Deloitte LLP Statutory Auditor London United Kingdom For the year ended 31 December 2019

The directors, in preparing this strategic report, have complied with s414C of the Companies Act 2006. This strategic report has been prepared for the Group and therefore gives greater emphasis to those matters which are significant to WPP Jubilee Limited and its subsidiary undertakings when viewed as a whole.

Review of the business

WPP Jubilee Limited is a company incorporated in the UK and registered in England and Wales, under the Companies Act. The address of the registered office is Sea Containers House, 18 Upper Ground, London, SE1 9GL. The Company has acted as an intermediate holding company in the WPP group since its incorporation on 8 November 2012. As part of the Group's re-organisation during 2013, the Group put in place a new United Kingdom tax resident parent company by means of a scheme of arrangement pursuant to Article 125 of the Companies (Jersey) Law 1991.

The new scheme became effective on 2 January 2013, with WPP 2012 plc becoming the new parent company of the WPP Group and being renamed WPP plc. At the same time, the existing parent company of the WPP Group, WPP plc, was renamed WPP 2012 Limited. Under this scheme, all the shares in the Company were cancelled and the same number of new shares were issued to WPP plc, the new holding company of the WPP group. WPP Jubilee Limited is a subsidiary of WPP plc and as part of the Group re-organisation, the entire operations of the Group previously under Lexington International B.V. were transferred to WPP Jubilee Limited. The remaining Group continues to trade as normal.

With reference to the consolidated income statement on page 9, reported revenues from continuing operations were £13.2 billion (2018: £13.0 billion).

The number of people in the Group, including the Kantar disposal group and excluding associates, averaged 132,823 against 133,903 in 2018. At the end of 2019, staff numbers were 106,786 compared with 134,281 at the end of 2018. At 31 December 2019, net assets were £15,786.4 million compared with £15,988.4 million in 2018.

In addition, the performance of WPP plc, which includes the Group, is discussed in its annual report, which does not form part of this report and is available at wpp.com.

Key performance indicators

WPP Jubilee Limited is a wholly-owned subsidiary of WPP plc. For this reason, the Company's directors believe that further key performance indicators for the Company are not necessary or appropriate for an understanding of the development, performance or position of the business. The performance of WPP plc, which includes the Group, is discussed in its annual report which does not form part of this report.

Principal risks and uncertainties

The Group has considered the principal risks and uncertainties affecting the Group as at 31 December 2019 and up to the date of this report. These are described in detail in the annual report of WPP plc which does not form part of this report and is available at wpp.com.

Future developments

Prior to the Covid-19 pandemic, the directors expected the general level of activity to remain consistent with 2019 in the forthcoming year, with the prime focus on improving operating margin on revenue less pass-through costs, increasing flexibility in the cost structure and growth in revenue and revenue less pass-through costs.

The directors expect the impact of Covid-19 on our business to increase in the short term, but it is not possible to quantify the depth or duration of the impact. We are nonetheless confident that, through our scenario planning, we are well positioned to take further action if the downturn is prolonged and to respond positively when the market picks up.

At the end of March we announced a number of measures designed to minimise the impact of any downturn on our employees and ensure the Company is well prepared to weather the storm. First, we suspended our share buyback scheme and our 2019 final dividend so that our balance sheet and cash position are as healthy as possible. Second, the WPP Board and Executive Committee took a voluntary 20% cut in their fees or salary for an initial period of three months. And third, we began a comprehensive programme of cost reduction and cash conservation measures. We have also modelled a range of revenue declines resulting from the pandemic and, in the most extreme scenarios tested, considered further actions that could be taken to mitigate the impact on cash flow and ensure additional liquidity. In May 2020 we issued £250 million of 3.75% bonds due May 2032 and €750 million of 2.375% bonds due May 2027 which improved the Group's liquidity position further.

Details of significant events since the balance sheet date are contained in the notes to the financial statements.

Directors' report

For the year ended 31 December 2019

The directors present their annual report and the audited financial statements for the year ended 31 December 2019.

Results and dividends

The audited financial statements are set out on pages 9 to 181. The profit before taxation for the year from continuing operations was £1,120.4 million (2018: £1,373.9 million). The Company did not pay or declare any ordinary dividends during the year (2018: nil).

Group activities

The principal activity of the Group continues to be the provision of communications services worldwide. The Company acts only as a holding company and does not trade.

Risk management and financial instruments

Currency risk

The Group's results in pounds sterling are subject to fluctuation as a result of exchange rate movements. The Group does not hedge this translation exposure to its earnings but does hedge the currency element of its net assets using foreign currency borrowings, cross-currency swaps and forward foreign exchange contracts.

Interest rate risk

The Group is exposed to interest rate risk on both interest-bearing assets and interest-bearing liabilities. The Group has a policy of actively managing its interest rate risk exposure while recognising that fixing rates on all its debt eliminates the possibility of benefiting from rate reductions and similarly, having all its debt at floating rates unduly exposes the Group to increases in rates.

Going concern and liquidity risk

In considering going concern and liquidity risk, the Directors have reviewed the Group's future cash requirements and earnings projections. The Directors believe these forecasts have been prepared on a prudent basis and have also considered the impact of a range of potential changes to trading performance. The potential impact of Brexit has been considered and is not deemed to have a significant effect on this assessment. Given the strong cash generation of the business, its debt maturity profile and available facilities, the Directors believe the Group has sufficient liquidity to match its requirements for the foreseeable future.

Treasury activities

Treasury activity is managed centrally, from London, New York and Hong Kong, and is principally concerned with the monitoring of working capital, managing external and internal funding requirements and the monitoring and management of financial market risks, in particular interest rate and foreign exchange exposures.

Capital risk management

The Group manages its capital to ensure that entities in the Group will be able to continue as a going concern while maximising the return to stakeholders through the optimisation of the debt and equity bolance. The capital structure of the Group consists of debt, cash and cash equivalents and equity attributable to equity holders of the paramount issued capital, reserves and retained earnings.

Directors' report (continued) For the year ended 31 December 2019

Risk management and financial instruments (continued)

Given the significant uncertainty over the coming months generated by the emergence and spread of Covid-19, the Group continues to monitor its capital structure.

Credit risk

The Group's principal financial assets are cash and short-term deposits, trade and other receivables and investments, the carrying values of which represent the Group's maximum exposure to credit risk in relation to financial assets.

The Group's credit risk is primarily attributable to its trade receivables. The majority of the Group's trade receivables are due from large national or multinational companies where the risk of default is considered low.

The credit risk on liquid funds and derivative financial instruments is limited because the counterparties are banks with high credit-ratings assigned by international credit-rating agencies or banks that have been financed by their government.

Financial instruments

The Group utilises currency derivatives to hedge significant future transactions and cash flows and the exchange risk arising on translation of the Group's investments in foreign operations. The Group is a party to a variety of foreign currency derivatives in the management of its exchange rate exposures. The instruments purchased are primarily denominated in the currencies of the Group's principal markets.

The Group uses interest rate swaps as hedging instruments in fair value hedges to manage its exposure to interest rate movements on its borrowings.

More information on the Group's principal risks and risk management policies and financial instruments are set out in notes 26 and 27 of the consolidated financial statements.

Directors' duties

The Directors' of the Company, as those of all UK companies, must act in accordance with section 172 of the UK Companies Act 2006. As stated on page 3, this company acts only as a holding company and does not trade. Refer to pages 104-105 of the Annual Report of WPP plc available at wpp.com for more on how the Group directors meet their duty.

Directors' indemnities

The Company has made qualifying third party indemnity provisions for the benefit of its directors which were made during the year and remain in force at the date of this report.

Employees

Our non-discrimination and anti-harassment policies are included in our Group Code of Conduct. In the case of disability, our policy is to provide continuing employment and training wherever practicable. Refer to pages 68 to 70 of the Annual Report of WPP plc for more detail.

Directors' report (continued) For the year ended 31 December 2019

Directors

The directors who served throughout the year were as follows:

- D. Conaghan (appointed on 21 November 2019)
- A. Payne (appointed on 21 November 2019)
- C. van der Welle
- S. Winters (resigned on 6 December 2019)

Going concern

The directors are required to consider whether it is appropriate to adopt the financial statements on the basis that the Company and the Group are going concerns. The directors assess the Group's prospects on a regular basis through the financial reporting and planning process, business reviews at each WPP plc Board meeting, quarterly reviews of our businesses by the executive team and ongoing reviews of the Group's profitability, cash flows and funding requirements. The directors have considered the longer-term risks and opportunities for the Group and the potential impact of competition for talent and competition from consulting firms, technological disruption, climate change and regulation. The directors have also considered the impact of the Covid-19 pandemic which is adversely affecting and is expected to continue to adversely affect our business and our clients' and suppliers' businesses across all of the countries in which we operate. The Group has experienced and expects to continue to experience unpredictable reductions in demand for our services from clients in sectors impacted by the pandemic.

The Group's forecasts and projections, taking account of (i) reasonably possible declines in revenue less pass-through costs; and (ii) remote declines in revenue less pass-through costs for stress-testing purposes as a consequence of the Covid-19 pandemic from June 2020 onwards compared to 2019, considering the Group's bank covenant and liquidity headroom taking into account the suspension of share buybacks and the final dividend of 2019 and cost mitigation actions which are and which could be implemented, show that the Company and the Group would be able to operate with appropriate liquidity and within its banking covenants and be able to meet its liabilities as they fall due. The Group modelled a range of revenue less pass-through cost declines from 15% to over 35%. Other than the impact of the bond issuances noted in the strategic report, there have been no material changes to the Group's financial position since the issuance of the annual report of WPP plc that has impacted the Group's going concern considerations. The directors therefore have a reasonable expectation that the Company and the Group have adequate resources to continue in operational existence for the foreseeable future. Therefore, the Company and the Group continue to adopt the going concern basis in preparing the financial statements. Further details of the Group's financial position and borrowing facilities are described in note 26 of the consolidated financial statements.

