

Motability Operations

Group plc

Annual Report and Accounts 2014
Motability Operations Group plc
Company Number: 6541091

Through our unique insights and understanding of our customers' needs, we offer universally available, affordable, 'worry-free' mobility and independence to those who qualify.

We provide value to our customers by offering a wide choice of vehicles, powered wheelchairs and scooters, at affordable prices.

Our people deliver first-class customer service, and understand how disability affects our customers' needs.

All profit is retained in the Scheme for the benefit of our customers.

We have a clearly defined strategy to meet the requirements of our customers and our people, which will ensure the long-term sustainability of the Scheme.

Motability Operations at a glance

Motability Operations is contracted by Motability (the charity) to operate the Motability Car, Powered Wheelchair & Scooter Scheme. Having operated the Scheme since 1978, we aim to deliver value and an excellent service for customers by providing an affordable, consistent, worry-free leasing proposition which is universally available across the United Kingdom to recipients of qualifying mobility allowances

Our business model

What we do

Motability Operations is the operator of the Motability Car, Powered Wheelchair & Scooter Scheme. Under a service contract with Motability, we are responsible for the effective and efficient delivery of the Scheme

Motability was established in 1977 to enable disabled people to use their mobility allowance to access affordable motoring through a leasing package. The Motability Scheme was formed as a pioneering partnership, bringing together Government; banks; manufacturers; the Charity, Motability, which oversees the Scheme; and Motability Operations, the operating company. Motability Operations is owned by the main UK banks.

Under the service contract, with Motability, Motability Operations is required to meet specific performance targets across a range of measures including customer service, choice & affordability, value for money and efficiency. As operators of the Scheme, we seek to leverage economies of scale and tightly manage our cost base. It is by running an efficient operation that we are able to deliver a consistent, highly-affordable and competitive proposition for our customers which would not otherwise be available through the retail market.

To access a vehicle, powered wheelchair or scooter on the Motability Scheme a disabled person must receive the qualifying mobility allowance (see below). Neither Motability Operations nor Motability plays any role in deciding who is eligible for this allowance.

The 1.9 million people who are currently in receipt of this allowance can choose to lease one of these products from Motability Operations. At present, around 33% of allowance recipients choose to use their allowance to participate in the Scheme.

For those who decide to join the Scheme, we provide a unique and universally available mobility proposition, designed to meet the specific needs of our disabled customers. In choosing to take a vehicle, powered wheelchair or scooter on the Scheme, customers assign their mobility allowance to Motability Operations.

In return, we provide worry-free, affordable mobility including full insurance, maintenance and servicing, tyre and windscreen replacement, breakdown cover and 60,000 miles, mileage allowance over three years.

Mobility allowance

There are currently over 1.9 million recipients of qualifying mobility allowances. To access the Scheme, an individual must receive the Higher Rate Mobility Component of the Disability Living Allowance (DLA), the Enhanced Rate of the Mobility Component of the newly introduced Personal Independence Payment (PIP) (both administered

How we do it

Individuals may choose to use their mobility allowance to lease a car, powered wheelchair or scooter on the Motability Scheme. Motability Operations, as operator of the Scheme, aims to provide these customers with a 'worry-free' proposition

Mobility allowance

Government decides who should receive mobility allowances. Customers may choose to assign their mobility allowance to lease a car, powered wheelchair or scooter

Customers

Our customers are at the heart of what we do. We provide affordable and 'worry-free' mobility through a wide choice of vehicle solutions that meet their specific needs

by the DWP; in Northern Ireland this is administered by the Social Security Agency and in the Isle of Man by the Department of Health and Social Security) or either the War Pensioners' Mobility Supplement or the Armed Forces Independence Payment (AFIP) (both of which are administered by Veterans-UK). Receipt of a qualifying allowance is the sole eligibility criterion for people wishing to access the Scheme. Upon joining the Scheme customers assign their allowance to be paid directly to Motability Operations.

Motability Operations

Motability Operations is the operator of the Motability Car, Powered Wheelchair & Scooter Scheme

As the UK's largest car leasing company, we have 37 years' experience in the industry and have supplied over 3.75 million vehicles since the Motability Scheme was launched.

Nearly 646,000 customers currently choose to access the Scheme (consisting of just under 632,000 Car Scheme customers and nearly 14,000 Powered Wheelchair & Scooter Scheme customers). We aim to offer customers a comprehensive and affordable solution. Currently, 31 vehicle manufacturers (representing 96% UK brand availability) and 16 powered wheelchair and scooter manufacturers are represented on the Scheme.

We aim to provide sustained value and choice, combined with first-class customer service. To this end, we continually review and develop our business model to ensure that we optimise the value that we provide to customers. The key elements of this business model are set out on pages 4 and 5.

This business model is underpinned by a robust Balance Sheet which is designed to ensure that our operation is stable and sustainable in the

long term. This enables us to provide our customers with sustained affordability throughout the economic cycle. All profit is retained in the Scheme for the benefit of our customers.

Motability

Motability is a national charity, set up in 1977, to assist disabled people with their mobility needs. Motability directs and oversees the Motability Scheme – with its prime purpose being to ensure that those disabled people who want to use their mobility allowance to obtain a vehicle, scooter or powered wheelchair on the Motability Scheme always receive the best possible service and value for money.

Through the Scheme Agreement, Motability directs and oversees the Scheme. Motability and Motability Operations are constitutionally and operationally separate entities.

The Motability Scheme

The Motability Scheme provides customers with 'worry-free' mobility, with a lease price which includes:

- Use of a leased vehicle
- Comprehensive insurance
- Maintenance and servicing
- Tyre and windscreen replacement
- Breakdown cover
- 60,000 miles, mileage allowance

Funding

Funding from the financial market

Delivering the Scheme

Cars, powered wheelchairs and scooters are delivered through partnerships with manufacturers, dealers and other suppliers

End of lease

At the end of lease (typically three years), vehicles are returned to us. Currently 92% of customers choose to renew their lease

Remarketing

Used cars are resold into the used car market through our market-leading online channel 'mflirect' and our national auction programme

Suppliers

Provide servicing, breakdown assistance, insurance, and tyre and windscreen replacement

Delivering value for our customers

Our revenues

Motability Operations' revenue comprises rental income from customers' mobility allowances and proceeds from the re-sale of vehicles at the end of lease

Our financing

We finance the Scheme by issuing bonds in the Sterling and European Debt Capital Markets, through securing term-finance and credit facilities from the major UK banks and through the liquidity provided by our capital base

Our suppliers

We manage a range of key suppliers to ensure that we provide customers with a consistent UK-wide proposition, representing excellent value for money and delivering first-class customer service

Our revenues

In choosing to join the Scheme, customers assign their mobility allowance to Motability Operations. Customers can choose from a wide range of models with 'nil advance payment' – where the assignment of their allowance alone is sufficient to cover the cost of leasing the vehicle. However, some customers may elect to top this up with an 'advance payment' depending on their choice of vehicle. Our aim is to ensure that we use customers' money – our Rental Income – to deliver the best possible products and services for our customers.

We do not receive any grant or funding from Government.

Nearly half of our revenue is derived from the re-sale of the vehicles that are returned to Motability Operations at the end of lease each year – we sold over 220,000 vehicles in the year to September 2014, generating over £1.8 billion in revenue. The effective management and deployment of our vehicle remarketing activities, and the subsequent realisation of asset values, is critical in underpinning ongoing affordability and providing stable lease prices to customers.

Our financing

As a standalone company, Motability Operations is financed through commercial market-based funding and by reinvesting profits back into the business.

Our current financing comprises a blend of borrowing from the Sterling and European Debt Capital Markets (bonds), combined with facilities negotiated with the major UK banks to provide liquidity headroom. We currently have £3.135 billion of bonds in issue and a £2 billion bank facility. In order to access these markets on competitive terms it is necessary to maintain an investment-grade credit rating. Our A+/A2 credit rating from Standard & Poor's and Moody's respectively underpins our ability to fund the Scheme in a sustainable and cost-effective manner.

The balance of our financing is provided by our capital base, which not only supports the Scheme's liquidity requirements, but also underpins our financial sustainability.

We ensure that we maintain an appropriate diversity of funds and a well-laddered maturity profile to minimise refinancing and liquidity risk. Our existing financing facilities provide sufficient liquidity headroom to meet our financing needs in the medium term.

Our suppliers

We aim to provide a UK-wide and universally available proposition to a consistently high standard. In order to deliver this we engage with and manage a range of suppliers. We aim to not only deliver value through every aspect of our supply chain, but also ensure that they deliver the highest standards of customer service.

We source vehicles from 31 vehicle manufacturers and use a variety of adaptation and conversion specialists.

Through our national network of over 4,800 approved Motability Dealers, we oversee the delivery of the full 'end-to-end' customer process – from application for and delivery of the vehicle, through servicing, maintenance and repair, to the return of the vehicle at the end of contract. This involves the training of 18,000 Motability Dealer Specialists and results in over one million transactions between Motability Operations and the dealer network each year.

We manage a number of other key suppliers who deliver other elements of the 'worry-free' package, including prioritised roadside assistance, and tyre and windscreen replacement.

The way in which we deliver the Scheme is designed to maximise the value we provide to customers. We are commercial in our approach and ensure that we benchmark well to market best-practice

Our insurance

Insurance is an essential element of our 'worry-free' proposition. Our new insurance arrangements provide an efficient and sustainable structure which ensures we offer value and continued peace of mind for our customers

Our vehicle remarketing

Our ability to optimise the market value of the used-vehicles as they are returned to us at the end of lease is a core competency for Motability Operations, and fundamental to delivering affordability and stability in lease prices for customers

Our people

Our business culture is customer focused and performance driven. We set challenging targets and we encourage our people to think and act commercially whilst remaining aligned to our values

Our insurance

We have recently reconfigured our insurance arrangements to ensure that it continues to provide value for money and is delivered in an efficient manner, and is sustainable in the long term. Whilst customers continue to benefit from fully comprehensive insurance provided by RSA, since 1 October 2013, Motability Operations has retained a proportion of premium exposure through its A+ rated reinsurance captive MO Reinsurance Ltd (MORL).

MORL's net exposure is contained through the placement of a conservatively structured reinsurance programme, which spreads insurance supply amongst a number of highly-rated reinsurers and, in so doing, diversifies risk and ensures stability of insurance provision in the future.

RSA continues to provide policy and claims administration activities through its dedicated RSA Motability unit in Liverpool.

The efficient financial model that underpins the new arrangements brings with it additional financial benefits, all of which are passed on to customers.

Our vehicle remarketing

Unexpected volatility in the used car market may impact our ability to realise the predicted value of our vehicles. This is our single largest risk. We are currently required to sell over 220,000 cars into the used-car market each year (over 600 per day, seven days a week), as these are returned to us at the end of lease.

The effective deployment of this activity, and therefore the realisation of the optimal value for these assets, is fundamental to protecting the affordability and sustainability of the Scheme. To achieve this we operate a market-leading online trade sales channel 'mfdirect', through which we sell to an actively managed buying base of over 3,200 dealers. During the year ended September 2014 we sold over 159,000 vehicles (71%) through this online channel. Vehicles that are not sold online are routed through our national auction programme, with over 750 branded events held across 29 auction centres last year.

Our people

We believe that our people are our greatest asset. By retaining a motivated and engaged workforce we are able to deliver a consistently strong business performance working within a business culture aligned to our values and principles.

Through our workforce of over 800 employees we operate the Motability Scheme. We challenge our people to be customer focused and to think and act commercially. This supports our dual goals of delivering excellent customer service and ensuring that we provide value to our customers.

As a responsible employer we are committed to paying our people at least the level of the minimum 'Living Wage' for their base location.

Through our customer call centre we handle approximately 950,000 calls every year, with over 80% of calls being answered within 20 seconds.

Each year we participate in an independently measured employee culture survey which measures employee views across a range of topics such as engagement, customer focus and leadership. In recent years Motability Operations has significantly outperformed the UK High-Performing Organisations' benchmark across all categories.

The needs of the Scheme's disabled customers are at the heart of everything we do

We are contracted by Motability, the Charity, to run all operational aspects of the Motability Scheme and I am delighted to report that the business has performed strongly throughout a challenging year, delivering robust financial performance, which has enabled us to make substantial investment in support of our disabled customers.

Customer service has continued to operate at extremely high levels. Tellingly, over 98% of customers said they would recommend the Motability Scheme to others. Renewals continued at 92%. It was satisfying to see these excellent ratings matched in assessments carried out by the Institute for Customer Service, which renewed our full "ServiceMark" accreditation.

I am pleased to report that the efficiency and value for money of the Scheme has been recently underscored by an independent report from EY (Ernst & Young), commissioned by Motability, the Charity. This report concluded that we have succeeded in reducing overhead costs per customer by 28% in real terms over the past 12 years. In addition it commented that at the same time as achieving these efficiencies *"the Scheme improved its customer service levels (as independently measured by customer satisfaction scores) to 98% and the number of models available at nil Advance Payment rose from 62 to 490"*.

Financially, reserves tracked strongly against target and we maintained our credit rating at A+/A2. With our new insurance arrangements now well established, we were also pleased to achieve a rating of A+ stable for our insurance operation. During the year we issued a £300 million 12-year Sterling bond, locking in a very competitive rate of funding. This has brought our total bond issuance through Capital Markets to £3.135 billion underpinning our structural liquidity into the medium term.

This year has seen the first of our customers reassessed for Personal Independence Payments (PIP), some of whom have subsequently lost access to the Scheme. As reported last year, Motability has agreed to pay each established customer exiting the Scheme following DWP PIP reassessment an amount up to £2,000 to assist with their future mobility needs, provided the car is returned within a specified period. This year, we have made a charitable donation of £150 million to the Charity to help meet these payments.

In operating the Motability Scheme we buy more than 220,000 cars each year, equivalent to around 10% of the total UK new car market, and we sell around 600 used cars every day to the motor trade. We are now the largest vehicle leasing business in Europe.

Our successful management team was born out of a task force committed to transform what was previously a lacklustre delivery mechanism with low customer satisfaction, into one that is now highly efficient and entirely customer-focused. Today over 71% of our used vehicle sales are online and first-point resolution in our customer call centres is at a record high of 88%. This has been achieved against a backdrop of several periods of economic instability. We have created an organisation with the in-depth expertise, scale and discipline necessary to meet the distinctive needs of disabled people, and with our prudent and cautious approach to risk and capital management, we are well placed to weather any future economic storms.

Whilst the financial transformation of the business is now broadly complete and we have demonstrated our resilience to significant economic shocks including the major downturn in residual values seen in 2008, our culture is always to strive for continuous improvement. No organisation, however successful, can afford to be complacent or to stand still and, as part of our normal business review cycle, we will seek to ensure that we continue to provide an efficient service delivery model properly aligned to effective remuneration structures. I am delighted that Neill Thomas, a partner and Head of Corporate Finance at KPMG, who very recently joined our Board bringing nearly 20 years' experience of working in our business sector and with Motability will, in 2015, undertake this review as Chair of our Remuneration Committee.

I greatly value the close working relationship we share with the Motability Charity, particularly Lord Sterling and his Governors, in delivering this unique scheme for disabled people. Together, our strength will enable us to continue to provide our customers with a long future of worry-free motoring.

Finally, I would like to thank all our employees, who continue to be absolutely passionate about customer service and are vital to the success of Motability Operations today. This excellent service reflects a cultural approach which is engrained through every part of the business. I would also like to thank Mike Betts, the entire Executive team and the Board for their leadership in delivery of such outstanding customer service and financial performance.

Financial statements

Delivering a value-added proposition for customers

Our ability to invest in customer service initiatives rests on the strength of our financial position – all profits are reinvested for the benefit of customers

This has been a significant year for Motability Operations, as we continue to drive excellence in customer service, while supporting the transition of customers affected by welfare changes. I am pleased to say that, through challenging times, we have continued to make important progress in each of our objectives of customer satisfaction, excellent business culture and financial strength, key elements supporting our ultimate goal of delivering affordable, worry-free motoring.

Successful performance

Despite expectations of a flat fleet, our numbers in fact grew by more than 9,000 this year, to nearly 632,000 car, and just under 14,000 scooter and wheelchair customers. Close to 64,000 brand new customers chose to use their disability allowance to lease a Motability car, of which 9% were recipients of the new disability allowance, Personal Independence Payment (PIP). It is early days, but with PIP evaluated under different criteria, we will begin to monitor and assess the requirements of this newly qualifying customer base. This will guide us in meeting the needs of customers who potentially come to us with a wider variety of conditions.

Throughout the year, overall customer satisfaction remained at its record level of 98%. This measure is researched for us independently every six months. For the first time, we achieved satisfaction of over 90% for every segment, or customer touch point, on our customer satisfaction 'wheel'. It was good to see these exceptional levels were also reflected across surveys undertaken by the Institute for Customer Service. After thorough scrutiny, through its demanding set of criteria, the organisation renewed our full ServiceMark accreditation, showing our customer satisfaction to be in line with, or ahead of, some of the UK's most popular and trusted household names.

In the independent survey, over 98% of Motability customers said they would happily recommend the Scheme to a friend, and 92% of customers chose to renew at the end of their lease. These levels are achieved through dedicated focus on customer needs including resolving 88% of customer queries during their first call. For the seventh year running, 80% of customer calls were answered in less than 20 seconds. A focus on dealer training and communications has also helped deliver consistent UK-wide service through 18,000 Motability Dealer Specialists at the dealership front line.

Customers in our powered wheelchair and scooter fleet are also becoming more satisfied with the service we offer, with overall satisfaction ratings at 95%. Renewal rates increased to 73%, and a number of steps have helped to reduce the volume of early terminations of these contracts. We have also continued our focus on support for customers needing adapted or converted vehicles; 368 'drive-from wheelchair' vehicles were handed over this year, and our wheelchair accessible vehicle (WAV) numbers are now at over 24,000. We continue to look at how we can better support those customers with additional and specific mobility needs.

Our UK-wide 'One Big Day' events saw record attendances this year with the six shows across the UK attracting more than 21,000 visitors. This included our first ever event in Northern Ireland, giving more customers and potential customers the opportunity to explore vehicle options, find out more about adaptations and conversions, and to test drive adapted cars.

Financial sustainability

Our ability to invest in customer service initiatives rests on the strength of our financial position, with all profits being reinvested for the benefit of customers. With that in mind, it is pleasing to record a further year of excellent financial performance. During the year this meant we were able to offer more than 444 car variants available at no more than the customers' allowance, representing excellent value and affordability for our customers when you consider that this includes full insurance for two drivers, breakdown cover, all maintenance and servicing, plus continuous customer helpline support. In fact, more than 150 cars were also available at less than the full allowance, enabling customers to keep some of their mobility allowance.

Over a third of the fleet is now covered through our new insurance arrangements, whereby Motability Operations takes on more of the risk, and this is now helping to contain prices. Together with strong partnerships with manufacturers, this has enabled us to maintain a wide range of affordable vehicles to meet customer needs.

Nearly half of our turnover is generated through used car sales, where we operate in a highly competitive marketplace. The year saw the highest ever number of vehicle sales, up at over 220,000. We were therefore delighted to increase performance in our used car sales operation, with 71% of cars now sold online, direct to dealers.

Our financial strength has improved, with reserves tracking in line with target, remaining above our minimum capital requirement. We maintained our credit rating at A+/A2, and achieved an A+ rating for our insurance captive. Structural liquidity remains strong, well in line with our targets, and we also successfully issued a £300m 12-year Sterling bond.

This year's successful performance has enabled us to make a discretionary charitable donation to Motability of £150m. This sum will be used to provide transitional support payments for customers leaving the scheme as a result of PIP reassessment. Qualifying customers who joined the Motability Scheme before 2013 will receive £2,000, as well as practical assistance, to help them remain mobile after leaving the Scheme.

For a business to perform consistently at these levels requires an outstanding degree of employee engagement, and deeply-embedded service culture. An annual survey of employees carried out for us by Towers Watson benchmarks the business against the UK's highest performing companies. This year saw further progress, with all divisions ahead of the 'High-Performing Organisations' high-performing benchmark across all 11 categories for the first time. Our employees' passion for our objectives, their energy and appetite for continuous improvement, remains exceptional.

Progress continued through the year on the overhaul of our core IT systems, a major project setting out to ensure we support our business with continued efficiency into the long term. The transfer of our powered wheelchair and scooter fleet to the new system is due in the summer of 2015, and should deliver immediate improvements to the handling of ordering and support processes.

Tight governance and control helped us make sure that financial and operational risks were again carefully managed throughout the year. This included the establishment of a new risk function alongside the appointment of a Board Director with responsibility for risk. We are also now regulated by the Financial Conduct Authority (FCA) for our consumer credit activities; interim FCA permissions have been received, and reviews undertaken to understand and respond to the FCA's requirements.

Looking ahead

Next year will undoubtedly bring new challenges. However, given the achievements of this year, during which we have sustained record levels of customer satisfaction and emerged in a strong financial position, we are well placed to meet whatever comes our way.

We are also very conscious that some of our customers will be affected by disability benefit changes over the coming months, and a number will lose eligibility for the Scheme. We will be as sensitive and flexible as we can in supporting customers in this position, including enabling them to remain in their car for up to three weeks following their last allowance payment. In addition, we have worked closely with Motability who will provide financial support to help customers through this difficult transition.

I would like to thank everyone who has worked hard to deliver this outstanding set of results.

Mike Betts
Chief Executive

See the following page
for a Q&A with Mike Betts

With Mike Betts, CEO

How confident can you be that Motability Operations can continue to offer universal, affordable motoring over the long term?

Over the past ten years or so, we have worked hard to build a financially secure and robust business that can withstand the full range of risks which may affect us. We have built levels of capital that can help us weather some of our biggest threats, such as a sudden drop in used car values – with assets worth nearly £6 billion, that's obviously a major concern. However we have stress-tested a range of other scenarios, including the impact of welfare changes, and remain confident that in any of these cases, we will continue to perform as a large-scale, efficient business and maintain our customer offering. Risk is something we manage and plan for, and in fact have strengthened this area even more this year with the establishment of a new risk function, and appointment of a Board Director with specific responsibility for risk.

How important is culture to this business?

For us at Motability Operations, culture is extremely important. In fact I would go so far as to say that it is the bedrock on which all our activities are based. We have a set of values which are well understood and lived and breathed across the organisation. In addition, a business such as ours requires employees with specific qualities of leadership, drive, acumen, flexibility and customer focus. We also look for individuals prepared to take clear ownership of and responsibility for their actions – people we can trust to demonstrate our standards in everything they do, at all levels. We measure performance not only in relation to whether people have met their objectives, but whether they have done so in line with our values. This process has helped us develop a strongly engaged and high-performing workforce. I'll be frank and say the successes we have seen would not be possible without it.

With benefit changes underway, some customers may lose eligibility for the Motability Scheme. What sort of support can customers expect in these circumstances?

Lord Sterling (Chairman of Motability) responded to welfare changes in September 2013 with a detailed announcement of support measures, and we are pleased to support these initiatives.

The changes are undoubtedly going to affect many of our customers, and we realise that this is likely to be a very difficult time for those affected. We have set out to support customers as best we can through this process, by offering both financial and practical support. Financially, if a customer returns their car in good order within 21 days of their last benefit payment, we will pay them up to £2,000 (depending on when they first joined the Scheme). In addition, there will be a pro rata refund of any advance payment, plus a practical guide to next steps, including a claims history letter to help with future insurance cover. Customers should also feel free to contact us to discuss any particular concerns. We are also being as flexible as we can with the car return, giving customers up to seven weeks from the PIP award decision. However, it is not possible to leave people in their car for longer than this as we do not have a mandate to provide vehicles to people who are not in receipt of one of the qualifying allowances.

“Over the past ten years or so, we have worked hard to build a financially secure and robust business, that can withstand the full range of risks which may affect us.”

Our strategic framework

Our strategy

In order to ensure that our activity delivers outstanding value to customers, we have defined four strategic 'pillars'. These set out a clear framework within which we align our business objectives, performance targets and business planning. Our people, positioning principles, culture and values form the bedrock to deliver these objectives.

Our values

Our values are central to delivering and meeting the needs and expectations of our customers. We embrace diversity, which enables us to have a wide variety of approaches and perspectives, enhancing performance and creating value for customers.

People and principles

Our people are fundamental to our success and we are committed to recruiting and retaining an engaged and motivated workforce. We have created an excellent working environment, and promote a collaborative business culture aligned to our core values and principles. We seek to develop our people and to reward and recognise excellent performance.

Go to pages 33-34
For more information on people and culture

Performance

We track performance through a range of corporate Key Performance Indicators (KPIs). These KPIs are defined in the context of the four strategic 'pillars', thereby ensuring that activity across the business is aligned with these strategic objectives. Employee performance is measured with reference to the delivery of both individual and company targets.

Go to pages 12-19
For more on performance

Risk management

Through our comprehensive risk management processes we identify and assess the risks that we face. Having understood the nature of these risks, we ensure that we have the appropriate mitigants in place to reduce these exposures.

Go to pages 29-32
For more on risk management

Build our customer and disability expertise

Strategy

We aim to maintain consistently excellent levels of customer service throughout the leasing proposition, and demonstrate disability expertise in our approach to our customers and in our role as an employer.

Goals

Understanding our customers is critical to our success. By listening and responding to their feedback, we are able to adapt our proposition and focus our resources on their needs. Our success is dependent on our ability to deliver a Scheme that meets our customers' requirements and provides excellent service. Development of our disability expertise is fundamental to our success in understanding our customers and the delivery of our customer service aspirations.

Objectives

- Deliver best-practice customer service through our call centre
- Ensure that the standard of services deployed through our key suppliers is commensurate with our internal targets
- Build our adaptation and conversion expertise to ensure that customers have a seamless experience and that we are recognised for the excellence of our 'one-stop-shop' service
- Provide our customers with the information and tools they need to select a suitable car from the wide range available
- Provide information to support decision-making to meet customers' mobility needs
- Work with disability organisations for guidance and support.

KPIs

Overall customer satisfaction

98%

We deliver by listening to our customers and ensuring that we meet their requirements.

Calls answered within 20 seconds

83%

We have successfully met our target of answering 80% of calls within 20 seconds for seven consecutive years. The removal of Interactive Voice Recognition in 2010 means that customers quickly reach a real person.

