**Kazphosphate Plc**  
**Consolidated financial statements for the period ended 31 December 2008**

**Report of the Directors for the year ended 31 December 2008**

The directors present their report with the audited financial statements of the Group for the year ended 31 December 2008.

**PRINCIPAL ACTIVITY**

The Group's principal trading activities are the extraction and processing of phosphoric ore, concentration and processing of raw minerals, production of mineral fertilisers, yellow phosphorous and phosphorous-containing products at mine pits and plants located in Southern Kazakhstan. These products are primarily exported from this region.

**DIRECTORS**

The directors who have held office during the period from 1 January 2008 to the date of this report are as follows:

D. Abdykalykova - appointed 5 February 2008

Y. Baimakhanov - appointed 9 October 2007 and resigned 5 February 2008

D. Mamytov - appointed 9 October 2007

G. Yessenov - appointed 9 October 2007

All the directors who are eligible offer themselves for election at the forthcoming first Annual General Meeting.

**BUSINESS REVIEW AND FUTURE DEVELOPMENTS**

The results for the period and the financial position at the period end for the Group were considered satisfactory by the directors.

In particular, turnover for the Group's only trading subsidiary, Kazphosphate LLC increased on a year on year basis by 130% to US\$377M. In addition, the gross profit margin also increased from 23.8% to 43%. This entity has made a major contribution to the Group's results.

The directors expect the Group's results to deteriorate significantly in the near future due to the loss of its largest customer and deteriorating market conditions. As a result the carrying amount of trade receivables and inventory has increased, which has had a negative impact on the Group's liquidity position.

The directors are also investigating broadening the group's product range to include additional sales lines derived from existing products.

**PRINCIPLE RISKS AND UNCERTAINTIES**

**Country risk**

The Group's operations are subject to country risk being the economic, political and social risks inherent in doing business in Kazakhstan. These risks include matters arising from the policies of the government, economic conditions, the imposition of, or changes to, taxes and regulations, foreign exchange fluctuations and the enforceability of contract rights.

**Kazphosphate Plc****Consolidated financial statements for the period ended 31 December 2008****Financial risk**

The Group's principal financial instruments are non-derivative and comprise of trade and other receivables, cash and cash equivalents, loans and borrowings, and trade and other payables. The main purpose of these instruments is to raise funds for the group's operations and to finance the group's trading activities.

The group has exposure to credit, liquidity and market risk. Note 22 explains the Group's objectives, policies and processes for measuring and managing these risks.

**EMPLOYEES**

The Group is committed to a policy of equal opportunities in employment by which the Group continues to ensure that all aspects of selection and retention are based on merit and suitability for the job without considerations of sex, marital status, nationality, race, colour, race, ethnicity, sexual orientation or any disability.

The Group aims to maintain a diverse workforce free from discrimination. Persons who have or develop a disability are, where possible, given practical assistance and training to seek to overcome their disability in the performance of their work.

**PAYMENT POLICY**

The Group does not have a formal code that it follows with regard to payments to suppliers. Members of the Group generally agree payment terms with their suppliers when they enter into binding contracts for the supply of goods and services. Suppliers are, in that way made aware of these terms.

Group companies seek to abide by these payment terms when they are satisfied that the supplier has provided the goods and services in accordance with the agreed terms and conditions. At 31 December 2008 the amount of trade creditors shown in the Group balance sheet represented 66 days (2007: 135days) of average purchases.

**RESULTS AND DIVIDENDS**

The consolidated income statement for the period is set out on page 7.

The directors do not recommend payment of an ordinary dividend.

**DIRECTORS' RESPONSIBILITIES**

The directors are responsible for preparing the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare group and parent company financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with International Financial Reporting Standards (IFRS) as adopted for use in the European Union. The financial statements are required by law to give a true and fair view of the financial position of the group and the parent company and of the performance for that period. In preparing these financial statements, the directors are required to:

**Kazphosphate Plc****Consolidated financial statements for the period ended 31 December 2008**

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state that the financial statements comply with IFRS;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the group will continue in business.

The directors are responsible for keeping proper accounting records which disclose with reasonable accuracy at any time the financial position of the parent company and the group and to enable them to ensure that the financial statements comply with the Companies Act 1985. They are also responsible for safeguarding the assets of the company and the group and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

**AUDITORS**

Haines Watts Central London LLP have indicated their willingness to continue in office and a resolution concerning their re-appointment will be proposed at the forthcoming Annual General meeting.

**STATEMENT AS TO DISCLOSURE OF INFORMATION TO AUDITORS**

The directors who held office at the date of approval of the Directors' Report confirm that, so far as they are each aware, there is no relevant audit information (as defined by Section 234ZA of the Companies Act 1985) of which the group's auditors are unaware, and each director has taken all the steps that they ought to have taken as a director in order to make themselves aware of any relevant audit information and to establish that the group's auditors are aware of that information.

**ON BEHALF OF THE BOARD:**

.....  
Director: G. Yessenov

Date: November 2009

**Kazphosphate Plc****Consolidated financial statements for the period ended 31 December 2008****Report of the Independent Auditors to the Shareholders of Kazphosphate Plc**

We have audited the group and parent company financial statements (the 'financial statements') of Kazphosphate Plc for the period ended 31 December 2008 on pages 7 to 48 which comprise the consolidated Income Statement, the Group and Parent Company Balance Sheets, the Group and Parent Company Cash Flow Statements, the Consolidated Statement of Changes in Shareholders' Equity and the related notes. These financial statements have been prepared under the accounting policies set out therein.

**Respective responsibilities of directors and auditors**

The directors' responsibilities for preparing the financial statements in accordance with applicable law and International Financial Reporting Standards as adopted for use in the European Union are set out on page 3.

Our responsibility is to audit the financial statements in accordance with relevant legal and regulatory requirements and International Standards on Auditing (UK and Ireland). This report is made solely to the company's members, as a body, in accordance with Section 235 of the Companies Act 1985. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditors' report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

We report to you our opinion as to whether the financial statements give a true and fair view and are properly prepared in accordance with the Companies Act 1985. We also report to you whether in our opinion the information given in the Report of the Directors is consistent with the financial statements.

In addition, we report to you if, in our opinion, the company has not kept proper accounting records, if we have not received all the information and explanations we require for our audit, or if information specified by law regarding directors' remuneration and other transactions is not disclosed.

We read the Report of the Directors and consider the implications for our report if we become aware of any apparent misstatements within it.

**Basis of audit opinion**

We conducted our audit in accordance with International Standards on Auditing (UK and Ireland) issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of the significant estimates and judgements made by the directors in the preparation of the financial statements, and of whether the accounting policies are appropriate to the group's and company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

**Kazphosphate Plc**

**Consolidated financial statements for the period ended 31 December 2008**

**Opinion**

In our opinion:

- the consolidated financial statements give a true and fair view, in accordance with International Financial Reporting Standards as adopted for use in the European Union, of the group's affairs as at 31 December 2008 and of its profit and cash flow for the period then ended;
- the parent company financial statements give a true and fair view in accordance with International Financial Reporting Standards as adopted for use in the European Union as applied in accordance with the provisions of the Companies Act 1985, of the state of the parent company's affairs as at 31 December 2008 and cash flows for the year then ended;
- the financial statements have been properly prepared in accordance with the Companies Act 1985; and
- the information given in the Report of the Directors is consistent with the financial statements.

