of the Exchequer announced that the corporation tax rate will remain at 19% from 1 April 2023, reversing a previously enacted measure to increase the rate to 25%. This reversal in the tax rate from 1 April 2023 has not been enacted or substantively enacted and accordingly has no impact on the tax balances at 31 May 2022.

The potential impact of this change on the deferred tax balances at 31 May 2022 is expected to be immaterial.

Notes to the financial statements

at 31 May 2022

9. Results attributable to members of parent undertaking

The post-tax loss attributable to the company for the year was £8.5m (2021 – £4.3m).

10. Cash and cash equivalents

11. Monies held in restricted accounts and deposits

Monies held in restricted accounts and deposits represent cash held by the Group in accounts with conditions that restrict the use of these monies by the Group and, as such, does not meet the definition of cash and cash equivalents. Restrictions include funds held by the Group's Escrow Agent, GLAS Trustees Limited as well as separate funds held as collateral for guarantees issued to landlords in the United States. Holding cash in restricted accounts does not prevent the Group from optimising returns by putting these monies on short-term deposit.

12. Property, plant and equipment (continued)

Asset written down to nil net book value but with a gross cost of £105m (2021 – £85.4m) are still in use by the company at 31 May 2022.

The significant trading disruption in the prior period due to the COVID-19 pandemic was judged to be an indicator of potential impairment of assets and as such the directors decided to assess all assets for impairment in accordance with IAS 36. The current year began in the same way and was also impacted by COVID-19, causing a disruption to trade. The directors, again, decided to re-assess all assets for impairment with the same principles as the prior year.

The approach to impairment reviews remains unchanged from previous years and relies primarily on value in use calculations based on cash flow projections approved by senior management.

In this base case forecast, it is assumed that trading performance will gradually return to a pre-Covid level over the period from June 2022 to May 2023 and then grow at a terminal growth rate of 2.5%.

Discount rates as used in the value in use calculations are estimated with reference to the wider Caffè Nero Group's weighted average cost of capital. For 2022, a discount rate of 10.5% has been applied to discount future cash flow projections (2021 – 10.2%).

Impairment has been recorded in a small number of stores, reflecting weaker trading following the Covid-19 pandemic. A charge of £0.2m (2021 – £6.5m) was recorded against Property, Plant & Equipment ('PPE') and a further £0.3m (2021 – £11.9m) against right-of-use assets (see note 13).

Disposals arose following Covid-19 driven store closures.

13. Right-of-use assets and lease liabilities

	£000
Right-of-use assets at 1 June 2021	85,525

Goodwill arose as follows:

1. The brand value arose on the acquisition of Italian Coffee Holdings Ltd on 1 February 2007 and is being amortised over 20 years. Goodwill on acquisition of £142m was recognised.
2. In 2015, the company acquired a 50% shareholding in Caffè Nero Gida Urunleri AS, taking the group's total shareholding to 100%. Goodwill on acquisition of £14.1m was recognised.
3. During 2017 the company acquired a 100% shareholding in Harris and Hoole Limited. Goodwill on acquisition of £2.5m and a brand value of £1.7m were recognised. The brand value was based on a 10 year forecast, hence is being amortised over 10 years.
4. On 6 February 2019, Storm Finance Co Ltd acquired 100% of the issued share capital of Coffee #1 Limited which owns the leases of 92 coffee bars that trade under the Coffee #1 brand. Goodwill on acquisition of £3.9m and a brand value of £21.8m were recognised.

The remainder of goodwill arose on the acquisition of the UK Caffè Nero stores in 2007.

Impairment testing of goodwill

The group tests for impairment annually or more frequently if there are indications that goodwill may be impaired.

