**Critical accounting judgements and key sources of estimation uncertainty**

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the amounts reported for assets and liabilities as at the balance sheet date and the amounts reported for revenues and expenses during the year. However, the nature of estimation means that actual outcomes could differ from those estimates.

**Critical judgements**

The following judgements (apart from those involving estimates) have had the most significant effect on amounts recognised in the financial statements:

**Foreign currency**

An entity's functional currency is determined (not chosen). IAS 21 (The Effects of Changes in Foreign Exchange Rates) provide factors, often referred to as indicators, that are considered when identifying the functional currency. In some cases, the indicators will clearly identify a particular currency as the functional currency. In other cases they will not. When the factors provide a varied result and the functional currency is not obvious, management must use judgement based on the entity's individual facts and circumstances to determine its functional currency in a way that gives a fair presentation (ie faithfully represents the economic effects of transactions, events and conditions). As HLT Owned Mezz V-B Limited's cash flows are denominated in ZAR and the immediate parent reporting currency is ZAR, management has used their judgement and determined a change in the functional currency of the company from GBP to ZAR, this change has been applied fully retrospectively to the underlying records which are in ZAR, in accordance with the required Accounting Standards.

**Key sources of estimation uncertainty**

The following are the key assumptions concerning the future, and other sources of estimation uncertainty at the end of the reporting period, that may have a significant risk of resulting in a material adjustment to the carrying amounts of assets within the next financial year.

**Impairment of investments**

Determining whether a subsidiary is impaired requires an estimation of the value in use of it's subsidiary. The value in use calculation requires the directors to estimate the future cash flows expected to arise from the subsidiary and a suitable discount rate in order to calculate present value. Each investment in subsidiary is an individual cash generating unit.

**Taxation**

Current taxes are based on the results shown in the financial statements and are calculated according to local tax rules, using tax rates enacted or substantially enacted by the balance sheet date.

**Fixed asset investments**

Investments in subsidiary undertakings are stated at cost. The carrying value of investments is reviewed for impairment when events or changes in circumstances indicate the carrying value may not be recoverable.

**4. EMPLOYEES AND DIRECTORS**

All operations of the company during the year ended 31 December 2018 have been undertaken by employees of other companies within Hilton Worldwide Holdings Inc.. A charge of R- has been included in cost of sales in respect of their services (2017:R-).

The directors received no remuneration in respect of their qualifying services as directors of the company.

There is therefore no UK corporation tax charge or credit to be recognised.