The accompanying notes are an integral part of these Financial Statements

**Kazphosphate Plc**  
**Consolidated financial statements for the period ended 31 December 2008**

**Notes to the financial statements**

**1.0 General Information**

Kazphosphate Plc is a company incorporated in England and Wales. The group financial statements consolidate those of the company and its subsidiaries (together referred to as a group). The parent company financial statements present information about the company as a separate entity and not about its group.

**2.0 Summary of Significant Accounting Policies**

**2.1 Accounting convention and basis of preparation**

The financial statements have been prepared and approved by the directors in accordance with International Financial Reporting Standards (IFRS). In publishing the parent company financial statements here together with the group financial statements, the company has taken advantage of the exemption in S230 of the Companies Act 1985 not to present its individual income statement and related notes that form part of these approved financial statements.

The financial statements are prepared on the historical cost basis except for property, plant and equipment; inventories and intangible assets that are stated at their fair values. All amounts have been rounded to the nearest US\$1,000 except as otherwise indicated.

These consolidated financial statements are prepared in accordance with IFRS, International Accounting Standards (IAS) and related IFRIC interpretations in issue that have been endorsed by the European Commission and are effective at 31 December 2008.

**2.2 New standards and interpretations**

**(i) Standards, amendments and interpretations effective in 2008**

IFRS 7, 'Financial instruments: Disclosures', and the complementary amendment to IAS 1, 'Presentation of financial statements – Capital disclosures', introduces new disclosures relating to financial instruments and does not have any impact on the classification and valuation of the Group or Company's financial instruments, or the disclosures relating to taxation and trade and other payables. The new disclosures are included primarily in notes.

**(ii) Standards and interpretations early adopted by the Group and Company**

No standards or interpretations were early adopted by the Group or the Company in the year

**(iii) Standards, amendments and interpretations effective in 2008 but not relevant**

The following standards, amendments and interpretations to published standards are mandatory for accounting periods beginning on or after 1 January 2008 but they are not relevant to the Group or Company's operations:

## **Kazphosphate Plc**

### **Consolidated financial statements for the period ended 31 December 2008**

- IFRS 4, 'Insurance contracts';
- IFRIC 7, 'Applying the restatement approach under IAS 29, Financial reporting in hyper-inflationary economies';
- IFRIC 8, 'Scope of IFRS 2', requires consideration of transactions involving the issuance of equity instruments, where the identifiable consideration received is less than the fair value of the equity instruments issued in order to establish whether or not they fall within the scope of IFRS 2. This standard does not have any impact on the Group or Company's financial statements. The company already applies an accounting policy which complies with the requirements of IFRIC 8;
- IFRIC 9, 'Re-assessment of embedded derivatives'; and
- IFRIC 10, 'Interim financial reporting and impairment', prohibits the impairment losses recognised in an interim period on goodwill and investments in equity instruments and in financial assets carried at cost to be reversed at a subsequent balance sheet date. This standard does not have any impact on the Group or Company's financial statements.
- IFRIC 12, 'Service concession arrangements'. IFRIC 12 applies to contractual arrangements whereby a private sector operator participates in the development, financing, operation and maintenance of infrastructure for public sector services. IFRIC 12 is not relevant to the Group or Company's operations because none of the Group's companies provide services to the public sector.
- IFRIC 13, 'Customer loyalty programmes'. IFRIC 13 clarifies that where goods or services are sold together with a customer loyalty incentive (for example, loyalty points or free products), the arrangement is a multiple-element arrangement and the consideration receivable from the customer is allocated between the components of the arrangement using fair values. IFRIC 13 is not relevant to the Group or Company's operations because none of the Group's companies operate any loyalty programmes.
- IFRIC 14, 'IAS 19 – The limit on a defined benefits asset, minimum funding requirements and their interaction'. IFRIC 14 provides guidance on assessing the limit in IAS 19 on the amount of the surplus that can be recognised as an asset. It also explains how the pension asset or liability may be affected by a statutory or contractual minimum funding requirement. IFRIC 14 is not relevant to the Group or the Company's operations because none of the Group's companies participate in a defined benefit pension scheme.

(iv) Standards, amendments and interpretations to existing standards that are not yet effective and have not been early adopted by the Group and Company.

The following standards, amendments and interpretations to existing standards have been published and are mandatory for accounting periods beginning on or after 1 January 2009 or later periods, but the Group and Company have not early adopted them:

- Revised IAS 1 *Presentation of Financial Statements (2007)* which becomes mandatory for the Company's 2009 financial statements is expected to have a significant impact on the presentation of the financial statements. The Standard introduces the concept of total comprehensive income and requires presentation of all owner changes in equity in the statement of changes in equity, separately from non-owner changes in equity.
- IAS 27 (Revised) 'Consolidated and separate financial statements' requires the effects of all transactions with non-controlling interests to be recorded in equity if there is no change in control. The standard also specifies the accounting when control is lost. The Group will apply the revised standard from 1 January 2010 subject to endorsement by the European Union.

## **Kazphosphate Plc**

### **Consolidated financial statements for the period ended 31 December 2008**

- IFRS 3 (Revised) 'Business combinations' continues to apply the acquisition method to business combinations, with some significant changes. The Group will apply the revised standard from 1 January 2010 subject to endorsement by the European Union. There will be no effect on acquisitions prior to 1 January 2010 but the revised standard will apply for all acquisitions after that date.
  - Revised IAS 23 'Borrowing Costs' removes the option to expense borrowing costs and requires that an entity capitalise borrowing costs directly attributable to the acquisition, construction or production of a qualifying asset as part of the cost of that asset. The revised IAS 23 will become mandatory for the Company's 2009 financial statements and will constitute a change in accounting policy for the Company. In accordance with the transitional provisions the Company will apply the revised IAS 23 to qualifying assets for which capitalisation of borrowing costs commences on or after the effective date.
  - Various *Improvements to IFRSs* have been dealt with on a standard-by-standard basis. All amendments, which result in accounting changes for presentation, recognition or measurement purposes, will come into effect not earlier than 1 January 2009. The Company has not yet analysed the likely impact of the improvements on its financial position or performance.
- (v) Interpretations to existing standards that are not yet effective and not relevant to the Group and Company's operations.

The following interpretations and amendments to existing standards have been published and are mandatory for accounting periods beginning on or after 1 January 2009 or later periods but are not relevant for the Group's operations:

- IFRS 2 'Share-based payment' Amendment 'Vesting conditions and cancellations' clarifies that only service conditions and performance conditions are vesting conditions and specifies that all cancellations, whether by the entity or by other parties, should receive the same accounting treatment. IFRIC 2 is not relevant to the Group or the Company's operations because there are no share based payments.
- IFRS 8, 'Operating segments'. IFRS 8 replaces IAS 14 and aligns segment reporting with the requirements of the US standard SFAS 131, 'Disclosures about segments of an enterprise and related information'. The new standard requires a 'management approach', under which segment information is presented on the same basis as that used for internal reporting purposes. IFRIC 8 is not relevant to the Group or the Company's operations because its shares are not publicly traded.
- Amendment to IAS 32 'Financial instruments: Presentation' and IAS 1 'Presentation of financial statements': Puttable financial instruments and obligations arising on liquidation (effective from 1 January 2009). The amendments to the standards are still subject to endorsement by the European Union. It is not expected that the amendment will be relevant to the Group.
- IFRIC 11, 'IFRS 2 – Group and treasury share transactions' provides guidance on whether sharebased transactions involving treasury shares or involving group entities (for example, options over a parent's shares) should be accounted for as equity settled or cash-settled share-based payment transactions in the stand-alone accounts of the parent and group companies. IFRIC 11 is not relevant to the Group or the Company's operations because there are no such transactions.

