Directors' Report

The Directors present their Directors' report together with the unaudited financial statements of the Company for the year to 30 September 2022.

Review of the business

The principal activity of the Company continued to be that of holding investments. In the year ending 30 September 2022 the Company is deemed to be dormant, the Directors have no plans to recommence trading in the foreseeable future.

The Company is a wholly owned indirect subsidiary of Imperial Brands PLC, which is the ultimate parent company within the Imperial Brands group (the Group), and the Directors of the Group manage operations at a Group level. For this reason, the Company's Directors believe that analysis using key performance indicators for the Company is not necessary or appropriate for an understanding of the development, performance or position of the business of the Company. The development, performance and position of the Group's UK operations, which include the Company, are discussed in the Group's Annual Report which does not form part of this report, but is available at www.imperialbrandsplc.com.

In addition, the Directors of the Group manage the Group's risks at a Group level, rather than at an individual entity level. For this reason, the Company's Directors believe that a discussion of the Group's risks would not be appropriate for an understanding of the development, performance or position of the business of the Company. The principal risks and uncertainties of the Group, which include those of the Company, are discussed in the Group's Annual Report, which does not form part of this report.

In the normal course of business, the Group is exposed to market, liquidity and credit risk. The financial risk management policy is discussed in the Financial Risk Factors section of the Group's Annual Report, which does not form part of this report.

The subsidiary of the Company is shown at the end of this report.

Financial results

The results for the Company show profit for the financial year of £nil (2021: £nil), and total equity at 30 September 2022 of £1 thousand (2021: £1 thousand).

The Directors do not propose a final dividend (2021: £nil).

Future Developments

In the year ended 30 September 2022, the Company is considered to be dormant. The Directors are satisfied the Company has adequate resources to meet its operational needs for the foreseeable future and accordingly they continue to adopt the going concern basis in preparing the financial statements.

Interest

Interest payable and receivable is recognised in the income statement on an accruals basis.

Taxes

The tax expense for the year comprises current and deferred tax. Tax is recognised in the income statement, except to the extent that it relates to items recognised in other comprehensive income or directly in shareholders' funds. Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the balance sheet date, and any adjustments to tax payable in respect of previous periods.

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date, where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date.

A net deferred tax asset is recognised only to the extent that it is probable that future taxable profit will be available against which the asset can be utilised.

Deferred tax is determined using tax rates that have been enacted or substantively enacted by the balance sheet date and are expected to apply when the related deferred tax asset is realised or the deferred tax liability is settled. Deferred tax is measured on a non-discounted basis.

The exception is when a fair value hedge is in place whereby the investment is revalued at the rate prevailing at the period end, with any foreign exchange movement taken to the net finance income / costs. Investments are tested for impairment annually to ensure that the carrying value of the investment is supported by their underlying net assets.

Financial Instruments

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the relevant instrument. Financial assets are de-recognised when the rights to receive benefits have expired or been transferred, and the Company has transferred substantially all risks and rewards of ownership. Non-derivative financial assets are classified as loans and receivables. A provision for impairment of receivables is established when there is objective evidence that the Company will not be able to collect all amounts due according to the original terms of those receivables. The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, and is recognised in the income statement. For interest-bearing assets, the carrying value includes accrued interest receivable.