Roadside assistance average response time

37.8min

Mobility is a priority to our customers – in the event of a breakdown our customers receive priority assistance, and with an average response time of 37.8 minutes, customers are quickly attended to and are mobile again.

Meeting our customers' needs

"The Motability specialist at the dealership was brilliant throughout, being extremely patient with all my questions, providing two test drives and giving excellent advice on available accessories. His product knowledge and communication skills were outstanding."

Motability Customer, Somerset

We handle over

950k

calls through our dedicated customer
call centre each year

Provide value and choice

Strategy

We provide a wide range of vehicles to our customers at competitive and affordable prices.

Goals

We believe that customers should be able to choose from a wide selection of vehicles. Within this offering we are committed to providing a range of affordable models which are suitable for our customers' needs.

To this end we seek to leverage our purchasing power and ensure that we manage our cost base on commercial terms – the aim being to provide value without compromising choice or quality.

Objectives

- Maintain a range of at least 200 cars at 'nil advance payment'
- Provide a wide selection of vehicle models and brands
- Ensure that our residual value-setting and forecasting is the best in the industry
- Provide stability in pricing and choice throughout the economic cycle
- Retain our market leadership for vehicle remarketing.

KPIs

Affordable vehicle choice **>444**

We aim to maintain the availability of at least 200 cars that are funded solely by the assignment of the customer's disability allowance. During the year we exceeded this target with at least 444 models at any one time.

Relative affordability –
% cheaper than alternative **43%**

We benchmark ourselves using commercial contract hire quotations. These are usually unavailable to the general public and are likely to be less expensive than personal contract purchase quotations. Our economies of scale, operational efficiencies and a VAT concession (which is passed onto customers in lease pricing) deliver the majority of this differential.

% of vehicles sold online at
the end of lease **>71%**

Selling via our online sales channel, 'mflirect', provides an effective, low-cost route to market which facilitates the management of our high volume of disposals, and also ensures a competitive sales environment through which we seek to maximise our net return.

Providing value for customers

“The Scheme allows me to enjoy trouble-free motoring, giving me choice, control and independence.”

Motability customer, Chelmsford

Customers can
choose from

2,000

vehicle derivatives across
31 manufacturers, representing
96% of the UK brand availability

Improve reach and awareness

Strategy

We seek to create improved awareness and understanding of the Scheme proposition within our potential market. In doing so, we attract new customers to the Scheme.

Goals

Through promoting greater understanding of the Scheme proposition, we seek to develop better-informed potential customers who are well positioned to evaluate its benefits.

Fundamental to this is the loyalty and trust of our existing customers, with renewal rates being closely linked to our success in delivering sustained affordability and excellent customer service.

Objectives

- Raise understanding of Scheme elements and confidence and trust in the Scheme
- Maximise effectiveness of multimedia channels in increasing understanding within the eligible customer base
- Identify and, where appropriate, remove any barriers for potential customers
- Continue to encourage dealers to promote the Scheme in line with our brand.

KPIs

Trust in Motability **98%**

Since 2012 we have measured customers' trust in the Motability 'brand'. Trust is considered to be key in enabling current and potential customers to make an informed and confident choice of a mobility solution that meets their disability needs and, in turn, strengthens customer advocacy of the Scheme.

Customer renewal rate at the end of lease **92%**

Whether customers decide to renew their business at the end of the lease is a key measure of our success in delivering affordability, choice and customer service. During the year to September 2014 this was maintained at 92%, compared with a KPI target of 85%.

Customer advocacy **98%**

Existing customers are the Scheme's biggest advocates, with over 98% saying that they would recommend the Scheme to others.

Attracting new customers

“The layout and facilities at ‘The Big Event’ were outstanding. The whole experience was a real pleasure to attend and helped me to make an informed decision on which vehicles will suit my needs.”

Prospective customer at one of our ‘One Big Day’ events

Over

21,000

people attended our seven ‘One Big Day’ events which provided potential customers with information about the Scheme and the opportunity to explore product ranges

Ensure long-term sustainability

Strategy

We ensure that our business model, finances, people, reputation and infrastructure are geared to support the long-term sustainability of the Scheme.

Goals

Long-term sustainability is fundamental to the delivery of the other three strategic pillars. From a financial perspective we seek to ensure that we maintain a robust balance sheet and reserves base capable of absorbing market volatility, and that we secure longevity of funding on competitive terms capable of supporting our range of fleet expectations. This, in turn, allows stability of pricing through the economic cycle. We regard the enhancement of our reputation and the continuation of the support we enjoy across our stakeholder groups as pivotal to our sustained success.

Objectives

- Maintain a prudent reserves policy that provides financial strength adequate for us to withstand the impact of potential shock events
- Create opportunities to access wider sources of competitive funding. We aim to maintain our credit rating, enabling us to secure the most appropriate funding at competitive rates
- Continue to nurture effective partnerships with key stakeholders
- Maintain a forward-looking environmental policy, ensuring availability of a range of low-emission vehicles, but balancing our customers' needs with CO₂ considerations
- Ensure that our premises and information technology infrastructure are robust and future-proof
- Attract and retain quality people.

KPIs

Credit rating

A+/A2

We seek to preserve our credit rating with our robust approach to financial and risk management and through the flexibility of our pricing process. Our ratings are A+/A2 with stable/positive outlooks (from Standard & Poor's and Moody's respectively).

Capital

+17%

Above our Minimum Capital Requirement (2013: +17%), providing us with confidence that we have an adequate capital base to protect the Scheme through the economic cycle.

Employee engagement

95%

We participate in an independent annual review of business culture, where we have significantly outperformed the 'High-Performing Organisations' benchmark. Employee engagement is 14% higher than the benchmark.

Developing our people

“Motability Operations continues to be a forward thinking company which encourages staff to be the best at what they do. All of this ensures our customers receive the highest level of service available.”

Employee comment in our independent 2014
'High Performing Organisations' culture survey

Employees' view of
customer focus was

positive in the 2014 'High-Performing
Organisations' culture survey, a result
16% above the high-performing
benchmark norm

Providing a stable and sustainable proposition

Effective financial management provides a platform from which to deliver an efficient and stable Scheme, thereby delivering maximum value for customers

Our approach to liability management is founded in the overarching objective of protecting the sustainability of the Scheme into the long-term. We therefore focus on ensuring that our capital and liquidity management strategies are geared to be robust and sufficiently flexible to provide a solid platform from which to provide a high-quality, stable proposition for our customers.

David Gilman
Finance Director

Financial performance

Targets met

It is pleasing to report that targets were exceeded across the full range of financial measures during the year to September 2014. As indicated in the Half Year results, financial performance has benefited from the sustained buoyancy in the used-car market, with the strong demand for high-quality used vehicles continuing through the second half of the year. Motability Operations has performed well in this positive market – with over 71% of ex-lease vehicles being sold via our online channel 'mfldirect' – enabling the realisation of remarketing gains through the period. The strength of used-car values is also reflected in our fleet revaluation, which for the short-term anticipates a continuation of the current positive pattern of demand, resulting in a reduced depreciation charge for the year.

As outlined in the 2013 Annual Report & Accounts, in consultation with Motability, Motability Operations has agreed to implement a package of transitional support (see page 25 – Welfare Reform Update for details) for those customers who lose their eligibility for the Scheme through the roll-out of the PIP over the next five years. This support package will include transitional grants from Motability, which will be funded via periodic charitable donations from Motability Operations. The initial support package will be reviewed in Autumn 2015 to take account of economic circumstances and any possible changes the Government may be making at that time, following their forthcoming independent review of the PIP implementation.

Given the Group's robust financial performance during the year, the Board of Motability Operations Group plc has authorised and paid a £150m donation to Motability in September in support of the commitment to fund the PIP transitional support package. This donation is considered to be affordable without compromising either financial sustainability or our ability to provide stable and affordable pricing for customers who remain on the Scheme. We will periodically review the Group's capital position and this may provide scope for further donations to Motability in future years.

After this donation, post-tax profit, which is retained in the business for the benefit of our customers, was £204.7m (representing a Return on Gross Assets of 3.1%). Our corporation tax charge for the year was £46.6m (at an underlying rate of 22.0%, which, together with a deferred tax release of £9m due to reducing tax rates, brings the effective rate to 18.5%). This result takes restricted reserves on the balance sheet to £1,878.6m. The restricted reserves provide us with a capital base to meet the dual objectives of ensuring a stable and sustainable Scheme, and of supporting the financing of the fleet.

Total customer numbers continued to increase during the year, with a closing fleet of nearly 646,000, representing 1.5% growth year-on-year. Whilst there has been some slow-down in brand new customer numbers joining the Scheme during the year – not unexpected given the uncertainties created by the roll-out of PIP – renewal rates for existing customers have remained at 92%.

The Group's liquidity remains in a healthy position, with the refinancing of the Group's £2 billion bank facilities in December 2013 and also the issuance of a £300m 12-year Sterling bond in July 2014, increasing liquidity headroom and extending the Group's average debt maturity to over 6.5 years (see Cash and Funding section on page 23 for more detail). Balance Sheet ratios further evidence the robust nature of the Group's financial position, with the ratio of Adjusted Total Group Assets: Total Net Debt, which is targeted to be no less than 1.25:1, at 1.79:1 in September 2014. The Group's credit ratings were reaffirmed as A+/A2 during the year, with a stable outlook from Standard & Poor's and Moody's changing their outlook to 'positive'.

Revenue increased to £3,803m – up 9.6% year-on-year. This reflects both an increase in rental income – up 4.3% to £1,953m (a product of the growth in customer numbers combined with the 2.7% uplift in the mobility allowances from April 2014), and an increase in vehicle resale proceeds – with 223,307 vehicles sold during the year and overall disposal proceeds up 16.2% to £1,831m.

Cost management

Our £3.6 billion cost base continued to be tightly managed during the year through the application of effective cost management disciplines and via robust supplier management and procurement processes. We continuously review our processes and approach, searching for ways to refine and innovate the way in which we manage and deliver the Scheme.

We also target annual efficiency savings in our overhead cost base. During the year an independent review of Motability Operations' overhead cost efficiency was commissioned. The review showed that Motability Operations has delivered a 28% reduction in real terms overhead cost per lease since 2002.

It is as a result of these initiatives and the continued focus on cost management that we are able to provide excellent and sustained affordability to customers.

Use of earnings

Through the effective management of operations and leveraging our economies of scale we are able to provide a wide range of affordable vehicles for customers. The efficient delivery of the Scheme has given us the opportunity to invest in a number of discretionary investments to enhance the customer proposition. The chart below shows how our underlying earnings of £539m are utilised:

- Investment in the customer proposition: 53.4% of underlying earnings were reinvested in customer focused initiatives in 2014, such as ensuring continuous mobility for customers, a good condition bonus for customers who return their vehicle in appropriate condition at the end of lease, and investment to ensure that our dealer network provides customers with a first-class customer experience. In 2014 this total investment was £288m, including the £150m donation to support the programme of PIP transitional support payments
- Tax charge – after allowing for the investments outlined above, we delivered a pre-tax profit of £251m in 2014, incurring a £47m tax charge at an underlying tax rate of 22%
- Retained to underpin capital requirements and to finance fleet growth: Our post-tax profit, representing 38% of underlying earnings, was retained to ensure that the Group maintains an adequate capital base to provide resilience given the risks that it faces (see Risk Management, pages 29-32). The retained earnings also contribute to financing the purchase of new vehicles, thereby reducing future borrowing requirements.

Through the effective management of the Scheme we are able to provide a wide range of affordable vehicles for customers. The efficient delivery of the Scheme has afforded the opportunity to invest in a number of discretionary initiatives to enhance the customer proposition

Insurance performance

Our revised insurance arrangements commenced on 1 October 2013. Under the new structure, Motability Operations participates in a proportion of premium exposure via our A+ rated reinsurance captive MO Reinsurance Ltd (MORL). MORL's net exposure is contained through a conservatively structured reinsurance programme. The introduction of the new arrangements not only secures the long-term supply of insurance, but also brings greater efficiency and financial benefits, all of which are passed on to customers.

Our fleet will migrate on to the new arrangements over the next four years as new and renewing business falls under this cover. The new structure has been integrated seamlessly, with new expertise, processes and data flows all successfully embedded into the business. At the end of September 2014, over 229,000 vehicles were 'on-cover' under the new arrangements (see page 27 for further detail, and also page 30 in the Risk Management section).

The 2014 Group financial statements include the consolidated results of MORL. In terms of financial performance, following a detailed actuarial review of insurance liabilities, and having made the necessary provisions, MORL reported a small underwriting profit of £1.3m for the period. Incurred claims costs and the profile of expected claims development remain in line with priced expectations. This underwriting position has been validated through an independent actuarial review of claims exposures.

Assets and residual values

Operating Lease Assets increased by £344m during the year to £5,916m – reflecting the increase in customer numbers and also an increase in the average value of vehicles on the Scheme.

The Group has a demonstrable track record of successfully managing residual values through the economic cycle. The prudent and effective management of the asset base remains a top priority for management. This is achieved through the use of a sophisticated methodology for determining the residual value of each asset at the inception of the lease, and also through a quarterly re-assessment of this anticipated residual value during the life of each lease.

This revaluation allows us to be agile and adjust residual values as appropriate to reflect market trends. This enables us to mitigate the risk of potential market volatility. At each financial period end, this revaluation may result in the need for accounting adjustments which are usually made by recalibrating vehicle depreciation for the period and over the remaining life of the lease. Our in-house model, which is periodically independently validated, has consistently outperformed alternative external benchmarks and remains less volatile and typically more conservative in outlook than other market views. At September 2014, the projected revaluation of the fleet versus the priced position reflected an anticipated gross gain of £151.6m.

As regards vehicle resale performance, the Group realised significant gains on disposal during the year ended September 2014, recognising an aggregate gain of £128.5m (or 7%) against the adjusted residual value. This result both demonstrates the increasing effectiveness of our remarketing operation – with over 159,000 (over 71%) of vehicles sold via our online channel (mflirect) – and reflects a sustained period of stability in the used car market.

Financing

Capital management

The Group's capital management approach is designed to ensure the sustainability and stability of the Scheme into the long term. The Group's capital base is in the form of its restricted reserves (retained exclusively for the benefit of the Scheme – with shareholders having no entitlement to ordinary share dividends), which are used to protect the Scheme, and so customers, from potential market or economic shock events.

We continue to use an Economic Capital (EC) model to determine the minimum level of capital appropriate to protect the business from such economic shocks. The overarching principle is to secure the sustainability of the Scheme through the economic cycle, and in so doing preserve the relative stability of prices, affordability and choice for our customers. We have adopted a conservative approach, with a core underlying assumption that we need sufficient capital to cover the loss that may arise from all but the most extreme risk events.

The capital implications of the revised insurance arrangements have been subject to particular review and scrutiny. As a design principle, the structuring and implementation of the new arrangements have been configured to ensure that the net risk imported into the Group sits well within our risk appetite and that we hold sufficient capital to underpin these arrangements. Under the revised insurance structure the net risk retained by the Group is limited through a conservatively placed reinsurance programme. Our Economic Capital (EC) model has been adjusted to reflect the net risk. Consequently, as the fleet has migrated onto the new insurance arrangements, the calculated Minimum Capital Requirement (MCR) at Group level has increased year-on-year.

In order to ensure that our capital planning adequately reflects the current risk profile of the business, we undertake an annual review of our EC methodology and the key underlying assumptions. Focus is also given to new or emerging company-specific or wider environmental factors which are considered to have a bearing on the Group's capital requirements.

An independent review of the Group's EC methodology was commissioned last year, with feedback confirming our approach to be proportionate and appropriately conservative given the Group's overarching objective to ensure long-term sustainability. Therefore this review did not lead to any changes to the Group's underpinning EC calculations.

However, the review noted that the way in which the wider market is applying EC methodology as a tool for capital management is evolving, with current approaches to capital management being more flexible and fluid, with prudent management overlays over and above the calculated EC requirement now becoming the norm. The Group has therefore revised its capital management policy, with capital being targeted to remain at such a level that the Scheme could withstand at least a 'normalised' market shock without capital being eroded below the calculated MCR.

In order to simulate a 'normalised' market shock, the Group runs a comprehensive range of stress-test scenarios to validate the MCR and targeted capital position. By running a series of hypothetical market-specific and wider economic extreme stress scenarios, we can objectively scrutinise the efficacy of the Group's capital base. The conclusion of this stress-testing is to affirm the adequacy of the Group's capital position, so providing management with confidence and assurance as we look to the future. At the financial year end the Group's closing capital position was 17% above the MCR.

Cash and funding

During the year the Group refinanced its existing bank debt facilities and also completed a further debt capital market issuance under the European Medium Term Note programme, thereby increasing and extending the Group's liquidity headroom.

The bank refinancing was completed in December 2013:

- The previous £500m three-year term loan (due to mature in January 2015) was replaced with a £400m five-year term loan (maturing in December 2018)
- The existing £1.5 billion Revolving Credit Facility was renegotiated and extended, pushing the maturity date out to December 2018.

As regards the additional debt capital market financing, the Group successfully issued a £300m 12-year Sterling bond in July 2014, increasing the total debt capital market issuance to £3.135 billion. This combined with revised bank facilities extends our average debt maturity to 6.65 years at 30 September 2014.

The Group aims to retain significant liquidity headroom - the policy being to ensure that it has sufficient committed financing facilities to provide for at least 12 months' projected growth plus 20%. This target was met throughout the year, with £1.45 billion of the Revolving Credit Facility remaining undrawn at the financial year end. The Group targets a ratio of Total Group Assets: Total Net Debt of not less than 1.25:1. At the Balance Sheet date this ratio was 1.79:1.

Treasury policy

Consistent with other aspects of our business activities, we have adopted a risk-averse approach to treasury management. We use derivative financial instruments (specifically interest rate swaps) to reduce our exposure to interest rate movements that affect the funding of existing leased assets. The Group also fully hedges the foreign currency risk consequent on its two fixed-rate Eurobonds using cross-currency interest rate swaps. The Group's overall interest rate risk management strategy is to convert all new issued foreign denominated debt into the Group's functional currency of Sterling.

We have established hedge accounting, and, under accounting rules, derivative financial instruments are 'marked to market' in accordance with IAS 39 - their value being shown on the face of the Balance Sheet. The resulting hedging reserve balance at 30 September 2014 represents a post-tax gain valued at £23.7m.

David Gilman
Finance Director

Operational review

Excellent service levels and a consistent proposition

Overview

As outlined in the 'Strategy in action and performance' section (pages 11-19) the year ended September 2014 saw the Group continue to deliver high levels of performance across a range of targets.

Customer measures in terms of choice, affordability and satisfaction were all exceeded throughout the period, with overall customer satisfaction continuing at 98%. Renewal rates continued to track at 92% and total customer numbers increased 1.5% to 645,816.

Customer awareness and advocacy of the Scheme

Recipients of the higher-rate mobility allowances are able to choose how best to use their allowance. One option is for them to use their allowance to lease a vehicle, powered wheelchair or scooter on the Motability Scheme. Better awareness and understanding of the key components of the Motability 'package' enable customers to make informed decisions on whether leasing a product on the Scheme provides the best option for them.

Our activity aims to increase this understanding through creating opportunities to talk to potential customers, and through ensuring that information about the Scheme is widely and readily accessible through a range of communication channels.

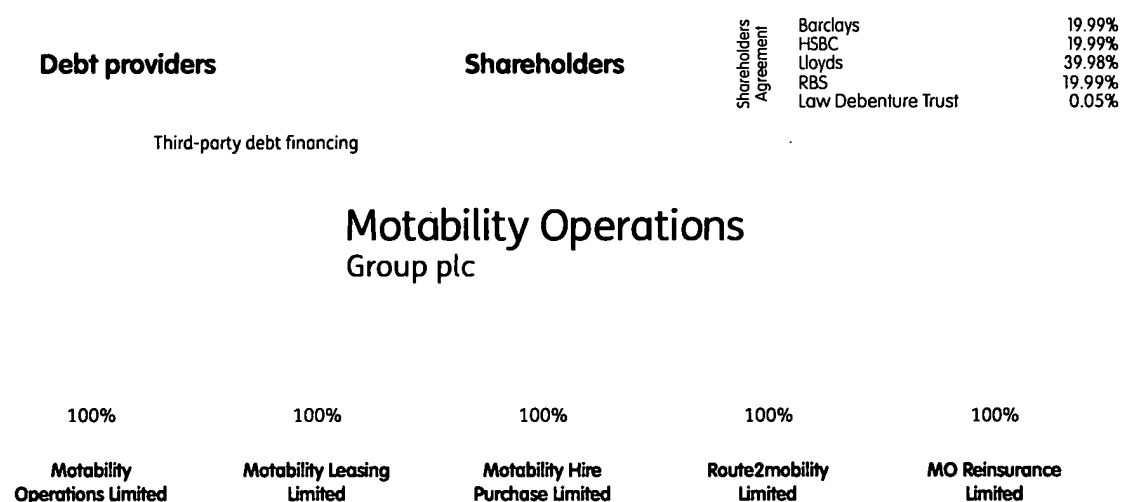

One of the most effective media for this communication is word of mouth. Our customers are our greatest ambassadors, and our research shows that 98% would recommend the Scheme.

In addition, a number of promotional programmes have enhanced customers' awareness, including our successful 'One Big Day' regional open days, which provide an opportunity for both existing and potential customers to see a range of cars, adaptations, scooters and wheelchairs, all in one accessible venue. These events continue to prove to be very popular, with over 21,000 people taking the opportunity to visit and find out more.

A measure of our success in building greater understanding is the growth in the number of new customers. During the year nearly 64,000 new customers chose to take a vehicle, powered wheelchair or scooter on the Scheme. This, combined with continued excellent renewal rates of 92% among existing customers (a product of high customer satisfaction and sustained affordability), has precipitated continued growth during the financial year.

Corporate structure

The diagram below sets out the Group's corporate structure

Government Welfare Reform changes

In 2013, the Government introduced a new benefit – Personal Independence Payment (PIP) – which will gradually replace Disability Living Allowance (DLA) for disabled people aged between 16 and 64.

From October 2013 to 2018, the Department for Work and Pensions (DWP) plans to reassess some two million disabled people, including around 360,000 who currently lease a Motability car. Recipients who qualify for the enhanced rate of the mobility component of PIP will be able to continue leasing a car as they do today. However, because PIP is a new benefit assessed using different criteria, it is expected that some people will lose their eligibility for the Motability Scheme. Other potential customers may qualify for the first time.

Transitional support

As a Scheme, we wish to support those customers losing eligibility. Many people may have been customers for a long time, and could not have expected a change in their eligibility for the Scheme to occur. Some, especially those with lifetime or indefinite awards, may have expected to remain permanently on the Scheme.

We have therefore worked closely with Lord Sterling and our colleagues at Motability to devise a package of support which is appropriate to customer needs, affordable and will not compromise the financial strength of the Scheme.

In September 2013 Motability announced the following support as available to customers when they leave the Car Scheme as a result of PIP reassessment:

Customers will be able to retain their cars for up to three weeks after their final DLA payment. The DWP has already announced they will allow DLA payments to continue for four weeks from their initial decision. This gives the customer up to seven weeks to find alternative solutions.

Customers who return their car to the dealership in good condition and within this timeframe will qualify for the following support from Motability:

- Customers who entered into their first lease agreement with the Scheme before January 2013 and therefore could not have been aware of PIP and the associated risks when they joined (the vast majority of customers), will be eligible for transitional support of £2,000. For many customers, this will enable them to continue to have mobility by purchasing a used car
- Customers who entered into their first lease agreement with the Scheme with an awareness of PIP being introduced and of the risk that they could lose eligibility following a future PIP reassessment, i.e. after January 2013 and up to December 2013, will be provided with £1,000 of transitional support

- Customers who have made an 'advance payment' (an additional upfront payment to lease a larger or more complex vehicle on the Scheme) will have their 'advance payment' refunded on a pro-rata basis. No further costs will be applied to customers whose leases end early as a result of a PIP reassessment
- To help departing customers plan their next step, we will provide general information on motoring, insurance and other services outside the Scheme. This will include information, for example, on buying a new or used car, and arranging insurance. We are working with a leading UK insurance broker who will offer insurance quotations to former Scheme customers that will recognise their no-claims history on the Scheme.

The Scheme will offer customers an opportunity to purchase their vehicle following the end of the lease. The payments that they would otherwise have received upon returning the vehicle can be directed towards the purchase price.

These levels of transitional support will be reviewed in 2015 to take account of economic conditions, and of any possible changes the Government may make to PIP at that time.

We will work with customers who have Wheelchair Accessible Vehicles on the Scheme on a case-by-case basis to understand and assist with their future mobility arrangements including, where appropriate, enabling them to retain their current vehicle. In a similar way, we will work with powered wheelchair and scooter customers to arrange that, wherever possible, these customers will be able to keep their current product.

We will refund the cost of any privately funded adaptations paid for by the customer. Where the Scheme car was adapted by Motability, we will arrange for similar adaptations to be fitted to the customer's new vehicle.

At Motability Operations, given the strong financial performance during the year, we were pleased to be in a position to make a £150m donation to Motability as part of our commitment to fund this transitional support package. This payment was made in September 2014.

As of September 2014, 614 Scheme customers have lost their entitlement to the higher-rate allowance following their PIP reassessment, and consequently have also lost their eligibility to continue leasing a product on the Motability Scheme. To date Motability has made 226 transitional support payments to customers who have returned their vehicles and have met the criteria set out above, with a further 313 potential payments in the pipeline pending vehicle hand-backs by the customers.

Operational review continued

Product offering

During the year, we consistently exceeded our targets on affordability and the choice of vehicles we offer to our customers on the Scheme. This is particularly pleasing given the pressures that the wider economic environment has placed on prices.

For the Car Scheme, we monitor our performance by referring to external benchmarks and to the number of cars we offer at 'nil advance payment'. This is where the allowance alone is sufficient to fund all leasing costs, with no additional contribution required from the customer. Where a customer selects a car that does require a supplement, we receive this as a single payment from the customer at the start of the lease (the 'advance payment'). We set out to ensure that at least 200 cars are available at nil advance payment, including a wide choice of automatics and green options. We have consistently met this target throughout the year. We also supply a range of affordable Wheelchair Accessible Vehicles (WAVs). Our prices are over 40% cheaper than our external benchmark, which references the cost of commercial contract hire quotations.