### **2.3 Basis of consolidation**

Subsidiaries are fully consolidated from the date on which control is transferred to the group. Control exists when then the group has the power, directly or indirectly, to govern the financial and operating policies of an entity so as to obtain benefits from its activities. They are deconsolidated from the date that control ceases. The purchase method of accounting is used to account for the acquisition of subsidiaries by the group.

The cost of an acquisition is measured as the fair value of the assets plus costs directly attributable to the acquisition. Identifiable assets acquired and liabilities assumed in a business combination are measured initially at their fair vales at the acquisition date. The excess of the cost of acquisition over the fair value of the group's share of the net fair value of the identifiable assets, liabilities and contingent liabilities is recorded as goodwill. If the cost of acquisition is less than the fair value of the group's share of the net assets of the subsidiary acquired, the difference is recognised directly in the income statement.

All intra-group transactions, balances income and expenses are eliminated on consolidation. Uniform accounting policies are applied by the group companies to ensure consistency.

### **2.4 Functional and presentation currency**

The Group's predominant functional currency and the currency in which these financial statements are presented is the United States Dollar ("USD"). The USD has been used as the functional currency as management considers that the USD reflects the economic substance of the underlying events and circumstances relevant to the Group. The functional currency of the Dutch subsidiaries is Euro.

### **2.5 Foreign currency transactions**

Transactions in foreign currencies are translated to USD at the exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated to USD at the exchange rate at that date. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are translated to USD at the exchange rate at the date that the fair value was determined. Foreign exchange differences arising on translation are recognised in the income statement. The exchange differences arising upon consolidation on retranslation from a functional currency other than USD are recognised in equity.

### **2.6 Use of judgments, estimates and assumptions**

Management has made a number of judgments, estimates and assumptions relating to the reporting of assets and liabilities and the disclosure of contingent assets and liabilities to prepare these financial statements in conformity with IFRS. Actual results may differ from those estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

In particular, information about significant areas of estimation uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements is described in the following notes:

- Note 11 – Property, plant and equipment;
- Note 16 – Trade and other receivables;
- Note 19 – Provisions;
- Note 25 – Contingencies

**Kazphosphate Plc**  
**Consolidated financial statements for the period ended 31 December 2008**

**2.7 Financial instruments**

***Non-derivative financial instruments***

Non-derivative financial instruments comprise trade and other receivables, cash and cash equivalents, loans and borrowings, and trade and other payables.

Non-derivative financial instruments are recognised initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition non-derivative financial instruments are measured at amortised cost using the effective interest method, less any impairment losses.

Cash and cash equivalents comprise cash balances. Bank overdrafts that are repayable on demand and form an integral part of the Company's cash management are included as a component of cash and cash equivalents for the purpose of the statement of cash flows.

**2.8 Property, plant and equipment**

***(i) Recognition and measurement***

Items of property, plant and equipment are measured at fair value less impairment losses based on periodic valuations by the directors.

A revaluation increase in property, plant and equipment is recognised directly in equity except to the extent that it reverses a previous revaluation decrease recognised in the income statement, in which case it is recognised in the income statement. A revaluation decrease in property, plant and equipment is recognised in the income statement except to the extent that it reverses a previous revaluation increase recognised directly in equity, in which case it is recognised directly in equity. When a revalued asset is sold, the amount included in other reserves is transferred to retained earnings.

Purchased software that is integral to the functionality of the related equipment is capitalised as part of that equipment.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Gains and losses on disposal of an item of property, plant and equipment are recognised net in other income or expense in the income statement.

***(ii) Subsequent costs***

The cost of replacing part of an item of property, plant and equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Group and its cost can be measured reliably. The carrying amount of the replaced part is derecognised. The costs of the day-to-day servicing of property, plant and equipment are recognised in income statement as incurred.

***(iii) Depreciation***

Depreciation is recognised in profit or loss on a straight-line basis over the estimated useful lives of each part of an item of property, plant and equipment. Depreciation of computer equipment is recognised in Profit and Loss on a reducing balances basis. Land is not depreciated.

The estimated useful lives for the current and comparative periods are as follows:

- Buildings and constructions 3 to 50 years;
- Machinery and equipment 7 to 10 years;

**Kazphosphate Plc****Consolidated financial statements for the period ended 31 December 2008**

- Computer equipment      4 to 10 years;
- Vehicles                      6 to 10 years;
- Other assets                  8 to 14 years.

Depreciation methods, useful lives and residual values are reviewed at each reporting date.

***(iv) Mine development costs***

Mine development costs are either transferred from exploration and evaluation assets upon demonstration of commercial viability of extracting phosphoric ore or incurred subsequently to the exploration and evaluation phase. Subsequent development expenditure refers to stripping expenditures, which are incurred to remove overburden and other mine materials to access mineral deposits. Mine development costs mainly consist of estimated site restoration costs. Mine development costs are capitalised and charged to the cost of production on a straight-line basis over the useful life of the respective licence.

**2.9 Intangible assets*****(i) Intangible assets***

Intangible assets that are acquired by the Group, which have finite useful lives and include licenses and software, are measured at cost less accumulated amortisation and accumulated impairment losses.

***(ii) Subsequent expenditure***

Subsequent expenditure on intangible assets is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure, including expenditure on internally generated goodwill and brands, is recognised in profit or loss when incurred.

***(iii) Amortisation***

Amortisation is recognised in profit or loss on a straight-line basis over the estimated useful lives of intangible assets, from the date that they are available for use. The estimated useful lives for the current and comparative periods are from 2 to 15 years.

***(iv) Mineral rights***

Mineral rights are measured at fair value less accumulated amortisation and impairment losses based on periodic valuations by the directors.

The cost of acquisition of mineral rights comprises the signature bonus, commercial discovery bonus, the cost of subsurface use rights and capitalised expenditures on social sphere financing and professional education.

As part of the cost of acquisition of the mineral rights, the Company is committed to finance social sphere programmes which benefit the wider community in the region. These costs will not benefit the Company directly but are compulsory under the acquisition terms. These social costs are recognised as part of the cost of acquisition upon initial recognition with a corresponding liability recognised at the present value of future social costs during the period of exploration and production.

As part of the cost of acquisition of mineral rights, the Company is committed to finance training programmes for the professional education of employees to become specialists, which will benefit the wider community in the region as well as the Company. The education costs are recognised as

## **Kazphosphate Plc**

### **Consolidated financial statements for the period ended 31 December 2008**

part of the acquisition cost, with a corresponding liability equal to the present value of estimated payments for education during the period of exploration and production.

