STRATEGIC REPORT
for the year ended 31 December 2017

The directors present their strategic report for the year ended 31 December 2017.

The principal activity of the company in the year under review was that of an investment holding company.

REVIEW OF BUSINESS

The company has not traded during the year and accordingly it has made neither a profit or a loss (2016: €-). No profit and loss account has been prepared and no dividend is recommended. It is not expected that the company will commence trading in the current year.

During the prior year as part of a group restructuring, the company acquired shares in a group undertaking with a net book value of €18.6m in exchange for issuing a share with a nominal value of €1 (£1) and share premium of €18.6m. The shares were then further contributed to HLT Owned Mezz IX-C Limited's subsidiary in exchange for shares in that subsidiary with no profit or loss being recognised.

PRINCIPAL RISKS AND UNCERTAINTIES

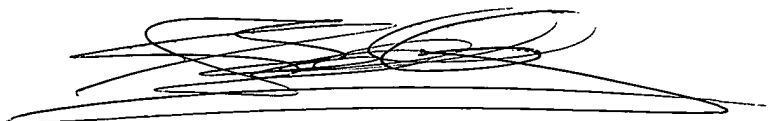

The company's principal activities are those of an investment holding company. As such the principal risks and uncertainties facing the company relate solely to the recoverability of the value of those investments.

The company monitors the fair value of all underlying assets to determine whether there are indicators that the carrying values of investments are not recoverable.

FUTURE DEVELOPMENTS

The company will continue to operate as an investment holding company in the future.

Critical accounting judgements and key sources of estimation uncertainty

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the amounts reported for assets and liabilities as at the balance sheet date and the amounts reported for revenues and expenses during the year. However, the nature of estimation means that actual outcomes could differ from those estimates.

Critical judgements

The following judgements (apart from those involving estimates) have had the most significant effect on amounts recognised in the financial statements:

Foreign currency

An entity's functional currency is determined (not chosen). IAS 21 (The Effects of Changes in Foreign Exchange Rates) provide factors, often referred to as indicators, that are considered when identifying the functional currency. In some cases, the indicators will clearly identify a particular currency as the functional currency. In other cases they will not. When the factors provide a varied result and the functional currency is not obvious, management must use judgement based on the entity's individual facts and circumstances to determine its functional currency in a way that gives a fair presentation (ie faithfully represents the economic effects of transactions, events and conditions). As HLT Owned Mezz IX-C Limited's cash flows are denominated in Euro and the immediate parent reporting currency is Euro, management has used their judgement and determined a change in the functional currency of the company from GBP to EUR, this change has been applied fully retrospectively to the underlying records which are in Euro, in accordance with the required Accounting Standards.

Key sources of estimation uncertainty

The following are the key assumptions concerning the future, and other sources of estimation uncertainty at the end of the reporting period, that may have a significant risk of resulting in a material adjustment to the carrying amounts of assets within the next financial year.

Impairment of investments

Determining whether a subsidiary is impaired requires an estimation of the value in use of its subsidiary. The value in use calculation requires the directors to estimate the future cash flows expected to arise from the subsidiary and a suitable discount rate in order to calculate present value. Each investment in subsidiary is an individual CGU.

Details of any impairment losses are disclosed in 'Investments' note.

Financial instruments

Financial assets and liabilities are recognised when the company becomes a party to the contractual provisions of the instruments.

Financial assets and liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than those financial assets and liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets and financial liabilities, as appropriate, on initial recognition.

Financial assets

Financial assets within the scope of IAS 39 (Financial Instruments: Recognition and Measurement) are classified as financial assets at fair value through profit or loss, loans and receivables, held-to-maturity investments, available-for-sale financial assets, or as derivatives designated as hedging instruments in an effective hedge, as appropriate. The company determines the classification of its financial assets at initial recognition.

Financial liabilities

Financial liabilities within the scope of IAS 39 are classified as financial liabilities at fair value through profit or loss, loans and borrowings, or as derivatives designated as hedging instruments in an effective hedge, as appropriate. The company determines the classification of its financial liabilities at initial recognition.

The company currently has no financial liabilities.

Fair values

All the company's financial instruments (except for cash) are not traded in an active market, at initial recognition the fair value is determined using appropriate valuation techniques. Due to the nature of the financial instruments as short term and market rate instruments, transaction price is considered to be the fair value.

Taxation

Current taxes are based on the results shown in the financial statements and are calculated according to local tax rules, using tax rates enacted or substantially enacted by the balance sheet date.

Fixed asset investments

Investments in subsidiary undertakings are stated at cost. The carrying value of investments is reviewed for impairment when events or changes in circumstances indicate the carrying value may not be recoverable.