UK (Italian Coffee Holdings Ltd and Harris and Hoole Limited) CGU & Coffee #1

The recoverable amount has been determined based on a value in use calculation. The value in use has been determined using a discounted cash flow model. The model incorporates projected cash flow forecasts over a period of 5 years and incorporates a terminal value based on expected long-term growth. The cash flows have been discounted to a present value using an appropriate discount rate. As a result of

Notes to the financial statements

at 31 May 2022

14. Intangible assets (continued)

this analysis no impairment has been recorded in the current year. The model uses the following key assumptions:

Turkey (Caffè Nero Gıda Ürünleri AS) CGU

The recoverable amount has been determined based on a value in use calculation. The value in use has been determined using a discounted cash flow model. The model incorporates projected cash flow forecasts over a period of 9 years and incorporates a terminal value based on expected long-term growth. A longer forecast period has been used compared to the UK due to the longer expected volatility in inflation rates before this CGU is forecast to reach a stable level. The cash flows have been discounted to a present value using an appropriate discount rate. As a result of this analysis, an impairment charge of £5.1m has been allocated against the existing goodwill balance of £12.1m. The discount rate utilised in this calculation was 30.8% vs last year 15.2% which is driven by the hyperinflationary conditions currently being experienced in Turkey. Turkey's accounts have been prepared using normal inflationary assumptions however as the impairment is a forward looking exercise, hyperinflation conditions had to be accounted for.

The model uses the following key assumptions:

Discount rate

A post-tax discount rate ranging from 10.5% to 30.8% has been used (2021 - 10.2% to 15.2%) and an appropriate country risk premium has been used where applicable. The discount rate has been derived from the group's weighted average cost of capital, adjusted to reflect a market assessment of the risks specific to the cash generating assets.

EBITDA growth

The discounted cash flow model was driven by EBITDA, representing the operating cash flows of the business. The EBITDA growth assumption used was 2.5% (2021 - 2.5%). The most significant assumptions and estimates relate to a like for like sales assumption of 2.5%. It is assumed that our business maintains a steady recovery in revenues. The forecast EBITDA is based on existing stores and excludes projected earnings from future store openings. Forecast capital expenditure on new stores has been excluded from the cash flow projections.

A terminal growth rate in the range of 2.9% to 10% (2021 - 1.9% to 5%) has been used to calculate expected cash flows of Italian Coffee Holdings Ltd after 5 years and Caffè Nero Gıda after 9 years respectively. This assumption is consistent with the long-term growth projections for the industry.

Sensitivity to changes in assumptions

The Group has conducted a sensitivity analysis taking into consideration the impact on key impairment test assumptions including discount rates and terminal year EBITDA applied to the cash flows.

The below table sets out the impact of a 1% increase in discount factor and a 10% reduction in terminal value EBITDA for each CGU within the Group:

Notes to the financial statements

at 31 May 2022

14. Intangible assets (continued)

Intangible asset base:

	Caffè Nero UK (including H&H) £'000	Coffee #1 £'000	Caffè Nero Gida Urunleri AS £'000	Total £'000
Goodwill	145,003	3,866	12,119	160,988
Brand	15,500	21,841	-	37,341
Impairment	-	-	(5,115)	(5,115)
Subtotal	160,503	25,707	7,004	193,214

Sensitivities:

	Caffè Nero UK (including H&H) £'000	Coffee #1 £'000	Total £'000
Headroom under base case	308,269	36,973	345,242
Headroom: 1% increase in discount factor	248,656	27,498	276,154
Headroom: 10% reduction in terminal value EBITDA	245,247	26,659	271,906

The key assumptions used in the recoverable amount estimates are the discount rates applied and the forecasted EBITDA growth. The Group has conducted a sensitivity analysis taking into consideration the impact on key impairment test assumptions arising from a range of possible trading and economic scenarios as outlined in the scenarios above.

undertakings*
£000

Company

As at 31 May 2022	454,442
As at 31 May 2021	454,442

In the opinion of the directors, the aggregate value of the investment in subsidiary undertakings is not less than the amount at which it is stated in the balance sheet.

Subsidiaries

The Company holds all the equity share capital of Rome PIK Holdco Limited, which is an indirect parent company of the main trading entities within the Group including Nero Holdings Limited, Harris and Hoole Limited, Caffè Nero Ireland Limited, Aroma Limited and Coffec #1 Limited, which operate Italian style coffee bars. The Company is also an indirect parent of Nero Coffee Roasting Limited, which roasts and packages coffee for the worldwide operations of the group. The results of these companies have been consolidated in these financial statements. All these companies are incorporated in England and Wales.

Caffè Nero Ventures Limited is another indirect subsidiary of the Company. Caffè Nero Ventures Limited acts as the management company of the Group's overseas subsidiaries Caffè Nero Gida Urunleri AS, Caffè Nero Americas Inc, CN Sweden AB, joint venture Green Coffee Sp z.o.o, and franchises.