Mineral rights are amortised to profit and loss using the units-of-production method based upon proved reserves commencing when phosphoric ore is first extracted.

#### **2.10 Inventories**

Inventories are measured at the lower of cost and net realisable value. The cost of inventories is based on the weighted-average principle, and includes expenditure incurred in acquiring the inventories, production or conversion costs and other costs incurred in bringing them to their existing location and condition. In the case of manufactured inventories and work in progress, cost includes an appropriate share of overheads based on normal operating capacity.

Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

#### **2.11 Impairment**

##### ***(i) Financial assets***

A financial asset is assessed at each reporting date to determine whether there is any objective evidence that it is impaired. A financial asset is considered to be impaired if objective evidence indicates that one or more events have had a negative effect on the estimated future cash flows of that asset.

An impairment loss in respect of a financial asset measured at amortised cost is calculated as the difference between its carrying amount, and the present value of the estimated future cash flows discounted at the original effective interest rate.

Individually significant financial assets are tested for impairment on an individual basis. The remaining financial assets are assessed collectively in groups that share similar credit risk characteristics.

All impairment losses are recognised in income statement.

##### ***(ii) Reversal of impairment***

An impairment loss is reversed if the reversal can be related objectively to an event occurring after the impairment loss was recognised. For financial assets measured at amortised cost, the reversal is recognised in income statement.

##### ***(iii) Non-financial assets***

The carrying amounts of the Group's non-financial assets, other than inventories and deferred tax assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists then the asset's recoverable amount is estimated.

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets (the "cash-generating unit").

An impairment loss is recognised if the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. Impairment losses are recognised in the income statement.

**Kazphosphate Plc****Consolidated financial statements for the period ended 31 December 2008**

Impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

**2.12 Cash and cash equivalents**

Cash and cash equivalents comprise cash in hand and cash held on demand with banks, and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities on the balance sheet.

Cash set aside for a particular use or event is accounted for as Restricted Cash. Depending on the length of the restriction, the Restricted Cash may be shown as either current asset (less than 12 months) or non-current asset (more than 12 months)

**2.13 Employee benefits**

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided.

***(i) Defined contribution plans***

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. Obligations for contributions to defined contribution pension plans, including Kazakhstan's State pension fund, are recognised as an expense in profit or loss when they are due.

**2.14 Provisions**

A provision is recognised if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation.

***Site restoration***

In accordance with applicable legal requirements, a provision for restoring the Group's mines and dismantling associated infrastructure, and the related expense, is recognised as the mines are worked and as the infrastructure is built. The Group is not responsible for restoring mines and infrastructure in existence before the commencement of its licences.

**2.15 Revenue*****(i) Goods sold***

Revenue from the sale of goods is measured at the fair value of the consideration received or receivable, net of returns and allowances, trade discounts and volume rebates. Revenue is recognised when the significant risks and rewards of ownership have been transferred to the buyer, recovery of the consideration is probable, the associated costs and possible return of goods can be estimated reliably, and there is no continuing management involvement with the goods, and the amount of revenue can be measured reliably.

Transfers of risks and rewards vary depending on the individual terms of the contract of sale.

**Kazphosphate Plc**

**Consolidated financial statements for the period ended 31 December 2008**

***(ii) Services***

Revenue from services rendered is recognised in the income statement in proportion to the stage of completion of the transaction at the reporting date. The stage of completion is assessed by reference to surveys of work performed.

**2.16 Other expenses**

***(i) Lease payments***

Assets leased under operating leases are not recorded in the Balance Sheet.

Payments made under operating leases are recognised in income statement on a straight-line basis over the term of the lease. Lease incentives received are recognised as an integral part of the total lease expense, over the term of the lease.

***(ii) Social expenditure***

To the extent that the Group's contributions to social programs benefit the community at large and are not restricted to the Group's employees, they are recognised in the income statement as incurred.

**2.17 Finance income and expenses**

Financial income comprises foreign exchange gains and interest income on funds invested. Interest income is recognised as it accrues, using the effective yield on the asset.

Financial expenses comprise interest expense on borrowings, unwinding of discount on provisions, foreign currency losses and impairment losses recognised on financial assets. All borrowing costs are recognised in profit or loss using the effective interest method. All interest and other costs incurred in connection with borrowings are expensed as incurred as part of financial expenses.

Foreign currency gains and losses are reported on a net basis.

**2.18 Income tax expense**

Income tax expense comprises current and deferred tax. Income tax expense is recognised in profit or loss except to the extent that it relates to items recognised directly to equity, in which case it is recognised in equity.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognised using the balance sheet method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for temporary differences on initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit. Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

**Kazphosphate Plc**  
**Consolidated financial statements for the period ended 31 December 2008**

**3.0 Determination of fair value**

A number of the Group's accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities. Fair values have been determined for measurement and/or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

**(i) Property, plant and equipment**

Property, plant and equipment are measured at fair value, based on periodic valuations by an internal valuer (see Note 11).

**(ii) Trade and other receivables**

The fair value of trade and other receivables is estimated as the present value of future cash flows, discounted at the market rate of interest at the reporting date.

**(iii) Non-derivative financial liabilities**

Fair value, which is determined for disclosure purposes, is calculated based on the present value of future principal and interest cash flows, discounted at the market rate of interest at the reporting date.

**4.0 Acquisition**

In the prior year the Company acquired 100% of the shares in InterTherm BV and EnergoTherm BV from EnergoInterTherm Holding S.a r.l. and EnergoTherm Luxembourg S.a r.l. The consideration paid for the acquisition of shares was USD120,000 thousand together with the costs directly attributable to the acquisition of USD 96 thousand. Both InterTherm BV and EnergoTherm BV are non-trading companies, holding 100% of the shares in Kazphosphate LLC the mining company registered in the Republic of Kazakhstan. The total investment in Kazphosphate LLC by InterTherm BV was USD 1,050 thousand and by EnergoTherm BV USD 19,050 thousand.

The acquisition has been accounted for using the purchase method of accounting. The amount of negative goodwill arising as a result of the acquisition is USD 359,587 thousand. The negative goodwill was eliminated in full on acquisition in accordance with the basis of consolidation policy (note 2.3)

Net assets acquired at the date of acquisition and the resulting negative goodwill is summarised below:

	'\$000 USD	'000 USD
	Net Book values	Fair values
Tangible assets	32,484	400,210
Intangible Assets	96	76,261
Inventories	43,678	52,444
Net Current liabilities	(24,072)	(28,232)
Net assets acquired	52,186	500,683
Cost of investment		141,096
Negative goodwill on acquisition		359,587

**Kazphosphate Plc****Consolidated financial statements for the period ended 31 December 2008**

The profit and loss includes the following amounts attributable to the acquired business:

	2007 '000 USD
Turnover	78,088
Gross profit	16,098
Distribution Expenses	(8,088)
Administrative expenses	(6,748)
Other Operating Expenses	(3,315)
Operating loss	(1,884)
Net loss for the period	(4,785)

**5.0 Revenue**

The Group's business segments are based on its primary products as detailed below. Note that the Company had no revenue, cost of sales, other income or distribution expenses in the period. All such items for the Group are attributable to the Company's subsidiaries.