Product range and choice are important to both our existing and potential customers, and we compare the variety of vehicles and brands available on the Scheme with those available in the retail market. During the financial year, we offered vehicles from 31 manufacturers with over 2,000 vehicle derivatives on the price list. Our approach to the PWS Scheme is also to provide customers with a wide and representative choice.

We are pleased to offer this continued stability in pricing, which allows customers to make choices based on needs when selecting a car, powered wheelchair or scooter with minimal volatility between each price list.

Protecting the Scheme from abuse

Motability Operations does not play any role in deciding who is entitled to receive the higher-rate mobility allowances. However, if customers choose to use their allowance to lease a vehicle on the Motability Scheme we have a responsibility to ensure that the vehicle is used appropriately. It is a fundamental principle of the Motability Scheme that cars must be used for the benefit of disabled people. Motability Operations has taken steps to remind customers and business partners of their obligations in this respect. This includes asking all customers, drivers and car dealers to sign a Statement of Responsibilities at car handover to confirm they understand these terms of use. The introduction of these tightened guidelines is designed to ensure that Motability cars are used exclusively for the benefit of the disabled customer.

Like any organisation with more than 645,000 customers, there is a small minority of customers who may try to abuse the Scheme. We work with all stakeholders, including Motability, the DVLA, as well as the police, to ensure that effective procedures are in place to protect the Scheme, and to respond appropriately to allegations of Scheme misuse.

During the past year, we dealt with more than 10,500 allegations relating to fraud or abuse of the Scheme. These included cases of uninsured driving, unauthorised use of Scheme cars, drink-driving, and even criminal activity, many of which led to prosecution.

Around 3,500 cases resulted in enforcement action, including 1,550 customers who had their agreements terminated and their cars withdrawn. We now invest close to £1 million a year in Scheme protection activities both to safeguard the reputation of the Scheme, and to protect the proposition for our customers.

Other changes include some restrictions regarding the criteria for named drivers, who should generally live within five miles of the disabled customer, and a reduced selection of cars available to younger drivers. Exceptions are considered to address particular disability needs.

In situations where a customer's circumstances give rise to particular risk, such as where none of the drivers live at the customer's home, we have started to fit trackers into cars to create a record of customer journeys. In the event of a proposed agreement where the disabled person lived a long way from the named driver this would also trigger further investigation. Individual exceptions, such as arrangements for a daily carer, can be authorised if appropriate.

Customer experience

We focus on providing customers with a seamless, worry-free experience. Product choice and affordability are significant elements of this, but meeting our customers' needs is about much more.

We aim for excellent customer service, which, for us, clearly requires that we take particular steps to meet our customers' disability-related requirements.

We have used an independent research agency to conduct bi-annual customer surveys since 2003. These surveys cover all the key customer contact points on the Scheme. The latest results showed the continuation of excellent levels of overall customer satisfaction of 98%, indicating first-rate levels of customer service. The survey continues to provide valuable feedback on our customer proposition.

Our customer call centre plays a pivotal role in supporting our customers. The strong customer satisfaction results are in no small part attributable to the consistent service levels delivered by the call centre, which has now achieved more than seven years of answering 80% of calls within 20 seconds, with 88% of customer queries resolved during their first call.

Initiatives designed to support and enhance the customer experience include:

- Improvements made to customer communications and the website, creating a more welcoming impact, and more than doubling the information available
- Removal of Interactive Voice Recognition (IVR), to enable customers to reach a real person more quickly
- Availability of an online 'car search', which gives customers a user-friendly and readily navigable tool to find the vehicle that best meets their needs
- Building flexibility into our systems to ensure that 99.9% of customers take delivery of their new vehicle on the day they hand back their old one
- Providing a full range of adaptations and conversions as options at the point of vehicle selection.

Excellent service helps drive up renewal rates at the end of lease, and increases the likelihood of customers recommending the Scheme to someone else. In fact, 98% of customers say they would recommend Motability to friends or family.

Measurement of our disability expertise is inherently more subjective and difficult. However, we continue to place significant focus on ensuring that we meet this goal, both as a customer service organisation and in our role as an employer. Examples include:

- The use of a Specialised Mobility Team to support the delivery of the Powered Wheelchair & Scooter Scheme proposition
- Displaying vehicle accessibility information on our website
- The availability of targeted specialist publications including the Wheelchair Accessible Vehicle (WAV) Guide
- The Car Price Guide includes images of cars with accessibility considerations, an 'automatics' column and images to help customers visualise the types of cars available.

Fleet insurance arrangements

The Group's revised insurance arrangements commenced on 1 October 2013. Under the new arrangements RSA continue as insurer, but premium exposure is shared with Motability Operations via its reinsurance captive MO Reinsurance Ltd (MORL). MORL's net exposure is contained through a conservatively structured reinsurance programme (see the Risk Management report on page 30 for more detail).

RSA continue to provide policy and claims administration activities through its dedicated Motability unit in Liverpool, ensuring seamless continuity of service for customers.

The new insurance arrangements enable the continuation of excellent customer service and deliver significant additional benefits to the Scheme:

- Customer service: RSA has been the insurance supplier to the Scheme for many years and the new deal ensures continuity of our customers' 'worry-free' claims management experience. The new structure does not result in any visible change for our customers
- Financial: the financial model that underpins the new arrangements brings with it additional financial benefits, all of which are passed on to customers
- Supply risk: MORL is supported by a conservatively structured reinsurance programme that spreads insurance supply amongst a number of highly-rated organisations and, in so doing, diversifies risk and ensures stability of insurance provision into the future.

MO Reinsurance Ltd (MORL) – Overview

MORL is a wholly owned subsidiary of Motability Operations Group plc, which has been newly established for the sole purpose of reinsuring a proportion of the Company's fleet insurance exposure. In setting up MORL, adherence to core design principles has ensured that the structure is robust, sustainable, efficient and transparent.

As part of the implementation of these arrangements we engaged with Standard & Poor's and Moody's, who have both noted the changes and confirmed these to be 'ratings neutral' for the Group, with the reaffirmation of the Group's credit ratings (A+/A2 respectively) in their most recent credit opinions.

Standard & Poor's categorise MORL as a 'core' subsidiary under their Group Rating methodology – recognising that MORL is

integral to the Group's purpose and customer proposition, that the reinsurance programme has been structured to be well within the Group's risk appetite, and recognising also that MORL has been appropriately capitalised. Standard & Poor's has therefore assigned the Group's A+ rating to MORL.

MORL is domiciled in the Isle of Man (IOM), because it is not possible to operate the preferred structure efficiently on the UK mainland. The IOM provides the most appropriate 'near shore' option:

- The IOM is a centre of excellence for reinsurance captives and regulates similar vehicles for a number of large UK and multinational companies
- The IOM's regulatory regime appropriately services the requirements of a business-to-business reinsurance structures, reflecting the new relationship between MORL and RSA
- From a tax perspective, the structure ensures that any profits realised in the IOM through MORL are allocated to Motability Operations Group plc and charged to tax in the UK. This is achieved under the UK Controlled Foreign Company (CFC) rules. These rules, contained in sections 371AA to 371VJ of Taxation (International and Other Provisions) Act 2010, impose a charge to tax on a parent company of the profits of non-resident subsidiary companies in certain prescribed circumstances
- The Group has obtained a letter of non-statutory clearance from HMRC agreeing this principle, and confirming that all profits of MORL are chargeable to tax in the UK, and that it does not benefit from a lower level of taxation than would be incurred if the captive were based in the UK.

After a year of operation, approximately one third of the fleet (over 229,000 vehicles) is insured under the new arrangements (as new and renewing leases come on cover). The new structure has been integrated seamlessly, with new expertise, processes and data flows all successfully embedded into the business. It is pleasing also to confirm the successful renewal of MORL's reinsurance arrangements, thereby limiting the Group's potential financial exposure. Detail of the reinsurance structure is elaborated within the Risk Management section on page 30. Financial performance is in line with expectations as outlined in the Finance Director's review on page 22.

Operational review continued

Our suppliers

By developing strategic relationships with all leading car manufacturers, we have achieved 96% brand availability based on market share, with 31 manufacturers currently on the Scheme. This now provides our customers with access to 2,000 vehicle derivatives, delivered through a network of over 4,800 car dealerships. During the year we accounted for over 10% of UK car registrations.

As a consequence we provide a significant and stable route to market for the manufacturers. We regard our partnership with them as extremely valuable to the Scheme.

While we take responsibility for the overall customer experience, 18,000 trained Motability specialists employed by the car and PWS dealerships conduct the primary face-to-face relationship with the customer. We introduced the Motability Dealer Partnership (MDP) programme in 2004 to ensure that customers receive a consistently high level of service in the car dealerships. This is designed to influence dealer behaviour and performance in every key element of the leasing process (supply, service and after sales) with a particular emphasis on customer service. The MDP programme has, through targeted investment, delivered improvements that have led to a better customer experience at car dealerships.

Throughout the year, dealers continued to work closely with us to improve awareness and understanding of the Scheme, and provide a warm welcome for Motability Scheme customers.

Alongside dealers, a number of other key partners deliver services to our customers. These include insurance, roadside assistance and tyre replacement companies, which have to re-tender systematically for the contracts to provide these services. This process helps us leverage our purchasing power and ensures that our commercial terms are in line with the market.

While cost control is critical, we take careful steps to make sure that this does not affect the quality of service provided. We work closely with our service providers to ensure that they maintain our required standards, and routinely carry out supplier reviews to monitor performance against key performance indicators, ensuring that suppliers implement action plans where necessary. We include insurance, roadside assistance and tyre replacement services on our Customer Satisfaction Index, enabling us to benchmark and align the performance of every provider.

Remarketing

At the end of contract, we sell our returning fleet into the used market. During the financial year ended September 2014, we sold over 223,000 cars to the used trade. We have developed an innovative multi-channel disposal strategy to manage these volumes. This is centred on a market-leading online process which is augmented by a proactive auction programme. Our online sales channel, 'mflirect', is available to certified trade subscribers, through which they may buy vehicles online 24 hours a day, seven days a week. This route to market has a number of advantages over physical channels including its lower cost, and it allows a more targeted approach. This system platform was upgraded during 2011 to ensure its future capability and scalability.

Our end-of-contract processes enable us to sell a car online before it is returned at the end of lease. While we target this marketing across all our registered buyers, it provides a particular opportunity for the franchised dealers who originally supplied and then maintained the

vehicle. It means that they can buy a low mileage, fully serviced vehicle that they know first-hand, and which, through our end-of-contract process, will most likely be returned to their forecourt at the end of lease. This opportunity has been promoted to the dealers through the 'Get Your Own Back' marketing campaign.

'mflirect' provides a competitive purchasing environment and ensures that we both maximise our sales return and minimise disposal costs. Online sales accounted for over 71% of all disposals during 2014. Cars that do not sell online are usually routed to auction and sold at one of our branded events. We have progressively routed more of our early-terminating stock via the online channel, with an 13% increase in volumes over the last two years.

Through the versatility of our remarketing strategies, the proactive management of stock, and an increased buyer base, the remarketing team has delivered an excellent performance in 2014, contributing to a £128.5m gain recognised across aggregate sales.

Environment

We know that our customers are keen to look for greener choices. However, given their limited mobility, public transport is, for them, rarely a viable option. We therefore aim to ensure that a range of lower emitting, higher MPG vehicle choices is available (which in turn are more cost effective for our customers). We continue to take a proactive approach to managing our CO₂ emissions agenda with a number of initiatives that provide information and choice for our customers. These include:

- Introducing alternative vehicles with lower CO₂ emissions, including hybrids, combined fuel and new technology products
- Making attractive, low CO₂ cars available in all vehicle categories on the Scheme (the price list highlights at least two low CO₂ vehicles in each vehicle category)
- Featuring green choices (low CO₂ vehicles) in all our promotional mailings
- Providing practical advice to help lower motoring costs and CO₂ emissions in our customer publications, our annual customer newsletters and through our website.

Our approach to meeting our environmental responsibilities also extends to the management of our internal infrastructure. In terms of premises, we run a continuing programme of capital investment to ensure that our plant and equipment remain energy efficient and we actively aim to recycle an increasing proportion of our waste. We recently refurbished our premises to ensure that our buildings are exemplary from a disability accessibility perspective and also meet the highest environmental standards. The Bristol phase of this refurbishment was assigned a 'Ska Gold Accreditation' based on an assessment of the approach to energy and CO₂ emissions, waste, water, materials, pollution, wellbeing and transport.

We encourage employees to minimise their environmental footprint through use of video-conferencing facilities, promoting lift-share arrangements and our membership of the Government's Cycle to Work Scheme.

A dynamic and robust approach

Through our comprehensive risk management processes we identify and assess the potential risks that we face. Having understood the nature of these risks, we ensure that we have effective mitigants in place to reduce these exposures

At Motability Operations, we recognise that sound risk management is fundamental to the successful and sustainable operation of the business. It is a core commitment that our approach protects the interests of customers and seeks to ensure that risks are managed sufficiently to avoid pricing shocks through the extremes of the economic cycle.

Our approach to risk management is both dynamic and robust, aiming to ensure that we identify, quantify and manage all material risks. Our Risk Policy, which is enshrined within our governance framework, is overseen and managed by our Risk Management Committee.

Our risk processes were further improved this year, with a strengthened risk function, including the appointment of a Board Director with specific responsibilities for risk.

We make certain that, through this policy and approach, our activities meet standards of behaviour and fall within boundaries that are consistent with our approved level of appetite for risk.

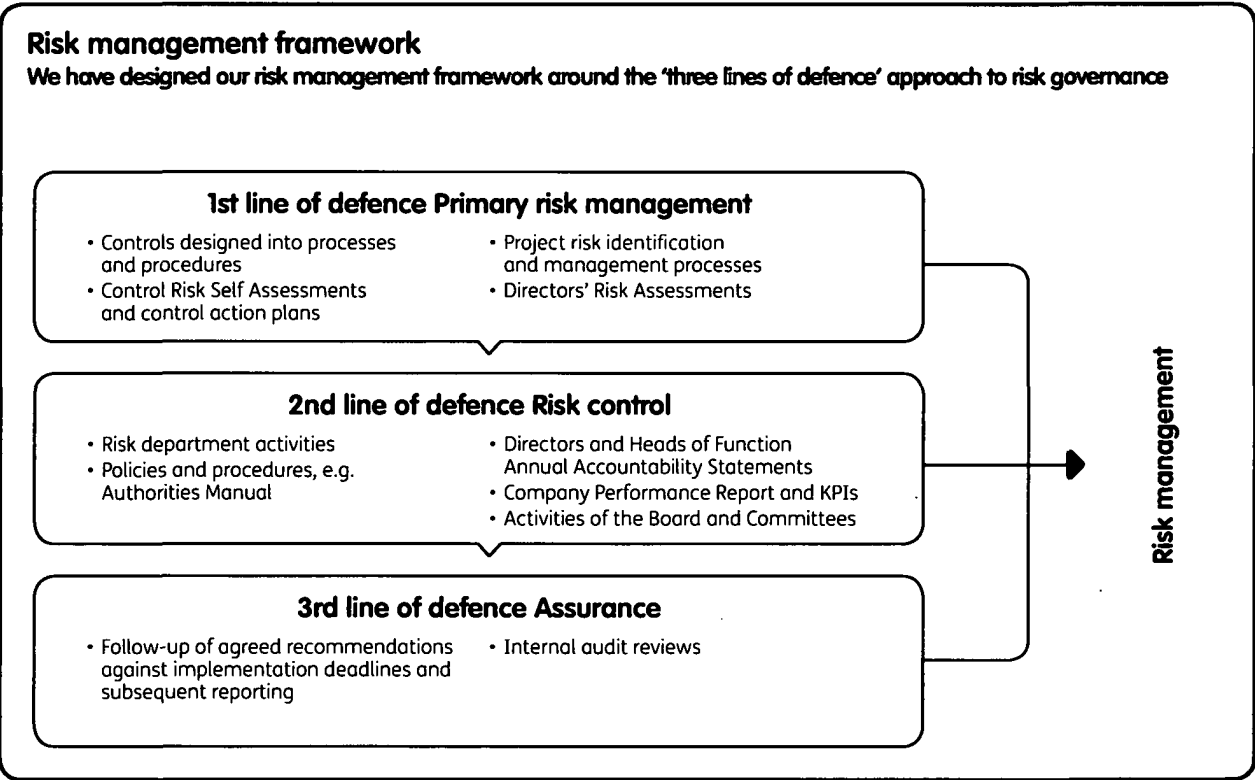

We use Economic Capital principles to determine and manage our reserves position.

Risk identification and monitoring

We have designed our risk management framework around the ‘three lines of defence’ approach to risk governance. Consistent with this approach, we have a dedicated risk management function that is integral to co-ordinating, monitoring and advising on control activities.

This holistic approach encompasses all material risks, with clearly identified accountabilities and responsibilities for risk management, control and assurance. As such, risk management is incorporated as a core part of effective business planning and capital management.

We regularly update our risk management framework to ensure that it remains appropriate to the business. These updates include regular assessments of risks and controls, including the update of risk registers, and early identification of any emerging risks to the achievement of our stated objectives.

Risk management continued

Key risks and mitigations

Residual values

The most significant risk we face is the exposure to unforeseen and material movement in the market value of second-hand vehicles. This is measured as the difference between the forecast values used for pricing and the latest projected market value at the end of lease.

Through our team of experts, we have developed and implemented an in-house residual value forecasting model to help manage this risk. This combines the latest econometric modelling techniques with subjective feedback gathered from used car buyers and market experts. We developed the model in consultation with Oxford Economic Forecasting, which has validated and endorsed our approach. The model is periodically re-calibrated and validated, the most recent independent review being completed during the year ended September 2012. Since it was first implemented in October 2004, our in-house model has outperformed the alternative market benchmarks. We also undertake a quarterly re-forecasting exercise to review and monitor the actual position and assess the associated financial impacts of any movement in residual values.

There is, in addition, an associated risk of differences arising between the benchmark market value and the net proceeds we are able to realise on disposal. This gap can be affected by the effectiveness of our remarketing performance, by vehicle mix, concentration and condition.

We manage this disposal performance risk through the effectiveness of our remarketing activity, through our streamlined logistics operation and through our commercial sales force. Our proactive portfolio management has reduced concentration risk in recent years, with a broad spread of models and manufacturers now represented in our diversified fleet.

Supplier failure

Our core product offering is delivered through contracts with key suppliers who provide vehicle insurance, roadside assistance, and tyre and windscreen replacement services. The failure of a key supplier would create difficulty for customers and potentially have significant financial implications as we seek alternative service providers. We manage this risk primarily through ongoing liaison and maintenance of strong relationships with our key suppliers. We also routinely assess their creditworthiness.

We have specifically assessed the risk of failure of one or more of our key manufacturers. Such a failure would probably lead to impaired residual values, invalid warranties, non-availability of parts and maintenance providers, and the potential withdrawal or renegotiation of discounts. We seek to manage this risk through routinely monitoring manufacturer-related news and by diversifying our portfolio to minimise our exposure to the default of any one manufacturer. We have also developed scenarios to stress-test our durability in the face of such a failure, and are confident that our Economic Capital approach means that we have assigned sufficient risk capital to withstand such an event.

Credit risk

Our rental income is received from the DWP, through the allowances assigned to us by our customers, hence the credit risk is considered to be very low. Where the total cost of the lease exceeds the value of the customers' allowance, then the customer is required to make an upfront balancing payment – the 'advance payment' – prior to taking possession of the vehicle.

As regards the revenue which is derived from the re-sale of vehicles that are returned to us at the end of lease, we proactively manage this credit risk. To this end, we regularly carry out credit assessments of the limits set for auction houses, manufacturers and dealers and receive exception reports from monitoring agencies. Exposure to dealer debt is largely mitigated through the 'zero-day' direct debit collection process, with the cash collection being triggered at the point the sale is transacted (and before title is passed).

Treasury risk

The availability of sustainable funding and liquidity is critical to our ongoing operation. This has been brought into sharpened focus since the 'credit crunch' with scarcity of competitive funding affecting many businesses. Risks include those associated with exposure to interest and exchange rate movements, liquidity, funding, counterparty and operational risk.

We manage these risks through a well-defined Treasury Policy, the operation of which is overseen by the Asset and Liability Management Committee – a sub-committee of the Executive Committee. We maintain a risk-averse stance and continue to develop a diversified portfolio of funding maturities, seeking to lock the majority of funding onto fixed rates. Our policy is also to avoid exotic treasury products. Through our robust financial management and governance we seek to maintain a credit rating that allows us access to a range of debt markets on competitive terms. It is our policy to ensure that we maintain sufficient financing facilities to cater for projected growth over the next 12 months, plus 20% headroom.

Insurance risk

Prior to the introduction of Motability Operations' revised insurance arrangements on 1 October 2013, we undertook a forensic assessment of the impact that this would have on the Group's risk exposure.

An overarching design principle guiding the implementation of the new insurance structure is to ensure that the Group's risk exposure is conservatively managed. Under the new insurance arrangements, whilst the Group now participates in a proportion of premium exposure (insurance risk) via its reinsurance captive MORL, our net exposure is contained through the placement of a conservatively structured reinsurance programme.

This reinsurance cover was successfully renewed ahead of 1 October 2014, and continues to be placed with a panel of 16 highly-rated (at least A rated and predominantly AA rated) reinsurers, thereby diversifying the Group's exposure to any single supplier.

Quota share reinsurance has been purchased to protect Motability Operations against any individual losses exceeding £25,000 (each and every claim). Excess of loss reinsurance protects the Group and RSA against individual losses exceeding £5m (each and every claim). In respect of the layer of risk below £25,000, MORL has purchased Stop Loss reinsurance to protect the Group from exposure to adverse frequency risk, i.e. high volumes of relatively low-value individual claims.

The net exposure retained by the Group is therefore contained both in terms of severity and frequency. In accordance with Motability Operations' established Economic Capital approach to capital management, we have ensured that we hold sufficient capital, at the 99.99% confidence level, to cover this net risk.

There are additional mitigations in place which ensure that the Group is well equipped to manage this retained tranche of risk, including the recruitment and retention of extensive expertise to ensure that we have the requisite knowledge and management information to inform our pricing, reserving and risk analysis activities:

- Three independent Non-Executive Directors with extensive insurance and reinsurance expertise have been appointed to MORL's Board
- MORL has outsourced the day-to-day operation of MORL to an experienced captive management company
- External actuarial resource has been retained to support Motability Operations' pricing and reserving processes
- Motability Operations has also recruited an in-house actuary to enhance internal expertise in this area.

Capital adequacy and economic capital

Whilst the group is not regulated for capital purposes, our approach to Balance Sheet management aligns with best-practice, with the overarching objective being to ensure that we have the financial resilience to withstand economic turbulence without compromising the customer offering. The Group holds capital in the form of 'restricted reserves' to provide the necessary financial shock-absorber to ensure sustainability into the long term. This capital is retained exclusively for the benefit of the Scheme – with ordinary shareholders having no entitlement to dividends.

The Group uses Economic Capital (EC) principles to determine the appropriate level of capital. The EC process involves undertaking a comprehensive assessment of the material risks and evaluated potential impacts the Group faces given its core activities. The key risks are outlined in the table on page 32.

This enables us to calculate our Minimum Capital Requirement (MCR), using a model to aggregate potential losses at the required confidence level and determine a 'per vehicle' requirement. The EC methodology we use is conservative, and encompasses all material risks, delivering an outcome that management views as reasonable and prudent.

We then apply the estimated MCR per vehicle to our current and projected contract hire fleet size. This gives us an overall current and projected MCR for the full contract hire fleet.

The capital implications of the revised insurance arrangements have been subject to particular review and scrutiny. As a design principle, the structuring and implementation of the revised insurance arrangements have been configured to ensure that the net risk imported into the Group sits well within our risk appetite, and that we hold sufficient capital to underpin these arrangements. Under the revised insurance structure the net risk retained by the Group is limited through a conservatively placed reinsurance programme. Our Economic Capital model has been adjusted to reflect the net risk – and consequently, as the fleet migrates onto the new insurance arrangements, the calculated Minimum Capital Requirement (MCR) at a Group level has increased year-on-year.

In order to ensure that our capital planning adequately reflects the current risk profile of the business, we undertake an annual review of our Economic Capital methodology and the key underlying assumptions. Focus is also given to new or emerging Company-specific or wider environmental factors which are considered to have a bearing on the Group's capital requirements.

An independent review of the Group's Economic Capital methodology was commissioned last year, with feedback confirming our approach to be proportionate and appropriately conservative given the Group's overarching objective to ensure long-term sustainability. Therefore this review did not lead to any changes to the Group's underpinning EC calculations.

However, the review noted that the way in which the wider market is applying EC methodology as a tool for capital management is evolving, with current approaches to capital management being more flexible and fluid, with prudent management overlays, over and above the calculated EC requirement, now becoming the norm. The Group has therefore revised its capital management policy accordingly, with capital being targeted to remain at such a level that the Scheme could withstand at least a 'normalised' market shock without capital being eroded below the calculated MCR.

In order to simulate a 'normalised' market shock, the Group runs a comprehensive range of stress-test scenarios to validate the MCR and targeted capital position. By running a series of hypothetical market-specific and wider economic extreme stress scenarios, we can objectively scrutinise the efficacy of the Group's capital base. At financial year end the Group's closing capital position was 17% above the MCR.