Joint ventures

On 27 September 2012, the Group acquired 58.46% of Green Coffee Sp Z.o.o. a company based in Warsaw, Poland and also acting as a coffee retailer. In a prior period, £2.5 million was invested bringing the group's stake to 90.0%. The company is accounting for this investment as a joint venture as unanimous shareholder votes are required for all key operating, strategic and financial decisions and the definition of control has not been satisfied.

The group has a call option to acquire the remaining 10% of Green Coffee Sp Z.o.o. The holders of the remaining shares also have a put option to sell their remaining shares to the Group.

The execution price of the above is dependent on company performance. The call and put options are accounted for at fair value through profit and loss, the call option is recognised as a financial asset and the put option is recognised as a financial liability (note 23). At 31 May 2022, the options had a fair value of £0.6m and £0.1m respectively. The fair value of the options decreased in the year by £0.02m (2021 - increase of £0.8m), which has been recognised in the statement of comprehensive income.

Notes to the financial statements

at 31 May 2022

15. Non-current asset investments (continued)

The share of the assets, liabilities, income and expenses of Green Coffee Sp. Z.o.o at 31 May 2022 are as follows:

Notes to the financial statements

at 31 May 2022

15. Non-current asset investments (continued)

Details of group undertakings

In February 2022, the Group acquired an additional 33% of its subsidiary Coffee #1 from SA Brain. SA Brain had been the previous owner, and had retained a 33% minority stake upon selling the majority to the Group. This new development takes the Group's ownership of Coffee #1 to 76.5%.

In May 2022, the group acquired an additional 4% of its subsidiary CN Sweden AB.

All investments are held by subsidiary undertakings apart from a directly held investment in Rome PIK Holdco Limited. Details of the investments in which the Group holds 20% or more of the nominal value of any class of share capital are as follows:

<i>Name of company</i>	<i>Proportion of voting rights and shares held</i>	<i>Nature of Business</i>

20. Provisions

	2022 £000	2021 £000
At 1 June	4,926	3,431
Provided during the year	182	2,224
Utilised during the year	(1,100)	(729)
At 31 May	4,008	4,926

¹ Due to the transition to IFRS 16 in the previous financial year, the liabilities for all leases, including those that are onerous, are included in lease liabilities on the Statement of Financial Position. As part of the transition, onerous lease provisions were used to reduce the right of use asset as an impairment.

Provisions for dilapidations are based on the future expected repair costs required to restore the Group's leased buildings to their fair condition at the end of their respective lease terms. Provisions for dilapidations are recognised on a lease by lease basis and are based on the best estimate of the likely committed cash outflow. Provisions are based on assumptions concerning the timing of cash flows, dependent on the remaining term of the leases, which is up to 7.5 years.

21. Other financial liabilities

Group

At 31 May 2022	Current £000	Non-current £000	Total £000
<i>Interest bearing loans and borrowings:</i>			
Super Senior Revolving Credit Facility – £15m ⁽¹⁾	-	12,837	12,837
Term loan – Unitranche – £324m ⁽²⁾	-	314,192	314,192
Term loan – Capex facility – £20m ⁽³⁾	-	17,741	17,741
Non-secured third-party loans	-	11,971	11,971
	-	356,741	356,741

Amounts disclosed above are net of issue costs total of £18.3m.

⁽¹⁾ The Super Senior Revolving Credit Facility has a nominal balance of £15m. Interest is charged at SONIA +2.75-3.5% variable cash margin. This amount is repayable on 23 December 2026.

⁽²⁾ The Unitranche Facility has a nominal balance of £324m. Interest is charged at a total of of SONIA + 7-7.75% variable cash and PIK margin. The group elects the proportion of interest to capitalise each quarter. This balance includes £3.6m of capitalised interest. The facility is repayable on 23 December 2027.

The net amount disclosed above also includes effective interest charged on the loan premium, payable upon repayment of the Unitranche facility. The expected final repayable balance as at 31 May 2022 is £14m. This payable is calculated as a variable upon the group's EBITDA.

