OBERTHUR CASH PROTECTION UK LTD

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2014

1. Accounting policies

1.1 Basis of preparation of financial statements

The financial statements have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

1.2 Going concern

These financial statements have been prepared on a going concern basis. The going concern basis of the company is entirely dependent on the on-going support of the immediate parent company, Oberthur Cash Protection SA.

The directors of the company have received assurances from the company's immediate parent company that it is willing and able to support the company to enable it to meet its on-going liabilities as they fall due for at least 12 months from the signing of these accounts. In the directors' opinion, going concern is an appropriate basis for the preparation of the financial statements.

Should the company be unable to continue trading as a result of the withdrawal of support of the immediate parent company adjustments would have to be made to reduce the value of assets to their recoverable amount and to provide for further liabilities which may arise.

1.3 Cash flow

The financial statements do not include a Cash flow statement because the company, as a small reporting entity, is exempt from the requirement to prepare such a statement under the Financial Reporting Standard for Smaller Entities (effective April 2008).

1.4 Turnover

Turnover comprises revenue recognised by the company in respect of goods and services supplied during the year, exclusive of Value Added Tax and trade discounts.

1.5 Operating leases

Rentals under operating leases are charged to the profit and loss account on a straight line basis over the lease term.

Benefits received and receivable as an incentive to sign an operating lease are recognised on a straight line basis over the period until the date the rent is expected to be adjusted to the prevailing market rate.

1.6 Deferred taxation

Full provision is made for deferred tax assets and liabilities arising from all timing differences between the recognition of gains and losses in the financial statements and recognition in the tax computation.

A net deferred tax asset is recognised only if it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax assets and liabilities are calculated at the tax rates expected to be effective at the time the timing differences are expected to reverse.

Deferred tax assets and liabilities are not discounted.
