1 Accounting policies

Basis of preparation

The full financial statements, from which these abbreviated accounts have been extracted, have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (Effective April 2008).

Turnover

The turnover of the company represents fees for medical services in respect of accident claims. The services are provided on a contingency basis in that these are not received in the event that the claim does not proceed or is not successful. The outcome can take a number of years before the claim is settled and the fee is received or not. Accordingly it is considered that the only prudent and accurate policy for turnover is to base this on receipts rather than on the accruals basis.

Depreciation

Depreciation is provided on tangible fixed assets so as to write off the cost or valuation, less any estimated residual value, over their expected useful economic life as follows:

Asset class	Depreciation method and rate
Fixtures and fittings	15% reducing balance basis

Hire purchase and leasing

Rentals payable under operating leases are charged in the profit and loss account on a straight line basis over the lease term.