Statement of disclosure of information to the auditor

So far as the directors currently in office are aware, there is no relevant audit information of which the Company's auditor is unaware; and the directors have taken all the steps that ought to have been taken as directors to make themselves aware of any relevant audit information and to establish that the Company's auditor is aware of that information.

Directors' responsibilities statement For the year ended 31 December 2019

Directors' responsibilities statement

The directors are responsible for preparing the Annual Report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the group financial statements in accordance with International Financial Reporting Standards (IFRSs) as adopted by the European Union and the parent company financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law). Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period.

In preparing the parent company financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- · make judgements and accounting estimates that are reasonable and prudent;
- state whether applicable UK accounting standards have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

In preparing the group financial statements, International Accounting Standard 1 requires that directors:

- · properly select and apply accounting policies;
- present information, including accounting policies, in a manner that provides relevant, reliable, comparable and understandable information;
- provide additional disclosures when compliance with the specific requirements in IFRS are insufficient to enable
 users to understand the impact of particular transactions, other events and conditions on the entity's financial position
 and financial performance; and
- make an assessment of the company's ability to continue as a going concern.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The directors are responsible for the maintenance and integrity of the corporate and financial information included on the company's website. Legislation in the United Kingdom governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Notes

The accompanying notes form an integral part of this consolidated statement of changes in equity.

¹ Other reserves are analysed in note 29.

² Acquisition of subsidiaries represents movements in retained earnings and non-controlling interests arising from changes in ownership of existing subsidiaries and recognition of non-controlling interests on new acquisitions.

³ The impact of the adaption of IFRS 16 Leades, rom 1 January 2019 is described in note 1.

1 Accounting policies

The consolidated financial statements of WPP Jubilee Limited and its subsidiaries (the Group) for the year ended 31 December 2019 have been prepared in accordance with International Financial Reporting Standards (IFRS) as adopted by the European Union as they apply to the financial statements of the Group for the year ended 31 December 2019. The Group's financial statements have also been prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board.

Basis of preparation

The consolidated financial statements have been prepared under the historical cost convention, except for the revaluation of certain financial instruments and held for sale assets. The financial statements have been prepared using the going concern basis of accounting. The principal accounting policies are set out below.

Basis of consolidation

The consolidated financial statements include the results of the Company and all its subsidiary undertakings made up to the same accounting date. All intra-Group balances, transactions, income and expenses are eliminated in full on consolidation. The results of subsidiary undertakings acquired or disposed of during the period are included or excluded from the consolidated income statement from the effective date of acquisition or disposal.

New IFRS accounting pronouncements

In the current year, the following Standards and Interpretations became effective:

- IFRS 16 Leases; and
- IFRIC 23 Uncertainty over Income Tax Treatments.

Impact of the adoption of IFRS 16 Leases

IFRS 16 is effective from 1 January 2019. The standard eliminates the classification of leases as either operating or finance leases and introduces a single accounting model. Lessees are required to recognise a right-of-use asset and related lease liability for their operating leases and show depreciation of leased assets and interest on lease liabilities separately in the income statement. IFRS 16 requires the Group to recognise substantially all of its operating leases on the balance sheet.

The Group adopted IFRS 16 effective 1 January 2019 on a modified retrospective basis and applied the standard retrospectively with the cumulative effect of initially applying the standard recognised at the date of initial application as an adjustment to retained earnings. Accordingly, prior year financial information has not been restated and will continue to be reported under IAS 17 Leases. The right-of-use asset and lease liability have initially been measured at the present value of the remaining lease payments, with the right-of-use asset being subject to certain adjustments. For certain leases the right-of-use asset was measured as if the standard had been applied from the lease commencement date and for others the right-of-use asset was set equal to the lease liability.

1 Accounting policies (continued)

When applying IFRS 16, the Group has applied the following practical expedients on transition date:

- Reliance on the previous identification of a lease (as provided by IAS 17) for all contracts that existed on the date of initial application;
- Reliance on previous assessments on whether leases are onerous instead of performing an impairment review;
- · Exclusion of initial direct costs from the measurement of the right-of-use asset at the date of initial application
- The accounting for operating leases with a remaining lease term of less than 12 months as at 1 January 2019 as short-term leases; and
- The use of hindsight, such as in determining the lease term if the contract contains options to extend or terminate the lease.

The right-of-use asset and lease liability recorded on the consolidated balance sheet as of 1 January 2019 were £1,895.1 million and £2,326.2 million, respectively. There was a reduction in other creditors of £233.5 million and property provisions of £68.7 million with regard to amounts related to property leases, including deferred rent and tenant improvement allowances, which are now recognised in the right-of-use asset. These movements resulted in a decrease to retained earnings of £128.9 million and the recognition of a deferred tax asset of £27.8 million on this movement.

For the year ended 31 December 2019, depreciation of the right-of-use asset and recognition of interest on the lease liability in the consolidated income statement replaced amounts recognised as rent expense under IAS 17. The implementation of IFRS 16 on 1 January 2019 resulted in an increase to reported and headline operating profit (as defined in note 2) of £61.0 million and a subsequent increase to operating profit margin of 0.6 margin points along with increased interest.

The following table reconciles the opening balance for the lease liabilities as at 1 January 2019 based upon the operating lease obligations as at 31 December 2018:

£m	
Operating lease commitments at 31 December 2018	3,628,2
Short-term and low-value leases not included in lease liabilities	(73.8)
Extension options reasonably certain to be exercised	115.1
Signed leases not yet commenced	(598.1)
Gross lease liabilities at 1 January 2019	3,071.4
Effect of discounting	(745.2)
Lease liabilities at 1 January 2019	2,326.2

The weighted average discount rate was 5.4% at 1 January 2019.

Impact of the adoption of IFRIC 23 uncertainty over income tax treatments

IFRIC 23 clarifies the accounting for uncertainties in income tax and is effective from 1 January 2019. There has been no impact to our financial statements as a result of the adoption of IFRIC 23.

1 Accounting policies (continued)

At the date of authorisation of these financial statements, the following amendments to standards, which have not been applied in these financial statements, were in issue but not yet effective:

Impact of Interest Rate Benchmark Reform, (Amendments to IFRS 9, IAS 39 and IFRS 7).

Impact of Interest Rate Benchmark Reform

The amendments issued by the IASB, Interest Rate Benchmark Reform (Amendments to IFRS 9, IAS 39 and IFRS 7), are mandatory and are effective from 1 January 2020. They provide relief on specific aspects of pre-replacement issues that impact hedge accounting, whereby entities applying hedge accounting requirements will be able to assume that the interest rate benchmark on which the hedged cash flows and cash flows of the hedging instrument are based are not altered as a result of Interest Rate Benchmark Reform. The Group does not consider that these amendments will have a significant impact on the financial statements as they provide relief for the possible effects of the uncertainty arising from interest rate benchmark reform.

Goodwill and other intangible assets

Intangible assets comprise goodwill, certain acquired separable corporate brand names, acquired customer relationships, acquired proprietary tools and capitalised computer software not integral to a related item of hardware.

Goodwill represents the excess of fair value attributed to investments in businesses or subsidiary undertakings over the fair value of the underlying net assets, including intangible assets, at the date of their acquisition.

Goodwill impairment reviews are undertaken annually or more frequently if events or changes in circumstances indicate a potential impairment. The carrying value of goodwill is compared to the recoverable amount, defined as the higher of fair value less costs to sell and value in use. The net present value of future cash flows is derived from the underlying assets using a projection period of up to five years for each cash-generating unit. After the projection period, a steady growth rate representing an appropriate long-term growth rate for the industry is applied. Any impairment is recognised immediately as an expense and is not subsequently reversed.

Corporate brand names, customer relationships and proprietary tools acquired as part of acquisitions of businesses are capitalised separately from goodwill as intangible assets if their value can be measured reliably on initial recognition and it is probable that the expected future economic benefits that are attributable to the asset will flow to the Group.

Certain corporate brands of the Group are considered to have an indefinite economic life because of the institutional nature of the corporate brand names, their proven ability to maintain market leadership and profitable operations over long periods of time and the Group's commitment to develop and enhance their value. The carrying value of these intangible assets is reviewed at least annually for impairment and adjusted to the recoverable amount if required.

Amortisation is provided at rates calculated to write off the cost less estimated residual value of each asset on a straight-line basis over its estimated useful life as follows:

- Brand names (with finite lives) 10–20 years.
- Customer-related intangibles 3–10 years.
- Other proprietary tools 3–10 years.
- Officer (including capitalised computer software) 3–5 years.

Contingent consideration

Contingent consideration is accounted for in accordance with IFRS 3 Business Combinations. Contingent consideration only applies to situations where contingent payments are not dependent on future employment of vendors and any such payments are expensed when they relate to future employment.

Future anticipated payments to vendors in respect of contingent consideration (earnout agreements) are initially recorded at fair value which is the present value of the expected cash outflows of the obligations. The obligations are dependent on the future financial performance of the interests acquired (typically over a four- to five-year period following the year of acquisition) and assume the operating companies improve profits in line with Directors' estimates. The Directors derive their estimates from internal business plans together with financial due diligence performed in connection with the acquisition.