Summary of our key risks and mitigations

Residual values

Unexpected movements in used-car values, failure to achieve market value on disposal

Potential impact	Mitigation	Relevance to strategy
<ul style="list-style-type: none"> Volatility in profitability, reserves and pricing. Potential impact on affordability and choice 	<ul style="list-style-type: none"> Sophisticated in-house residual value setting and forecasting process Risk Capital management for asset risk using Economic Capital principles Market-leading remarketing approach 	<ul style="list-style-type: none"> The setting of residual values is one of our core competencies. Our strategic approach ensures that we invest appropriately to maintain a market-leading capability (in terms of people, methodology and technology)

Supplier failure

Failure of key manufacturer or other key Scheme supplier

Potential impact	Mitigation	Relevance to strategy
<ul style="list-style-type: none"> Compromised customer service provision and potential financial impact of securing alternative supplier In case of manufacturer failure, likely impairment of residual values and threatened availability of parts and warranties 	<ul style="list-style-type: none"> Active monitoring of credit ratings and market announcements Strong supplier relationships and communication Diversification of supply Diversified portfolio 	<ul style="list-style-type: none"> Through our annual strategic review we assess the performance and stability of all main Scheme suppliers, including contingency planning in the event that a major failure occurs

Credit

Risk of default of key income streams and exposure to bad debt

Potential impact	Mitigation	Relevance to strategy
<ul style="list-style-type: none"> Potential impact on cash inflows and consequent write-off to Income Statement 	<ul style="list-style-type: none"> Principal income stream received directly from DWP – therefore minimal credit risk Residual credit risks are managed through credit assessments and an effective credit control function 	<ul style="list-style-type: none"> The assignment of customers' allowances directly to the Group is a fundamental strategic underpinning of the effective and efficient operation of the Scheme

Treasury

Exposure to interest or exchange rate movements, liquidity, funding, counterparty and operational risk

Potential impact	Mitigation	Relevance to strategy
<ul style="list-style-type: none"> Potential impacts include volatility in funding costs, with knock-on effects on lease pricing, and lack of availability of growth funding 	<ul style="list-style-type: none"> Majority of funding on fixed rates or fixed through interest rate and/or foreign currency swaps Balanced portfolio of funding maturities and diversification into bond market Maintenance of strong credit rating Good treasury system, controls and governance 	<ul style="list-style-type: none"> The strategic pillar of ensuring long-term sustainability guides our approach to determining treasury policy, which is designed to be 'vanilla' and risk averse

Operational

Risk of failure of key systems, controls or processes

Potential impact	Mitigation	Relevance to strategy
<ul style="list-style-type: none"> Potential financial and reputational risk Risk of business disruption 	<ul style="list-style-type: none"> Robust control environment Active monitoring of Business Continuity and Disaster Recovery plans 	<ul style="list-style-type: none"> We ensure that we make appropriate strategic investments in our infrastructure, systems and processes

Insurance

Exposure to insurance claims that exceed expectations or supplier failure

Potential impact	Mitigation	Relevance to strategy
<ul style="list-style-type: none"> Financial impact of claims exceeding priced expectations Failure of a reinsurer could transfer risk back to Motability Operations 	<ul style="list-style-type: none"> Conservatively placed reinsurance programme effectively limits the Group's net risk Risk Capital in place to cover net risk Access to extensive expertise Diversification of supply across highly-rated reinsurers 	<ul style="list-style-type: none"> Our revised insurance arrangement has been carefully designed to ensure that the structure delivers value for customers and is sustainable into the long term

Our people are fundamental to our success

In order to deliver excellent performance, we need to recruit and retain talented individuals with the right skills and experience

Business culture

We promote a positive business culture aligned to our core values and principles, described below.

We believe that our business culture provides a foundation for success. For this reason, we are committed to carrying out independent culture benchmarking through an annual employee survey conducted by a global employee research and consulting firm. The results are shared with employees through roadshows hosted by the Chief Executive, with key themes identified and actions being agreed to address any issues that emerge. Results are compared against a benchmark of high-performing organisations. In the last six years, our results have significantly outperformed the 'high-performing' norm.

Motability Operations is an equal opportunities employer. It embraces diversity, which it believes is fundamental to attracting and retaining the most talented people and making the organisation more effective in providing an exceptional service to its customers. The Company has a diversity policy where diversity is defined as including disability, race, sexual orientation, gender, ethnicity, culture, religion, age, nationality, education and experience.

Our approach to recruiting, developing, managing and rewarding performance, as well as employee communication and our working environment, is described over the following two pages.

Our values

We strive for excellence in customer service

- Our customers are our first and major focus
- We take ownership
- We are disability-confident

We are passionate about what we do

- We understand the aims and objectives of our business
- We set high standards and go the extra mile
- We trust and respect others and value differences

We have a high-performance culture

- We strive for the highest standards
- We recognise and reward strong performance and success
- We are resilient and professional

We think and act commercially

- We have sound business judgement
- We manage our business for the long term
- We understand the impact of our decisions

We are friendly, flexible and facilitating

- We act honestly and with integrity
- We have a 'can do' and solution-based approach
- We work together and communicate openly

Principles

We have defined a number of positioning principles that underpin our business strategy. We use these alongside our values as reference points in conducting our day-to-day interactions with customers, employees and other stakeholders. Our positioning principles ensure that we:

- Compete on value and customer and disability expertise
- Provide specialist support to remove barriers where appropriate
- Have excellent plc practices and governance
- Work closely with Motability
- Maintain excellent relations with stakeholders
- Are recognised as an outstanding and responsible employer
- Are non-political and transparent
- Ensure that our financial position is capable of sustaining the Scheme into the future
- Provide value for stakeholders
- Are recognised and respected in the community
- Maintain a forward-looking green policy, balancing needs with emissions.

Recruitment and induction

Critical to our success is the ability to recruit employees who will deliver excellence in their role and be aligned to our values.

Our leaders know how important it is to make the right recruitment decisions and provide new employees with a thorough induction to the organisation.

All new employees attend a formal introduction to the Company which describes the business strategy and culture. They will also attend a 'Disability Confidence' workshop during the first six months of employment.

We run a structured Graduate Programme which seeks to attract and retain a number of high-calibre graduates each year from a range of academic disciplines. This involves an intensive 18-month programme that includes rotations in a number of areas of the business. After this period, we expect graduates to move into key line management or specialist roles. Last year, we introduced an internship programme for our Business Systems division.

Employment of disabled people

We are committed to employing and retaining the best person for the job, whoever that person may be. Our policy is to ensure that disabled people receive equal and fair consideration in recruitment, training and career development. Support and adjustments are provided to ensure that the needs of employees who are, or become,

People and principles continued

disabled are met. The Company ensures that its policies and practices are not barriers to disabled people. We are 'Gold Card' members of the Business Disability Forum. We are accredited by Jobcentre Plus to use the Disability 'two ticks' symbol ('positive about disabled people'). We have an internal disability networking group which is sponsored by the HR Director. During the year, we ran a series of training workshops focused on the recruitment and development of employees with disabilities, including mental health.

We run a Scholarship Programme aimed at supporting disabled students during their academic studies and providing work experience during the summer months.

Performance management and assessment

Critical to the success of the overall Company is the ability of each employee to deliver excellence and have a clear 'line of sight' to our customers. Individuals' objectives are directly aligned to the business' goals and targets and are reviewed on a regular basis. The performance management framework is consistent across the whole business.

All employees are assessed on the basis of their results and behaviours, each carrying equal weight. As part of the performance management process, all leaders are assessed using 360-degree feedback. Company performance is communicated to employees regularly during the year through team meetings, roadshows and the intranet.

Reward

Our remuneration is regularly reviewed against the market to ensure that it is fair and competitive. We are fully committed to paying our people at least at the level of the current Living Wage for their base location.

Performance-related pay is discretionary and is dependent on Company and individual performance. Further details of our remuneration policy can be found on pages 44-48.

Training, development and succession planning

Individuals' development is supported through a number of mechanisms including formal training, involvement in specific initiatives or projects, or through secondments to other parts of the business. Mentoring and coaching also form an important part of employees' development.

While regretted attrition levels are low, we manage the risk of losing key individuals through regular talent reviews and succession planning. High-potential employees are identified and plans designed to develop them. Our Nomination Committee reviews the succession plans for Directors and senior managers and takes an active interest in the different programmes run by the business, including the Graduate, Scholarship and Internship schemes.

Employee communication

Leaders are responsible for ensuring that their teams have regular face-to-face communication to discuss the Company's objectives and performance as well as their own department's priorities. They hold regular team briefings and 'one-to-one' meetings.

Twice a year, the Chief Executive runs a series of roadshows across the whole business, covering topics such as Company performance, results of the culture survey and an update on strategic initiatives. Divisional directors and Heads of Function also run regular briefings for their teams.

Other employee communication includes regular newsletters, employee consultation forums and use of our corporate intranet.

Working environment

We believe that the quality of our working environment has a major impact on employee engagement and contribution. We have recently completed a programme of refurbishment of our offices to create a productive workspace with excellent disability and environment credentials.

Our people are fundamental to our success and we are committed to recruiting and retaining an engaged and motivated workforce.

Our Board

Membership of the Board comprises a Non-Executive Chairman, five Executive Directors, six Independent Non-Executive Directors and four Non-Executive Directors. The Directors of the Company who were in office during the year and up to the date of signing the financial statements were:

Neil Johnson OBE

Non-Executive Chairman

Neil was appointed Chairman of Motability Operations in 2001. He was appointed as Non-Executive Chairman of Motability Operations Group plc on 20 March 2008.

Executive Directors

Mike Betts

Chief Executive

Mike joined the Motability Operations Board in 2002 and was appointed to the position of Chief Executive Officer in September 2003. He was appointed as Chief Executive Officer of Motability Operations Group plc on 20 March 2008.

Anne Downey

HR Director

Anne joined Motability Operations in 1997, and was appointed to the Board in 2004. She was appointed as an Executive Director of Motability Operations Group plc on 17 September 2008.

David Gilman

Finance Director

David joined the Motability Operations Board in 2003 as Finance Director. He was appointed as an Executive Director of Motability Operations Group plc on 30 June 2008.

Ian Goswell

Commercial Director

Ian joined the Motability Operations Board as Commercial Services Director in 2004. In 2014 he was appointed Commercial Director. He was appointed as an Executive Director of Motability Operations Group plc on 17 September 2008.

Ashley Sylvester

Risk & Business Systems Director

Ashley joined the Motability Operations Board in 2004 as Asset and Pricing Director. In 2014 he was appointed Risk & Business Systems Director. He was appointed as an Executive Director of Motability Operations Group plc on 17 September 2008.

Non-Executive Directors

Christopher Lendrum CBE

Senior Independent Director

Christopher was appointed as an Independent Non-Executive Director of Motability Operations Group plc on 10 June 2009. Christopher was subsequently appointed as the Senior Independent Director on 10 September 2014.

John Callender

Independent Non-Executive Director

John has been a Non-Executive Director of Motability Operations since 1993. He was appointed as an Independent Non-Executive Director of Motability Operations Group plc on 30 June 2008.

Nigel Clibbens

Non-Executive Director

Nigel has been a Non-Executive Director of Motability Operations since 2002. He was appointed as a Non-Executive Director of Motability Operations Group plc on 30 June 2008 (alternate – Peter Lord, appointed 17 September 2008).

Anna Cross

Non-Executive Director

Anna was initially appointed as Mark Parsons' alternate on 3 March 2014 following Duncan Rowberry's resignation on 23 December 2013. Anna subsequently replaced Mark Parsons as a Non-Executive Director of Motability Operations Group plc following his resignation on 31 May 2014.

Frank Gardner OBE

Independent Non-Executive Director

Frank was appointed as an Independent Non-Executive Director of Motability Operations Group plc on 10 December 2008.

Joe Hennessy OBE

Independent Non-Executive Director

Joe has been an Independent Non-Executive Director of Motability Operations since 2006. He was appointed as an Independent Non-Executive Director of Motability Operations Group plc on 30 June 2008.

David Oldfield

Non-Executive Director

David was appointed as a Non-Executive Director of Motability Operations Group plc on 14 September 2011 (alternate – Mark Stokes, resigned 30 June 2014 and Jakob Pfaudler appointed 1 August 2014).

Mike Russell-Brown

Non-Executive Director

Mike has been a Non-Executive Director of Motability Operations since 2006. He was appointed as a Non-Executive Director of Motability Operations Group plc on 30 June 2008 (alternate – Martin Lord, appointed 1 November 2012).

David Smith

Independent Non-Executive Director

David was appointed as an Independent Non-Executive Director of Motability Operations Group plc on 1 July 2010.

Neill Thomas

Independent Non-Executive Director

Neill was appointed as an Independent Non-Executive Director of Motability Operations Group plc on 1 September 2014.

Jo Pentland

Company Secretary

Jo joined Motability Operations in 2003 and as a qualified Chartered Secretary was appointed to the role of Company Secretary in 2005. She was appointed as Company Secretary of Motability Operations Group plc on 20 March 2008.

Other statutory information

Corporate Social Responsibility

Motability Operations actively embraces its Corporate Social Responsibility obligations. This manifests in a number of ways, including:

- Through the Scheme's core objectives, we help customers to gain independence and lead fuller lives through affordable, worry-free mobility
- We offer our facilities to various disability organisations and local associations
- We have an environmental policy which is reviewed through the Health & Safety Committee and Risk Management Committee. Motability Operations is also registered with the Carbon Trust
- Our HR policies allow for flexible working, including staggered and reduced working hours
- We operate a scholarship programme which is designed to provide financial support and work experience (through summer placements) for a number of disabled students each year.

Other environmental, social and governance policies

In addition to those set out above, MO also has the following policies in place:

- Fraud & Bribery Prevention Policy
- Employee Information Security Policy
- Health & Safety Policy
- Insider Trading & Information Policy
- Whistle-blowing Policy
- People Policy (including policies on Bullying & Harassment; Disability Confidence; Diversity & Grievances)
- Treating Customers Fairly Policy.

These policies are made accessible to all employees via the Company's intranet, and form part of the induction pack for all new starters.

Charitable and political donations

During the year the Company made charitable donations of £76,746 (2013: £51,398) to support and sponsor local initiatives through our 'mycommunity' programme. In addition, the Group made a £150m charitable donation to Motability as part of our commitment to support the PIP transitional support package. (2013: £50m donation to the Motability Tenth Anniversary Trust).

Our policy is to be non-political and, consistent with this, we have not made any political donations.

Proposed dividend

In accordance with the shareholders' agreement, the ordinary shareholding carries no rights to income.

Directors' indemnity

As permitted by the Articles of Association, the Directors have the benefit of an indemnity which is a qualifying third-party indemnity provision as defined by Section 234 of the Companies Act 2006. The indemnity was in force throughout the last financial year and is currently in force. The Company also purchased and maintained throughout the financial year Directors' and Officers' liability insurance.

Statement of Directors' responsibilities

Statement of Directors' responsibilities

The Directors are responsible for preparing the Annual Report and the financial statements in accordance with applicable law and regulations. Company law requires the Directors to prepare financial statements for each financial year. Under that law the Directors have prepared the Group and Parent Company financial statements in accordance with International Financial Reporting Standards (IFRSs) as adopted by the European Union. Under company law the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Group and the Parent Company and of the surplus or loss of the Group for that period.

In preparing these financial statements the Directors are required to:

- Select suitable accounting policies and apply them consistently
- Make judgements that are prudent and reasonable
- State whether applicable IFRSs as adopted by the European Union have been followed
- Prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Group will continue in business.

The Directors confirm that they have complied with the above requirements in preparing the financial statements. The Directors are responsible for keeping proper accounting records that disclose with reasonable accuracy at any time the financial position of the Group and to enable them to ensure that the financial statements comply with the Companies Act. They are also responsible for safeguarding the assets of the Group and for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Each of the persons who is a Director at the date of approval of this report confirms that:

- Insofar as the Director is aware, there is no relevant audit information of which the Company's auditors are unaware
- The Director has taken all the steps that he/she ought to have taken as a director in order to make himself/herself aware of any relevant audit information and to establish that the Company's auditors are aware of that information.

This confirmation is given and should be interpreted in accordance with the provisions of s418 of the Companies Act 2006.

Each of the Directors, whose names and functions are listed on page 35, confirm that, to the best of their knowledge:

- The Group financial statements, which have been prepared in accordance with IFRSs as adopted by the European Union, give a true and fair view of the assets, liabilities, financial position and surplus of the Group
- The Strategic Report includes a fair review of the development and performance of the business and the position of the Group, together with a description of the principal risks and uncertainties that it faces.

Going concern

The Directors are satisfied that the Group has adequate resources to continue in operational existence for the foreseeable future, and for this reason the financial statements continue to be prepared on the going concern basis.

Independent Auditors

The auditors, PricewaterhouseCoopers LLP (PwC), have indicated their willingness to continue in office and a resolution to reappoint them will be proposed at the Annual General Meeting.

Directors

Neil Johnson, Mike Betts, John Callender, Nigel Clibbens, Anne Downey, Frank Gardner, David Gilman, Ian Goswell, Joe Hennessy, Christopher Lendrum, David Oldfield, Mike Russell-Brown, David Smith and Ashley Sylvester served as Directors throughout the year.

Martin Lord and Peter Lord served as alternate Directors throughout the year.

Duncan Rowberry resigned as an alternate Director on 23 December 2013.

Mark Parsons resigned as a Non-Executive Director on 31 May 2014.

Anna Cross was initially appointed as Mark Parsons' alternate on 3 March 2014 following Duncan Rowberry's resignation on 23 December 2013. Anna then subsequently replaced Mark Parsons as a Non-Executive Director of Motability Operations Group plc following his resignation on 31 May 2014.

Jakob Pfaudler was appointed as David Oldfield's alternate as of 1 August 2014 following the resignation of Martin Stokes on 30 June 2014.

Neill Thomas was appointed as an Independent Non-Executive Director of Motability Operations Group plc on 1 September 2014.

Directors' interests

No Directors have any share interest in the Group, nor any material interest in any contract entered into by the Group.

Signed by order of the Board

Governance

Financial statements

Committed to high standards of governance

“At Motability Operations, we believe that good governance is inseparable from our objective to run a high performing business, delivering long-term value to our customers. It is critical for the Board that we have a clear strategy; strong and appropriate risk control; and the right people in place to ensure this is effectively overseen and delivered. We have a strong culture of control, and all Directors and Heads of Function sign an accountability statement setting out expectations.”

Every year the Company revises its strategic plan, which sets the agenda for sustained delivery of affordable, worry-free motoring for customers. The strategy is refreshed in light of current financial, environmental and customer-related insights, and the Board devotes considerable time to debating the critical issues. The updated plan is well understood and shared throughout the business, enabling individuals, teams and divisions to see clearly how their goals fit with Company’s overall objectives.

Key areas of focus in this year’s strategic review included putting in place the right structures and framework for addressing risk and ensuring that our high performance is maintained and fully sustainable. Given the wide-ranging pressures on the business, it is essential that we have clear and transparent risk management leadership. As a result, in 2014 we established a new Risk function, under the guidance of a Board Director with specific responsibility for risk.

We comply with the relevant provisions of the Companies Act 2006, FCA’s Disclosure and Transparency Rules and with its Listing Rules applicable to a company with wholesale debt admitted to trading on the London Stock Exchange’s regulated market. In addition we are now regulated by the FCA for our consumer credit activity.

This year we also appointed Christopher Lendrum as Senior Independent Director, in line with best practice under the UK’s Corporate Governance Code.

Motability Operations’ culture and its people are fundamental to its success, and the Company is committed to recruiting and retaining an engaged and motivated workforce. We are equally committed to key representation on the Board, and aim to provide the optimal balance and diversity of expertise, skills, experience and objectivity.

The performance of the Company, its culture and complexity, and risks faced, are all taken into account when addressing remuneration. The Company reviews its remuneration against the market, and deploys pay and benefit programmes which support the achievement of its objectives. The Company’s values are central to delivering excellent performance, and this starts at the top.

The Remuneration Committee undertook a wide-ranging review of market data and positioning for executive pay. The review’s conclusion was that the CEO’s remuneration was correctly positioned for the size, complexity and performance of the business. During the year the Committee also completed a new policy document, which sets out in detail the Company’s approach to compensation and benefits, including information on how it reviews changes. The Committee will need to confirm that its decisions are aligned to this policy annually.

I should like to thank John Callender for all the hard work and experience he has brought to the role of Remuneration Committee Chair over the years. John’s characteristic drive and enthusiasm for robust process has culminated with this best-practice policy document. Having completed this task, you will note from the Remuneration Committee Statement that John has indicated his wish to stand down from the Committee at its next meeting. I am delighted to announce that Neill Thomas, who joined the Committee in September 2014, has agreed to assume the Chairmanship. Meanwhile, John will remain a much valued member of the Board where his advice and specific sector knowledge is greatly appreciated.

Neil Johnson OBE
Chairman

Motability Operations Group plc Board

The Board meets on a quarterly basis, in December, March, June and September. The agenda will typically include a review of the Company Performance Report (including a financial and operational review), a Chief Executive's update, and Audit, Remuneration and Nomination Committee updates.

The Board's responsibilities

Matters reserved for the Board include:

- Promoting the success of the business
- Approval of strategy proposed by the Executive Committee
- Approval of financial reporting and controls
- Ensuring maintenance of a sound system of internal control and risk management
- Approval of major capital projects
- Ensuring adequate succession planning for the Board and senior management
- Undertaking reviews of its own performance and that of other Board committees
- Approval of Group policies
- Approval of the structure and terms of reference of the Board committees.

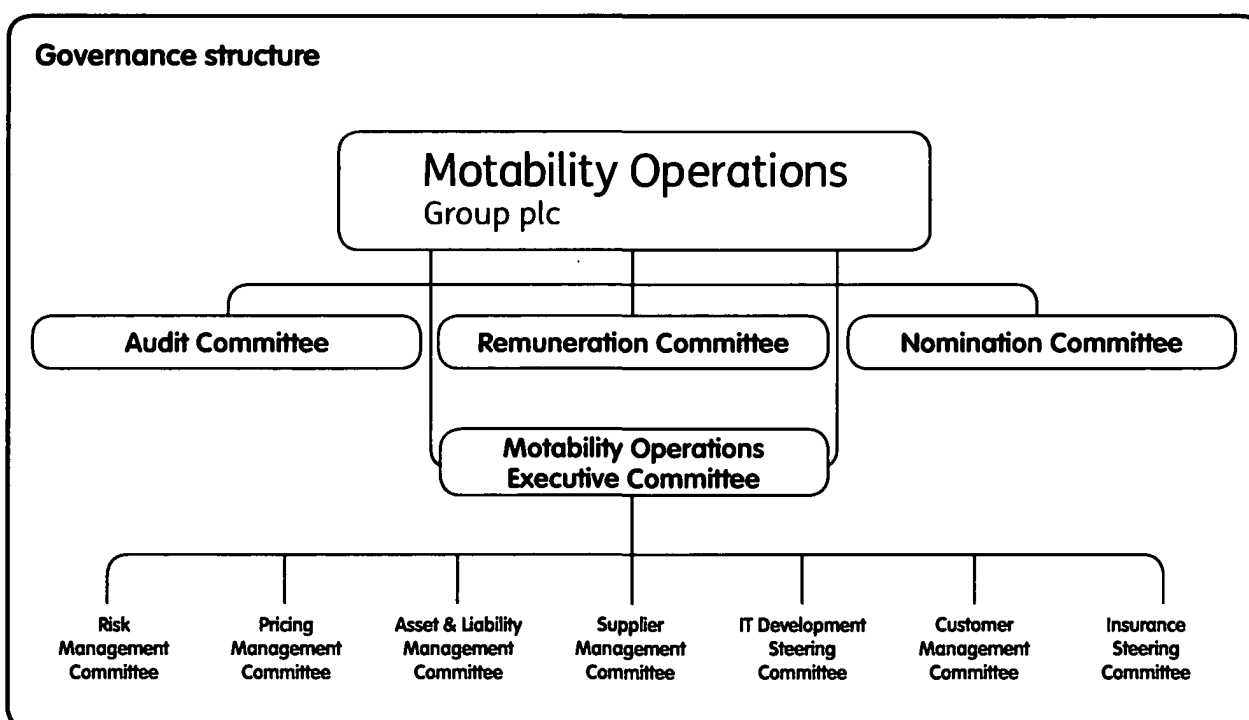

Roles of the Chairman and Chief Executive

The division of responsibilities between the Chairman and the Chief Executive has been clearly established. The responsibility of the Non-Executive Chairman includes leading the Board and ensuring its effectiveness. This includes setting the agenda for Board meetings and, with the assistance of the Company Secretary, arranging for the Directors to receive timely, accurate and clear information ahead of Board meetings.

The Chief Executive is responsible for leading and managing the business on a day-to-day basis with authorities delegated by the Board, and is accountable to the Board for the financial and operational performance of the Group. This day-to-day management is effected through the Executive Committee, with the Chief Executive as Chair.

Non-Executive Directors

The Non-Executive Directors combine broad business and commercial knowledge to enable them to challenge and contribute to the development of our strategy. They bring an independent judgement to all business issues through their contribution at Board and Committee meetings. The Chairman is satisfied that the Independent Non-Executive Directors are independent in both character and judgement.

EXECUTIVE COMMITTEE

The Executive Committee is chaired by Mike Betts, Chief Executive, and includes: David Gilman, Finance Director; Anne Downey, HR Director; Ian Goswell, Commercial Director; Ashley Sylvester, Risk & Business Systems Director; Matthew Hamilton-James, Head of Financial Control and Jo Pentland, Company Secretary, as members.

The Executive Committee met 12 times during the financial year and it has delegated authority from the Board to:

- Manage the day-to-day business operation of the Group and its subsidiaries
- Develop and set strategic objectives
- Agree policy guidelines
- Agree the Group's budgets and plans and, once these are adopted by the Board, be responsible for achieving them
- Ensure appropriate levels of authority are delegated to senior management
- Ensure the co-ordination and monitoring of the Group's internal controls and ensure that activities undertaken are conducted within the Group's risk appetite
- Safeguard the integrity of management information and financial reporting systems
- Approve key supplier agreements
- Ensure the provision of adequate management development and succession, and recommendation and implementation of appropriate remuneration structures
- Develop and implement Group policies through the Governance Committees (Asset and Liability Management; Risk Management; Supplier Management; Information & Systems Security Management; IT Development Steering; Pricing Management; Insurance Steering and Customer Management) and MO Reinsurance Ltd Board
- Agree internal authority limits and control.

The Executive Committee is kept informed and updated by the subordinate Governance Committees, the MO Reinsurance Ltd Board, and monthly Executive Committee packs are sent to the Non-Executive Directors for information. The Executive Committee reports quarterly to the main Board and there is a standard Board agenda item which allows any Director to comment or ask questions on the content of the Executive Committee packs.

Mike Betts
Chief Executive

AUDIT COMMITTEE

The Audit Committee comprises four Independent Non-Executive Directors and four Non-Executive Directors. The Committee is chaired by Christopher Lendrum, the other members being John Callender, Nigel Clibbens, Anna Cross, David Oldfield, Mike Russell-Brown, David Smith and Neill Thomas. Executive Directors and members of senior management are in attendance where appropriate.