	Group year ended 31/12/08 '000 USD	Group Period from 23/11/06 to 31/12/07 '000 USD
Yellow phosphorous	173,751	40,277

According to Kazphosphate LLC's subsoil use contracts, branches of this company, GPK Karatau and GPK Chulaktau are required to pay excess profits tax on its profits from activities under subsoil use contracts if the contract's internal rate of return exceeds 20%. In 2007, the internal rate of return for the two subsoil use contracts (phosphorites and dolomites) did not exceed 20%.

During the year ended 31 December 2007 the following branches of Kazphosphate LLC; GPK Karatau, GPK Chulaktau and MU received 50% income tax relief with regard to their investment contracts.

The Group's applicable tax rate is the income tax rate of 30% for Kazakh companies (2007: 30%). With effect from 1 January 2009, the income tax rate for Kazakhstan companies has been reduced to 20% in 2009, to 17.5% in 2010 and to 15% in 2011. These rates have been used in the calculation of deferred tax assets and liabilities depending on the future periods when the respective timing differences will be deductible or taxable.

The standard rate of UK Corporation Tax has been reduced from 30% to 28%, effective from 1 April 2008.

**Kazphosphate Plc**

**Kazphosphate Plc**  
**Consolidated financial statements for the period ended 31 December 2008**

The above table represents the historic cost of the Group's property, plant and equipment adjusted for fair values. The valuation was carried out by Deloitte TCF LLP; a professional services firm based in Almaty, Republic of Kazakhstan as at 1 July 2007 and resulted in a material difference between historic cost and the fair values.

(b) Company

Company	Machinery and equipment
	USD'000
<i>Cost/Valuation</i>	
At 1 January 2008	
and 31 December 2007	77
<i>Depreciation</i>	
At 1 January 2008	5
Depreciation charge	16
At 31 December 2008	21
<i>Net book value</i>	
At 31 December 2008	56
At 31 December 2007	72

(i) Depreciation charge

The depreciation charge for property, plant and equipment directly related to production, which comprises the majority of depreciation, is included in cost of sales. The depreciation charge for other property, plant and equipment is included in administrative expenses and distribution expenses.

(ii) Property, plant and equipment

The above has been restated ~~at fair value following work carried out by Deloitte (Kazakhstan)~~.

(iii) Security

As at 31 December 2008 land, buildings, machinery and equipment with a carrying amount of USD 7,772 thousand have been pledged to secure obligations under bank loan agreements (see note 20). The collateral value of property, plant and equipment pledged to secure obligations as at 31 December 2007 was USD 63,789 thousand.

The above table represents the historic cost of the Group's identifiable intangible assets adjusted for fair values and amortised over the period of 15 years. The valuation was carried out by Deloitte TCF LLP as at 1 July 2007 and resulted in additional assets (Mining Rights and Rent Entitlements) recognised in the accounts. Software and Other Intangible Assets were not included in the valuation on the basis of immateriality.

**Kazphosphate Plc****Consolidated financial statements for the period ended 31 December 2008****13.0 Reclamation trust fund**

In accordance with the subsurface use contracts, the Group is obliged to deposit cash in restricted special purpose bank accounts that have been classified as long-term deposits. This deposit fund is formed for closure and reclamation costs which will be incurred when the mineral deposits are exhausted. The total amount of restricted cash as at 31 December 2008 was USD 64 thousand (2007: USD 51 thousand).

**Kazphosphate Plc**  
**Consolidated financial statements for the period ended 31 December 2008**

**Provisions for site restoration costs**

Kazphosphate LLC's obligation to restore its mining sites is stipulated in the subsurface agreements between this company and the Government of Kazakhstan. These agreements require Kazphosphate LLC to make payments into a state-administered liquidation fund based on a percentage of this company's operating expenses.

In 2008 the Kazphosphate LLC commissioned an independent third party to estimate future site restoration costs as at 31 December 2007 in respect of mine development and infrastructure built subsequent to commencement of the licences. This company is not responsible for the cost of restoring mines and decommissioning infrastructure in existence at the commencement of a licence. The majority of expenditures are expected to occur in 2015, which is at the end of the licence period. Independent experts have estimated total future decommissioning and reclamation costs to be USD 4,716 thousand. Future expected cash outflows for site restoration activities have been discounted at a rate of 14%. Unwinding of the discount is recognised in the income statement.

In view of the long-term nature of reclamation liabilities, there is uncertainty concerning the actual amount of costs that will be incurred in performing site restoration activities as well as concerning the timing of site restoration should licences for mining activities be prolonged.

In accordance with the terms of the subsurface use contracts, Kazphosphate LLC transfers amounts to long-term bank deposit accounts to finance future site restoration activities. As at 31 December 2008 the balance of the special deposit accounts was USD 64 thousand (2007: USD 51 thousand). See Note 13.

**Assumptions and critical judgments**

Management's estimates of the costs of closure, reclamation and decommissioning are based on reclamation standards that meet existing regulatory requirements, while environmental legislation in Kazakhstan continues to evolve. The provision is the discounted present value of estimated costs to close, reclaim and decommission the mine sites at the end of the mine life. Elements of uncertainty in estimating these amounts include potential changes in regulatory requirements and decommissioning and reclamation alternatives as well as discount rate used.

**20.0 Loans and borrowings**

This note provides information about the contractual terms of the Group and Company's borrowings. For more information about the Group's exposure to interest rate and foreign currency risk, see Note 22.

\* See prior period adjustments -Note 29

The Company's exposure to currency and liquidity risk related to trade and other payables in disclosed in Note 22.

**22.0 Financial instruments and financial risk management**

The Group has exposure to the following risks from its use of financial instruments:

- Credit risk
- Liquidity risk
- Market risk

This note presents information about the Group's exposure to each of the above risks, the Group's objectives, policies and processes for measuring and managing risk, and the Group's management of capital. Further quantitative disclosures are included throughout these financial statements.

The Supervisory Board has overall responsibility for the establishment and oversight of the Company's risk management framework. Management is responsible for developing and monitoring the Company's risk management policies. Management reports regularly to the Supervisory Board on its activities.

The Group's risk management policies are established to identify and analyse the risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities. The Group, through its training, management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Group's financial instruments comprise borrowings, accounts receivable and payable, and cash. The Group's accounting policies with regard to financial instruments are detailed in Note 2.7.

**Kazphosphate Plc**  
**Consolidated financial statements for the period ended 31 December 2008**

The Group does not speculate in financial instruments and does not use derivative instruments to hedge risk exposures.

Exposure to credit, liquidity and market risks arises in the normal course of the Group's business.

***(i) Credit risk***

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises mainly from the Group's receivables from customers, prepayments for current assets and value-added tax ("VAT") receivable from the UK and Kazakh tax authorities.

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer. The demographics of the Group's customer base, including the default risk of the industry and country, in which customers operate, has less of an influence on credit risk. Approximately 40% of the Group's revenue is attributable sales transactions with three main customers. However, geographically there is no concentration of credit risk.