Subsequent adjustments to the fair value are recorded in the consolidated income statement within revaluation of financial instruments.

Property, plant and equipment

Property, plant and equipment are shown at cost less accumulated depreciation and any provision for impairment with the exception of freehold land which is not depreciated. The Group assesses the carrying value of its property, plant and equipment to determine if any impairment has occurred. Where this indicates that an asset may be impaired, the Group applies the requirements of IAS 36 Impairment of Assets in assessing the carrying amount of the asset. This process includes comparing its recoverable amount with its carrying value. Depreciation is provided at rates calculated to write off the cost less estimated residual value of each asset on a straight-line basis over its estimated useful life, as follows:

- Freehold buildings 50 years.
- Leasehold land and buildings over the term of the lease or life of the asset, if shorter.
- Fixtures, fittings and equipment 3-10 years.
- Computer equipment 3-5 years.

Interests in associates and joint ventures

An associate is an entity over which the Group has significant influence. In certain circumstances, significant influence may be represented by factors other than ownership and voting rights, such as representation on the Board of Directors.

The Group's share of the profits less losses of associate undertakings net of tax, interest and non-controlling interests is included in the consolidated income statement and the Group's share of net assets is shown within interests in associates in the consolidated balance sheet. The Group's share of the profits less losses and net assets is based on current information produced by the undertakings, adjusted to conform with the accounting policies of the Group.

The Group assesses the carrying value of its associate undertakings to determine if any impairment has occurred. Where this indicates that an investment may be impaired, the Group applies the requirements of IAS 36 in assessing the carrying amount of the investment. This process includes comparing its recoverable amount with its carrying value. The recoverable amount is defined as the higher of fair value less costs to sell and value in use.

To the year ended 31 December 2019

1 Accounting policies (continued)

The Group accounts for joint venture investments under the equity method which is consistent with the Group's treatment of associates.

Other investments

Certain equity investments are designated as either fair value through other comprehensive income or fair value through profit or loss. Movements in fair value through profit or loss are recorded in the consolidated income statement within revaluation of financial instruments.

The Group generally elects to classify equity investments as fair value through other comprehensive income where the Group forms a strategic partnership with the investee.

Non-current assets held for sale and discontinued operations

Under IFRS 5 Non-current Assets Held for Sale and Discontinued Operations, where certain conditions are met, an asset or disposal group that is for sale should be recognised as "held for sale". An entity should classify a disposal group as held for sale if the carrying amount will be recovered principally through a sale transaction rather than through continuing use. For this to be the case, the disposal group must be available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such assets and its sale must be highly probable. Such assets are measured at the lower of carrying amount and fair value less costs to sell, and are not depreciated or amortised, excluding certain assets that are carried at fair value under IFRS 5. Furthermore, when an associate is classified as held for sale, equity accounting ceases.

A discontinued operation is a component of the entity that has been disposed of or is classified as held for sale and that represents a separate major line of business or geographical area of operations, is part of a single co-ordinated plan to dispose of such a line of business or area of operations, or is a subsidiary acquired exclusively with a view to resale. The profit or loss from a discontinued operation is shown as a single amount on the face of the income statement and the comparatives and related notes restated accordingly. This represents total post-tax profit of the disposal group for the whole of the financial year including any post-tax gain or loss on the measurement of fair value less costs to sell, as well as the post-tax loss on sale of the disposal group. Assets and liabilities classified as held for sale are shown as a separate line on the balance sheet.

Accrued and deferred income

Accrued income is a contract asset and is recognised when a performance obligation has been satisfied but has not yet been billed. Contract assets are transferred to receivables when the right to consideration is unconditional and billed per the terms of the contractual agreement.

In certain cases, payments are received from customers or amounts are billed with an unconditional right to receive consideration prior to satisfaction of performance obligations and recognised as deferred income. These balances are considered contract liabilities and are typically related to prepayments for third-party expenses that are incurred shortly after billing.

1 Accounting policies (continued)

Trade receivables and work in progress

Trade receivables are stated net of provisions for bad and doubtful debts.

Work in progress includes outlays incurred on behalf of clients, including production costs, and other third-party costs that have not yet been billed and are considered receivables under IFRS 15 Revenue from Contracts with Customers.

Expected credit losses

The Group has applied the simplified approach to measuring expected credit losses, as permitted by IFRS 9. Therefore the Group does not track changes in credit risk, but recognises a loss allowance based on the financial asset's lifetime expected credit loss.

Under IFRS 9 Financial Instruments, the expected credit losses are measured as the difference between the asset's gross carrying amount and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate. Given the short-term nature of the Group's trade receivables, work in progress and accrued income, which are mainly due from large national or multinational companies, the Group assessment of expected credit losses includes provisions for specific clients and receivables where the contractual cash flow is deemed at risk. Additional provisions are made based on the assessment of recoverability of aged receivables, where the following criteria are met:

- 100% of the asset aged over one year;
- 50% of the asset aged between 180 days and one year; and
- · sufficient evidence of recoverability is not evident.

Foreign currency and interest rate hedging

The Group's policy on interest rate and foreign exchange rate management sets out the instruments and methods available to hedge interest and currency risk exposures and the control procedures in place to ensure effectiveness.

The Group uses derivative financial instruments to reduce exposure to foreign exchange risk and interest rate movements. The Group does not hold or issue derivative financial instruments for speculative purposes.

Derivatives are initially recognised at fair value at the date a derivative contract is entered into and are subsequently remeasured to their fair value at each balance sheet date. The resulting gain or loss is recognised in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedge relationship.

At the inception of the hedge relationship the entity documents the relationship between the hedging instrument and hedged item, along with its risk management objectives and its strategy for undertaking various hedge transactions. Furthermore, at the inception of the hedge and on an ongoing basis, the Group documents whether the hedging instrument that is used in a hedging relationship is highly effective in offsetting changes in fair values or cash flows of the hedged item.

1 Accounting policies (continued)

Note 27 contains details of the fair values of the derivative instruments used for hedging purposes.

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recorded in profit or loss immediately, together with any changes in the fair value of the hedged item that is attributable to the hedged risk.

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow or net investment hedges is recognised in other comprehensive income and deferred in equity. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss. Amounts deferred in equity are recycled in profit or loss in the periods when the hedged item is recognised in profit or loss. However, when the forecast transaction that is hedged results in the recognition of a non-financial asset or a non-financial liability, the gains and losses previously deferred in equity are transferred from equity and included in the initial measurement of the cost of the asset or liability.

Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated, or exercised, or no longer qualifies for hedge accounting. At that time, any cumulative gain or loss on the hedging instrument recognised in equity is retained in equity until the forecast transaction occurs. If a hedged transaction is no longer expected to occur, the net cumulative gain or loss recognised in equity is transferred to net profit or loss for the period.

Derivatives embedded in other financial instruments or other host contracts are treated as separate derivatives when their risks and characteristics are not closely related to those of host contracts and the host contracts are not carried at fair value with unrealised gains or losses reported in the consolidated income statement.

Liabilities in respect of option agreements

Option agreements that allow the Group's equity partners to require the Group to purchase a non-controlling interest are treated as derivatives over equity instruments and are recorded in the consolidated balance sheet initially at the present value of the redemption amount in accordance with IAS 32 Financial Instruments: Presentation and subsequently measured at fair value in accordance with IFRS 9 Financial Instruments. The movement in the fair value is recognised as income or expense within revaluation of financial instruments in the consolidated income statement.

Derecognition of financial liabilities

In accordance with IFRS 9 Financial Instruments, a financial liability of the Group is only released to the consolidated income statement when the underlying legal obligation is extinguished.

Debt

Interest-bearing debt is recorded at the proceeds received, net of direct issue costs.

Borrowing costs

Finance costs of borrowing are recognised in the consolidated income statement over the term of those borrowings.

Revenue recognition

The Group is a leading worldwide creative transformation organisation offering national and multinational clients a comprehensive range of communications, experience, commerce and technology services. Contracts often involve multiple agencies offering different services in different countries. As such, the terms of local, regional and global contracts can vary to meet client needs and regulatory requirements. Consistent with the industry, contracts are typically short-term in nature and tend to be cancellable by either party with 90 days' notice. The Group is generally entitled to payment for work performed to date.

The Group is generally paid in arrears for its services. Invoices are typically payable within 30 to 60 days. Revenue comprises commissions and fees earned in respect of amounts billed and is stated exclusive of VAT, sales taxes and trade discounts. Pass-through costs comprise fees paid to external suppliers when they are engaged to perform part or all of a specific project and are charged directly to clients, predominantly media and data collection costs. Costs to obtain a contract are typically expensed as incurred as the contracts are generally short-term in nature.

In most instances, promised services in a contract are not considered distinct or represent a series of services that are substantially the same with the same pattern of transfer to the customer and, as such, are accounted for as a single performance obligation. However, where there are contracts with services that are capable of being distinct, are distinct within the context of the contract, and are accounted for as separate performance obligations, revenue is allocated to each of the performance obligations based on relative standalone selling prices.

Revenue is recognised when a performance obligation is satisfied, in accordance with the terms of the contractual arrangement. Typically, performance obligations are satisfied over time as services are rendered. Revenue recognised over time is based on the proportion of the level of service performed. Either an input method or an output method, depending on the particular arrangement, is used to measure progress for each performance obligation. For most fee arrangements, costs incurred are used as an objective input measure of performance. The primary input of substantially all work performed under these arrangements is labour. There is normally a direct relationship between costs incurred and the proportion of the contract performed to date. In other circumstances relevant output measures, such as the achievement of any project milestones stipulated in the contract, are used to assess proportional performance.