The Committee has delegated authority from the Board to:

- Review and recommend the annual assurance plan to the Board and receive reports from Internal Audit on progress against plan
- Oversee all assurance activity and monitor the adequacy and effectiveness of such activity
- Review audit reports and monitor management's progress against agreed actions
- Monitor the objectivity, independence and effectiveness of the external auditors, including the sanction of non-audit work
- Oversee the operation of the risk management framework, including the risks identified in the corporate risk register
- Review key areas of management judgement which may have a material bearing on the financial statements including, but not limited to, the periodic revaluation of residual values, the assessment of the adequacy of MORL's insurance reserves and other accounting estimates such as maintenance accruals and end of contract payments
- Consider any substantive control issues arising, including major control failures or incidents
- Receive periodic reports from MORL's Audit & Risk; Underwriting; and Investment Committees to ensure that risk management within the subsidiary is managed in a manner consistent with Group policies
- Oversee internal and public financial reporting.

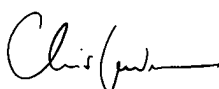

The Committee meets quarterly in advance of meetings of the main Board, at which the Committee chairman reports. Matters considered during the year included:

- The Company's capital position, incorporating the evolution and quantification of major risks, including those set out in the Independent Auditors' Report, and their implication for capital requirements as recorded and measured through the risk register, to ensure appropriate capital adequacy at all times within the parameters agreed by the Board
- A Treasury report covering policy and factors affecting liquidity (including ongoing Group financial performance, bank finance availability and bond market access) to ensure that satisfactory liquidity is maintained at all times
- Progress reports from the responsible Executive Director on all current major change programmes and projects. During the year these included the development and implementation of the new IT platform, preparation for Financial Conduct Authority authorisation, and in depth oversight of the performance, governance and reporting of MORL in its first year of operation
- Internal Audit reports and issue resolution on a quarterly basis, together with the appropriate resourcing of the function. No significant issues were encountered.
- Reports on any significant control failures or incidents over the previous quarter
- The financial statements for the half year and full year which are considered in depth at the Committee's May and December meetings respectively, with the benefit of a detailed report on the findings of the external auditors, PwC, who are in attendance to present their report and respond to questions. In issuing unqualified reports in the year ended 30 September 2014 the auditors provided appropriate assurance and identified no matters of material concern to the Committee.

Significant financial issues/judgements in relation to the Group's Financial Statements considered by the Committee are set out on page 42.

The Committee is satisfied that PwC complies with UK regulatory and professional requirements and that its objectivity is not compromised. PwC has held the audit contract for the Company since 2008, and it is envisaged that it will be put out to tender in 2018 in conformance with EU Mandatory Audit Firm legislation.

In recognition of the importance of evaluating its own effectiveness, in 2014 the Committee undertook a review covering members' experience and knowledge in the context of the key aspects of its work, the results of which were both reassuring and useful in preparing for future challenges.

Christopher Lendrum CBE
Audit Committee Chairman

Strategic report

Directors' report

Governance

Financial statements

AUDIT COMMITTEE continued

During the year, the Committee considered the following significant financial issues/judgements in relation to the Group's financial statements and disclosures, with input from management, internal audit and the external auditor:

Key issues/judgements in financial reporting	Audit Committee review and conclusions
<p>Residual values</p> <p>The estimation of the residual values of the vehicle fleet is subject to a number of economic, industry and portfolio specific factors. Volatility and/or inaccuracy in estimating residual values could have a material impact on the Group's reported financial position.</p>	<p>The estimation of residual values is identified as a key business risk and was subject to regular scrutiny and review by the Audit Committee during the year.</p> <p>The Audit Committee reviewed management's accounting estimates of residual values as part of the financial reporting cycle to understand and evaluate assumptions and estimates.</p> <p>Internal audit provided assurance to the Audit Committee that the residual value forecasting process was undertaken in a controlled manner.</p> <p>The Audit Committee was satisfied that residual value estimations were appropriate and processes well controlled.</p>
<p>Insurance reserves</p> <p>Insurance reserves are set aside in anticipation of insurance claims where accidents in the Group's cars have occurred but are yet to be reported. The assessment of these claims results in a provision being recognised, which will affect the reported financial result. The Group's assessment of insurance reserves is based on a detailed independent actuarial assessment.</p>	<p>The Group's assessment of insurance reserves was initially reviewed by the MORL Underwriting Committee and MORL Board to consider the appropriateness of the methodology and assumptions applied.</p> <p>The approach adopted was discussed and subsequently validated by the Audit Committee.</p> <p>The Audit Committee was satisfied that estimate of insurance reserves was appropriate and processes well controlled.</p>
<p>Other accounting estimates</p> <p>Other areas of accounting estimate include maintenance accrual and end of contract payments. Changes in estimate of future expenditure or payout rates may affect the reported financial result.</p>	<p>The Committee assessed accounting estimates as part of the review process for the financial statements.</p> <p>The Committee discussed the work and findings of internal audit to assess the appropriateness and robustness of estimates.</p> <p>On this basis the Committee was satisfied that estimates of other accounting estimates were appropriate and processes well controlled.</p>
<p>Group consolidation process</p> <p>The consolidation process for the financial accounts is complex and includes a number of manual elements. Good control is important to ensure that this does not result in the misstatement of the Group's financial position.</p>	<p>Key manual processes are identified as a business risk and are regularly reviewed by the Audit Committee through the Major Risks Schedule and Controls Self Assessment processes.</p> <p>Internal audit specifically reviewed the Group's key manual processes including the financial reporting controls, and findings were reported into the Audit Committee.</p> <p>The Audit Committee was satisfied that the Group consolidation process is robust and well controlled.</p>

REMUNERATION COMMITTEE

During the year the Remuneration Committee concluded the process of consolidating existing remuneration related policies and processes into a single policy document in line with best practice.

The Policy encompasses the Company's approach and philosophy to total pay and benefits, a clear statement of the main elements of remuneration for employees and Directors and a description of the processes involved in reviewing and approving any changes to elements of remuneration.

Each year, the Committee will be required to confirm that all decisions in relation to remuneration have been taken in line with the Policy. The Policy will be formally reviewed every three years unless there are any material changes required before the next scheduled review.

The Board and the Remuneration Committee set the Policy against the business context of a large independent commercial business driven by customer focus and satisfaction, ensuring it offers competitive and appropriate remuneration to attract and retain talent to deliver its strategic agenda.

When determining the right level of remuneration, the Committee looks at a broad group of comparative organisations across a number of sectors, both commercial and public/quasi-public, to ensure market data is relevant to the Company and individual roles. During the year the Committee undertook an extensive review of market data and positioning for executive pay, focusing on the CEO's remuneration, sourced from external independent reward specialists. The conclusion from the review was that the CEO's remuneration was positioned appropriately for the size and scale of the business between the commercial and public/ quasi-public markets.

By March 2015 I will have completed my second three-year term as Chair of the committee. In line with good governance it is appropriate for me to stand down following the March 2015 meeting. I would like to take this opportunity to thank my committee colleagues for their commitment and support over the years during which we have embedded the highest standards of governance, process and policy on behalf of the Board.

John Callender
Remuneration Committee Chairman

REMUNERATION COMMITTEE continued

Remuneration report

Remuneration matters are overseen by the Remuneration Committee. It recognises that setting the right level of remuneration is critical in supporting the achievement of the Company's short-term and long-term objectives and needs to reflect the interests of key stakeholders.

Members of the Remuneration Committee are appointed by the Group Board, on the recommendation of the Nomination Committee and in consultation with the Chairman of the Remuneration Committee, and the majority are Independent Non-Executive Directors.

The Remuneration Committee comprises the Non-Executive Chairman of Motability Operations Group plc, the Senior Independent Director, five Independent Non-Executive Directors and one Non-Executive Director. In addition, the Committee draws on the expertise of an external independent specialist for benchmarking, advice on best practice and to confirm that a thorough and well governed process is applied. The HR Director provides subject matter expertise to the Committee in its consideration and application of the Company's remuneration policy. The CEO attends the Committee as appropriate; for example, to present remuneration proposals for the Executive Directors.

The Committee is chaired by John Callender, an Independent Non-Executive Director. The other members are Neil Johnson, Christopher Lendrum, Joe Hennessy, Neill Thomas, David Smith and Anna Cross. The HR Director, or an alternate approved by the Committee Chair, acts as secretary of the Committee.

Individuals are not involved in any Committee discussions or decisions which directly relate to their own performance or remuneration.

The Committee meets at least twice a year and has delegated authority from the Group Board to review and approve, for Motability Operations Group plc and its subsidiaries:

- The overall positioning of competitive remuneration with reference to market data
- Base salaries and increases for the Executive Directors
- The design, terms and eligibility of performance-related pay schemes including annual awards and long-term incentive arrangements
- Whether any circumstances exist which would result in the need to withhold or claw-back any element of variable pay
- The policy for pension arrangements and other benefits for the Executive Directors
- The broad policy for the remuneration of all employees, the implementation of which is delegated to the Executive Committee.

The Committee reports bi-annually to the Group Board and works closely with the Audit and Nomination Committees. The Terms of Reference of the Remuneration Committee are reviewed annually and approved by the Group Board. The effectiveness of the Committee is evaluated at least every three years.

The link between performance and pay

As described on page 11 the Company has a clear strategic agenda, with an overarching purpose of providing customers with independence and mobility by offering a wide choice of vehicles at affordable prices. Each year, the Company reviews and refreshes this strategic agenda in consultation with key stakeholders. Annual objectives and targets are then set. The Company tracks performance using a range of corporate Key Performance Indicators (KPIs) for each of its strategic pillars.

Remuneration is linked very clearly to Company and individual performance targets. Individual objectives are aligned to the achievement of the Company's annual objectives, both financial and non-financial, and the demonstration of core values (see below).

The performance management framework is consistent across the whole organisation.

Performance appraisals are conducted annually by employees' direct managers following the year-end. Individual performance is based on the delivery of 'results' and demonstration of 'behaviours'. Leaders are assessed using 360° style feedback. Employees' appraisal ratings directly drive any discretionary pay awards.

Each Executive Director and Head of Function receives, each year, a copy of the Annual Operating Plan which describes corporate and divisional objectives and budgets, together with an Accountability Statement setting out expectations in respect of a range of matters including risk management, adherence to Company policies, diversity, employee engagement, and fraud & bribery prevention.

The Company's culture, as defined by the core values, iterated below, is central to delivering excellent performance.

The core values are:

- To provide excellence in customer service
- To be passionate about what we do
- To have a high-performance culture
- To think and act commercially
- To be friendly, flexible and facilitating.

The main measure of the Company's culture is through the use of an annual employee survey conducted by an independent external company. The survey benchmarks the organisation's culture versus that of other high-performing companies. The performance of the Company, its culture and the risks facing the organisation are regularly considered when the Board and the Remuneration Committee address remuneration matters.

The Company deploys pay and benefit programmes which facilitate the achievement of its objectives. The Company reviews its remuneration against the market to ensure that it is both affordable and competitive over the long term, is able to attract talent, and incentivises and encourages retention, whilst at the same time ensuring it does not encourage inappropriate behaviours and actions. Remuneration outcomes reflect the performance of the organisation and of each employee. The Company does not reward poor performance or failure.

Motability Operations aims to provide a balance of fixed and variable compensation that ensures stability and incentivises excellent performance. There is strong alignment between remuneration and the achievement of both short-term and long-term objectives.

Pay for all Company employees in the UK, including Motability Operations' Non-Executive Chairman, Independent Non-Executive Directors, CEO and Executive Directors, is managed through PAYE (Pay As You Earn). The Company's remuneration policy recognises Equal Pay.

We are fully committed to paying our people at least at the level of the current Living Wage for their base location.

The key remuneration elements are:

- Base salary
- Annual performance-related pay
- Long-term incentive arrangements
- Core benefits
- Pension

The Company's approach to each of these elements is described below:

Base salary

Base salaries are set at a level to attract and retain employees and they reflect the skills and experience of the individual as well as the scope and responsibilities of the role. There are five salary bands reflecting different levels of responsibility in employees' roles.

The Company undertakes a salary review for all employees annually, including reference to market rates, with any changes normally implemented on 1 January. Salaries may be changed at other times if appropriate e.g. in order to reflect a promotion / change in responsibility or accountability, or to ensure competitiveness in the market for a particular skill.

The Non-Executive Chairman of Motability Operations Group plc receives an annual fee.

Remuneration for the Independent Non-Executive Directors comprises a basic fee with additional fees being paid if they are a member of, or chair, one or more Board committee(s).

The level of fees for the Non-Executive Chairman and the Independent Non-Executive Directors of Motability Operations Group plc and its subsidiaries are set to attract and provide stability, reflecting the complexity of the role and the time commitment required. Their fees are reviewed from time to time based on the market and level of responsibility, including whether they are a member or chair of Board Committees. The Non-Executive Directors from the Shareholder banks are not remunerated by the Company.

Annual performance-related pay

Annual performance-related payments are not guaranteed and are overtly linked to clear and sustainable measures of business and individual performance, both financial and non-financial. Targets and individual objectives are set annually. There are fixed upper limits on these discretionary performance-related payments, which for Executive Directors cannot exceed 50% of salary.

The Non-Executive Chairman and Independent Non-Executive Directors are not eligible for annual performance-related payments.

Long-term incentive arrangements

The purpose of the long-term incentive arrangements is to attract and retain executives and incentivise sustainable long-term performance and value.

Due to its ownership structure, the Company cannot provide shares or share option schemes – instead, it provides a deferred cash incentive in the form of a Long Term Incentive Plan (LTIP) that is broadly reflective of an equity-based plan.

The LTIP applies to the CEO and the Executive Directors. It is a three year rolling plan with performance periods starting each year in October. Initial allocations of 'units' are awarded each year, at the discretion of the Remuneration Committee, to the CEO and each Executive Director.

Payouts from the LTIP are based on the achievement of long-term objectives relating to the Company's financial results, customer service & product affordability and business culture, and are also impacted by movements in the Company's credit rating.

Payments are made in December following the end of the three year period, subject to the performance criteria being met and the Company's credit rating. Depending on performance, the value of the units can decrease as well as increase. Details of units allocated and payments made under the LTIP can be found in Note 34 - Directors' Remuneration on page 82. There is also a one-off long-term incentive scheme for the current CEO.

In the event of a serious defect in the individual's performance (results or behaviours) coming to light after an allocation has been made, the Company has the right to adjust or withhold part or all of the payment or, in the event that a payment has already been made, to claw-back part or all of the payment.

Core benefits

Employees are eligible for a number of core benefits, detailed below.

The Non-Executive Directors are not eligible for any benefits.

Private Medical insurance (PMI) cover: provided to all employees on joining the Company. The level of cover depends on the employee's Salary Band. The Non-Executive Chairman receives PMI.

Life assurance: provided to all employees on joining the Company. In the event of death in service, a tax-free lump sum payment is made. The Non-Executive Chairman is not eligible for life assurance cover.

Critical illness: provided to all employees on joining the Company. In the event that an employee cannot continue to work due to a critical illness a lump sum payment may be made. The Non-Executive Chairman is not eligible for critical illness cover.

Holiday (excluding public holidays): employees' annual holiday entitlement is based on their Salary Band.

Company cars: a company car or allowance is provided to senior managers. A different scheme is in place for employees whose roles require significant business travel e.g. field-based – for these roles, a job-related car is provided. The Non-Executive Chairman receives a company car / allowance.

REMUNERATION COMMITTEE continued

The core benefits, mentioned above, and any other benefits, such as childcare vouchers, provision of EAP (Employee Assistance Programme), and season-ticket loans, are reviewed from time to time, taking into account market competitiveness and trends. Proposals for changes to the core benefits are reviewed and approved by the Remuneration Committee.

The Company operates a flexible benefits programme enabling employees to buy or sell certain benefits within specific limits.

The Non-Executive Chairman is not a member of the Company's flexible benefits programme.

Pension

The Company provides a Defined Contribution scheme which is non-contributory.

The Non-Executive Chairman and the Non-Executive Directors are not eligible to join the pension scheme.

In light of the annual and life-time limits to tax-relievable pension contributions which the Government introduced in 2010, Executive Directors can reduce or cease contributions being made to the Company's pension scheme and, instead, receive a pension allowance. Where an allowance is paid, normal tax and National Insurance deductions are made. This arrangement is also offered to other high pension contributors subject to approval by the Chairman of the Remuneration Committee.

The requirements of Pension Auto-Enrolment were implemented on 1 October 2013. Contribution levels will be reviewed as necessary to meet any changes in Auto Enrolment requirements.

As part of the Company's flexible benefits programme, eligible employees can reduce their pension contributions to a minimum level or they can make additional contributions if they wish.

The principles on which payments are made when an Executive Director leaves the Company

The CEO and the HR Director work with the Remuneration Committee to ensure that contractual terms on termination, and payments made, are fair to the individual and the Company and that failure is not rewarded.

The principles on which remuneration is decided when an Executive Director is appointed

The remuneration package for a new Executive Director (whether recruited externally or promoted from within the business) will be based on the market and will be consistent with the position stated in the Remuneration Policy when deciding each element of salary, performance-related pay, long-term incentives, pension and benefits.

Performance during the year

As outlined in the Strategy & Performance section of this report (pages 11-19), Company performance was excellent in the year to September 2014. The specific targets which link to performance-related pay are set out on the opposite page. Targets across the full range of financial, customer, affordability and business culture measures were exceeded. As a result of this excellent performance the Remuneration Committee authorised the payment of discretionary performance-related payments in the year, and this also resulted in payments being released from the Long Term Incentive Plan.

Details of Directors' remuneration are set out in note 34 on page 82 of the Financial Statements.

Customer service

We are targeted to deliver first-class levels of customer service and excellent value for money. Customer service is measured via an independent customer satisfaction survey and also through customer renewal rates at the end of lease, which reflects the ultimate validation of the level of service and value that we provide in the eyes of our customers. We have a target for the number of models available on the price list at 'nil advance payment', thereby ensuring that customers can choose from a wide range of affordable vehicles that meet their disability needs.

Business culture

Business culture is independently benchmarked against a pool of UK companies with results compared against the UK National Norm group and the High Performing Organisations (HPO).

Financial performance

Financial performance targets are in place to ensure that the Company remains robust and sustainable through the economic cycle, thereby safeguarding the future of the Scheme in the long-term. Financial performance measures include the assessment of capital adequacy, liquidity and cost efficiency. Management is set targets against these measures. During the year to September 2014:

- Capital levels were successfully managed in line with policy, closing the year with capital above the minimum requirement
- Our treasury management activities ensured that we retained sufficient liquidity capacity to finance 12 months' growth plus 20% headroom
- Our overhead cost base was successfully managed within our 2.5% annual efficiency target. Since 2002 the per lease overhead cost has reduced by 28%.

NOMINATION COMMITTEE

The Nomination Committee comprises the Non-Executive Chairman and two Independent Non-Executive Directors. It is chaired by Neil Johnson and the other members are John Callender and Christopher Lendrum. The CEO and HR Director are in attendance where appropriate.

The Committee meets twice yearly and has delegated authority from the Board to:

- Review succession and retention plans
- Review plans for the appointment of new Directors and reappointment of Non-Executive Directors at the end of their term
- Review the structure, size and composition of the Board.

In recognition of the importance of evaluating its own effectiveness, the Committee undertook a review covering members' experience and knowledge in the context of the key aspects of its work, the results of which will be reported to the Committee in December 2014.

Neil Johnson OBE
Chairman

Report on the financial statements

Our opinion

In our opinion:

- Motability Operations Group plc's Group financial statements and Company financial statements (the "financial statements") give a true and fair view of the state of the Group's and of the Company's affairs as at 30 September 2014 and of the Group's profit and the Group's and the Company's cash flows for the year then ended;
- the Group financial statements have been properly prepared in accordance with International Financial Reporting Standards ("IFRSs") as adopted by the European Union;
- the Company financial statements have been properly prepared in accordance with International Financial Reporting Standards ("IFRSs") as adopted by the European Union and as applied in accordance with the provisions of the Companies Act 2006; and
- the financial statements have been prepared in accordance with the requirements of the Companies Act 2006 and, as regards the Group financial statements, Article 4 of the IAS Regulation.

What we have audited

Motability Operations Group plc's financial statements comprise:

- the Group and Company balance sheets as at 30 September 2014;
- the Group income statement and Group statement of comprehensive income for the year then ended;
- the Group and Company statements of cash flows for the year then ended;
- the Group and Company statements of changes in equity for the year then ended; and
- the notes to the financial statements, which include a summary of significant accounting policies and other explanatory information.

The financial reporting framework that has been applied in the preparation of the financial statements is applicable law and IFRSs as adopted by the European Union and, as regards the Company financial statements, as applied in accordance with the provisions of the Companies Act 2006.

In applying the financial reporting framework, the Directors have made a number of subjective judgements, for example in respect of significant accounting estimates. In making such estimates, they have made assumptions and considered future events.

Our audit approach

Overview

Materiality

Materiality

Overall Group materiality: £19.2 million, which represents 1% of adjusted revenue.

Audit scope

Audit scope

The Group has five subsidiaries as detailed in note 15. For the purposes of planning our audit, we considered each to be a separate component in the Group. However, only the following three components were considered to be financially significant:

- We performed an audit of the complete financial information of Motability Operations Limited and Motability Leasing Limited
- In addition, under our instruction, PricewaterhouseCoopers LLC based in the Isle of Man performed an audit of the complete financial information of MO Reinsurance Limited.

Areas of focus

Areas of focus

Other areas of focus comprised:

- Residual values of used cars
- Maintenance accruals
- Valuation and completeness of the incurred but not reported (IBNR) insurance reserves
- Group consolidation process
- Accounting estimates – end of contract payments.

Strategic report

Directors' report

Governance

Financial statements

Independent Auditors' report to the members of Motability Operations Group plc continued

The scope of our audit and our areas of focus

We conducted our audit in accordance with International Standards on Auditing (UK and Ireland) ("ISAs (UK & Ireland)").

We designed our audit by determining materiality and assessing the risks of material misstatement in the financial statements. In particular, we looked at where the Directors made subjective judgements, for example in respect of significant accounting estimates that involved making assumptions and considering future events that are inherently uncertain. As in all of our audits, we also addressed the risk of management override of internal controls, including evaluating whether there is evidence of bias by the Directors that may represent a risk of material misstatement due to fraud.

The risks of material misstatement that had the greatest effect on our audit, including the allocation of our resources and effort, are identified as "areas of focus" in the table below together with an explanation of how we tailored our audit to address these specific areas. This is not a complete list of all risks identified by our audit.

Area of focus	How our audit addressed the area of focus
<p>Residual values of used cars</p> <p>The Group has a large fleet of cars that it leases to customers under operating leases. The cars are depreciated over the life of the operating lease down to their forecast residual values.</p> <p>Management initially estimates the residual values for the cars at the start of the lease using a forecasting model and updates these forecasts on a quarterly basis.</p> <p>If the forecasted residual values are inaccurate it will impact the depreciation charge and profits recorded in the period as follows:</p> <ul style="list-style-type: none"> • If residual value estimates are too high, depreciation charges are likely to be too low, resulting in losses when vehicles are sold at the end of operating leases • If residual value estimates are too low, depreciation charges are likely to be too high, resulting in gains when vehicles are sold. <p>Estimating residual values is highly judgemental and dependent on a number of factors including: projected supply and demand for used cars; the economic outlook; the estimated mileage concentration of vehicle makes and models; and condition of the vehicles at the end of their contracts.</p>	<ul style="list-style-type: none"> • We evaluated the forecasting model and the end to end processes by which residual values are calculated. In doing this, we assessed how initial values are determined and periodically updated throughout the useful economic life of vehicles • We tested a sample of inputs used to calculate residual values including the accuracy of supply, demand and economic outlook projections • The model outputs are reviewed and challenged by management at the Residual Value and Fleet Valuation forum meetings. They also benchmark forecast residual values to Group vehicle sales data and estimates available from third party data sources. We attended a number of these meetings throughout the year to observe the level of challenge offered by management and tested that final residual values determined through these forum meetings are accurately updated in the general ledger • We compared estimates of residual values to recent Group sales data and third party data sources to test that residual values calculated by management were consistent • Depreciation charges are automatically posted to the general ledger based on residual values set at the inception of leases. The residual values are updated on a quarterly basis and depreciation charges are adjusted accordingly. We tested a sample of depreciation postings for accuracy of recording in the general ledger.

Area of focus	How our audit addressed the area of focus	Strategic report
<p>Maintenance accruals Vehicle lease prices incorporate an estimate of the future costs of maintenance over the lease period. The Group defers a portion of revenues and releases amounts in the period in which maintenance activity takes place.</p> <p>In order to calculate the amount of revenue to be deferred and released, management estimates projected maintenance expenditure prior to the commencement of leases and monitors actual expenditure. Actual costs are used to update forecasts of maintenance expenditure for each vehicle tranche.</p> <p>Inaccurate estimates of total maintenance expense could result in revenues being over or under reported in a given reporting period. Errors in the computation would also lead to inaccurate deferred revenue balances being recorded at the period end.</p> <p>Estimating the maintenance expenditure and related deferral of revenue is highly judgemental and dependent on a number of factors including vehicle mileage and usage, part costs, servicing costs and servicing schedules.</p>	<ul style="list-style-type: none"> • We reviewed the maintenance budgeting and maintenance cost review processes to understand how revenue is deferred and subsequently released in the period in which maintenance activity takes place • Estimated and actual maintenance costs are reviewed and challenged by management on a quarterly basis at the Service and Maintenance Review forum. We attended a number of these forum meetings to observe the level of challenge offered by management and check that maintenance budgets, actual expenditure and forecast remaining cost are accurately updated in the calculation of deferred revenue • We tested the key inputs into the computation of deferred maintenance revenue balances, namely actual costs to date, forecast maintenance costs and the length of leases by testing data inputs, assumptions and calculations, including part costs, servicing costs and servicing schedules. 	Directors' report
<p>Valuation and completeness of the incurred but not reported (IBNR) insurance reserves IBNR reserves are set aside for insurance claims where accidents in the Group's cars have occurred but are yet to be reported. At the period end, the Group estimates the number and severity of these claims to determine the level of provisions to be recognised.</p> <p>The calculation of the IBNR insurance reserves requires management to estimate potential levels and amounts of claims which have been incurred but not yet reported. Management uses an independent actuary to undertake a study using a combination of actuarial methods to determine the projected liability at the period end. Given the level of judgement and uncertainty involved, there is a risk that the methodology adopted for claims IBNR reserving may not be appropriate, resulting in an under or over provided amount, and, as such, this is an area of focus for us.</p>	<ul style="list-style-type: none"> • We evaluated the methods of reserving and the appropriateness of the methodology used by management's actuary to calculate the IBNR reserves • We performed a detailed review of the actuarial report, reviewing underlying assumptions and agreeing the source data to the year-end audited claims information. 	Governance
<p>Group consolidation process The Group consolidation process is complex and has a number of manual elements. Trial balances for each legal entity are uploaded and consolidation adjustments are recorded in relation to inter-company balances, insurance activities and other period end journals. This was an area of focus for us as there is a risk of error due to the manual nature of the processes by which these adjustments are made.</p>	<ul style="list-style-type: none"> • We tested the consolidation entries including inter-company adjustments, adjustments in relation to insurance activities and other period end journals for the Group companies by agreeing adjustments to supporting calculations and documentation. 	Financial statements
<p>Accounting estimates – end of contract payments Incorrect estimates applied in the calculation of deferred income or provision balances could result in revenues being over or under reported.</p> <p>The Group rewards customers who ensure vehicles are returned at the end of leases in good condition. Revenue is deferred to make these payments to customers. Estimating the level of these end of contract payments is judgemental and so there is a risk that the level of deferred revenue at the period end could be incorrect.</p>	<ul style="list-style-type: none"> • We tested the assumptions for the number of customers who would qualify for end of contract payments and compared this to historic qualification levels in order to ascertain that the levels set were appropriate and consistent with historic customer behaviour. We also reperformed management's calculations for the level of revenue deferred at the period end to test that this was accurate. 	

