1 Accounting policies

Basis of preparation

The full financial statements, from which these abbreviated accounts have been extracted, have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008)

Turnover

Turnover represents the value of services provided under contracts to the extent that there is a right to consideration and is recorded at the value of the consideration due

Where a contract has only been partially completed at the balance sheet date turnover represents the value of the service provided to date based on a proportion of the total expected consideration at completion. Where payments are received from customers in advance of services provided, the amounts are recorded as deferred income and included as part of creditors due within one year

Depreciation

Depreciation is provided on tangible fixed assets so as to write off the cost or valuation, less any estimated residual value, over their expected useful economic life as follows

Asset class	Depreciation method and rate
Plant and machinery	20% straight line
Motor vehicles	15% straight line

Deferred tax

Deferred tax is recognised, without discounting, in respect of all timing differences between the treatment of certain items for taxation and accounting purposes, which have arisen but not reversed by the balance sheet date, except as required by the FRSSE

Deferred tax is measured at the rates that are expected to apply in the periods when the timing differences are expected to reverse, based on the tax rates and law enacted at the balance sheet date