Management has established a credit policy under which each new customer is analysed individually for creditworthiness before the Group's standard payment and delivery terms and conditions are offered. The Group's review includes external ratings, when available, and in some cases bank references.

The majority of the Group's customers have been transacting with the Group for over five years, and losses have occurred infrequently. In monitoring customer credit risk, customers are grouped according to their credit characteristics, including geographic location, industry, aging profile, maturity and existence of previous financial difficulties. Trade and other receivables relate mainly to the Group's wholesale customers.

The Group establishes an allowance for impairment that represents its estimate of incurred losses in respect of trade and other receivables and investments. The main component of this allowance is a specific loss component that relates to individually significant exposures.

***Exposure to credit risk***

The Group does not require collateral in respect of financial assets. Credit evaluations are performed on all customers, other than related parties, requiring credit over a certain amount.

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the reporting date was:

	<b>Group 31 December 2008 '000 USD</b>	<b>Company 31 December 2008 '000 USD</b>	<b>Group 31 December 2007 '000 USD</b>	<b>Company 31 December 2007 '000 USD</b>

Past due 180-360 days	1,029	(974)	7	(6)
More than one year	82	(82)	24	(24)
<b>Trade and other receivables</b>	<u>29,881</u>	<u>(1,056)</u>	<u>12,388</u>	<u>(43)</u>

<b>Company'</b>	<b>Gross 2008</b>	<b>Allowance for impairment 2008</b>	<b>Gross 2007</b>	<b>Allowance for impairment 2007</b>
<b>'000 USD</b>				
Not past due	16	-	-	-
Past due 90-180 days		-	-	-
Past due 180-360 days		-	-	-
More than one year	76	-	139	-
<b>Trade and other receivables</b>	<u>92</u>	<u>-</u>	<u>139</u>	<u>-</u>

The movement in the allowance for impairment in respect of trade and other receivables during the year was as follows:

**Kazphosphate Plc**  
**Consolidated financial statements for the period ended 31 December 2008**

	<b>Group</b>	<b>Company</b>	<b>Group</b>	<b>Company</b>
<b>'000 USD</b>	<b>2008</b>	<b>2008</b>	<b>2007</b>	<b>2007</b>
Balance at 31 January	(43)	-	(6,489)	-
Impairment loss recognised	(1,013)	-	(166)	-
Reversal of impairment loss	24	-	24	-
Amounts written off during the period		-	6,588	-
<b>Balance at the end of the year</b>	<b>(1,056)</b>	<b>-</b>	<b>(43)</b>	<b>-</b>

Based upon historic default rates, the Group believes that no impairment allowance is necessary in respect of trade receivables not past due or past due by up to 30 days; 40% of the balance, which includes the amount owed by the Group's most significant customer, relates to customer that have a good track record with the Company.

Credit risk relating to the Group's other financial assets, such as cash and cash equivalents and loan receivable, arise from the potential default of counterparties. Management regularly monitors the financial strength of counterparties through its knowledge of local market conditions and does not believe any counterparty will fail to meet its obligations.

The allowance account in respect of trade receivables is used to record impairment losses unless the Group is satisfied that no recovery of the amount owing is possible; at that point the amount is considered irrecoverable and is written off against the financial asset directly. At 31 December 2008 the Group did not have any collective impairments on its trade receivables (2007: nil).

**(ii) Liquidity risk**

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due. The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

Typically the Group ensures that it has sufficient cash on demand to meet expected operational expenses for a period of 60 days, including the servicing of financial obligations; this excludes the potential impact of extreme circumstances that cannot reasonably be predicted, such as natural disasters.

The following are the contractual maturities of financial liabilities, including estimated interest payments and excluding the impact of netting agreements:

**2008**

<b>'000 USD</b>	<b>Carrying amount</b>	<b>Contractual cash flows</b>	<b>0-6 months</b>	<b>6-12 months</b>
Non-derivative financial liabilities:				
Secured bank loans	51,653	54,953	10,172	44,781
Trade and other payables	18,856	18,856	18,856	-
<b>31 December 2008</b>	<b>70,509</b>	<b>73,809</b>	<b>29,028</b>	<b>44,781</b>

**2007**

<b>'000 USD</b>	<b>Carrying amount</b>	<b>Contractual cash flows</b>	<b>0-6 months</b>	<b>6-12 months</b>
Non-derivative financial liabilities:				

**Kazphosphate Plc****Consolidated financial statements for the period ended 31 December 2008**

Secured bank loans	22,937	23,778	11,507	12,271
Bank overdrafts	6,596	6,596	6,596	-
Trade and other payables	10,090	10,090	10,090	-
<b>31 December 2007</b>	<b>39,623</b>	<b>40,464</b>	<b>28,193</b>	<b>12,271</b>

**(iii) Market risk**

Market risk is the risk that changes in market prices, such as foreign exchange rates and interest rates will affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

**(a) Interest rate risk**

Changes in interest rates impact primarily loans and borrowings by changing either their fair value (fixed rate debt) or their future cash flows (variable rate debt). Management does not have a formal policy of determining how much of the Group's exposure should be to fixed or variable rates. However, at the time of raising new loans or borrowings management uses its judgment to decide whether it believes that a fixed or variable rate would be more favourable to the Group over the expected period until maturity.

The Group only had fixed rate financial liabilities as at 31 December 2008 and 31 December 2007.

**Profile**

At the reporting date the interest rate profile of the Group's interest-bearing financial instruments were:

	Carrying amount	
	2008	2007
<b>'000 USD</b>		
<b>Fixed rate instruments</b>		
Financial assets (Notes 13 and 18)	9,258	51
Financial liabilities (Note	(51,302)	(22,500)
	<u>(42,044)</u>	<u>(22,449)</u>

**Fair value sensitivity analysis for fixed rate instruments**

The Group does not account for any fixed rate financial assets and financial liabilities at fair value through profit or loss and does not designate derivatives (interest rate swaps) as hedging instruments under a fair value hedge accounting model. Therefore a change in interest rates as the reporting date would not affect profit or loss.

**(b) Foreign currency risk**

The Group is exposed to currency risk in relation to sales, purchases and borrowings in currency other than its respective functional currency (USD). The currency giving rise to this risk is primarily the Kazakhstan KZT. Management does not hedge the Group's exposure to foreign currency risk. However, interest on borrowings is denominated in currencies that match the cash flows generated by the underlying operations of the Group. This provides an economic hedge and no derivatives are entered into.

**Kazphosphate Plc****Consolidated financial statements for the period ended 31 December 2008**

In respect to other monetary assets and liabilities denominated in foreign currencies, the Group ensures that its net exposure is kept to an acceptable level by buying or selling foreign currencies at spot rates when necessary to address short-term imbalances.