For our retainer arrangements, we have a stand ready obligation to perform services on an ongoing basis over the life of the contract. The scope of these arrangements are broad and generally are not reconcilable to another input or output criteria. In these instances, revenue is recognised using a time-based method resulting in straight-line revenue recognition.

The amount of revenue recognised depends on whether we act as an agent or as a principal. Certain arrangements with our clients are such that our responsibility is to arrange for a third party to provide a specified good or service to the client. In these cases, we are acting as an agent as we do not control the relevant good or service before it is transferred to the client. When we act as an agent, the revenue recorded is the net amount retained. Costs incurred with external suppliers (such as production costs and media suppliers) are excluded from revenue and recorded as work in progress until billed.

For the year ended 31 December 2019

1 Accounting policies (continued)

The Group acts as principal when we control the specified good or service prior to transfer. When the Group acts as a principal (such as in-house production services, events, data investment management and branding), the revenue recorded is the gross amount billed. Billings related to out-of-pocket costs such as travel are also recognised at the gross amount billed with a corresponding amount recorded as an expense.

Further details on revenue recognition are detailed by sector below:

Global integrated agencies

Revenue is typically derived from media placements and advertising services. Revenue may consist of various arrangements involving commissions, fees, incentive-based revenue or a combination of the three, as agreed upon with each client. Revenue for commissions on purchased media is typically recognised at the point in time the media is run.

The Group receives volume rebates from certain suppliers for transactions entered into on behalf of clients that, based on the terms of the relevant contracts and local law, are either remitted to clients or retained by the Group. If amounts are passed on to clients they are recorded as liabilities until settled or, if retained by the Group, are recorded as revenue when earned.

Variable incentive-based revenue typically comprises both quantitative and qualitative elements. Incentive compensation is estimated using the most likely amount and is included in revenue up to the amount that is highly probable not to result in a significant reversal of cumulative revenue recognised. The Group recognises incentive revenue as the related performance obligation is satisfied.

Public relations and specialist agencies

Revenue for these services is typically derived from retainer fees and fees for services to be performed subject to specific agreement. Most revenue under these arrangements is earned over time, in accordance with the terms of the contractual arrangement.

Discontinued operations (data investment management)

Revenue for market research services is typically recognised over time based on input measures. For certain performance obligations, output measures such as the percentage of interviews completed, percentage of regorts delivered to a client and the achievement of any project milestones stipulated in the contract are used to measure progress.

While most of the studies provided in connection with the Group's market research contracts are undertaken in response to an individual client's or group of clients' specifications, in certain instances a study may be developed as an off-the-shelf product offering sold to a broad client base. For these transactions, revenue is recognised when the product is delivered. When the terms of the transaction provide for licensing the right to access a product on a subscription basis, revenue is recognised over the subscription period, typically on a straight-line basis.

1 Accounting policies (continued)

Taxation

Corporate taxes are payable on taxable profits at current rates. The tax expense represents the sum of the tax currently payable and deferred tax.

The Group is subject to corporate taxes in a number of different jurisdictions and judgement is required in determining the appropriate provision for transactions where the ultimate tax determination is uncertain. In such circumstances, the Group recognises liabilities for anticipated taxes based on the best information available and where the anticipated liability is both probable and estimable, liabilities are classified as current. Any interest and penalties accrued are included in corporate income taxes both in the consolidated income statement and balance sheet. Where the final outcome of such matters differs from the amount recorded, any differences may impact the income tax and deferred tax provisions in the period in which the final determination is made.

The tax laws that apply to the Group's subsidiaries may be amended by the relevant tax authorities. Such potential amendments are regularly monitored and adjustments are made to the Group's tax liabilities and deferred tax assets and liabilities where necessary.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from net profit as reported in the consolidated income statement because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the balance sheet date.

Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and is accounted for using the balance sheet liability method. Deferred tax liabilities are recognised for all taxable temporary differences unless specifically excepted by IAS 12 Income Taxes. Deferred tax is charged or credited in the consolidated income statement, except when it relates to items charged or credited to other comprehensive income or directly to equity, in which case the deferred tax is also dealt with in other comprehensive income or equity. Deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised, which can require the use of accounting estimation and the exercise of judgement. Such assets and liabilities are not recognised if the temporary difference arises from the initial recognition of goodwill or other assets and liabilities (other than in a business combination) in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities are recognised for taxable temporary differences arising on investments in subsidiaries and associates, and interests in joint ventures, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

1 Accounting policies (continued)

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Group intends to settle its current tax assets and liabilities on a net basis.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised based on enacted or substantively enacted legislation.

Retirement benefit costs

The Group accounts for retirement benefit costs in accordance with IAS 19 Employee Benefits.

For defined contribution plans, contributions are charged to the consolidated income statement as payable in respect of the accounting period.

For defined benefit plans the amounts charged to operating profit are the current service costs, past service costs, administrative expenses and gains and losses on settlements and curtailments. They are included as part of staff costs. Past service costs are recognised immediately in the consolidated income statement when the related plan amendment occurs. Net interest expense is calculated by applying the discount rate to the recognised overall surplus or deficit in the plan.

Actuarial gains and losses are recognised immediately in the consolidated statement of comprehensive income.

Where defined benefit plans are funded, the assets of the plan are held separately from those of the Group, in separate independently managed funds. Pension plan assets are measured at fair value and liabilities are measured on an actuarial basis using the projected unit method and discounted at a rate equivalent to the current rate of return on a high-quality corporate bond of equivalent currency and term to the plan liabilities. The actuarial valuations are obtained at least triennially and are updated at each balance sheet date.

Recognition of a surplus in a defined benefit plan is limited based on the economic gain the Company is expected to benefit from in the future by means of a refund or reduction in future contributions to the plan, in accordance with IAS 19.

Provisions for liabilities and charges

Provisions comprise liabilities where there is uncertainty about the timing of settlement, but where a reliable estimate can be made of the amount. These include provisions for vacant space, sub-let losses and other property-related liabilities. Also included are other provisions, such as certain long-term employee benefits and legal claims, where the likelihood of settlement is considered probable.

1 Accounting policies (continued)

Leases

The Group has adopted IFRS 16 Leases from 1 January 2019. The Group leases most of its offices in cities where it operates. Other lease contracts include office equipment and motor vehicles.

At inception of a contract, the Group assesses whether a contract is, or contains, a lease based on whether the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

The Group recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured based on the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred, less any lease incentives received. The assets are depreciated over the shorter of the assets' useful life and the lease term using the straight-line method. The lease term includes periods covered by an option to extend if the Group is reasonably certain to exercise that option. Right-of-use assets are reviewed for indicators of impairment.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate for the same term as the underlying lease. Lease payments included in the measurement of lease liabilities comprise fixed payments less any lease incentives receivable and variable lease payments that depend on an index or a rate as at the commencement date. Lease modifications result in remeasurement of the lease liability.

Depreciation is recognised in both costs of services and general and administrative costs and interest expense is recognised under finance costs in the consolidated income statement.

The Group has elected to use the exemption not to recognise right-of-use assets and lease liabilities for short-term leases that have a lease term of 12 months or less and leases of low-value assets (under \$5,000). The payments associated with these leases are recognised as cost of services and general and administrative costs on a straight-line basis over the lease term.

In 2018 and 2017 leases were accounted for per IAS 17 Leases. The following policies were applicable:

Finance leases

Assets held under finance leases are recognised as assets of the Group at the inception of the lease at the lower of their fair value and the present value of the minimum lease payments. Depreciation on leased assets is charged to the consolidated income statement on the same basis as owned assets. Leasing payments are treated as consisting of capital and interest elements and the interest is charged to the consolidated income statement as it is incurred.

Operating leases

Operating lease rentals are charged to the consolidated income statement on a straight-line basis over the lease term. Any premium or discount on the acquisition of a lease is spread over the life of the lease on a straight-line basis.

1 Accounting policies (continued)

Translation of foreign currencies

Foreign currency transactions arising from normal trading activities are recorded at the rates in effect at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the year-end are translated at the year-end exchange rate. Foreign currency gains and losses are credited or charged to the consolidated income statement as they arise.

The income statements of overseas subsidiary undertakings are translated into pounds sterling at average exchange rates and the year-end net assets of these companies are translated at year-end exchange rates.

Exchange differences arising from retranslation of the opening net assets and on foreign currency borrowings (to the extent that they hedge the Group's investment in such operations) are reported in the consolidated statement of comprehensive income.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate.

Hyperinflation in Argentina

During 2019 and 2018, Argentina was designated as a hyperinflationary economy and the financial statements of the Group's subsidiaries in Argentina have been adjusted for the effects of inflation in accordance with IAS 29 Financial Reporting in Hyperinflationary Economies.

IAS 29 requires that the income statement is adjusted for inflation in the period and translated at the year-end foreign exchange rate and that non-monetary assets and liabilities on the balance sheet are restated to reflect the change in purchasing power caused by inflation from the date of initial recognition. In 2019, this resulted in an increase in goodwill of £41.0 million (2018: £105.8 million) and an increase in other intangibles of £7.1 million (2018: £19.5 million). The impact on other non-monetary assets and liabilities and the impact on the Group's income statement in the year were immaterial.

Share-based payments -

The Group issues equity-settled share-based payments (including share options) to certain employees and accounts for these awards in accordance with IFRS 2 Share-Based Payment. Equity-settled share-based payments are measured at fair value (excluding the effect of non-market-based vesting conditions) at the date of grant. Details regarding the fair value of equity settled share-based transactions are set out in notes 23 and 28.