⁽³⁾ The Capex Facility has a nominal balance of £20m. Interest is charged at a total of SONIA + 7-7.75% variable cash and PIK margin. The group elects the proportion of interest to capitalise each quarter. This balance includes £0.2m of capitalised interest. The facility is repayable on 23 December 2027.

⁽³⁾ where SONIA means the Sterling Overnight Index Average

⁽⁴⁾ where SOFR means the Secured Overnight Financing rate.

In order to hedge exposure to interest rate risk, the group had entered into interest rate swaps to fix £80 million of the term loans over a period of 46 months, expiring on 31 March 2026. All loan repayments are to be made in the same currency in which the loan principal is denominated.

Notes to the financial statements

at 31 May 2022

22. Deferred consideration

	£000	£000
	2022	2021
At 1 June 2021	4,722	4,244
Payment of deferred consideration	(5,541)	-
Unwinding of discount	819	478
At 31 May 2022	-	4,722

Deferred consideration relates to the acquisition of Coffee #1 Limited on 6 February 2019. It is contingent on the exercise of options held by certain subsidiaries and the previous owner, S.A. Brains, respectively. Under the terms of the agreement, the options are exercisable at both the earliest of 42 months and 54 months from the date of acquisition based on certain multiples of EBITDA, 8x and 9x respectively. (The options are held within Storm Equity Co Ltd, a member of the wider Caffè Nero Group).

During the year ending 31 May 2022, the group exercised its option to purchase the remaining share of Coffee #1 Limited from S.A. Brains. The deferred consideration was paid as part of this purchase and the remaining value was released to the Income Statement.

23. Financial instruments

The Group uses various financial instruments including joint venture investments, cash, trade & other debtors, bank, Group balances, loans, trade & other creditors and derivatives. The parent company is also exposed to risk in respect of its holding of investments in subsidiary undertakings. Existence of these financial instruments exposes the Group and parent company to a number of financial risks, which are described in more detail below.

The main risks arising from the Group's financial instruments are interest rate risk, credit risk liquidity risk and investment impairment risk. The directors review and agree policies for managing each of these risks and they are summarised below. These policies have remained unchanged from previous years.

Interest rate risk

The Group borrows in pound Sterling at floating rates of interest. The Group's policy is to keep at 40-60% of its borrowings at fixed interest rates. This is achieved by entering into interest rate swaps which are designed to hedge underlying debt obligations. The Group classifies interest rate swaps as derivative financial instruments and measures them at fair value. These instruments do not qualify for hedge accounting. The Group refinanced its loan facilities during the year and put in place a long-term swap for 25% of its borrowings during the year with a further 20% swapped post year end.

Credit risk

The Group monitors its exposure to third party credit risk through detailed checks on customers and regular review of outstanding receivables. The Group mitigates its exposure to related party credit risk by only lending to undertakings from the same Group of which it is a member.

Investment impairment risk

The directors understanding of the risks associated with the investments held by the entity relate to the potential impairment of those investments. To identify any risk of impairment in a timely manner, the Group reviews the financial performance of its investments on a regular basis. The directors are satisfied with the performance of the investments. This is expected to continue for the foreseeable future.

Notes to the financial statements

at 31 May 2022

23. Financial instruments (continued)

Liquidity risk

The Group's objective is to maintain a balance between continuity of funding and flexibility through the use of bank loans, other loans and facilities. The Group regularly reviews its exposure and ensures funds are available as required. The Group refinanced its facilities during the year and this has provided access to a Revolving Credit Facility as well as a Capex Facility.

Capital risk management

Capital comprises shareholders' equity and financing from third party loans and the Company's parent undertakings. The primary objective of the Group's capital management policy is to ensure that the Group has adequate capital to support the business. The Group monitors the cost of the various sources of capital on an ongoing basis and manages cost through planning future alternative sources of capital. No changes in these factors were made during the year. The Group has no externally imposed capital restrictions. To the extent derivatives impact the financial statements they do not impact decision making options.

The table below summarises the maturity profile of the group's financial liabilities at 31 May 2022 and 31 May 2021 based on contractual undiscounted payments.