The Group's exposure to foreign currency risk was as follows:

'000 USD	KZT-denominated		KZT-denominated	
	Group 2008	Company 2008	Group 2007	Company 2007
Reclamation trust fund	64	-	51	-
Restricted bank deposit	9,194	-	-	-
Loan receivable	6,665	-	-	-
Trade and other receivables	1,864	-	6,843	-
Cash and cash equivalents	163	-	159	-
Trade and other payables	(13,975)	-	(10,148)	-
Bank overdrafts	-	-	(6,596)	-
<b>Net balance sheet exposure</b>	<b>3,975</b>	<b>-</b>	<b>(9,691)</b>	<b>-</b>

The following significant exchange rates applied during the year:

The following significant exchange rates applied during the year:	Average rate	Reporting date spot rate	Average rate	Reporting date spot rate
	2008	2008	2007	2007
1,000 KZT	8.31	8.28	8.16	8.31
1 Euro	1.47134	1.40974	1.37034	1.47190
1 British pound	1.83517	1.44792	2.01495	1.99730

**Sensitivity analysis**

A 30% strengthening of the USD against the KZT as at 31 December 2008 would have increased equity and profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular interest rates, remain constant.

	Equity	Profit or loss
	'000 USD	'000 USD
<b>31 December 2008</b>		
KZT	835	835
<b>31 December 2007</b>		
KZT	(2,035)	(2,035)

A 30% weakening of the USD against the KZT as at 31 December 2008 would have had the equal but opposite effect on the amounts shown above, on the basis that all other variables remain constant.

**Kazphosphate Plc****Consolidated financial statements for the period ended 31 December 2008*****(c) Other market risk***

The Group does not enter into commodity contracts other than to meet the Group's expected usage and sale requirements, such contracts are not settled net.

***(iv) Fair values***

Management believes that the fair values of its financial assets and liabilities approximate their carrying amounts. The basis for determining fair values is disclosed in Note 3.

***(v) Capital management***

Management's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. Management monitors the return on capital and seeks to maintain a balance between the higher returns that might be possible with higher levels of borrowings and the advantages and security afforded by a sound capital position.

There were no changes in the Group's approach to capital management during the year.

The Group is not subject to externally imposed capital requirements.

**23.0 Operating leases**

The Group leases offices and vehicles under operating leases. The leases typically run for an initial period of one year, with an option to renew the lease after that date.

During the current year USD 636 thousand (2007: USD 288 thousand) was recognised as an expense in the income statement in respect of operating leases.

The following operating lease payments are committed to be paid within one year:

Expiring in:	'000 USD
Less 1 year	-
2 – 5 years	508
Total	<u>508</u>

**24.0 Commitments*****(i) Capital commitments***

The Group and the 'Agency on the Investments of the Republic of Kazakhstan' concluded four investment contracts, each of which requires capital investments to be made. Management believes that the Group complies with the requirements of the investment contracts. There are no contracts where the required cumulative capital expenditures have not been made as at the end of the reporting period.

There are six subsoil usage contracts concluded with the Government of the Republic of Kazakhstan. According to the terms of these contracts, the Group is required to make certain capital expenditures. Management believes that the Group complies with the requirements of the subsoil usage contracts. There are no contracts where the required cumulative capital expenditures have not been made as at the end of the reporting period.

**Kazphosphate Plc**  
**Consolidated financial statements for the period ended 31 December 2008**

***(ii) Social commitments***

The Group makes contributions to mandatory and voluntary social programs. The Group's social assets, as well as local social programs, benefit the community at large and are not normally restricted to the Group's employees. The Group has transferred certain social operations and assets to local authorities; however, management expects that the Group will continue to fund these social programs through the foreseeable future. These costs are expensed as they are incurred.

**25.0 Contingencies**

***(i) Insurance***

The insurance industry in the Republic of Kazakhstan, in which the Group's main subsidiary is situated, is in a developing state and many forms of insurance protection common in other parts of the world are not yet generally available. There are few mandatory types of insurance required by the legislation of the Republic of Kazakhstan and provided by local insurance companies.

In 2005 the government of Kazakhstan introduced employer's insurance against employees' injuries during the performance of their job causing disability or death. The Group has also full insurance coverage for its plant facilities excluding vehicles, arising from accidents on the Group's property. Apart from such insurances, the Group does not have full insurance coverage for business interruption and third party liability in respect of property or environmental damage arising from accidents on the Group's property or relating to the Group's operations.

Until the Group obtains adequate insurance coverage, there is a risk that the loss or destruction of certain assets could have a material adverse effect on the Group's operations and financial position.

***(ii) Taxation contingencies***

***(a) Taxation contingencies in Kazakhstan***

The taxation system in Kazakhstan where the Group's main trading subsidiary carries on its business is relatively new and is characterised by frequent changes in legislation, official pronouncements and court decisions, which are often unclear, contradictory and subject to varying interpretation by different tax authorities. Taxes are subject to review and investigation by a number of authorities, which have the authority to impose severe fines, penalties and interest charges. A tax year remains open for review by the tax authorities during ten subsequent calendar years; however, under certain circumstances a tax year may remain open longer.

These circumstances may create tax risks in Kazakhstan that are more significant than in other countries. Management believes that it has provided adequately for tax liabilities based on its interpretations of applicable tax legislation, official pronouncements and court decisions. However, the interpretations of the relevant authorities could differ and the effect on the Group, if the authorities were successful in enforcing their interpretations, could be significant.

A new tax law took effect in Kazakhstan on 1 January 2009 which introduces substantial changes, including the reduction of the corporate income tax rate to 20% in 2009, 17.5% in 2010 and 15% in 2011. The Group has not yet evaluated the potential impact of the changes to its financial performance and position apart from deferred tax assets and liabilities which have been assessed by incorporating estimated tax rates from 20% to 17.5% and 15% depending upon the future periods when the respective timing differences will be deductible or taxable.

***(b) Mineral Extraction Tax***

The new tax law introduces a tax on extraction of mineral products, a "mineral extraction tax" ("MET"). This new tax replaces previously existing royalty payments for subsoil use rights. Mineral extraction tax applies to all subsoil users that produce minerals, including phosphate rock.

**Kazphosphate Plc****Consolidated financial statements for the period ended 31 December 2008**

The tax base for mineral extraction tax is the value of the depleted deposits of a mineral extracted in the reporting period (excluding normal losses), which is a calendar quarter. The new tax law stipulates that the average sales price of phosphate rock should be used to calculate the MET tax base.

MET applies to phosphate rock at the rate of 4 percent.

***(iv) Work program compliance***

In Kazakhstan all subsoil reserves belong to the State, with the Ministry of Energy and Mineral Resources granting exploration and production rights to third parties. Subsoil rights are not granted in perpetuity and any renewal must be agreed before the expiration of the relevant contract or license. These rights may be terminated by the Ministry if the Group does not satisfy its contractual liabilities.

According to the annual work program approved by the Ministry, the Group should have extracted a total of 1,379 thousand tons (2007: 1,327 thousand tons) of phosphoric ore at Koksau and Sholaktau fields in 2008, whereas it extracted 1,457 thousand tons (2007: 866 thousand tons).

***(v) Railroad accident***

In July 2007 freight train carrying yellow phosphorus sold by Kazphosphate LLC derailed and caught fire in western Ukraine. The resultant smoke allegedly caused harm to the environment, as well as to the property and individuals located in the area. The carrier of the cargo was the Ukrainian Railway Administration, whereas the cisterns in which the yellow phosphorus was transported were owned by Kazphosphate LLC.