The fair value determined at the grant date is recognised in the consolidated income statement as an expense on a straight-line basis over the relevant vesting period, based on the Group's estimate of the number of shares that will ultimately vest and adjusted for the effect of non-market-based vesting conditions.

Critical judgements in applying accounting policies

Management is required to make key decisions and judgements whilst acknowledging there is estimation uncertainty in the process of applying the Group's accounting policies. These estimates and judgements are reviewed on an ongoing basis. Where judgement has been applied or estimation uncertainty exists, the key factors taken into consideration are disclosed in the accounting policies and the appropriate note in these financial statements.

The most significant areas of estimation uncertainty include:

- Goodwill: The discounted cash flow methodology employed by the Group when testing for goodwill impairment
 requires estimates regarding revenue growth, operating margins, discount rates and working capital
 requirements. Further details of the methodology, discount rates, long-term growth rates and estimates used
 in relation to the goodwill impairment are set out in note 14.
- Payments due to vendors (earnout agreements) and liabilities in respect of put options: Estimates are required
 regarding growth rates in deriving future financial performance and discount rates to be applied when
 measuring the liabilities for earnouts and put options. Further details on growth rates and discount rates and
 the sensitivity to these estimates are set out in note 27.
- Provision for post-employment benefits: Estimates are required in the accounting for defined benefit pension
 plans, including establishing discount rates, rates of increase in salaries and pensions in payment, inflation and
 mortality assumptions. These estimates are made by management based on the advice of qualified advisors.
 Details of the assumptions used and the sensitivity of the benefit obligation to these assumptions are set out
 in note 24.
- Deferred consideration on the Kantar disposal: as per the terms of the Kantar disposal, deferred consideration
 consisted of amounts expected to be received in future periods on satisfaction of certain conditions and the
 deferral of consideration against services to be provided to Kantar in the future, as detailed in note 12.
 Estimates are required in determining amounts to be received and the value of services to be provided, taking
 into account uncertainty in the ultimate timing and resolution of each of these. The sensitivity to these estimates
 is specific to each individual circumstance and no individual estimate is expected to result in a material change
 to the amount recognised.
- Taxation: Estimates are required in determining whether a provision is required and, the amount of taxes that will be due, particularly given the many countries in which the Group operates. Where the final tax outcome is different from the amounts recorded then such differences may expose the Group to additional tax liabilities or impact the carrying value of deferred tax assets, which would affect the future tax charge. Further details on the tax charge, corporate income tax payable and deferred tax balances are set out in the income statement, balance sheet and notes 8 and 17.

1 Accounting policies (continued)

The most significant areas of judgements include:

- Revenue recognition: Judgement is required regarding the timing of recognition, particularly in relation to media
 volume income with regards to whether it is required to be passed back to the client and in assessing progress
 on performance obligations where revenue is recognised over time, particularly in the Group's Data Investment
 Management business. Further details are set out in the accounting policy.
- Non-current assets held for sale and discontinued operations: judgement is required for presenting the Group's Kantar business as discontinued operations, particularly with the timing of the held for sale classification. Further details are set out in note 12.

2 Segment information

The Group is a leading worldwide creative transformation organisation offering national and multinational clients a comprehensive range of communications, experience, commerce and technology services. Substantially all of the Group's revenue is from contracts with customers.

Recent restructuring actions, including the mergers of VMLY&R and Wunderman Thompson, the One Ogilvy strategy and the reorganisation of our specialist healthcare agencies, mean that certain units have been reclassified between the previously reported sectors. In order to take account of these changes, the internal reporting of the Group used by the Chief Executive Officer (the Chief Operating Decision Maker) to review performance and allocate resources has also changed. The Group has therefore reassessed its segment information under IFRS 8 Operating Segments. In assessing the Group's reportable segments, the Directors have considered the similar economic characteristics of certain operating segments, their shared client base and the similar nature of their products or services, amongst other factors. As a result, the Group is now organised into three reportable segments – Global Integrated Agencies; Public Relations; and Specialist Agencies. The Data Investment Management segment is now excluded from the segment analysis as it is classified as discontinued operations. Comparatives have been restated.

Reconciliation to non-GAAP measures of performance

Management includes non-GAAP measures as they consider these measures to be both useful and necessary. They are used by management for internal performance analyses; the presentation of these measures facilitates comparability with other companies, although management's measures may not be calculated in the same way as similarly titled measures reported by other companies; and these measures are useful in connection with discussions with the investment community.

Notes

In 2019, operating profit includes credits totalling £26.9 million (2018: £25.6 million) relating to the release of excess provisions and other balances established in respect of acquisitions completed prior to 2018. Further details of the Group's approach to acquisition reserves, as required by IFRS 3 Business Combinations, are given in note 30.

Amortisation and impairment of acquired intangibles in 2019 includes an impairment charge in the year of £26.5 million (2018: £89.1 million) in regard to certain brand names that are no longer in use and customer relationships where the underlying clients have been lost.

In 2013, the goodwill impairment charge of £47.7 million (2018: £183.9 million) relates to a number of underperforming businesses in the Group. In certain markets, the impact of current local economic conditions and trading circumstances on these businesses is sufficiently severe to indicate impairment to the carrying value of goodwill. In 2018, the goodwill impairment charge primarily relates to a charge of £148.0 million on VMYL&R.

¹ Prior year figures have been re-presented in accordance with IFRS 5 Non-current Assets Held for Sale and Discontinued Operations, as described in note 1.

3 Costs of services and general and administrative costs (continued)

Gains on disposal of investments and subsidiaries of £40.4 million in 2019 include a gain of £28.6 million on the disposal of the Group's interest in Chime. Gains on disposal of investments and subsidiaries of £237.9 million in 2018 include a gain of £185.3 million on the disposal of the Group's interest in Globant S.A.

In 2019, restructuring and transformation costs of £153.5 million comprise £116.3 million of restructuring costs and £37.2 million transformation costs with respect to strategic initiatives including co-locations in major cities, IT transformation and shared services. Restructuring and transformation costs of £121.1 million are in relation to the continuing restructuring plan, first outlined at the Investor Day in December 2018. As part of that plan, restructuring actions have been taken to right-size under-performing businesses, address high cost severance markets and simplify operational structures. Further restructuring and transformation costs will be incurred in 2020 and 2021. The remaining £32.4 million primarily comprises transformation costs in relation to the continuing global IT transformation programme.

In 2018, restructuring and transformation costs of £265.5 million comprise £179.7 million of restructuring costs and £85.8 million transformation costs with respect to strategic initiatives including co-locations in major cities, IT transformation and shared services. In the fourth quarter of 2018, £212.3 million of restructuring and transformation costs were incurred in relation to the strategic review of the Group's operations. The remaining £53.2 million primarily relates to restructuring costs recorded in the first half of 2018 and transformation costs in relation to the IT transformation programme.

In 2019, the Group received £16.8 million in settlement of a class action lawsuit against Comscore Inc. for providing materially false and misleading information regarding their company and its financial performance.

In March 2019, the Group entered into a sale and leaseback agreement for its office space at 3 Columbus Circle in New York. The Group sold the freehold for proceeds of £159.0 million and simultaneously entered into a 15-year lease. The net gain recognised from the sale and leaseback is £7.9 million.

Effective tax rate on profit before tax	24.5%	18.6%

Note

Factors affecting the tax charge in future years

Given the Group's geographic mix of profits and the changing international tax environment, the tax rate is expected to increase slightly over the next few years.

The tax charge may also be affected by the impact of acquisitions, disposals and other corporate restructurings, the resolution of open tax issues, and the ability to use brought forward tax losses. Changes in local or international tax rules, for example, as a consequence of the financial support programmes being implemented by government during the Covid-19 crisis, changes arising from the application of existing rules, or challenges by tax or competition authorities, for example, the European Commission's state aid decision into the Group Financing Exemption in the UK CFC rules, may expose the Group to additional tax liabilities are the company of the officers that assets which could affect the future tax charge.

¹ Prior year figures have been re-presented in accordance with IFRS 5 Non-current Assets Held for Sale and Discontinued Operations, as described in note 1.

² The Parent Company of the Group was tax resident in the UK. As the Group is subject to the tax rates of more than one country, it has chosen to present its reconciliation of the tax charge using the UK corporation rate of 19.0% (2018: 19.0%).

8 Taxation (continued)

The Group does not currently expect any material additional charges, or credits, to arise in respect of these matters, beyond the amounts already provided. Liabilities relating to these open and judgemental matters are based upon estimates of whether additional taxes will be due after taking into account external advice where appropriate. Where the final tax outcome of these matters is different from the amounts which were initially recorded then such differences will impact the current and deferred income tax assets and liabilities in the period in which such determination is made.

Tax risk management

We maintain constructive engagement with the tax authorities and relevant government representatives, as well as active engagement with a wide range of international companies and business organisations with similar issues. We engage advisors and legal counsel to obtain opinions on tax legislation and principles. We have a Tax Risk Management Strategy in place which sets out the controls established and our assessment procedures for decision-making and how we monitor tax risk. We monitor proposed changes in taxation legislation and ensure these are taken into account when we consider our future business plans. Our directors are informed by management of any tax law changes, the nature and status of any significant ongoing tax audits, and other developments that could materially affect the Group's tax position.

Sterling bonds The Group has in issue £400 million of 2.875% bonds due September 2046.

