Notes to the Financial Statements

1. Accounting policies

The principal accounting policies, which have been applied consistently throughout the current and prior year are

(a) Basis of accounting

The financial statements are prepared under the historical cost convention and in accordance with applicable United Kingdom accounting standards, unless otherwise stated

No cash flow statement has been presented as provided by FRS 1 (Revised) as the consolidated financial statements of the ultimate holding company (Note 16) contain a consolidated cash flow statement which includes the cash flows of this Company and are publicly available

The balance sheet at 30 June 2011 shows that the Company is in a net liability position. The directors have reviewed the trading prospects and projected cash flows of the business and have agreed funding from its immediate parent company (Note 16) based on these projections. Details of the parent company bank facilities are set out in the financial statements of The Premier Property Group Limited. On that basis the directors have a reasonable expectation that there are adequate resources to allow the Company to continue to realise its assets and discharge its liabilities in the normal course of business for the foreseeable future. Accordingly, the directors have determined that it is appropriate to continue to adopt the going concern basis of accounting in the preparation of these financial statements

(b) Stocks and work in progress

Development properties held for development and resale are valued at the lower of the cost and net realisable value. Land held for development, including land in the course of development until legal completion of sale, is valued at cost. Work in progress on development properties is valued at the cost of labour and materials plus interest incurred on borrowings for development expenditure until the date of practical completion.

The estimated net realisable values for stocks and work in progress are based on the directors' assessment of residual values for land and properties under development and projected net sales proceeds for completed properties. The key assumptions in assessing these values take into account current market rental levels, investment yields and construction cost data.

(c) Capitalised interest

Interest is capitalised from the point at which development expenditure is incurred until the date of practical completion, except where there is a substantial delay between acquisition and commencement of physical construction, where capitalisation will commence at the latter point.

1. Accounting policies (continued)

(d) Taxation

Current tax, including UK corporation tax and foreign tax, is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date

The taxation liabilities of certain group undertakings are reduced wholly or in part by the surrender of losses by fellow group undertakings. The tax benefits arising from group relief are normally recognised in the financial statements of the surrendering undertakings

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date. Timing differences are differences between the Company's taxable profits and its results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in periods different from those in which they are recognised in the financial statements

A net deferred tax asset is regarded as recoverable and therefore recognised only when, on the basis of all available evidence, it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted

Deferred tax is not recognised when fixed assets are sold and it is more likely than not that the taxable gain will be rolled over, being charged to tax only if and when the replacement assets are sold

Deferred tax is measured at the average tax rates that are expected to apply in the periods in which the timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantively enacted by the balance sheet date. Deferred tax is measured on a non-discounted basis

(e) Turnover and revenue recognition

Turnover was generated wholly within the United Kingdom and is net of VAT. Rental and other income is recognised as they are earned. Income from the sale of development properties is recognised when the transaction is complete

2. Exceptional items

The charge in the current year of £1,000,000 (2010 - £Nil) relates to a reduction in the net realisable value of development property held as stocks

3. Other operating expenses

The following is included in other operating expenses

	2011 £	2010 £

Notes to the Financial Statements (continued)

7. Tax on loss on ordinary activities

The tax credit comprises

	2011 £	2010 £
UK corporation tax	-	-

The differences between the total current tax shown above and the amount calculated by applying the standard rate of UK corporation tax to the loss before tax are as follows

	2011 £	2010 £
Loss on ordinary activities before taxation	(1,093,711)	(208,900)
Tax on loss on ordinary activities at standard UK corporation tax rate of 27.5% (2010 – 28%)	(300,771)	(58,492)
Effects of Unrelieved tax losses arising in the year	300,771	58,492
