Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period. ## NOTES TO THE FINANCIAL STATEMENTS

YEAR ENDED 31 DECEMBER 2009

---

### 1. ACCOUNTING POLICIES

**(a) Basis of preparation**

The financial statements are prepared on a historical cost basis and in accordance with applicable accounting standards

As permitted by section 408 of the Companies Act 2006 the parent company has not presented its own profit and loss account

**(b) Basis of consolidation**

The Group financial statements consolidate the financial statements of Phigold Plc and its subsidiary undertaking for the year ended 31 December 2009. The subsidiary undertaking has been accounted for using the merger accounting principles. The financial statements of the subsidiary undertaking are adjusted, where appropriate, to conform to Group accounting policies.

**(c) Associated companies**

When the group has the power to participate in (but not control) the financial and operating policy of another entity, it is classified as an associate.

Associates are initially recognised in the consolidated balance sheet at cost. The Group's share of post-acquisition profits and losses is recognised in the consolidated profit and loss account, except that the losses in excess of the Group's investment in the associate are not recognised unless there is an obligation to make good those losses.

**(d) Foreign currency translation**

Transactions in foreign currencies are recorded at the rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the rate of exchange ruling at the balance sheet date. All differences are taken to the profit and loss account.

**(e) Compound financial instruments**

Compound financial instruments comprise of both liability and equity components. At issue date, the fair value of the liability component is estimated by discounting its future cash flows at an interest rate that would have been payable on a similar debt instrument without any equity conversion option. The liability component is accounted for as a financial liability.

The difference between the net issue proceeds and the liability component, at the time of issue, is the residual of equity component, which is accounted for as an equity instrument.

The interest expense on the liability component is calculated by applying the effective interest rate for the liability component of the instrument. The difference between any repayments and the interest expense is deducted from the carrying amount of the liability.

**(f) Deferred shares**

The fair value of the company's deferred shares has been recognised as a share issue expense with a corresponding increase in other reserves.

**(g) Share-based payments**

FRS 20 requires the Group to recognise an expense in respect of the granting over shares to employees and directors. This expense, which is calculated by reference to the fair value of the options granted, is recognised on a straight line basis over the vesting year based on the Group's estimate of options that will eventually vest. The Directors have used the Black Scholes model to estimate the value of options granted in the current year.

**(h) Deferred taxation**

Full provision is made for deferred tax in respect of all material non-permanent timing differences that have originated but not reversed at the balance sheet date.

Until conversion, the deferred shares have no rights attaching to them. The conversion price payable is the difference between the par value and £0.50.

**Fair Value pricing of options and deferred shares**

The fair value of options and deferred shares has been calculated using the Black Scholes pricing model. The inputs into the model were as follows:

<b>Grant date</b>	<b>7 February 2008</b>	<b>27 May 2008</b>	<b>21 November 2008</b>
Share price at date of grant	£0.50	£0.50	£0.75

Volatility	50%	50%	50%
Option life	5 years	5 years	5 years
Dividend yield	0%	0%	0%
Risk free investment	4%	4%	4%

Based on the above assumptions, the fair values of the options granted are estimated to be:

<b>Grant date</b>	<b>7 February 2008</b>	<b>27 May 2008</b>	<b>21 November 2008</b>
Fair value	£0.241 (US\$0.348)	£0.241 (US\$0.348)	£0.361 (US\$0.521)