Revolving Credit Facility The Group has a five-year Revolving Credit Facility of \$2.5 billion due March 2024, signed in March 2019. The Group's borrowing under these facilities, which are drawn down predominantly in pounds sterling, averaged the equivalent of \$72 million in 2019. In June 2018, the Group's subsidiary, WPP AUNZ entered into a A\$150 million Revolving Credit Facility due June 2019 and a A\$370 million Revolving Credit Facility due June 2021. In May 2019, the A\$150 million Revolving Credit Facility was extended to June 2020. In December 2019, the A\$370 million Revolving Credit Facility was reduced to A\$270 million due June 2021. The Group's borrowings under the Australian dollar facilities which were drawn down in Australian dollars and New Zealand dollars, averaged the equivalent of A\$310 million in 2019. The Group had available undrawn committed credit facilities of £2,005.6 million at 31 December 2019 (2018: £2,074.7 million).

Borrowings under the \$2.5 billion Revolving Credit Facility are governed by certain financial covenants based on the results and financial position of the Group. Borrowings under the A\$150 million Revolving Credit Facility and the A\$270 million Revolving Credit Facility are governed by certain financial covenants based on the results and financial position of WPP AUNZ.

The \$2.5 billion Revolving Credit Facility, due March 2024, includes terms which require the consent of the majority of the lenders if a proposed merger or consolidation of the Company would alter its legal personality or identity. On 14 February 2020, the lending banks approved an extension of the term of the revolving credit facility to March 2025.

12 Assets held for sale and discontinued operations

In July 2019, the Group announced the proposed sale of its Kantar business to Bain Capital. On 5 December 2019 the first stage of the transaction completed, consisting of approximately 90% of the Kantar group, with consideration of £2,140.2 million after tax and disposal costs. The sale involved the Group disposing of the Kantar business and holding 40% equity stakes post-transaction which are treated as associates. This generated a pre-tax gain of £73.8 million, tax charge of £157.4 million and goodwill impairment of £94.5 million for the Group. The remaining stages of the transaction are expected to complete in 2020 with further consideration expected to be approximately £200 million after tax and disposal costs.

As outlined in the accounting policies, the criterion of a highly probable sale was met on 9 July 2019, following Board approval of the disposal of Kantar to Bain Capital, representing the date at which the appropriate level of management was committed to a plan to sell the disposal group. The Kantar disposal group therefore became held for sale on this date.

The Kantar group (both the portion that has been disposed of by year end and the portion that is expected to be disposed of in 2020) is classified as a discontinued operation under IFRS 5 as it forms a separate major line of business and there was a single co-ordinated plan to dispose of it. Kantar represents materially all of the Data Investment Management segment of the Group.

As at 31 December 2019 the remaining portion of the company not yet sold is disclosed as held for sale.

¹ Proceeds on disposal of investments and subsidiaries includes return on capital from investments in associates.

² Bank overdrafts are included in cash and cash equivalents because they form an integral part of the Group's cash management.

Notes

12 Assets held for sale and discontinued operations (continued)

¹ Re-investment in equity stake represents the value of the Group's 40% stake in the new Kantar group as part of the disposal. ² Deferred consideration is made up of £79.6 million expected to be received in future periods on the satisfaction of certain conditions and the deferral of £78.0 million consideration against services the Group will supply to Kantar on favourable terms in the future. The conditions expected to be met in the future include the settlement of ongoing legal cases, realisation of the value of certain investments and the utilisation of certain tax losses and allowances. There was uncertainty at the date of disposal in regard to the ultimate resolution of these items and estimates of amounts due to be received were required to be made; there were no individually material estimates. Future services provided by the Group to Kantar arose through the negotiation of Transition Service Arrangements, as is customary for a disposal of this magnitude. The Group will support Kantar for a period of up to 4 years, primarily in the area of IT, on terms which are favourable to the disposal group. As such, an element of consideration has been deferred and will be recognised as the services are provided.

Other goodwill represents goodwill on a large number of cash-generating units, none of which is individually significant in comparison to the total carrying value of goodwill.

Separately identifiable brands with an indefinite life are carried at historical cost in accordance with the Group's accounting policy for intangible assets. The carrying values of the other brands with an indefinite useful life are not individually significant in comparison with the total carrying value of brands with an indefinite useful life.

Acquired intangible assets at net book value at 31 December 2019 include brand names of £218.6 million (2018: £361.2 million), customer-related intangibles of £100.6 million (2018: £220.6 million), and other assets (including proprietary tools) of £4.4 million (2018: £13.0 million).

The total amortisation and impairment of acquired intangible assets of £121.5 million (2018; £201.8 million) includes an impairment charge of £26.5 million (2018; £89.1 million) comprising £21.4 million in regard to certain brand names that are no longer in use, including £13.2 million for brands with an indefinite life and £5.1 million in regard to customer relationships where the underlying clients have been lost. £13.2 million of the impairment charge relates to the Public Relations segment, £13.0 million of the impairment charge relates to the Global Integrated Agencies segment, and £0.3 million relates to the Specialist Agencies segment. In addition, the total amortisation and impairment of acquired intangible assets includes £5.5 million (2018; £0.7 million) in relation to associates.

14 Intangible assets (continued)

In accordance with the Group's accounting policy, the carrying values of goodwill and intangible assets with indefinite useful lives are reviewed for impairment annually or more frequently if events or changes in circumstances indicate that the asset might be impaired.

The impairment review is undertaken annually on 30 September. The goodwill impairment charge of £47.7 million (2018: £183.9 million) relates to a number of under-performing businesses in the Group. In certain markets, the impact of local economic conditions and trading circumstances on these businesses was sufficiently severe to indicate impairment to the carrying value of goodwill. In 2018, the goodwill impairment charge primarily relates to a charge of £148.0 million on VMLY&R with the remaining £35.9 million relating to a number of under-performing businesses in the Group.

Under IFRS, an impairment charge is required for both goodwill and other indefinite-lived assets when the carrying amount exceeds the "recoverable amount", defined as the higher of fair value less costs to sell and value in use. The review assessed whether the carrying value of goodwill and intangible assets with indefinite useful lives was supported by the value in use determined as the net present value of future cash flows.

Due to a significant number of cash-generating units, the impairment test was performed in two steps. In the first step, the recoverable amount was calculated for each cash generating unit using a conservative pre-tax discount rate of 8.5% (2018: 9.0%), and assumed a long-term growth rate of 3.0% (2018: 3.0%). The pre-tax discount rate of 8.5% was above the range of rates calculated for each of the global networks and for smaller cash-generating units that operate primarily in a particular region where we calculated a discount rate to be higher than 8.5%, that higher discount rate was used in the impairment test. Management have made the judgement that the long-term growth rate does not exceed the long-term average growth rate for the industry.

The recoverable amount was then compared to the carrying amount. Cash-generating units where the recoverable amount exceeded the carrying amount by a considerable margin were not considered to be impaired. Those cash-generating units where the recoverable amount did not exceed the carrying amount or where the recoverable amount exceeded the carrying amount by less than 25% were then further reviewed in the second step.

In the second step, the cash-generating units were retested for impairment using more specific assumptions. This included using a cash-generating unit specific pre-tax discount rate and management forecasts for a projection period of up to five years, followed by an assumed long-term growth rate of 3.0% (2018: 3.0%). If the recoverable amount using the more specific assumptions did not exceed the carrying value of a cash-generating unit, an impairment charge was recorded.

Pre-tax discount rates were calculated for the geographic regions in which the cash-generating units operate based on market assessments of the weighted average cost of capital. These assessments considered the time-value of money and risks specific to the asset for which the future cash flow estimates had not been adjusted, giving a range of pre-tax discount rates from 4.1% to 13.6% (2018: 6.2% to 16.3%).

Notes to the conscillated financial statements (continued) For the year ended 31 December 2019

14 Intangible assets (continued)

Discount rates for each of the cash generating units that operate globally were based on a weighting of the regional rates by its geographic distribution of cash flows, ranging from 6.3% to 7.4% (2018: 8.0% to 8.7%). The cash generating units were initially tested for impairment in the first step using a conservative discount rate of 8.5% (2018: 9.0%).

Our approach in determining the recoverable amount utilises a discounted cash flow methodology, which necessarily involves making numerous estimates and assumptions regarding revenue growth, operating margins, appropriate discount rates and working capital requirements. The key assumptions used for estimating cash flow projections in the Group's impairment testing are those relating to revenue growth and operating margin. The key assumptions take account of the businesses' expectations for the projection period. These expectations consider the macroeconomic environment, industry and market conditions, the unit's historical performance and any other circumstances particular to the unit, such as business strategy and client mix.

These estimates will likely differ from future actual results of operation and cash flows, and it is possible that these differences could be material. In addition, judgements are applied in determining the level of cash-generating unit identified for impairment testing and the criteria used to determine which assets should be aggregated. A difference in testing levels could affect whether an impairment is recorded and the extent of impairment loss.

Changes in our business activities or structure may also result in additional changes to the level of testing in future periods. Further, future events could cause the Group to conclude that impairment indicators exist and that the asset values associated with a given operation have become impaired. The recoverable amount of goodwill represents valuations as at 31 December 2019 and does not consider the impact of the emergence and spread of the Covid-19 virus. Given the adverse impact of the Covid-19 pandemic on the global economy and the likely revenue declines that are expected as a result, there is an increased likelihood of impairments to goodwill and other indefinite lived intangible assets in future reporting periods. At the current time, given the level of uncertainty, such impact has not been quantified and any resulting impairment loss could have a material impact on the Group's financial condition and results of operations.