As at 31 May 2022

Third party loans	-	-	396,042	-	396,042
	-	27,192	396,042	-	423,234

The table below sets-out the interest rate risk profile. Interest rates on variable rate loans have been based on SONIA at the relevant balance sheet date. The Unitranche and Capex loans accrue rolled-up interest, which is not payable until the maturity of the loan under the terms of the finance agreements. The Unitranche loan also has a cash interest payable element. Future interest on the Capex and Unitranche loans is charged on the unpaid interest element as well as the original capital amount. Interest will accrue on previously unpaid interest charges throughout the term of each agreement. Interest due on the senior loans is not rolled up and is payable on a quarterly basis on contractual due dates. The contract maturity table assumes that interest will continue to be accrued until the termination date of each agreement.

Interest rate risk

Group

The floating rate financial liabilities bear interest at rates based on the percentages above LIBOR as set out in note 21.

Floating rate cash and deposits earn interest at rates linked to LIBOR. The following table demonstrates the sensitivity, to a reasonably possible change in interest rates, with all other variables held constant, of the group's result before tax (through the impact on floating rate borrowings and financial assets).

	<i>Increase / decrease in basis points</i>	<i>Effect on result before tax £000</i>

23. Financial instruments (continued)

Fair values of financial assets and liabilities

The book values of financial assets and liabilities of the group are set out below. The directors conclude there were no material differences between the book values and fair values at each year end.

	2022	2021
	£000	£000
Investments in joint ventures	1,785	1,895
Trade and other receivables	7,064	9,311
Cash at bank and in hand (including monies held in restricted accounts)	20,992	41,146
Trade and other payables	(21,826)	(18,981)
Lease liabilities	(123,571)	(107,202)
Current portion of third-party long-term borrowings	-	(2,290)
Long term third party borrowings	(356,741)	(388,120)
Interest rate swap	(1,247)	(43)
Call options	1,038	4,907
Put options	(3,953)	(4,266)
Fair value of currency contracts	118	(483)

Interest rate swaps

During the year, the Storm interest rate swap agreement terminated. A new swap agreement was entered into with Santander and Rome Bidco Limited. This swap has a duration of four years and payments of interest under the hedge arrangements are due on the same dates as those on which the interest payments on the underlying borrowings fall due for payment. Payments and receipts under this interest rate swap is recognised in the statement of comprehensive income when it becomes due and the interest rate swap is accounted for at fair value through the profit and loss. The overall fair value of the groups interest rate swaps increased by £1.3m to a total asset of £1.2m (2021 – liability of £0.43m). The table below summarises the details of the remaining interest rate swap agreements:

The table below summarises the details of the interest rate swap agreements active in the year:

	Principal amount £000	Termination Date	Interest rate %
Rome Bidco Swap	80,000	31-Mar-26	1.886%
Total	80,000		1.886%

<i>Non current liabilities</i>		
Fair value of put option	-	4,138
<i>Current liabilities</i>		
Fair value of put option	3,953	128

The group has granted a put option to the minority shareholder of Green Coffee Sp Z.o.o. by which it can sell its shares to the group at certain multiples of EBITDA. The liability has been fair valued using the Black Scholes model and is included within current liabilities. The group also has a call option whereby it can acquire the minority shareholder's remaining shares. This is also based on multiples of EBITDA. The asset has been fair valued using the Black Scholes method and is included within current assets.

As part of the acquisition of Coffee #1 Limited in 2019, the Group was granted call options by both S. A. Brains and MC (Cayman) Coffco Limited, to purchase their respective minority shareholdings in Coffee #1 Limited. The call options were granted at both the earliest time of exercise of 42 months and 54 months based on certain multiples of EBITDA. Put options were also granted to each minority shareholder to sell their remaining shares under the same terms of exercise. During the year ended 31 May 2022, the group exercised its option to purchase S.A. Brains minority shareholding in Coffee #1. At the year end, only the MC (Cayman) Coffco Limited options remain. The fair value of the call (£1m) and put options (£4m) are calculated using the Black Scholes pricing method. The put option has been recognised as a current financial liability (note 21) and the call options have been recognised within current assets (note 17).

Forward currency contracts

The Group uses forward currency contracts to hedge its exposure to foreign currency risks arising from overseas operations. The currency contracts have been fair valued and are included within current assets (note 17). The fair value attributable to the currency contracts increased by £601k in the year (2021 – decrease of £792k), the movement of which has been recognised in the Statement of Comprehensive Income.

