AYNGARAN INTERNATIONAL (UK) LTD

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH 2010

1 BASIS OF PREPARATION

The financial statements are prepared under the historical cost convention in accordance with applicable United Kingdom Accounting Standards (United Kingdom Generally Accepted Accounting Practice), which have been applied consistently (except as otherwise stated)

The financial statements present information about the company as an individual undertaking. Being an indirect subsidiary, the accounts are consolidated in Eros International PLC, the ultimate parent company.

Turnover and revenue recognition

Turnover represents the total invoice value, excluding value added tax, of sales made during the year and derives from the provision of goods falling within the company's ordinary activities. The revenue is recognised for the services as the services are performed.

Cash flow Statement

The directors have taken the advantage of exemption in Financial Reporting Standard No 1 (Revised 1996) from including a cash flow statement in the financial statement on the grounds that the company is a subsidiary company and ultimate parent publishes a consolidated cash flow statement.

Film and Audio/Video Licensing Rights (Contents)

Investments in films and associated rights, including acquired rights and distribution advances in respect of completed films, are stated at cost less amortisation less provision for impairment. A charge is made to write down the cost of completed rights over the estimated useful lives except where the asset is not yet available for exploitation.

Amortisation Film and Audio/Video Licensing Rights

The company's policy in amortising intangible assets is as follows:

The amortisation charge is recognised in the income statement within cost of sales.

Film Licensing rights are divided into 3 groups-Theatrical, DVD and TV & Satellite in the ratio of 50:30:20. Theatrical rights are amortised 100% in the first year while DVD and TV rights are amortised at the rate of 50% in the first year, 30% in the second year and 20% in the third year. Audio and Licensing Rights are amortised over 10 years. Blue Ray Technology 25% straight line.

Tangible fixed assets and depreciation

Tangible fixed assets are stated at cost, net of depreciation and any provision for impairment. Depreciation is calculated to write down cost less estimated residual value of all tangible fixed assets. The rates applicable are:

Motor Vehicles 20% straight line

Equipment 20% straight line

Stocks

Stocks which comprise videos and DVDs are valued at the lower of cost and net realisable value of each of item or group of items, after making due allowance for obsolete and slow moving items.

Foreign currencies

Transactions in foreign currencies are translated at the exchange rate ruling at the date of the transaction. Monetary assets and liabilities in foreign currencies are translated at the rates of exchange ruling at the balance sheet date. Non-monetary items that are measured at historical cost in a foreign currency are translated at the exchange rate at the date of the transaction. Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. Any exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were initially recorded are recognised in profit or loss in the period in which they arise. Exchange differences on non-monetary items are recognised in the statement of changes in equity to the extent that they relate to a gain or loss on that non-monetary item, otherwise such gains and losses are recognised in the income statement.

Deferred taxation

The charge for taxation takes into account taxation deferred as a result of timing differences between the treatment of certain items for taxation and accounting purposes. In general, deferred taxation is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date. However, deferred tax assets are recognised only to the extent that the directors consider that it is more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted. Deferred taxation balances are not discounted.