Historically our impairment losses have resulted from a specific event, condition or circumstance in one of our companies, such as the loss of a significant client. As a result, changes in the assumptions used in our impairment model have not had a significant effect on the impairment charges recognised and a reasonably possible change in assumptions would not lead to a significant impairment. The carrying value of goodwill and other intangible assets will continue to be reviewed at least annually for impairment and adjusted down to the recoverable amount if required.

At 31 December 2019, capital commitments contracted, but not provided for in respect of property, plant and equipment, were £165.0 million (2018: £28.4 million). The increase is due to a number of significant property decolorments in North America, UK and Western Continental Europe.

16 Interests in associates, joint ventures and other investments (continued)

The investments included above as "other investments" represent investments in equity securities that present the Group with opportunity for return through dividend income and trading gains. They have no fixed maturity or coupon rate. The fair values of the listed securities are based on quoted market prices. For unlisted securities, where market value is not available, the Group has estimated relevant fair values on the basis of publicly available information from outside sources.

The carrying values of the Group's associates and joint ventures are reviewed for impairment in accordance with the Group's accounting policies.

The fair value of other investments represents valuations as at 31 December 2019 and does not consider the impact of the emergence and spread of the Covid-19 virus.

The Group's principal associates and joint ventures at 31 December 2019 included:

17 Deferred tax

The Group's deferred tax assets and liabilities are measured at the end of each period in accordance with IAS 12. The recognition of deferred tax assets is determined by reference to the Group's estimate of recoverability, using models where appropriate to forecast future taxable profits.

Deferred tax assets have only been recognised for territories where the Group considers that it is probable that all or a portion or the deferred tax assets will be realised. The main factors that we consider include:

- The future earnings potential determined through the use of internal forecasts;
- The cumulative losses in recent years;
- The various jurisdictions in which the potential deferred assets arise;
- The history of losses carried forward and other tax assets expiring;
- The timing of future reversal of taxable temporary differences;
- The expiry period associated with the deferred tax assets; and
- The nature of the income that can be used to realise the deferred tax asset.

If it is probable that some portion of these assets will not be realised, then no asset is recognised in relation to that portion.

If market conditions improve and future results of operations exceed our current expectations, our existing recognised deferred tax asset may be adjusted, resulting in future tax benefits. Alternatively, if market conditions deteriorate further or future results of operations are less than expected, future assessments may result in a determination that some or all of the deferred tax assets are not realisable. As a result, all or a portion of the deferred tax asset may need to be reversed.

Certain deferred tax assets and liabilities have been offset as they relate to the same tax group. The following is the analysis of the deferred tax balances for financial reporting purposes:

	Gross 2019 £m	Offset 2019 £m	As reported 2019 £m	Gross 2018 £m	Offset 2018 £m	As reported . 2018

17 Deferred tax (continued)

At the balance sheet date, the Group has gross tax losses and other temporary differences of £6,475.6 million (2018: £6,638.6 million) available for offset against future profits. Deferred tax assets have been recognised in respect of the tax benefit of £1,856.6 million (2018: £1,763.4 million) of such tax losses and other temporary differences. No deferred tax asset has been recognised in respect of the remaining £4,619.0 million (2018: £4,875.2 million) of losses and other temporary differences as the Group considers that there will not be enough taxable profits in the entities concerned such that any additional asset could be considered recoverable. Included in the total unrecognised temporary differences are losses of £60.7 million (2018: £46.4 million) that will expire within 1-10 years, and £4,437.6 million (2018: £4,572.6 million) of losses that may be carried forward indefinitely.

At the balance sheet date, the aggregate amount of the temporary differences in relation to the investment in subsidiaries for which deferred tax liabilities have not been recognised was £2,165.3 million (2018: £1,768.5 million). No liability has been recognised in respect of these differences because the Group is in a position to control the timing of the reversal of the temporary differences and the Group considers that it is probable that such differences will not reverse in the foreseeable future.

20 Trade and other payables: amounts falling due after more than one year (continued)

As of 31 December 2019, the potential undiscounted amount of future payments that could be required under the earnout agreements for acquisitions completed in the current year and for all earnout agreements ranges from £nil to £14 million (2018: £nil to £179 million) and £nil to £1,110 million (2018: £nil to £1,960 million), respectively. The decrease in the maximum potential undiscounted amount of future payments for all earnout agreements is due to earnout arrangements that have completed and payments made on active arrangements during the year, disposal related to the Kantar sale and exchange adjustments, partially offset by earnout arrangements related to new acquisitions.

22 Provisions for liabilities and charges (continued)

The Company and various of its subsidiaries are, from time to time, parties to legal proceedings and claims which arise in the ordinary course of business. The directors do not anticipate that the outcome of these proceedings and claims will have a material adverse effect on the Group's financial position or on the results of its operations.

23 Share-based payments

Charges for share-based incentive plans over continuing operations were as follows:

2019	20181
£m	£m
66.0	78.3
	£m

Note

Share-based payments comprise charges for stock options and restricted stock awards to employees of the Group. All share options are over the share capital of WPP plc.

As at 31 December 2019, there was £140.7 million (2018: £146.0 million) of total unrecognised compensation cost related to the Group's restricted stock plans. That cost is expected to be recognised over a period of one to two years.

Further information on stock options is provided in note 28.

Restricted stock plans

The Group operates a number of equity-settled share incentive schemes, in most cases satisfied by the delivery of WPP plc stock from one of the Group's ESOP Trusts. The most significant current schemes are as follows:

Executive Performance Share Plan (EPSP)

This scheme is intended to reward and incentivise the most senior executives of the Group. The performance period is five complete financial years, commencing with the financial year in which the award is granted. The vest date will usually be in the Merch following the end of the five-year performance period. Vesting is conditional on continued employment throughout the vesting period.

The 2019 EPSP awards are subject to a relative TSR performance condition, with a Return on Invested Capital (ROIC) underpin. TSR performance will be compared to companies representing the most relevant, listed global competitors, with performance below median resulting in zero vesting. Performance between median and upper decile provides for a vesting opportunity of between 15% and 100%. The awards will vest subject to a ROIC underpin of an average of 7.5% over the performance period. The Compensation for a large large discretion of discretion determine the extent to which the award will vest

¹ Prior year figures have been re-presented in accordance with IFRS 5 Non-current Assets Held for Sale and Discontinued Operations, as described in the accounting policies.

Notes to the consolidated financial statements (continued) For the year ended 31 December 2019

23 Share-based payments (continued)

For EPSP awards granted between 2013 and 2018 there are three performance criteria, each constituting one-third of the vesting value, and each measured over this five-year period:

- (i) TSR against a comparator group of companies. Threshold performance (equating to ranking in the 50th percentile of the comparator group) will result in 20% vesting of the part of the award dependent on TSR. The maximum vest of 100% will arise if performance ranks in the 90th percentile, with a sliding scale of vesting for performance between threshold and maximum.
- (ii) Headline diluted earnings per share. Threshold performance (7% compound annual growth) will again result in a 20% vest. Maximum performance of 14% compound annual growth will give rise to a 100% vest, with a sliding vesting scale for performance between threshold and maximum.
- (iii) Return on equity (ROE). Average annual ROE defined as headline diluted EPS divided by the balance sheet value per share of shareholders' equity. Threshold performance ranges between 10-14% average annual ROE and maximum performance ranges between 14-18%, with a sliding scale in between. Threshold again gives rise to a 20% vest, 100% for maximum, with a sliding scale in between.

Performance Share Awards (PSA)

Conditional stock awards made under the PSA are dependent upon annual performance targets, typically based on one or more of: operating profit, profit before taxation and operating margin. Grants are made in the year following the year of performance measurement, and vest two years after grant date provided the individual concerned is continually employed by the Group throughout this time.

Leaders, Partners and High Potential Group

This scheme makes annual conditional stock awards to approximately 1,500 key executives of the Group. Vesting is conditional on continued employment over the three-year vesting period.

Valuation methodology

For all of these schemes, the valuation methodology is based upon fair value on grant date, which is determined by the market price on that date or the application of a Black-Scholes model, depending upon the characteristics of the scheme concerned. The assumptions underlying the Black-Scholes model are detailed in note 28, including details of assumed dividend yields. Market price on any given day is obtained from external, publicly available sources.

Market/non-market conditions

Most share-based plans are subject to non-market performance conditions, such as margin or growth targets, as well as continued employment. EPSP is subject to a number of performance conditions, including TSR, a market-based condition.

Notice 19 the consolidated financial statements (continued) For the year ended 31 December 2019

23 Share-based payments (continued)

For schemes without market-based performance conditions, the valuation methodology above is applied and, at each year-end, the relevant accrual for each grant is revised, if appropriate, to take account of any changes in estimate of the likely number of shares expected to vest.

For schemes with market-based performance conditions, the probability of satisfying these conditions is assessed at grant date through a statistical model (such as the Monte Carlo model) and applied to the fair value. This initial valuation remains fixed throughout the life of the relevant plan, irrespective of the actual outcome in terms of performance. Where a lapse occurs due to cessation of employment, the cumulative charge taken to date is reversed.

24 Provision for post-employment benefits

Companies within the Group operate a large number of pension plans, the forms and benefits of which vary with conditions and practices in the countries concerned. The Group's pension costs are analysed as follows:

Continuing operations	2019	2018 ¹
	£m	£m
Defined contribution plans	154.9	146.7
Defined benefit plans charge to operating profit	14.8	14.2
Pension costs (note 5)	169.7	160.9
Net interest expense on pension plans (note 7)	3.5	3.6
	173.2	164.5

Note

Defined benefit plans

The pension costs are assessed in accordance with the advice of local independent qualified actuaries. The latest full actuarial valuations for the various pension plans were carried out at various dates in the last three years. These valuations have been updated by the local actuaries to 31 December 2019. Valuations are as at 31 December 2019 and do not consider the impact of the emergence and spread of the Covid-19 virus.