Independent Auditors' report to the members of Motability Operations Group plc continued

How we tailored the audit scope

We tailored the scope of our audit to perform enough work to be able to give an opinion on the financial statements as a whole, taking into account the structure of the Group, the accounting processes and controls, and the industry in which the Group operates.

The Group's operations and supporting accounting functions are based in London, Bristol and the Isle of Man. Further details of how the Motability Car and Powered Wheelchair & Scooter Scheme operate are detailed on pages 2 to 5.

The Group has five subsidiaries as detailed in note 15. For the purposes of planning our audit, we considered each to be a separate component in the Group, being entities for which the Group prepares financial information.

In establishing our overall approach to audit the Group, we considered the significance of these components to the financial statements. We also separately considered our assessment of risk within each component, the overall coverage of our procedures across the Group, as well as the risk associated with less significant components not brought into the normal scope of our audit.

We determined the type of work that needed to be performed for each component by us in relation to components within the UK, or by other PwC network firms operating under our instruction in relation to components outside the UK. Where the work was performed by other firms, we determined the level of involvement we needed to have in the audit work of those components to be able to conclude whether sufficient appropriate audit evidence had been obtained as a basis for our opinion on the Group financial statements as a whole.

Of the five components, we performed an audit of the complete financial information of Motability Operations Limited and Motability Leasing Limited. In addition, we instructed PricewaterhouseCoopers LLC based in the Isle of Man to perform full scope audit procedures for the complete financial information of MO Reinsurance Limited. These components were selected due to their size and risk characteristics.

In aggregate, these component's financial statement line items accounted for 99.9% of total revenue and 99.8% of total assets. This work, together with additional procedures performed at the Group level, gave us the evidence we needed for our opinion on the Group financial statements as a whole.

Materiality

The scope of our audit is influenced by our application of materiality. We set certain quantitative thresholds for materiality. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures and to evaluate the effect of misstatements, both individually and on the financial statements as a whole.

Based on our professional judgement, we determined materiality for the financial statements as a whole as follows:

Overall Group materiality	£19.2 million (2013: £18.2 million).
How we determined it	This represents 1% of adjusted revenue. Adjusted revenue is current year revenues, excluding proceeds from the disposal of operating lease assets.
Rationale for benchmark applied	We believe that revenue, adjusted to exclude proceeds from the disposal of operating lease assets, provides a consistent year on year basis for determining materiality as proceeds from disposal of operating lease assets are likely to fluctuate. This would create undue volatility in materiality, particularly given that gains on disposal have been generated in recent years.

We agreed with the Audit Committee that we would report to them misstatements identified during our audit above £1.0 million (2013: £1.0 million) as well as misstatements below that amount that, in our view, warranted reporting for qualitative reasons.

Opinions on other matters prescribed by the Companies Act 2006

In our opinion:

- the information given in the Strategic Report and the Directors' Report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the information given in the Corporate Governance Statement set out on pages 38 to 48 with respect to internal control and risk management systems and about share capital structure is consistent with the financial statements.

Other matters on which we are required to report by exception

Adequacy of accounting records and information and explanations received

Under the Companies Act 2006 we are required to report to you if, in our opinion:

- we have not received all the information and explanations we require for our audit; or
- adequate accounting records have not been kept by the Company, or returns adequate for our audit have not been received from branches not visited by us; or
- the Company financial statements are not in agreement with the accounting records and returns.

We have no exceptions to report arising from this responsibility.

Directors' remuneration

Under the Companies Act 2006 we are required to report to you if, in our opinion, certain disclosures of Directors' remuneration specified by law are not made. We have no exceptions to report arising from this responsibility.

Corporate governance statement

Under the Companies Act 2006 we are required to report to you if, in our opinion, a corporate governance statement has not been prepared by the Company. We have no exceptions to report arising from this responsibility.

Responsibilities for the financial statements and the audit

Our responsibilities and those of the Directors

As explained more fully in the Directors' Responsibilities Statement set out on page 37, the Directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view.

Our responsibility is to audit and express an opinion on the financial statements in accordance with applicable law and International Standards on Auditing (UK and Ireland) ("ISAs (UK & Ireland)"). Those standards require us to comply with the Auditing Practices Board's Ethical Standards for Auditors.

This report, including the opinions, has been prepared for and only for the Company's members as a body in accordance with Chapter 3 of Part 16 of the Companies Act 2006 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

What an audit of financial statements involves

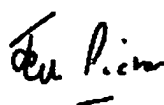

We conducted our audit in accordance with ISAs (UK & Ireland). An audit involves obtaining evidence about the amounts and disclosures in the financial statements sufficient to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or error. This includes an assessment of:

- whether the accounting policies are appropriate to the Group's and the Company's circumstances and have been consistently applied and adequately disclosed;
- the reasonableness of significant accounting estimates made by the Directors; and
- the overall presentation of the financial statements.

We primarily focus our work in these areas by assessing the Directors' judgements against available evidence, forming our own judgements, and evaluating the disclosures in the financial statements.

We test and examine information, using sampling and other auditing techniques, to the extent we consider necessary to provide a reasonable basis for us to draw conclusions. We obtain audit evidence through testing the effectiveness of controls, substantive procedures or a combination of both.

In addition, we read all the financial and non-financial information in the Annual Report and Accounts to identify material inconsistencies with the audited financial statements and to identify any information that is apparently materially incorrect based on, or materially inconsistent with, the knowledge acquired by us in the course of performing the audit. If we become aware of any apparent material misstatements or inconsistencies we consider the implications for our report.

Governance

Financial statements

Notes to the financial statements

1. General information

Motability Operations Group plc is a company incorporated and domiciled in the United Kingdom, whose shares are privately owned. The address of the registered office is City Gate House, 22 Southwark Bridge Road, London SE1 9HB. The nature of the Company's operations and its principal activities are set out in the Strategic report on pages 2 to 3 and the Group's shareholders are detailed in the Operational review on page 24.

Motability Operations Group plc ('the Company') and its subsidiaries will be referred to as 'the Group' in this report.

These financial statements are presented in pounds Sterling because that is the currency of the primary economic environment in which the Company operates.

Accounting convention

The financial statements have been prepared under the historical cost convention, except the revaluation of financial assets and financial liabilities (including derivative instruments) which are valued at fair value through profit or loss.

2. Significant accounting policies

Basis of preparation

These financial statements have been prepared in accordance with International Financial Reporting Standards (IFRSs) and International Financial Reporting Interpretations Committee (IFRIC) interpretations endorsed by the European Union (EU) and with those parts of the Companies Act 2006 applicable to companies reporting under IFRSs. A summary of the more important accounting policies is set out below, together with an explanation of where changes have been made to previous policies on the adoption of new accounting standards in the year.

The preparation of financial statements in conformity with IFRSs requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on the Directors' best knowledge of the amount, event or actions, actual results ultimately may differ from those estimates. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements, are disclosed in note 3.

Except as described below, the accounting policies have been applied consistently to the years 2014 and 2013.

Adoption of new or revised standards

The following new and revised standards and interpretations have been adopted in these financial statements. Their adoption has not had any significant impact on the amounts reported.

Amendments to IFRS 7	<i>Financial Instruments: Disclosures</i>
IFRS 13	<i>Fair Value Measurement</i>
Amendment to IAS 19 (Jun 2011)	<i>Employee Benefits</i>
Annual improvements to IFRSs	<i>2009-2011 Cycle</i>

At the date of authorisation of these financial statements, the following standards, amendments and interpretations were in issue but not yet effective, or effective but not adopted by the EU and have not been early adopted by the Group.

IFRS 9	<i>Financial Instruments</i>
IFRS 10	<i>Consolidated Financial Statements</i>
IFRS 11	<i>Joint Arrangements</i>
IFRS 12	<i>Disclosure of Interests in Other Entities</i>
IFRS 14	<i>Regulatory Deferral Accounts</i>
IFRS 15	<i>Revenue from Contracts with Customers</i>
Amendments to IAS 16	<i>Property, Plant and Equipment</i>
Amendment to IAS 19 (Nov 2013)	<i>Employee Contributions</i>
IAS 27 (reissued)	<i>Consolidated and Separate Financial Statements</i>
IAS 28 (reissued)	<i>Investments in Associates</i>
Amendments to IAS 32	<i>Financial Instruments: Presentation</i>
Amendments to IAS 36	<i>Impairment of Assets</i>
Amendments to IAS 39	<i>Financial Instruments: Recognition and Measurement</i>
Annual improvements to IFRSs	<i>2010-2012 Cycle</i>
Annual improvements to IFRSs	<i>2011-2013 Cycle</i>
Annual improvements to IFRSs	<i>2012-2014 Cycle</i>

Lease contracts are outside the scope of IFRS 15, therefore the Group is waiting for the issue of the leasing standard, expected in the first quarter of 2015, to make an impact assessment.

With the exception of IFRS 15, the Directors anticipate that the adoption of these standards, amendments and interpretations in future periods will have no material effect on the financial statements of the Group.

Other standards, amendments and interpretations not described above are not relevant to the Group.

2. Significant accounting policies continued

Going concern

The Group's business activities, together with the factors likely to affect its future development, performance and position are set out in the Strategic report on pages 11 to 19. The financial position of the Group, its cash flows, liquidity position and borrowing facilities are described in the Finance Director's review on pages 20 to 23. In addition, note 36 to the financial statements includes the Group's objectives, policies and processes for managing its capital; its financial risk management objectives; details of its financial instruments and hedging activities; and its exposures to credit, liquidity and foreign exchange risk.

The Group has considerable financial resources together with a long-term contract with Motability to operate the 'Motability Scheme'. As a consequence, the Directors believe that the Group is well placed to manage its business risks.

After making enquiries, the Directors have a reasonable expectation that the Company and the Group have adequate resources to continue in operational existence for the foreseeable future. Accordingly, they continue to adopt the going concern basis in preparing the Annual Report and Accounts.

Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and entities controlled by the Company. Control exists when the Group has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

The net assets and results of acquired businesses are included in the consolidated financial statements from their respective dates of acquisition, being the date on which the Group obtains control.

The Group and its subsidiaries apply uniform accounting policies and the financial statements of subsidiaries are prepared for the same reporting year as the Parent Company.

All intra-Group transactions, balances, income and expenses are eliminated on consolidation.

Investment in subsidiaries

The Company's investments in its subsidiaries are stated at cost less any provision for impairment in the Parent Company's balance sheet. Impairment provisions are charged to the income statement.

Intangible assets

Intangible assets represent computer software costs. In accordance with IAS 38, computer software is capitalised on the basis of the costs incurred to acquire and bring into use the specific software and includes capitalised internal labour where appropriate. These costs are amortised on a straight-line basis over their estimated useful lives, between three and five years.

Property, plant and equipment

Property, plant and equipment are stated at historical cost less accumulated depreciation and provision for any impairment in value. Cost includes the original purchase price of the asset and the costs attributable to bringing the asset to its working condition for its intended use. The carrying values of all property, plant and equipment are reviewed for impairment when events or changes in circumstances indicate the carrying value may not be recoverable. Residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date.

Depreciation is calculated to write down assets, on a straight-line basis, over the estimated useful life of the assets as follows:

Motor vehicles	Four years
Leasehold improvements	Remaining term of lease
Fixtures, fittings and office equipment	Three years

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised within net operating costs in the income statement.

Assets held for use in operating leases

Assets leased to customers, under agreements which do not transfer substantially all the risks and rewards of ownership, are classified as operating leases. Operating lease assets are capitalised and depreciated on a straight-line basis over their anticipated useful lives to estimated residual values. Estimated residual values are reviewed at the balance sheet date against revised projections of used car prices at the end of the lease term and the resulting changes of estimate are accounted for as a recalibration of depreciation for the year and remaining lease term.

Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is the net carrying value of the operating lease assets, which were previously held for use in operating leases and then become held for sale, as at the date of the transfer to inventory. Net realisable value is the estimated selling price in the ordinary course of business, less applicable variable selling expenses. A provision for vehicles is made for inventories that have been held for more than 12 months.

Notes to the financial statements continued

2. Significant accounting policies continued

Revenue recognition

Revenue comprises the fair value of the consideration received or receivable for the sale of goods and services.

Rental revenue from operating leases is recognised on a straight-line basis over the lease term.

Revenue comprises both advance rentals payable directly by lessees and periodic rentals receivable from lessees by means of mandated payments of either: the Higher Rate Mobility Component of the Disability Living Allowance, the War Pensioners' Mobility Supplement, the Enhanced Rate of the Mobility Component of Personal Independence Payment, or the Armed Forces Independence Payment.

Proceeds from disposal of operating lease assets are recognised when the significant risks and rewards of ownership of the assets have been transferred to the buyer.

Hire purchase earnings are recognised over the hire purchase agreement term using the net investment method so as to reflect a constant periodic rate of return on the Group's net investment in the contract.

Deferred income – maintenance

Rental income in respect of vehicle maintenance is deferred to the extent that it relates to future maintenance activities. See note 20.

Deferred income – vehicle condition

Rental income is deferred on a straight-line basis over the life of the lease to the extent that it is expected to be repaid to lessees for returning leased assets in good condition. See note 20.

Leasing obligations

The costs of operating leases are charged to the income statement on a straight-line basis.

Net operating costs

Net operating costs comprise net book value of disposed operating lease assets, depreciation, insurance, maintenance, dealer supply and service payments, roadside assistance, charitable donations and other Scheme-related costs including the Motability levy (see note 33) and overheads. An analysis is provided in note 6.

Overheads include the cost to the Group of the Directors' long-term incentives, recognised on an accruals basis over the period to which the performance criteria relate, adjusted for changes in the probability of performance criteria being met or conditional awards lapsing.

Finance costs

Finance costs are recognised as an expense on an accruals basis, using the effective interest rate method.

Retirement benefit costs

Company pension contributions are calculated as a fixed percentage of the pensionable salaries of eligible employees. These contributions are charged in the period to which the salary relates. The Company pension scheme is a defined contribution scheme. The Group has no further payment obligations once the contributions have been paid.

Taxation

Taxation on the profit for the year comprises both current and deferred tax as well as adjustments in respect of prior years. Taxation is recognised in the income statement, except to the extent it relates to items recognised in other comprehensive income or directly in equity, in which case the tax is also recognised in other comprehensive income or directly in equity, respectively.

Current tax is the expected tax payable on the profit for the period, using tax rates enacted or substantively enacted by the balance sheet date.

Deferred tax is recognised in respect of all temporary differences between the carrying value of assets and liabilities for reporting purposes and the amounts charged or credited for tax purposes. Deferred tax is calculated at the rate of tax expected to apply when the liability is settled or the asset is realised using tax rates enacted or substantively enacted by the balance sheet date. A deferred tax asset is recognised only to the extent that it is probable that future taxable profit will be available against which the asset can be utilised.

Long Term Incentive Arrangements

Payments falling due under Long Term Incentive Arrangements depend upon length of service and performance criteria (see note 34). The cost is recognised during the years in which services are rendered subject to meeting specific performance requirements.

Share capital

Ordinary share capital is classified as equity. The Group's preference shares are classified as debt, with the associated dividend being recognised on an amortised cost basis in the income statement as a finance cost.

Financial instruments

Financial assets and liabilities are recognised in the Group's balance sheet when the Group becomes a party to the contractual provisions of the instrument. Financial assets and liabilities comprise trade and other receivables, cash and cash equivalents, trade and other payables, hire purchase receivables, debt, preference shares and derivative instruments.

2. Significant accounting policies continued

Foreign currency translation

The Company has issued fixed-rate Eurobonds and at the same time entered into cross-currency interest rate swap arrangements to hedge its foreign exchange risk. The Company's overall foreign exchange risk management strategy is to transform all new issued foreign denominated debt into the Company's functional currency of Sterling.

Monetary assets and liabilities expressed in foreign currencies are translated into Sterling at rates of exchange prevailing at the balance sheet date. Foreign currency amounts are initially recorded at the rates of exchange prevailing on the dates of the transactions. Individual transactions denominated in foreign currencies are translated into Sterling at the exchange rates prevailing on the dates payment takes place. Gains and losses arising on retranslation are, with the exception of the effective portion of foreign exchange gains or losses on debt instruments designated as hedging instruments in a cash flow hedge relationship, included in the income statement for the period and are classified as either operating or financing depending on the nature of the monetary item giving rise to them. The Group hedged all its foreign exchange risks on the Eurobonds and does not have any other monetary assets or liabilities in foreign currencies.

Financial assets

Trade and other receivables

Trade and other receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They arise when the Group provides money, goods and services directly.

Trade receivables do not carry any interest and are stated at their nominal value, which approximates to the fair value because of their short maturities, as reduced by appropriate provisions for estimated irrecoverable amounts. These provisions are established when there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of the receivables based on past experience of default or delinquency in payments.

Hire purchase receivables

Under IAS 17, hire purchase agreements, which transfer substantially all the risks and rewards of ownership to the customer, are treated in the same way as finance leases.

Assets purchased by customers under hire purchase contracts are included in 'hire purchase receivables' at gross amount receivable, less unearned finance charges. Finance income is recognised over the lease term using a net investment method so as to reflect a constant periodic rate of return on the Group's net investment in the contract. Hire purchase receivable balances also include an allowance for estimated irrecoverable amounts by reference to past default experience.

Insurance receivables

Receivables arising from insurance contracts are classified in this category and are reviewed for impairment as part of the overall impairment review of receivables. Insurance receivables relate to insurance premium debtors and amounts recoverable on reinsurance policies where claims reported have exceeded the Group's retentions.

Cash and cash equivalents

Cash and cash equivalents comprise cash and bank balances and bank overdrafts. Cash and bank balances comprise cash held by the Group, cash in the course of transmission and collection, and short-term bank deposits with an original maturity of three months or less. The carrying value of these assets approximates to their fair value. In the consolidated balance sheet, bank overdrafts are shown within borrowings in current liabilities.

Financial liabilities including trade and other payables

Trade and other payables

Trade and other payables are recognised when the Group has a present legal or constructive obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefit will be required to settle the obligation, and reliable estimates of the amount of obligation can be made.

Trade and other payables are short-term financial liabilities which do not carry any interest and are stated at nominal value, which approximates to the fair value because of their short maturities.

Financial liabilities

Financial liabilities are recognised initially at fair value, net of transaction costs. They are subsequently held at amortised cost. Any difference between the amount on initial recognition and the redemption value is recognised in the income statement using the effective interest method.

Short-term financial liabilities, such as bank overdrafts, are measured at nominal value, which approximates to the fair value because of their short maturities.

Insurance payables

Payables arising from insurance contracts are classified in this category. They are stated at nominal value which approximates to their fair value. Such amounts relate to reinsurance premiums payable, claims payment reimbursements due and commissions payable.

Notes to the financial statements continued

2. Significant accounting policies continued

Derivative financial instruments

The Group enters into derivative financial instruments, comprising interest rate and cross-currency swaps, to manage its exposures to interest rate and foreign exchange risk. Further details of derivative financial instruments are disclosed in note 25 to the financial statements.

Derivatives are initially recognised at fair value at the date a derivative contract is entered into, and are subsequently remeasured to their fair value at each balance sheet date. The resulting gain or loss is recognised in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedge relationship.

Insurance contracts

Insurance contracts are those contracts that transfer significant insurance risk. Such contracts may also transfer financial risks.

Recognition and measurement

Insurance and reinsurance claims and loss adjustment expenses are charged and credited to the income statement as incurred based on the estimated liability for compensation owed to contract holders. They include direct and indirect claims settlement costs and arise from events that have occurred up to the balance sheet date even if they have not yet been reported to the Group. The measurement of insurance liabilities and reinsurance recoveries is described in more detail in note 23.

Liabilities for unpaid claims are estimated using the input of data for individual cases reported to the Group and statistical analysis for the claims incurred but not reported, including an estimate of the impact on claims that may be affected by external factors (such as court decisions).

The provisions for claims outstanding and related reinsurance recoveries are discounted where there is a particularly long period from the incident claims settlement or when nominal interest rates are high and where there exists a suitable claims payment pattern from which to calculate the discount. Claims with a long period from incident to claims settlement are those claims where the expected period of settlement is six years or more. The discount rate used is based upon an investment return expected to be earned by assets, which are appropriate in magnitude and nature to cover the provisions for losses and loss adjustment expenses being discounted during the period necessary for the payment of such claims.

Hedge accounting

The Group designates hedging instruments, mainly interest rate and cross-currency swaps, as cash flow hedges. Hedges of interest rate risk on firm commitments are accounted for as cash flow hedges.

At the inception of the hedge relationship, the Group documents the relationship between the hedging instrument and the hedged item, along with its risk management objectives and its strategy for undertaking various hedge transactions. Furthermore, at the inception of the hedge and on an ongoing basis, the Group documents whether or not the hedging instrument that is used in a hedging relationship is effective in offsetting changes in cash flows of the hedged item.

Note 25 sets out details of the fair values of the derivative instruments used for hedging purposes. Movements in the fair value reserve (net of tax effects) are also detailed in the statement of changes in equity.

Cash flow hedge

Changes in the fair value of the derivative financial instruments that are designated and effective as hedges of future cash flows are recognised directly in other comprehensive income and the ineffective portion is recognised immediately in the income statement.

Amounts accumulated in equity are reclassified to profit or loss in the period when the hedged item is recognised in profit or loss. The gain/loss relating to the effective portion of interest rate swaps hedging variable rate borrowings is recognised in the income statement within 'finance costs'. Any gain or loss relating to the ineffective portion would be recognised in the income statement as 'other gains/(losses)'.

Hedge accounting is discontinued when the Group revokes the hedging relationship, the hedging instrument expires or is sold, terminated or exercised or no longer qualifies for hedge accounting. Any cumulative gain or loss deferred in equity at that time remains in equity and is recognised when the forecast transaction is ultimately recognised in profit or loss. When a forecast transaction is no longer expected to occur, the cumulative gain or loss that was deferred in equity is recognised immediately in profit or loss.

3. Critical accounting judgements and key sources of estimation uncertainty

In the application of the Group's accounting policies, which are described in note 2, the Directors are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources.

The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

Critical judgements in applying the Group's accounting policies:

Residual values of operating lease assets

The method by which the Directors have determined the Group's residual values of the operating lease assets is described in note 13.

3. Critical accounting judgements and key sources of estimation uncertainty continued

Sensitivity analysis

Because of the inherent uncertainty associated with such valuation methodology and in particular the volatility of the prices of second-hand vehicles, the carrying value of the residual values of the operating lease assets may differ from their realisable value (see note 13). As at 30 September 2014, if the future value of the net sale proceeds for our existing portfolio of operating leases were to decrease/increase by 1% from our estimates (1% being a reasonable, scalable base unit for movements in the used car market), the effect would be to decrease/increase the depreciation on these vehicles by £45.5m (2013: £41.9m). This change in depreciation would be charged/credited to depreciation expense on operating leases over the remaining terms of the operating leases so that the net investment in operating leases at the end of the lease term for these vehicles is equal to the revised expected residual value.

Insurance contracts

There are certain factors that cause uncertainty when the Group is estimating its ultimate claims liability. Principally, the complex nature of the claims invariably results in a lengthy legal process where claims quantum can fluctuate, as described in more detail in note 23.

4. Revenue

An analysis of the Group's revenue is provided below:

	2014 £m	2013 £m
Rentals receivable from operating leases	1,952.9	1,873.1
Proceeds from disposal of operating lease assets	1,830.6	1,575.9
Insurance reimbursements from disposal of operating lease assets	15.0	17.1
Other income	1.9	1.3
Hire purchase earnings	1.6	2.8
Contingent rentals	0.6	0.6
Finance income	0.3	0.3
Total revenue	3,802.9	3,471.1

Contingent rentals relate to variable charges for excess mileage on operating leases.

Reinsurance premiums earned by the Group's insurance captive of £44.8m (2013: £nil) relate to the Group's fleet. Therefore, on consolidation, they are recognised as a reduction of insurance premiums paid as part of the Group's fleet operating costs.

5. Segmental analysis

The Group is organised into two main operating segments: Scheme Operations and Fleet Reinsurance. Fleet Reinsurance is not a reportable segment as it does not yet exceed any of the quantitative thresholds in IFRS 8. Accordingly, no segmental analysis is applicable.