The recipient of the cargo, Thermphos Trading GmbH, a former related party, denied any responsibility for the incident. It maintained that the tanks with phosphorus should be sent back to the company which had prepared the cargo for transportation. Newspaper reports allege that the phosphorus was not properly prepared for transportation and specifically that the level of water was lower than required. In the aftermath of the accident, Ukraine imposed a temporary ban on the transportation of yellow phosphorus through its territory. An independent expert committee was set up by the Ukrainian authorities to investigate the train crash. It concluded that the protective water level had been 31 cm instead of the 50 cm required for the transportation of phosphorus during the summer months. Kazphosphate LLC has disputed the findings of the committee.

Kazphosphate LLC commissioned an independent review and analysis of the incident by a law firm. The review concludes that primary liability for any harm caused by the accident should rest with the Ukrainian Railway Administration. The Group may only be subject to liability if it is determined by a court that the company negligently committed an act or omission which was the cause of the accident. No such determination has been made, no cause of the accident has been established and no such court proceedings have been commenced in Ukraine or abroad. Furthermore, the Group should be protected from any liability in connection with the accident under the terms of the Yellow Phosphorus Sale and Purchase Agreement ("Purchase Agreement") dated 24 September 2003, which provides that all liability for harm caused by the transport of phosphorus has been assumed by the buyer.

Management has not provided any amounts in respect of such obligations in the financial statements as it believes it is possible, but not probable, that an outflow of economic benefits will be required to settle such obligations.

**Kazphosphate Plc**  
**Consolidated financial statements for the period ended 31 December 2008**

**26.0 Called Up Share capital**

**Authorised:**

Number:	Class:	Nominal value:	£
100,000,000	Ordinary shares	£1	100,000,000

**Allotted and issued:**

Number:	Class:	Nominal value:	\$
50,000	Ordinary shares	£1	98,392

50,000 Ordinary shares of £1 each were allotted and issued at par during the period.

**27.0 Related Party Transactions**

**Group and Company**

**(i) Control relationships**

The Group's ultimate controlling parties are the trustees of the Balliana Family Trust.

**(ii) Transactions with management and close family members**

Key management received the following remuneration during the year, which is included in personnel costs:

	Group For the year ended 31/12/2008 '000 USD	Company For the year ended 31/12/2008 '000 USD	Group For period from 23/11/06- 31/12/2007 '000 USD	Company For period from 23/11/06- 31/12/2007 '000 USD
Remuneration to new management starting from July 2007	422	-	152	-
Contributions to pension fund	28	-	-	-
	<u>450</u>	<u>-</u>	<u>152</u>	<u>-</u>

**(iii) Transactions with other related parties**

**Group**

JSC Sumbe and JSC Delta Bank are the Group's related parties due to common ownership. Kazphosphate LLC has contractual agreements with these entities regarding the rent of office accommodations and vehicles and the provision of bank overdrafts.

Transactions with other related parties are detailed below:

Expenses '000 USD	Transaction value 2008	Outstanding balance 2008	Transaction value 2007	Outstanding balance 2007
Purchases of goods:				
JSC Sumbe (under common control)	<u>124</u>	<u>-</u>	<u>389</u>	<u>68</u>

**Kazphosphate Plc**  
**Consolidated financial statements for the period ended 31 December 2008**

**(iii) Transactions with other related parties, continued**

**Loans**

'000 USD	Amount loaned 2008	Amount loaned 2007	Outstanding balance 2008	Outstanding balance 2007
----------	--------------------------	--------------------------	--------------------------------	--------------------------------

*Loans*

Daryn LLC (under common control)	6,665	-	6,665	-
----------------------------------	-------	---	-------	---

**Transactions with Delta Bank JSC (under common control)**

Loans	15,927	7,178	-	6,596
Short-term deposit	8901	-	8901	-
Interest on short-term deposit	293	-	293	-
	<b>25,121</b>	<b>7,178</b>	<b>9,194</b>	<b>6,596</b>

**Company**

As at 31 December 2008, the Company was owed USD 104 thousand to Kazphosphate LLC, a wholly owned subsidiary in respect of management services provided by the Company. During the year Kazphosphate LLC loaned the Company USD 859 thousand as a financial aid. The full amount was repaid before the year end.

**(iv) Pricing policies**

Related party transactions are not based on market prices.

**28.0 Events subsequent to the balance sheet date**

**(a) Tenge devaluation**

Subsequent to the balance sheet date the KZT was devalued by approximately 23% to KZT 150 for USD 1. Management of the Group has not completed its analysis of the total effect on the Group's operations and financial position; however the sensitivity analysis provided in Note 22 (b) shows the effect of reasonably possible changes in currency exchange rates on the Group's financial assets and liabilities as of the reporting date.

**(b) Financial performance**

Subsequent to the balance sheet date the Group's financial performance deteriorated significantly, which can be attributed to:

- The loss of its largest customer which accounted for 22% of revenue in 2008 (2007: 48%). Based on actual sales generated in the first five months of 2009, anticipated sales for the year ending 31 December 2009 are expected to be 40% less than in 2008.
- Deteriorating market conditions has resulted in a significant increase in the carrying amount of trade receivables and inventory and consequently the Group's liquidity position has deteriorated significantly.

**Kazphosphate Plc****Consolidated financial statements for the period ended 31 December 2008**

Management of the Group is in negotiations with Kazakh and international financial institutions regarding the provision of loan facilities and the restructuring of short-term debt. Part of the short-term loans and borrowings has already been restructured as there have been two amendments to the loan agreement with Development Bank of Kazakhstan. The Group has reached an agreement with the lender to extend its loan. Under the new agreement signed in June 2009, the Group will repay the outstanding loan balance in two installments of USD 11,833,333 each on 6 September and 6 December 2009

**29.0 Prior period adjustments**

As International Financial Reporting Standard IAS 8 *Accounting Policies, Changes in Accounting Estimates and Errors* requires retrospective application for prior period errors, management has corrected the presentation of the income statement, balance sheet and statement of cash flows. The impact of the adjustment for errors and the reclassification on the income statement, balance sheet and statement of cash flows as at and for the year ended 31 December 2007 is as follows:

	As previously reported '000 USD	Effect of restatement '000 USD	As Restated '000 USD
Income statement for the year ended 31 December 2007			
Cost of sales (i)	(61,990)	(153)	(62,143)
Income tax expense	(123,536)	450	(123,086)
Profit for the year	222,546	297	222,843
Balance sheet as at 31 December 2007			
Deferred tax liability	(121,094)	450	(120,644)
Advances paid and deferred expenses (iii)	5,280	(1,500)	3,780
Trade receivables (iii)	12,345	1,500	13,845
Trade and other payables (i, ii)	23,711	1,356	25,067
Retained earnings	222,546	297	222,843
Current provisions (ii)	1,202	(1202)	-

- (i) During the year ended 31 December 2007, the Company has failed to record USD 154 thousand of cistern maintenance expenses payable to Flex BV. During the current year the Company modified the classification of vacation pay accrual in the balance sheet.
- (ii) Comparatives were reclassified for consistency which resulted in USD 1,202 thousand being reclassified from short term provisions to other payables.
- (iii) Comparatives were reclassified for consistency which resulted in USD 1,500 thousand being reclassified from trade receivables to advances paid and deferred expenses.
