### NOTES TO THE ABBREVIATED ACCOUNTS FOR THE YEAR ENDED 31 DECEMBER 2012

#### 1. Accounting policies

#### 1.1 Basis of preparation of financial statements

The full financial statements, from which these abbreviated accounts have been extracted, have been prepared under the historical cost convention, as modified by the revaluation of the company's investment property, in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008) and on the going concern basis

At 31 December 2012 the company had net current liabilities of £75,249. The company has received assurances from a fellow subsidiary company that it will provide any necessary funding in order for the company to meet its liabilities as they fall due. On the understanding that this support will continue for at least one year from the date these financial statements are approved, the directors consider it appropriate to prepare the financial statements on the going concern basis.

#### 12 Turnover

Turnover comprises rents receivable by the company in respect of the year

#### 1.3 Investment properties

Investment properties are included in the Balance sheet at their open market value in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008) and are not depreciated. This treatment is contrary to the Companies Act 2006 which states that fixed assets should be depreciated but is, in the opinion of the directors, necessary in order to give a true and fair view of the financial position of the company.

#### 1.4 Deferred taxation

Full provision is made for deferred tax assets and liabilities arising from all timing differences between the recognition of gains and losses in the financial statements and recognition in the tax computation

A net deferred tax asset is recognised only if it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted

Deferred tax assets and liabilities are calculated at the tax rates expected to be effective at the time the timing differences are expected to reverse

Deferred tax assets and liabilities are not discounted