6. Net operating costs

An analysis of the Group's net operating costs is provided below:

	2014 £m	2013 £m
Net book value of disposed operating lease assets	1,719.5	1,489.2
Fleet operating costs including insurance, maintenance and roadside assistance costs	560.2	543.0
Charitable donations	150.0	50.0
Other operating costs	58.3	52.7
Employee costs	43.5	43.8
Insurance claims expense	40.9	-
Other product costs including continuous mobility costs, adaptations support, communications	31.1	26.7
Legal and professional fees	11.6	15.5
Motability levy and rebates	10.8	8.0
Bad debt charges and movement in bad debt provisions	4.4	4.1
Management fees	0.8	0.8
Net operating costs before depreciation	2,631.1	2,233.8
Depreciation on assets used in operating leases	743.6	796.0
Depreciation and amortisation of property, plant and equipment and intangible assets	7.6	6.8
Net operating costs	3,382.3	3,036.6

The depreciation charge on assets used in operating leasing includes a £3.0m release (2013: £8.3m charge) relating to the change in estimate during the year of future residual values (see note 13).

Notes to the financial statements continued

7. Auditors' remuneration

	2014	2013
Auditors' remuneration: Audit fees for Group and Parent Company financial statements	£169,247	£144,900
Total audit fees	£169,247	£144,900
Audit fees paid on behalf of subsidiaries	£108,713	£96,600
Audit-related assurance services	£64,925	£46,575
Tax compliance services	£0	£0
Tax advisory services	£0	£0
Internal audit services	£0	£0
Other assurance services	£39,450	£24,150
Corporate finance services	£0	£0
Total other fees payable to Auditors	£213,088	£167,325

8. Employee costs

The average monthly number of persons employed on a full time equivalent basis (including Executive Directors) was:

Group

	2014	2013
Administrative staff	807	765

	2014 £m	2013 £m
The breakdown of staff costs is as follows:		
Wages and salaries	36.4	36.9
Social security costs	4.1	4.1
Other pension costs	3.0	2.8
Total employee costs	43.5	43.8

9. Finance costs

	2014 £m	2013 £m
Interest and charges on bank loans and overdrafts	20.4	21.9
Interest on debt issued under the Euro Medium Term Note Programme	148.2	142.4
Preference dividends	0.7	0.7
Total finance costs	169.3	165.0

10. Taxation

The major components of the Group tax expense are:

	2014 £m	2013 £m
Current tax		
Charge for the year	55.8	45.3
Adjustment in respect of prior years	(0.4)	-
Total	55.4	45.3
Deferred tax		
Origination and reversal of temporary differences	(0.2)	18.5
Adjustment in respect of prior years	0.4	-
Utilisation of pre-trading losses brought forward	0.1	-
Impact of change in UK tax rate	(9.1)	(54.0)
Total	(8.8)	(35.5)
Tax on profit	46.6	9.8

10. Taxation continued

The tax on the Group's profit before tax differs from the theoretical amount that would arise using the weighted average tax rate applicable to profit of the consolidated entities as follows:

	2014 £m	2013 £m
Profit before taxation	251.3	269.5
Tax calculated at appropriate tax rates applicable to profit	55.3	63.4
Expenses not deductible for tax purposes	0.4	0.4
Adjustment relating to prior year's deferred tax	0.4	-
Adjustments recognised in the current year in relation to the current tax of prior years	(0.4)	-
Re-measurement of deferred tax due to change in the UK corporation tax rate	(9.1)	(54.0)
Total tax on profit	46.6	9.8

The standard rate of corporation tax in the UK changed from 23% to 21% with effect from 1 April 2014. Accordingly, profits are taxed at 22% for this accounting period (2013: 23.5%).

An analysis of the impact of the change in UK tax rates is disclosed in note 27.

11. Intangible assets

Group	Total £m
Cost	
At 1 October 2012	16.3
Additions	-
At 1 October 2013	16.3
Additions	7.0
At 30 September 2014	23.3
Accumulated amortisation and impairment	
At 1 October 2012	8.5
Amortisation charge for the year	2.9
At 1 October 2013	11.4
Amortisation charge for the year	2.9
At 30 September 2014	14.3
Carrying amount	
At 1 October 2012	7.8
Additions	-
Amortisation	(2.9)
At 1 October 2013	4.9
Additions	7.0
Amortisation	(2.9)
At 30 September 2014	9.0

The intangible assets relate to IT projects held by the Company's wholly owned subsidiary Motability Operations Limited.

At 30 September 2014, the Group had entered into contractual commitments in respect of capital expenditure on intangible assets amounting to £6.1m (2013: £nil). These amounts relate to the IT system replacement project.

Notes to the financial statements continued

12. Property, plant and equipment Group

	Motor vehicles £m	Leasehold improvements £m	Fixtures, fittings and office equipment £m	Total £m
Cost				
At 1 October 2012	1.9	15.1	11.5	28.5

Additions	2,564.2
Depreciation	(796.0)
Transfer to inventory (note 14)	(1,508.2)
At 1 October 2013	5,572.6
Additions	2,817.9
Depreciation	(743.6)
Transfer to inventory (note 14)	(1,730.6)
At 30 September 2014	5,916.3

Residual values

Residual values represent the estimated net sale proceeds expected from the sale of the asset at the end of the leasing period. A review is undertaken at the balance sheet date using market data to identify net residual values which differ from the sum anticipated at the inception of the lease.

In addition, the assets' resale market value and disposal costs structure are monitored and the process of realising asset values is managed in order to seek to maximise the net sale proceeds.

The following residual values are included in the calculation of the net book value of fixed assets held for use in operating leases:

Years in which unguaranteed residual values are recovered

	2014 £m	2013 £m
No later than one year	1,366.6	1,370.0
Later than one year and not later than two years	1,378.5	1,244.4
Later than two years and not later than five years	1,804.0	1,575.7
Total exposure	4,549.1	4,190.1

Notes to the financial statements continued

13. Assets held for use in operating leases continued

The total unguaranteed residual value exposure presented above consists of the original priced residual values net of revisions in estimation (see the 'Critical accounting judgements' policy in note 3). The amounts resulting from change in estimate on the live fleet at the balance sheet date are detailed below, together with the timing of the effects on the income statement.

Effects of changes in estimates included in the unguaranteed residual values above

	2014 £m	2013 £m
Prior years	(31.8)	(41.0)
Current year	3.0	(8.3)
Amounts carried at 30 September	(28.8)	(49.3)
Amounts to be charged in future years	(87.6)	(84.9)
Total effect of changes in estimated residual value	(116.4)	(134.2)

The Group and Company as lessor

The future rentals receivable under non-cancellable operating leases with customers, calculated with reference to the relevant Disability Allowances, for each of the following three periods after the balance sheet date are:

	2014 Group £m	2013 Group £m	2014 Company £m	2013 Company £m
No later than one year	1,532.6	1,468.8	-	-
Later than one year and not later than two years	942.0	872.0	-	-
Later than two years and not later than five years	382.5	358.4	-	-
Total	2,857.1	2,699.2	-	-

14. Inventories

	2014 Group £m	2013 Group £m	2014 Company £m	2013 Company £m
Ex-operating lease assets held for sale	99.0	87.9	-	-
Provisions	(0.2)	(0.4)	-	-
Ex-operating lease assets held for sale (net)	98.8	87.5	-	-

Inventories represent the operating lease assets previously held for rental to others and which cease to be rented and become held for sale as of the balance sheet date. As of the balance sheet date, £0.2m has been provided against irrecoverable vehicles (2013: £0.4m). During the year there was a £0.2m release of provision and £nil written off (2013: £0.1m release in provision and £nil written off).

The cost of inventories recognised as expense and included in net operating costs amounted to £1,719.5m (2013: £1,489.2m).

The movements of the inventories in 2014 and 2013 are as follows:

	£m
At 1 October 2012	68.9
Transfer from operating lease assets (note 13)	1,508.2
Disposals	(1,489.2)
At 1 October 2013	87.9
Transfer from operating lease assets (note 13)	1,730.6
Disposals	(1,719.5)
At 30 September 2014	99.0

15. Investment in subsidiaries

	2014 £m	2013 £m
Investments in subsidiaries at 30 September	68.8	43.8

The Company's subsidiaries are set out below:

Directly owned	Proportion of all classes of issued share capital owned by the Company	Principal activity
Motability Operations Limited	100%	Operation of the Scheme
Motability Leasing Limited	100%	Financing of Scheme contract hire agreements
Motability Hire Purchase Limited	100%	Financing of Scheme hire purchase agreements
Route2mobility Limited	100%	Financing of Scheme powered wheelchair and scooter agreements
MO Reinsurance Limited	100%	Provision of the Scheme reinsurance arrangements

All of the above subsidiaries are incorporated in Great Britain, with the exception of MO Reinsurance Limited which is incorporated in the Isle of Man. The Directors consider the value of the investments to be supported by underlying assets.

During the year Motability Operations Group plc subscribed for 100,000,000 of MO Reinsurance Limited's shares partly paid at 25 pence per £1 share and paid up 25 pence on the subscriber share for a total contribution of £25,000,000.

Loans to Group companies

	2014 Group £m	2013 Group £m	2014 Company £m	2013 Company £m
Motability Leasing Limited	-	-	3,585.0	3,428.1
Total	-	-	3,585.0	3,428.1

	2014 Group £m	2013 Group £m	2014 Company £m	2013 Company £m
Loans to Group companies – current	-	-	-	43.1
Loans to Group companies – non-current	-	-	3,585.0	3,385.0
Total	-	-	3,585.0	3,428.1

The loans to Group companies do not have a defined maturity. The current balance represents interest, charged on an arm's length basis.

During the year the Company received interest payments of £215.8m (2013: £172.7) in respect of loans to Group companies.

16. Cash and cash equivalents

	2014 Group £m	2013 Group £m	2014 Company £m	2013 Company £m
Cleared balances	186.5	83.9	113.2	52.0
Cash in the course of collection	20.4	17.4	-	-
Cash and bank balances	206.9	101.3	113.2	52.0

	2014 Group £m	2013 Group £m	2014 Company £m	2013 Company £m
Cleared balances	-	-	-	-
Cash in the course of transmission	(80.4)	(59.2)	-	-
Bank overdrafts	(80.4)	(59.2)	-	-

Cash and bank balances comprise cash held by the Group and short-term bank deposits with an original maturity of three months or less. The carrying amount of these assets approximate to their fair value.

For the purposes of the statements of cash flows, cash and cash equivalents are as follows:

	2014 Group £m	2013 Group £m	2014 Company £m	2013 Company £m
Cash and bank balances	206.9	101.3	113.2	52.0
Bank overdrafts	(80.4)	(59.2)	-	-
Cash and cash equivalents	126.5	42.1	113.2	52.0

Notes to the financial statements continued

17. Hire purchase receivables

	2014 Group £m	2013 Group £m	2014 Company £m	2013 Company £m
Gross repayments receivable				
No later than one year	6.5	11.5	-	-
Later than one year and not later than five years	8.0	12.7	-	-
Total	14.5	24.2	-	-
Unearned income receivable				
No later than one year	(0.9)	(1.5)	-	-
Later than one year and not later than five years	(0.8)	(1.1)	-	-
Total	(1.7)	(2.6)	-	-
Net total within one year	5.6	10.0	-	-
Net total due in the second to fifth years inclusive	7.2	11.6	-	-
Present value of minimum hire purchase receivables	12.8	21.6	-	-

The average term of hire purchase agreements entered into is five years.

Hire purchase receivable balances are secured over the vehicles subject to hire purchase contracts. The Group is not permitted to sell or re-pledge the collateral in the absence of default by the customer.

The interest rate inherent in hire purchase agreements is fixed at the contract date. The effective interest rate ranges between 8% and 10% per annum, and reflects provision for early termination losses and other costs (2013: between 8% and 10%).

Hire purchase receivable balances include an allowance for estimated irrecoverable amounts of £0.2m (2013: £0.4m). This allowance has been made by reference to past default experience. During the year there was a £0.1m increase in provision and £0.3m of receivables were written off (2013: £0.8m increase in provision and £0.5m written off). There are no hire purchase receivables which are past due at the reporting date.

The fair value of the hire purchase receivables as at 30 September 2014 is estimated to be £12.9m (2013: £21.8m) using discount rates based on the market rate for similar consumer credit transactions.

18. Insurance receivables

	2014 Group £m	2013 Group £m	2014 Company £m	2013 Company £m
Insurance premium debtor	9.7	-	-	-
Claims recoveries and rebates	7.4	-	-	-
Reinsurance claims recoveries and commissions receivable	3.8	-	-	-
Total insurance receivables	20.9	-	-	-

The carrying value of insurance receivables approximates to fair value.

19. Trade and other receivables

	2014 Group £m	2013 Group £m	2014 Company £m	2013 Company £m
Trade receivables	120.9	82.4	-	-
Other receivables	75.2	67.0	-	-
Prepayments and accrued income	94.5	114.5	15.5	20.4
Total	290.6	263.9	15.5	20.4
Included in current assets	272.3	244.6	12.9	15.8
Included in non-current assets	18.3	19.3	2.6	4.6
Total	290.6	263.9	15.5	20.4

Trade receivables include an allowance for estimated irrecoverable amounts of £3.9m (2013: £3.7m). This allowance has been made by reference to past default experience. During the year there was a £4.5m increase in provision and £4.3m of receivables were written off (2013: £3.4m increase in provision and £3.3m written off). The average receivable days period is 11 days (2013: 5 days).

The Directors consider that the carrying value of trade and other receivables approximates to their fair value. All balances are non-interest bearing and denominated in Sterling.

19. Trade and other receivables continued

The Group's principal source of rental income is from customers who assign their allowances to the Group via the Department for Work and Pensions ("DWP") in order to access the Scheme. This process of assigning allowances ensures that the Group's rental income flows directly from the DWP to the Group and hence rental credit risk is very low. A small residual credit risk arises from miscellaneous customer billings, monies due from dealers, auction houses and vehicle manufacturers. The Group's management carries out regular credit assessments of the limits set for auction houses, manufacturers and dealers.

Included in the Group's trade receivable balance are receivables with a carrying value of £13.0m (2013: £6.5m) which are past due at the reporting date. The Group has not set aside provisions for these amounts as there has not been a significant change in credit quality and the amounts are still considered to be recoverable. The Group does not hold any collateral over these balances. The average past due period of these receivables is 15 days (2013: 7 days).

Ageing of past due but not impaired receivables:

	2014 Group £m	2013 Group £m	2014 Company £m	2013 Company £m
Past due by 1-30 days	10.9	6.0	-	-
Past due by 31-60 days	1.9	0.4	-	-
Past due by 61-90 days	0.1	0.1	-	-
Past due by 91-120 days	0.1	-	-	-
Past due by more than 120 days	-	-	-	-
Total	13.0	6.5	-	-

20. Deferred rental income

	2014 Group £m	2013 Group £m	2014 Company £m	2013 Company £m
Customers' advance payments (*)	108.3	108.8	-	-
Vehicle maintenance income	13.4	28.5	-	-
Vehicle insurance income	-	-	-	-
Customers' end of contract bonuses	38.4	42.4	-	-
Total current	160.1	179.7	-	-
Customers' advance payments (*)	113.8	104.3	-	-
Vehicle maintenance income	47.1	31.4	-	-
Vehicle insurance income	3.6	-	-	-
Customers' end of contract bonuses	28.2	27.8	-	-
Total non-current	192.7	163.5	-	-
Total	352.8	343.2	-	-

(*) Customers may choose a leased vehicle where the price exceeds the mobility allowance. In such cases they make an advance payment which is recognised over the life of the lease.

21. Insurance payables

	2014 Group £m	2013 Group £m	2014 Company £m	2013 Company £m
Reinsurance premiums payable	2.1	-	-	-
Commissions and administration fee payable	1.4	-	-	-
Claims reimbursements payable	6.5	-	-	-
Total insurance payables	10.0	-	-	-

The carrying value of insurance payables approximates to fair value.

Notes to the financial statements continued

22. Trade and other payables

	2014 Group £m	2013 Group £m	2014 Company £m	2013 Company £m
Trade payables	50.6	58.0	-	-
Social security and other taxes	1.3	1.2	-	-
Accruals	93.3	73.4	-	-
Other payables	0.1	0.2	116.9	80.7
Advance payments received from DWP	8.3	1.0	-	-
Total	153.6	133.8	116.9	80.7

Trade payables and accruals principally comprise amounts outstanding for trade purchases and ongoing costs.

The Group's trade purchases are predominantly purchases of vehicles which are paid immediately. The average credit periods taken for the other trade purchases, mainly insurance premiums, are 30 days (2013: 30 days).

The Directors consider that the carrying amount of trade and other payables approximates to their fair value.

23. General insurance provisions and insurance risk management

Insurance risk management

The risk arising under any one insurance contract consists of a combination of a) the possibility that the insured event occurs and b) the uncertainty of the amount of the resulting claim. By the very nature of an insurance contract, this risk is defined although occurrence is random and therefore unpredictable. The principal risks of insurance relate to underwriting and insurance provisions risk. Underwriting risks arise out of day-to-day activities in underwriting contracts of insurance as well as risks associated with outward reinsurance. Insurance provision risk is the possibility that insurance provisions prove to be inadequate to encompass all of the Group's obligations arising out of its insurance contracts and related expenses.

The Group manages this risk through a proactive approach, including:

- regular Board and insurance steering committee meetings, at which the claims information is analysed together with any material changes to the risk;
- the Board is responsible for the assessment of the total cost of risk and setting of premiums which are commensurate with the exposure, revisable on a six-monthly basis based upon actuarially forecast information;
- the purchase of reinsurance to protect against losses exceeding individual or cumulative risk tolerances;
- the insurance managers receiving claims data on a monthly basis, the content of which is reviewed and any unexpected movements queried;
- significant individual losses are notified separately and the development of claims is monitored; and
- appointment of independent third-party claims handlers, selected on the basis of their ability to manage significant claims volumes whilst negotiating efficient and equitable claims settlements.

The Directors of the Group are responsible for ensuring that the premiums charged under the insurance contracts are commensurate with the estimated value of claims, operation costs and any remaining exposure presented to the Group. For all risks, the quantum of individual claims is managed by a prescribed system of proactive claims handling by the appointed claims handler. A system of review is in place whereby all claims in excess of £250,000 are reported separately to the Group.

Motor insurance risks

The Group is providing 80% motor quota share reinsurance in respect of the fleet block insurance policy. Comprehensive cover is provided including motor own damage, motor third-party damage and motor third-party liability. Due to the nature of this class of business, the frequency and severity of insured losses is difficult to predict. The Group limits its exposure through the purchase of appropriate reinsurance.

Sources of uncertainty in the estimation of future claim payments

Claims in respect of the motor quota share reinsurance are payable on a loss occurring basis. The Group is liable for all insured events that occurred during the term of the contract. There are several variables that affect the amount and timing of cash flows from these contracts. These mainly relate to the timing of claims settlements. The estimated cost of claims includes direct expenses to be incurred in settling claims, net of the expected subrogation value and other recoveries. The Group takes all reasonable steps to ensure that it has appropriate information regarding its claims exposures. However, given the uncertainty in establishing claims provisions, it is possible that the final outcome will prove to be different from the original liability established.

The estimation of the incurred but not reported ('IBNR') reserve will be determined by utilising an actuarial assessment and based on historical claims experience.

In estimating the liability for the cost of reported claims not yet paid, the Group considers any information available from loss adjusters and legal advisers and information on the cost of settling claims with similar characteristics in previous periods.

23. General insurance provisions and insurance risk management continued

Reinsurance contracts

The Group has limited its motor risk exposure by the purchase of reinsurance. Quota share reinsurance has been purchased to protect the Group against any individual losses exceeding the Group's net retention of £25,000 (2013: £nil) each and every claim. Excess of loss reinsurance protects the Group against individual losses exceeding £5,000,000 (2013: £nil) each and every claim. Stop loss reinsurance protects the Group against accumulation of losses exceeding 123.9% (2013: 0%) of the Group's net earned premium income or £56,000,000 (2013: £nil) in the aggregate whichever is the lesser. Stop loss reinsurance cover is limited to a maximum of £11,500,000 (2013: £nil).

Claims which have not been recovered from reinsurers at the balance sheet date are included in 'Insurance Receivables' in the balance sheet and are deemed to be fully recoverable. The Group manages its reinsurance risk through:

- regular Board and insurance steering committee meetings, at which the reinsurance markets are considered;
- the Group's policy is to select only those reinsurers that have a minimum credit rating of A- or better;
- significant individual losses are notified separately and the development of the claim is monitored; and
- independent third-party reinsurance brokers are appointed on the basis of their ability to negotiate, recommend and place reinsurance with appropriate markets.

General insurance provisions

	2014 Group £m	2013 Group £m	2014 Company £m	2013 Company £m
Specific claims reserves	25.7	-	-	-
Incurred but not reported reserve	1.4	-	-	-
Total general insurance provisions	27.1	-	-	-

Specific claims reserves

Specific claims reserves are stated gross of losses recoverable from reinsurers. Claims provisions are based on assumptions regarding past claims experience and on assessments by an independent claims handler and are intended to provide a best estimate of the most likely or expected outcome. The ultimate liabilities will vary as a result of subsequent developments. Differences resulting from reassessment of the ultimate liabilities are recognised in subsequent financial statements.

	2014 Group £m	2013 Group £m	2014 Company £m	2013 Company £m
Motor quota share reinsurance				
Specific claims reserves	25.7	-	-	-
Third-party recoveries reserve	(5.4)	-	-	-
Reinsurance recoveries reserve	(3.7)	-	-	-
Total net retained	16.6	-	-	-

Incurred but not reported (IBNR)

The Group has appointed an independent actuary to undertake an actuarial study of the motor quota share reinsurance claims reserves for the 2013/14 underwriting year.

The independent actuary has used a combination of methods to determine the estimate. The methods adopted are summarised below:

Chain Ladder method

The chain ladder method uses the development profile of paid or incurred claims on historical accident years to project the more recent accident years to their ultimate position.

Expected Burning Cost method

This method takes an assumed initial expected burning cost and estimates the ultimate cost directly based on this initial expectation. The initial expected burning cost has been derived based on the historical ultimate cost (from the chain ladder method on either paid or incurred claims as deemed appropriate) adjusted for frequency and average severity inflation as appropriate.

Bornhuetter-Fergusson method

This method takes as a starting point an assumed initial expected burning cost and blends in the burning cost implied by the experience to date (based on the historical claim development pattern).

Average Cost per Claim method

This method uses an ultimate average cost multiplied by a selected ultimate number of claims. The ultimate number of claims has been derived using the chain ladder method for each claims type and band. The ultimate average cost has been derived by creating an average cost development triangle and then applying the chain ladder method.

The Directors have considered the report of the independent actuary and the pattern of development is believed to be sufficiently consistent period on period to provide an appropriate basis to establish additional reserves.

Notes to the financial statements continued

23. General insurance provisions and insurance risk management continued

Motor quota share reinsurance

The development of insurance liabilities provides a measure of the Group's ability to estimate the ultimate value of claims. The top half of each table below illustrates how the Group's estimate of total claims outstanding for each underwriting period has changed at successive period-ends. The bottom half of the table reconciles the cumulative claims to the amount appearing in the balance sheet. An underwriting-period basis is considered to be most appropriate for the business written by the Group.

	Underwriting year 2014 £m
Estimate of ultimate claims cost	
At end of reporting year	52.1
One year later	-
Two years later	-
Three years later	-
Four years later	-
Current estimate of cumulative claims	52.1
Cumulative payments to date	(22.4)
Effect of discounting	-
Total liability included in balance sheet	29.7

	Underwriting year 2014 £m
Estimate of ultimate claims cost net of reinsurance	
At end of reporting year	40.3
One year later	-
Two years later	-
Three years later	-
Four years later	-
Current estimate of cumulative claims	40.3
Cumulative payments to date	(22.3)
Effect of discounting	-
Total liability net of reinsurance included in balance sheet	18.0

Included within cumulative payments to date are amounts received relating to volume, referral and wholesale discounts from trade partners, which have reduced the cost of claims to the Group.

Total	3,637.1	3,477.1	3,556.7	3,417.9

All borrowings are denominated in (or swapped into) Sterling.

Bank borrowings

All bank borrowings as at 30 September 2014 and 2013 are at floating rates.

As at 30 September 2014 the Group has the following principal bank loans:

- A five-year term loan of £0.4 billion taken out on 30 December 2013 (2013: three-year term loan of £0.5 billion taken out on 19 January 2012). Loan repayment date is 31 December 2018.
- A five-year revolving credit facility of £1.5 billion taken out on 30 December 2013 (2013: five-year revolving credit facilities of £1.5 billion taken out on 19 January 2012) of which £nil was drawn as at 30 September 2014 (2013: £50m). Facility repayment date 31 December 2018.

All bank borrowings carry LIBOR interest rates plus bank margins at a market rate.

Debt issued under the Euro Medium Term Note Programme

The Company has a £4 billion Euro Medium Term Note Programme with denominations of GBP 50,000. The bonds were admitted to trading on London Stock Exchange's regulated market and have been admitted to the Official List. The £4 billion Euro Medium Term Note Programme of the Company is unconditionally and irrevocably guaranteed on a joint and several basis by three subsidiaries, namely Motability Operations Limited, Motability Leasing Limited and Motability Hire Purchase Limited. The payments of all amounts due in respect of notes will be unconditionally and irrevocably guaranteed on a joint and several basis by these companies.

Preference shares

Cumulative preference shares of £9,950,000 were issued on 30 June 2008 at an issue price of £1 per share. The shares carry interest at 7%. The preference shares of the Group are classified as a financial liability in accordance with the contractual obligation to deliver cash (both dividends and repayment of principal) to the shareholders on winding up as stated in the Memorandum and Articles of Association of the Company.

Non-current debt issued under the Euro Medium Term Note Programme (*)	2,808.8	3,169.5	2,808.8	3,169.5
Non-current bank loans	548.9	548.9	548.9	548.9
Non-current preference shares	10.0	13.1	10.0	13.1
Total	3,477.1	3,840.9	3,417.9	3,781.7

(*) Amounts are shown net of unamortised discount, fee and transaction costs.

As at 30 September 2014, the fair value of current and non-current bank loans approximates to their carrying values, because all the bank loans carry floating interest rates. The fair value of preference shares for disclosure purposes is estimated by discounting the cash flows at a discount rate which is derived from the yield curve at the balance sheet date. The fair value of the debt issued under the Euro Medium Term Note Programme for disclosure purposes is based on the market data at the balance sheet date.

25. Derivative financial instruments

	Group 2014		Company 2014	
	Fair value £m	Notional amounts £m	Fair value £m	Notional amounts £m

Cross-currency swaps

On 29 November 2010, the Group issued fixed-rate Eurobonds under its Euro Medium Term Note Programme at a nominal value of €500m. The Company entered into cross-currency swap arrangements to hedge its currency rate risk on this Eurobond debt. The EUR coupon rate of 3.75% is fully swapped into the GBP rate of 4.242%.