Fair value hierarchy

In accordance with IFRS 7 Financial Instruments: Disclosures, financial instruments which are carried at fair value in the balance sheet are analysed as level 1, 2, or 3. The Group classified interest rate swaps and forward currency contracts as level 2 financial instruments (2021 – level 2) as their fair value is determined based on techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly. The call and put options are classified as level 3 (2021 – level 3) financial instruments as their valuations are based on non-observable inputs. Interest bearing loans and borrowings include a loan premium of £14m which is measured at the effective interest rate. This is also a level 3 financial instrument.

Notes to the financial statements

at 31 May 2022

23. Financial Instruments (Continued)

Borrowing facilities

The group has various borrowing facilities available. The undrawn committed facilities available at each relevant period or year-end were £65m (2021-£750k).

24. Authorised and issued share capital

	No.	2022 £	No.	2021 £
Allotted, called up and fully paid				
Ordinary shares of £1 each	2,041	<u>2,041</u>	1,040	<u>1,040</u>

The company has one class of share with equal voting rights. On 30 December 2021, a further 1,001 ordinary shares of £1 were issued. A share premium of £35,670k was recognised on issuance.

Other reserves disclosed in the group statement of changes in equity – the nature and purpose of this reserve is to record the release of deep discounted bonds which occurred in prior years. During the current year £11,829k was recorded as a result in the acquisition of non-controlling interests disclosed in note 15.

25. Contingent liabilities

Assets of the Group are held as security against loans and borrowings in note 21.

26. Capital commitments

At 31 May 2022, capital commitments contracted but not provided for in the financial statements were £1.5m (2021 – £nil).

27. Related party transactions

The group considers key management personnel to only include the directors of the group.

The amounts outstanding between the group and other related parties at the year-end were as follows:

	2022 £000	2021 £000
Amounts owed to Saratoga Limited	-	90
Amounts owed to Cheyson Partners	-	108
Amounts owed to Paladin Partners	216	216
Amounts owed to G W Ford	531	496
Amounts due to S. A. Brains – non interest bearing (included within trade payables)	-	26
Amounts due to S. A. Brains – interest bearing	-	1,606
Amounts owed to Rome Intermediate Co Ltd	5,871	4,870
Amounts owed to the Nero Company SARL	1,141	1,239
Amounts owed by Rome Intermediate Holdings SARL	(539)	(482)

Saratoga Limited previously held and monitored the beneficial interests of G W Ford in Caffè Nero along with Cheyson Partners Limited which manages Paladin Partners 1, a 39% shareholder of the group.

The following transactions took place between the group and related parties during the year:

Notes to the financial statements

27. Related party transactions (continued)

Rome Bidco Limited has paid monitoring fees to Saratoga Limited, Cheyson Partners Limited and Paladin Partners. At 31 May 2022, the amounts paid during the year were £90,000, £108,000 and £nil respectively (2021 – £54,000, £18,000 and £nil respectively). Rome Bidco Limited also paid an amount of £750,000 to Cheyson Partners Limited for consultancy and advisory fees in respect of advice provided during the course of its refinancing.

At the year end, the Group owed one of the directors, G W Ford £187k (2021 - £174k) in respect of business use of a personal car and £344k in respect of pensions (2021 - £322k).

As part of the acquisition of Coffee #1 Limited in prior years, S. A. Brains, a previous minority shareholder of a subsidiary, Coffee #1 Limited, granted an interest-bearing loan to Coffee #1, attracting interest at a rate of 4% per annum. In February 2022, S. A. Brains shares in Coffee #1 were purchased and the loan was paid off. The movement in the interest-bearing related party loan represents the payment of this loan. S.A. Brains remained the landlord of four Coffee#1 sites after the year acquisition. In the current year, the sites were taken over by a new independent landlord. At the year end, £nil (2021: £26k) was outstanding to S.A Brains in relation to rent for these sites.

Rome Intermediate Co Ltd, The Nero Company and Rome Intermediate Holdings SARL are intermediate parent undertakings of the Group. Movements in balances arose following transactions in respect of group treasury.

Transactions with key management personnel (comprising the directors) are disclosed below:

	<i>Group</i>	<i>Group</i>	<i>Company</i>	<i>Company</i>
	<i>2022</i>	<i>2021</i>	<i>2022</i>	<i>2021</i>