On 8 February 2012, the Group issued fixed-rate Eurobonds under its Euro Medium Term Note Programme at a nominal value of €550m. The Company entered into cross-currency swap arrangements to hedge its currency rate risk on this Eurobond debt. The EUR coupon rate of 3.25% is fully swapped into the GBP rate of 3.664%.

Interest rate swaps

At 30 September 2014, the fixed interest rates vary from 0.570% to 0.789% (2013: the fixed interest rates vary from 0.490% to 0.527%) and the main floating rates are LIBOR. Gains and losses recognised in the fair value reserve in equity on interest rate swap contracts as of 30 September 2014 will be continuously released to the income statement in accordance with the maturity of the swap contracts.

The following table details the contractual maturity of the Group's interest rate and cross-currency swap liabilities. The undiscounted cash flows are settled on a net basis.

	2014 Group £m	2013 Group £m	2014 Company £m	2013 Company £m
No later than one year	(4.0)	(4.0)	(4.0)	(4.0)
Later than one year and no later than three years	(8.0)	(8.2)	(8.0)	(8.2)
Later than three years and no later than five years	11.4	1.1	11.4	1.1
Later than five years	-	6.5	-	6.5
Total	(0.6)	(4.6)	(0.6)	(4.6)

Further details of derivative financial instruments are provided in note 36.

Notes to the financial statements continued

26. Provision for other liabilities

	Group £m
At 1 October 2013	1.5
Additional provision in the year	-
Utilised provision in the year	(1.5)
At 30 September 2014	-

	2014 £m	2013 £m
Analysis of total provisions		
Included in current liabilities	-	1.5
Included in non-current liabilities	-	-
Total	-	1.5

The provision for other liabilities was set up in respect of obligations arising due to dilapidations payable at the end of operating leases on the properties occupied by the Group. These provisions have been fully utilised within the financial year.

27. Deferred tax

The following are the deferred tax liabilities and assets recognised by the Group and Company and movements thereon during the current and prior reporting years.

Group	Accelerated tax depreciation £m	Short-term timing differences £m	Derivatives £m	Tax losses £m	Total £m
Net at 1 October 2012	469.1	(0.9)	(3.1)	-	465.1
Charge/(credit) to income	18.5	0.1	-	(0.1)	18.5
(Credit)/charge to income due to change in UK tax rate	(54.1)	0.1	-	-	(54.0)
Charge to equity	-	-	5.2	-	5.2
Credit to equity due to change in UK tax rate	-	-	(0.1)	-	(0.1)
Net at 1 October 2013	433.5	(0.7)	2.0	(0.1)	434.7
(Credit)/charge to income	(0.5)	0.3	-	-	(0.2)
Credit to income due to change in UK tax rate	(9.1)	-	-	-	(9.1)
Charge to equity	-	-	4.6	-	4.6
Credit to equity due to change in UK tax rate	-	-	(0.4)	-	(0.4)
Utilisation of pre-trading losses brought forward	-	-	-	0.1	0.1
Adjustment in respect of prior years	0.6	(0.2)	-	-	0.4
Net at 30 September 2014	424.5	(0.6)	6.2	-	430.1

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities (as the deferred taxes relate to the same fiscal authority). The presentation of the deferred tax on the balance sheet is as follows:

	2014 £m	2013 £m
Deferred tax assets	(2.8)	(2.5)
Deferred tax liabilities	432.9	437.2
Net at 30 September	430.1	434.7

As a result of the change to the UK corporation tax rate to 20% from 1 April 2015 the relevant deferred tax balances have been re-measured.

Deferred tax expected to reverse in the year to 30 September 2015 has been measured using the effective rate that will apply for the period (20.5%).

27. Deferred tax continued

Company	Accelerated tax depreciation £m	Short-term timing differences £m	Derivatives £m	Tax losses £m	Total £m
At 1 October 2012	-	-	(3.1)	-	(3.1)

At 1 October 2013	-	-	2.0	(0.1)	1.9
Charge to equity	-	-	4.6	-	4.6
Utilisation of pre-trading losses brought forward	-	-	-	0.1	0.1
Charge to equity due to change in UK tax rate	-	-	(0.4)	-	(0.4)
At 30 September 2014	-	-	6.2	-	6.2

28. Ordinary Share capital

The Company has one class of ordinary shares, which carry no rights to income.

	2014	2013
Authorised:		
100,000 Ordinary shares of £1 each	£100,000	£100,000
Issued and fully paid:		
50,000 Ordinary shares of £1 each	£50,000	£50,000

In accordance with the shareholders' agreement, the ordinary shareholders will not procure a dividend and, in the event of a winding up, all reserves surplus to the redeeming ordinary and preference share capital at par and outstanding dividends on the preference shares will be covenanted to Motability, the Charity.

The Company has 10,900,000 authorised 7% redeemable cumulative preference shares of £1 each, classified as a liability, of which 9,950,000 are in issue. These shares do not carry voting rights. Further details are provided in note 24.

29. Cash generated from/(used in) operations

Total net debt	(3,380.5)	(3,325.6)

31. Operating lease arrangements

The Group as lessee

	2014 Group £m	2013 Group £m
Minimum lease payments under operating leases recognised in the income statement in the year	2.9	3.3

At the balance sheet date, the Group had outstanding commitments for future minimum lease payments under non-cancellable operating leases which fall due as follows:

	2014 Group £m	2013 Group £m
No later than one year	3.3	2.8
Later than one year and no later than five years	13.0	12.9
Later than five years	23.0	26.4
Total	39.3	42.1

Operating lease payments represent rentals payable by the Group for use of office properties. Leases are negotiated for an average term of ten years and rentals fixed for an average of one year.

32. Retirement benefit schemes

The Motability Operations Limited pension plan is a non-contributory group personal pension (money purchase) scheme. The charge for the year to 30 September 2014 amounted to £2,995,107 (2013: £2, 847,218). Net contributions due at the balance sheet date were £117 (2013: £1,893).

33. Related parties

Transactions between the Company and its subsidiaries, which are related parties, have been eliminated on consolidation and are not disclosed in this note (see note 15 for the details of the intercompany transactions). The Group's corporate and finance structures are set out in the Strategic review on pages 2 to 29.

Related parties comprise Directors (and their close families and service companies), Motability (and its related charity the Motability Tenth Anniversary Trust) and the shareholder banks. Transactions entered into with related parties are in the normal course of business and on an 'arm's length' basis.

The relationship of the Company to Motability is set out in the Business overview.

Transactions

During the year Motability charitable grants totalling £23.4m (2013: £25.2m) were awarded to customers and paid to the Group to enable vehicles to be purchased on their behalf. The Group also paid £8.4m (2013: £6.8m) relating to Motability administration costs (the 'Motability levy').

A further £2.5m (2013: £2.8m) was paid by the Group to the Charity as rebates in respect of grant awards towards advance payments where customers terminated their hire agreements and rebates in respect of grants made where the Group-managed adaptations could not be processed.

In addition, £2.4m (2013: £1.2m) was paid by the Group as a rebate negotiated with Motability which effectively removes the risk pricing from vehicles acquired with charitable grants, and wheelchair accessible vehicles. The Group donated £4,120 (2013: £4,183) to Motability's charitable funds during the year.

In 2013, the Government launched a new benefit – the Personal Independence Payment (PIP) – which will gradually replace Disability Living Allowance (DLA) for disabled people aged between 16 and 64. During the reassessment process and transition from DLA to PIP it is expected that some people may lose their eligibility for the Motability Scheme.

The Group has worked closely with Motability to devise a transitional support package which includes charitable support grants from Motability (subject to conditions) of £2,000 for customers who joined the Scheme prior to January 2013 and £1,000 for customers joining the Scheme during calendar year 2013. During the year the Group has made an additional donation to Motability of £150m (2013: £nil) to fund this transitional support package.

The funding of the Group and the Company through bank loans is provided by the shareholder banks on commercial terms (see note 9 for details of financing costs on bank loans; £0.2m (2013: £0.1m) of bank charges were also paid during the year). Additionally, total fees of £0.8m (2013: £0.8m) were due to the shareholder banks in proportion to their shareholdings for management services. The reduction this year is because the banks have chosen to waive the advisory element of their fees.

During the year the Group made a donation of £nil (2013: £50m) to the Motability Tenth Anniversary Trust. The principal objective of the Tenth Anniversary Trust is to promote and support the objectives of Motability by making grants and investing in research and special projects to facilitate mobility needs.

Subsidiary, parent and ultimate controlling party

The Group is controlled by Motability Operations Group plc, the ultimate parent, which is registered in England and Wales. Details of principal subsidiary undertakings can be found in note 15.

Remuneration of key management personnel

The remuneration of the key management personnel who are the Directors of the Group is set out below in aggregate for each of the categories specified in IAS 24, 'Related Party Disclosures'.

	2014 £m	2013 £m
Short-term employee benefits	3.4	3.2
Post-employment benefits	0.1	0.1
Other long-term benefits	2.4	2.4
Total	5.9	5.7

Notes to the financial statements continued

34. Directors' remuneration

During the year there were five Executive Directors (2013: five) accruing benefits under money purchase pension schemes as well as receiving payments in lieu of pension. The Chairman makes separate provision for pension from his aggregate emoluments.

	2014	2013
Chairman		
Salary	£176,000	£176,000
Benefits	£19,750	£19,311
Aggregate emoluments in respect of qualifying services	£195,750	£195,311
Pension contributions under money purchase pension schemes	£nil	£nil
	2014	2013
Highest-paid Director		
Salary	£516,325	£501,900
Performance-related payments	£252,650	£245,850
Payments in lieu of pension (*)	£129,081	£125,475
Benefits	£24,996	£24,444
Aggregate emoluments in respect of qualifying services	£923,052	£897,669
Pension contributions under money purchase pension schemes	£nil	£nil
All Directors		
Salary	£2,065,623	£2,002,531
Performance-related payments	£813,850	£791,900
Payments in lieu of pension (*)	£366,505	£294,747
Benefits	£114,857	£113,366
Aggregate emoluments in respect of qualifying services	£3,360,835	£3,202,544
Pension contributions under money purchase pension schemes	£50,953	£109,422

(*) Payments in lieu of pension amounts relate to emoluments where the Remuneration Committee has agreed that Directors can opt to take taxable income instead of pension contribution entitlements under money purchase schemes.

Long Term Incentive Arrangements

In addition to the above, long-term incentive arrangements apply to the CEO and the Executive Directors. There are two programmes in place:

Long Term Incentive Plan (LTIP)

The Long Term Incentive Plan (LTIP) is linked to the Company's long-term objectives of maintenance of sufficient reserves, high levels of customer satisfaction and renewal levels, lease affordability and excellent business culture. Any payment is also determined by reference to the Company's external credit rating. The Plan aims to encourage sustained excellent performance and the retention of Directors.

The ownership structure of the Company precludes the use of shares or share options as long-term incentives. However, the Plan overtly and directly links any future payout with clear and unambiguous measures of sustained performance aligned to the Company's strategic objectives. Performance criteria are designed so that units allocated into the Plan can both increase and decrease in value. The main features of the LTIP are:

- The Remuneration Committee determines annually, on a discretionary basis, whether LTIP 'units' should be allocated to any Executive Director. The notional value of an allocated unit is £1,000, with the accumulated value varying (up or down) in subsequent years
- Potential payouts are deferred for three years
- The value of any potential payout is determined by annual assessment against specific performance requirements in respect of level of customer service, customer retention, lease affordability, reserves adequacy and business culture
- Potential payouts are also impacted by movements in the Company's credit rating.

On the third anniversary of the initial allocation of units into the LTIP, the accumulated units can be converted into cash and released. During the reported year to September 2014, in aggregate an initial allocation of 550 units was made into the Plan. These units will not become eligible for possible cash conversion until 2016 (2013: 550 units eligible for release in 2015).

During the year to September 2014, £2,188,500 was released including £666,065 for the highest paid Director in respect of the LTIP (2013: £666,065).

Long Term Incentive Scheme (LTIS)

The Long Term Incentive Scheme (LTIS) for the CEO was introduced in October 2010. It is a one-off, five-year programme. During the reported year to September 2014, no LTIS payments have been made (2013: £nil).

35. Events after the reporting period

There have been no events arising after the reporting date that require recognition or disclosure in the financial statements for the year ended 30 September 2014.

36. Funding and financial risk management

Capital risk management

The capital structure of the Group and the Company consists of debt, which includes the borrowings disclosed in note 24, net of cash and cash equivalents and equity capital. For capital risk management purposes the equity capital consists of equity share capital, preference share capital and restricted reserves. The hedging reserve relating to the fair value of swaps is excluded.

The Group's debt funding is provided through the Company via bank loans and debt issuance.

The objective of the Group's capital and reserves management policy is to ensure that the Group maintains adequate levels of equity capital and reserves to:

- Maintain the sustainability and longevity of the business through having adequate reserves to withstand the impact of potential macroeconomic, industry and company-specific shock events
- Provide relative stability of pricing and affordability to customers
- Provide confidence to lenders and credit rating agencies that allows the Group to raise sufficient funding at competitive rates.

As part of the capital and reserves management policy of the Group, any profits that arise in the Group are reinvested back into the Scheme for the benefit of disabled customers. The Banks as owners of the Group cannot access reserves (the ordinary shares do not carry any entitlement to dividend).

The Risk Management Committee reviews the capital structure and particularly the level of restricted reserves on a regular basis. The Group operates an Economic Capital methodology to determine the level of capital required in the business. In calculating the Minimum Capital Requirement, a comprehensive assessment of material risks and potential impacts is undertaken. The Economic Capital model is periodically refreshed to reflect changes to the risk profile.

The Group's policy is to ensure that capital remains above the calculated Minimum Capital Requirement at all times. The Group aims to hold capital at a level that is considered at least adequate to ensure that it can withstand a normalised cyclical market shock. The actual capital and the Minimum Capital Requirement at the year end are as follows:

	2014 £m	2013 £m
Actual capital (restricted reserves and equity share capital)	1,879	1,674
Minimum Capital Requirement	1,600	1,434
Actual capital held above Minimal Capital Requirement %	17%	17%

The Group's debt financing (bank loans) is subject to a customary loan covenant whereby the adjusted Total Group Assets:Total Net Debt ratio is targeted to be no less than 1.25:1. At 30 September 2014 the ratio was 1.79:1, and the Group has complied with the terms of the covenant throughout the year. The covenant ratio is reported on a monthly basis and reviewed by the Directors to ensure there is no breach of the covenant and to take appropriate action if necessary.

From the perspective of the Company, capital risk management is integrated with the capital risk management of the Group and is not managed separately.

Notes to the financial statements continued

36. Funding and financial risk management continued

Significant accounting policies

Details of the significant accounting policies and methods adopted in respect of each class of financial asset, financial liability and equity instrument, including the criteria for recognition, the basis of measurement and the basis on which income and expenses are recognised, are disclosed in note 2 to the financial statements.

IV Bearing interest at floating rate

The fair value of financial instruments traded in active markets is based on quoted market prices at the balance sheet date. The fair value of financial instruments that are not traded in active markets is determined by using valuation techniques. The following methods and assumptions were used to estimate the fair values of the financial instruments for disclosure purposes:

- the carrying value of cash and cash equivalents approximates to the carrying amount due to its short-term nature
- the carrying values less impairment provision of trade and other receivables and payables are assumed to approximate to their fair values due to the short-term nature of the trade receivables and payables
- the hire purchase receivables are interest bearing and the inherent interest rate is fixed at the contract date. The fair value of hire purchase receivables for disclosure purposes is estimated by a discount rate based on the market rate for similar consumer credit transactions
- the fair value of preference shares for disclosure purposes is estimated by discounting the cash flows using market data at the balance sheet date
- the fair value of debt issued under the Euro Medium Term Note Programme for disclosure purposes is based on market data at the balance sheet date
- the fair value of swaps is determined by discounting future cash flows using current market data at the balance sheet date.

Fair value of financial instruments continued

IFRS 13 requires that the classification of financial instruments at fair value be determined by reference to the source of inputs, grouped into Levels 1 to 3 based on the degree to which the fair value is observable:

- quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1)
- inputs other than quoted prices included within Level 1 that are observable for the assets or liabilities, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2)
- inputs for the assets or liabilities that are not based on observable market data (that is, unobservable inputs) (Level 3).

Financial risk management objectives

The Group's funding and financial risk is overseen and managed by the Asset and Liability Management Committee.

The Group's treasury function, operating under the control of the Asset and Liability Management Committee, monitors and manages the financial risks relating to the funding and treasury operations, as well as co-ordinating access to the financial markets. The Treasury Policy of the Group and the principles set out by the Policy are endorsed by the Board and applied through delegated authority to the Chief Executive Officer operating through the Executive Committee and the Asset and Liability Management Committee. The Treasury Policy and treasury control framework are overseen by the Audit Committee.

The risks of the Group arising from its funding activities include interest rate risk, foreign exchange risk, credit risk and liquidity risk. The Group's activities expose it primarily to the financial risks of changes in interest rates. The Group enters into interest rate swaps and issues fixed rate bonds to mitigate the risk of movements in interest rates. The Group does not enter into or trade financial instruments, including derivative financial instruments, for speculative purposes.

The Group's debt funding is provided through the Company via bank loans and capital markets issuance. As with the capital risk management, the overall funding and financial risk management of the Company is integrated with the funding and financial risk management of the Group and is not managed separately. As with the Group, the Company's operations expose it to a variety of financial risks that include interest rate risk, credit risk and liquidity risk. The Company's exposure to these risks is disclosed separately in the related sections below.

Interest rate risk management

The Group's revenues arise primarily from operating lease rentals, proceeds from disposal of operating lease assets and hire purchase repayments that are fixed for the period of the contract – typically three years for an operating lease contract. Apart from fixed rate bonds issued under the EMTN programme, the Group and the Company's borrowings are subject to floating interest rates. Borrowings arranged at floating rates of interest expose the Group and Company to cash flow interest rate risk, whereas those arranged at fixed rates of interest expose the Group and Company to fair value interest rate risk.

The Group and the Company seek to minimise cash flow interest rate risk by entering into fixed interest rate swaps to hedge floating rate borrowings. Interest rate swaps are employed to fix the interest rate profile of the borrowings and align these borrowings to the repayment profile of the assets. To the extent that borrowings at the balance sheet date will be used to fund new assets purchased during the year, the rentals will be set to reflect interest rates at the time the asset will be purchased. The Group's policy is that at least 90% of the total borrowings should be fixed in nature except where specific short-term dispensations are permitted (and commensurate with the overall funding policy). The Group only hedges the variable rate term borrowings; variable rate working capital facilities are not hedged.

Floating rate debt substantially swapped into fixed interest rates has a carrying value as at 30 September 2014 of £448m (2013: £549m).

Notes issued subject to fixed interest rates have a carrying value as at 30 September 2014 of £3,049m (2013: £2,809m).

The Group and the Company have interest rate swaps of £200m maturing on 29 December 2014 and £200m maturing on 29 December 2015 (2013: £400m maturing on 30 December 2013). Under these swaps the Group and the Company pay an average fixed rate of 0.68% (2013: 0.51%).

Foreign exchange risk

The Group is exposed to foreign exchange risk due to the issue of Euro-denominated fixed-rate bonds. This risk has been managed by use of a cross-currency swap to fix the exchange rate on all coupon and principal cash flows from the outset of the bond. In the event of any change in foreign exchange rates, there would be no material effect on the reserves of the Group and the Company.

Financial statements

Notes to the financial statements continued

36. Funding and financial risk management continued

Interest rate sensitivity analysis

The sensitivity analysis stated below is based on exposure to interest rates for both derivatives and non-derivative instruments at the balance sheet date. For floating rate liabilities, the analysis is prepared assuming the amount of liability outstanding at the balance sheet date was outstanding for the whole year.

In the event of any change in interest rates, there would be no material effect on the reserves of the Group and the Company. Although an increase in interest rates will lead to changes in interest payable on borrowings, this will be offset by a corresponding effect in either interest rate swaps or rental increases on new assets purchased during the year.

If average interest rates had been 1% higher and all other variables were held constant, this would have resulted, over a period of one year, in a pre-tax profit decrease of approximately £0.3m as at 30 September 2014 (2013: £0.2m). 1% is used to measure the sensitivity of average interest rates as it is an easily scalable base unit for readers to evaluate the impact on the Group of various changes in interest rates.

Interest rate swap contracts

Under interest rate swap contracts, the Group and the Company agree to exchange the difference between fixed and floating interest amounts calculated on agreed notional principal amounts. Such contracts enable the Group and the Company to mitigate the risk of changing interest rates on future cash flows on the variable rate debt held. The fair value of interest rate swaps at the reporting date is determined by discounting the future cash flows using a GBP market yield curve; the results are disclosed below. The average interest rate is based on the outstanding balances at the end of the financial year.

All interest rate swap contracts are designated as cash flow hedges in order to reduce the Group and the Company's cash flow exposure resulting from variable interest rates on borrowings. Interest rate swaps and floating rate borrowings re-fix and settle on the same day each month thereby minimising interest rate exposure further. Interest rate swaps settle net on a monthly basis.

The following table details the notional principal amounts and average interest rate of the swap contracts outstanding at the reporting date:

	2014 Average contract fixed interest rate %	2013 Average contract fixed interest rate %	2014 Nominal principal amount £m	2013 Nominal principal amount £m	2014 Fair value £m	2013 Fair value £m
No later than one year	0.57	0.51	200.0	400.0	-	-
Later than one year and no later than two years	0.79	-	200.0	-	0.1	-
Later than two years and no later than five years	-	-	-	-	-	-
Later than five years	-	-	-	-	-	-
Total			400.0	400.0	0.1	-

Cross-currency swap contract

Under the cross-currency swap contract, the Group and the Company agree to exchange Euro and Sterling amounts of the principal and fixed interest amounts calculated on the principal. This contract enables the Group and the Company to eliminate the risk of changing exchange rates on future cash flows on the foreign currency debt issued. The fair value of the cross-currency swap at the reporting date is determined by discounting the future cash flows using foreign currency spot rates; the results are disclosed below.

The cross-currency swap contract is designated as a cash flow hedge and reduces the Group and the Company's cash flow exposure resulting from variable exchange rates on borrowings. The cross-currency swap eliminates all exchange rate risk by settling on the same day as foreign currency liabilities.

The following table details the notional principal amount and average interest rate of the swap contract outstanding at the reporting date:

	2014 Contract fixed GBP interest rate %	2013 Contract fixed GBP interest rate %	2014 Nominal principal amount £m	2013 Nominal principal amount £m	2014 Fair value £m	2013 Fair value £m
No later than one year	-	-	-	-	-	-
Later than one year and no later than two years	-	-	-	-	-	-
Later than two years and no later than five years	3.94	-	885.0	-	(36.8)	-
Later than five years	-	3.94	-	885.0	-	1.5
Total			885.0	885.0	(36.8)	1.5

36. Funding and financial risk management continued

Credit risk management

Credit risk is managed using an established process encompassing credit limits, credit approvals, control of exposures and the monitoring and reporting of exposures. Credit risk may arise from cash and cash equivalents, derivative financial instruments and deposits with banks and financial institutions, as well as from credit exposures to customers.

The Group's principal source of income is the Department for Work and Pensions, through the assigned allowances received by customers of the Group, and therefore the credit risk is considered to be very low. A small residual credit risk arises from miscellaneous customer billings, monies due from dealers, auction houses and vehicle manufacturers. Group management regularly carries out credit assessments of the limits set for auction houses, manufacturers and dealers.

For banks and financial institutions, only independently rated institutions with a minimum 'A' rating are accepted. All new proposed counterparties are subject to internal credit approval and Asset and Liability Management Committee ratification prior to entering into any transaction. Credit limits are set by the treasury function and are subject to approval by the Asset and Liability Management Committee.

For the year under review the following figures represent the Group's total counterparty credit limit, the highest utilisation during the year and the balance as at 30 September 2014 and 2013 attributable to banks/financial institutions.

	2014 Total limit £m	2014 Maximum utilisation £m	Balance as at 30 September 2014 £m	2013 Total limit £m	2013 Maximum utilisation £m	Balance as at 30 September 2013 £m
Counterparty credit limit	630.0	378.4	203.6	310.0	193.3	67.7

No credit limits were exceeded during the reporting year and management does not expect any losses from non-performance by these counterparties.

The carrying amount of financial assets recorded in the financial statements, which is net of impairment losses, represents the Group's maximum exposure to credit risk. The limit and utilisation calculations consist of monies on deposit, asset fair value of derivatives and a calculated facility utilisation in respect of the interest rate swap notional principal amounts.

Liquidity risk management

The Group and the Company are exposed to changes in market conditions which in turn, and over time, could affect the provision of debt available to the Group.

Ultimate responsibility for liquidity risk management rests with the Board of Directors. The treasury policy has an appropriate liquidity risk management framework for the management of the Group and the Company's short, medium and long-term funding.

The Group policy for managing liquidity risk is to maintain undrawn headroom on its committed banking facilities of at least 20% of borrowings plus one year's projected funding growth. The Group has a five-year bank term loan with 4.3 years until maturity and a five-year revolving credit facility with 4.3 years until maturity. The Group has further increased the average maturity profile of the debt by issuing fixed rate bonds. The bonds, with average maturities of nine years, provide increased sustainability and diversity to the Group's funding profile.

The Group continuously monitors forecast and actual cash flows. Included in note 24 is a description of additional undrawn facilities that the Group has at its disposal.

The following tables detail the contractual maturity of the Group and the Company's non-derivative financial liabilities. The table has been drawn up based on the undiscounted amounts of the financial liabilities based on the earliest dates on which the Group and the Company can be required to discharge those liabilities. The table includes liabilities for both principal and interest.

Liquidity risk management continued

The following tables detail the Group and the Company's expected maturity for its non-derivative financial assets. The tables below have been drawn up based on the undiscounted contractual maturities of the financial assets including the interest that will be earned on those assets except where the Group and the Company anticipate that the cash flow will occur in a different period. Apart from hire purchase receivables the non-derivative financial assets are anticipated to mature within one year. The maturity of the hire purchase receivables is matched by the term borrowings.