The Group's policy is to close existing defined benefit plans to new members. This has been implemented across a significant number of the pension plans.

Contributions to funded plans are determined in line with local conditions and practices. Contributions in respect of unfunded plans are paid as they fall due. The total contributions (for funded plans) and benefit payments (for unfunded plans) paid for 2019 amounted to £37.1 million (2018: £44.9 million). Employer contributions and benefit payments in 2020 are expected to be approximately £25 million.

¹ Prior year figures have been re-presented in accordance with IFRS 5 Non-current Assets Held for Sale and Discontinued Operations, as described in the accounting policies.

(a) Assumptions

There are a number of areas in pension accounting that involve estimates made by management based on advice of qualified advisors. These include establishing the discount rates, rates of increase in salaries and pensions in payment, inflation, and mortality assumptions. The main weighted average assumptions used for the actuarial valuations at 31 December are shown in the following table:

	2019	2018
·	% ра	% pa_
UK		
Discount rate ¹	2.0	2.8
Rate of increase in salaries ²	, п/а	n/a
Rate of increase in pensions in payment	4.4	4.3
Inflation	2.6	2.8

Asia Pacific, Latin America, Africa & Middle East and Central & Eastern Europe		
Discount rate ¹	4.6	5.0
Rate of increase in salaries	6.1	5.8
Inflation	3.7	3.6

Notes

¹ Discount rates are based on high-quality corporate bond yields. In countries where there is no deep market in corporate bonds, the discount rate assumption has been set with regard to the yield on long-term government bonds.

² The salary assumptions are no longer applicable to the UK plans as the plans were frozen since 2017. Active participants will not accrue additional benefits for future services under these plans.

(a) Assumptions (continued)

For the Group's pension plans, the plans' assets are invested with the objective of being able to meet current and future benefit payment needs, while controlling balance sheet volatility and future contributions. Pension plan assets are invested with a number of investment managers, and assets are diversified among equities, bonds, insured annuities, property and cash or other liquid investments. The primary use of bonds as an investment class is to match the anticipated cash flows from the plans to pay pensions. The Group is invested in high-quality corporate and government bonds which share similar risk characteristics and are of equivalent currency and term to the plan liabilities. Various insurance policies have also been bought historically to provide a more exact match for the cash flows, including a match for the actual mortality of specific plan members. These insurance policies effectively provide protection against both investment fluctuations and longevity risks. The strategic target allocation varies among the individual plans.

Management considers the types of investment classes in which the pension plan assets are invested. The types of investment classes are determined by economic and market conditions and in consideration of specific asset class risk.

Management periodically commissions detailed asset and liability studies performed by third-party professional investment advisors and actuaries that generate probability-adjusted expected future returns on those assets. These studies also project the estimated future pension payments and evaluate the efficiency of the allocation of the pension plan assets into various investment categories.

At 31 December 2019, the life expectancies underlying the value of the accrued liabilities for the main defined benefit pension plans operated by the Group were as follows:

				Western	
	Ail	North	C	ontinental	
Years life expectancy after age 65	plans	America	UK_	Europe	Other ¹

- future pensioners (current age 45) - female	25.4	24.9	25.9	26.0	17.4

Note

The life expectancies after age 65 at 31 December 2018 were 22.2 years and 23.9 years for male and female current pensioners (at age 65) respectively, and 24.0 years and 25.7 years for male and female future pensioners (current age 45), respectively.

(a) Assumptions (continued)

In the determination of mortality assumptions, management uses the most up-to-date mortality tables available in each country.

The following table provides information on the weighted average duration of the defined benefit pension obligations and the distribution of the timing of benefit payments for the next 10 years. The duration corresponds to the weighted average length of the underlying cash flows.

¹ Includes Asia Pacific, Latin America, Africa & Middle East and Central & Eastern Europe.

The following table presents a sensitivity analysis for each significant actuarial assumption showing how the defined benefit obligation would have been affected by changes in the relevant actuarial assumption that were reasonably possible at the balance sheet date. This sensitivity analysis applies to the defined benefit obligation only and not to the net defined benefit pension liability in its entirety, the measurement of which is driven by a number of factors including, in addition to the assumptions below, the fair value of plan assets.

The sensitivity analyses are based on a change in one assumption while holding all other assumptions constant so that interdependencies between the assumptions are excluded. The methodology applied is consistent with that used to determine the recognised defined benefit obligation. The sensitivity analysis for inflation is not shown as it is an underlying assumption to build the pension and salary increase assumptions. Changing the inflation assumption on its own without changing the salary or pension assumptions will not result in a significant change in pension liabilities.

¹ The increase in 2019 from 2018 in the amount of assets held in insured annuities is attributable to the completion of buy-in transactions during 2019 for certain UK plans. The invested assets for these plans, as at 31 December 2018 consisted of a mixture of equities, bonds, cash and other assets, were transferred to an insurance company and, in accordance with IAS 19, all assets for these plans are now classified as insured annuities.

The related deferred tax asset is discussed in note 17.

(b) Assets and liabilities

Some of the Group's defined benefit plans are unfunded (or largely unfunded) by common custom and practice in certain jurisdictions. In the case of these unfunded plans, the benefit payments are made as and when they fall due. Pre-funding of these plans would not be typical business practice.

The following table shows the split of the deficit at 31 December 2019 between funded and unfunded pension plans.

25 Events after the reporting period

In the period since 31 December 2019, the emergence and spread of Covid-19 has impacted the Group and its clients. The coronavirus pandemic is adversely affecting and is expected to continue to adversely affect our business, revenues, results of operations, financial condition and prospects.

The Group has approximately £2.0 billion of undrawn credit facilities at 31 December 2019 and has supported this by further action to maintain liquidity, including the suspension of share buybacks and the 2019 final dividend. On working capital, we are constantly reviewing cash outflows and receipts to monitor our position. We are continuing to work closely with our clients to ensure timely payment for the services we have provided in line with contractual commitments. Cost reduction and cash conservation measures have also been taken, including the freezing of new hires, 20% salary and fee sacrifice for the CEO, Board members, Executive committee members and employees earning above certain thresholds. Additionally, savings have been identified on property and IT capital expenditure. In May 2020 we issued £250 million of 3.75% bonds due May 2032 and €750 million of 2.375% bonds due May 2027 which improved the Group's liquidity position further.

Close to 95% of our people are remote working and maintaining services to our clients and using creativity to support clients to adjust their communications, and support governments and NGOs in mitigating the impact of Covid-19.

26 Risk management policies

Foreign currency risk

The Group's results in pounds sterling are subject to fluctuation as a result of exchange rate movements. The Group does not hedge this translation exposure to its earnings but does hedge the currency element of its net assets using foreign currency borrowings, cross-currency swaps and forward foreign exchange contracts.

The Group effects these currency net asset hedges by borrowing in the same currencies as the operating (or "functional") currencies of its main operating units. The majority of the Group's debt is therefore denominated in US dollars, pounds sterling and euros. The Group's borrowings at 31 December 2019 were primarily made up of \$1,563 million, £844 million and €2,600 million (2018: \$2,784 million, £1,044 million and €3,200 million). The Group's average gross debt during the course of 2019 was \$2,509 million, £947 million and €3,128 million (2018: \$3,377 million, £1,039 million and €3,202 million).

The Group's operations conduct the majority of their activities in their own local currency and consequently the Group has no significant transactional foreign exchange exposures arising from its operations. Any significant cross-border trading exposures are hedged by the use of forward foreign-exchange contracts. No speculative foreign exchange trading is undertaken.

Notes to the conduit aied financial statements (continued). For the year ended 31 December 2019.

26 Risk management policies (continued)

Interest rate risk

The Group is exposed to interest rate risk on both interest-bearing assets and interest-bearing liabilities. The Group has a policy of actively managing its interest rate risk exposure while recognising that fixing rates on all its debt eliminates the possibility of benefiting from rate reductions and similarly, having all its debt at floating rates unduly exposes the Group to increases in rates.

Including the effect of interest rate and cross-currency swaps, 100% of the year-end US dollar debt is at fixed rates averaging 4.06% for an average period of 95 months; 100% of the sterling debt is at a fixed rate of 2.73% for an average period of 188 months; 80.8% of the euro debt is at fixed rates averaging 2.34% for an average period of 82 months and 19.2% of the euro debt is at floating rates averaging 0.06% for an average of 16 months.

Going concern and liquidity risk

In considering going concern and liquidity risk, the Directors have reviewed the Group's future cash requirements and earnings projections. The Directors believe these forecasts have been prepared on a prudent basis and have also considered the impact of a range of potential changes to trading performance. The Company's forecasts and projections, taking account of (i) reasonably possible declines in revenue less pass-through costs; (ii) remote declines in revenue less pass-through costs for stress-testing purposes as a consequence of the Covid-19 pandemic from April 2020 onwards compared to 2019; and considering the Group's bank covenant and liquidity headroom taking into account the suspension of share buybacks and the final dividend in 2019 and cost mitigation actions which are and which could be implemented, show that the Company and the Group would be able to operate with appropriate liquidity and within its banking covenants and be able to meet its liabilities as they fall due. The Company modelled a range of revenue less pass-through costs declines from 15% to over 35%. The Directors have concluded that the Group should be able to operate within its current facilities and comply with its banking covenants for the foreseeable future and therefore believe it is appropriate to prepare the financial statements of the Group on a going concern basis. The potential impact of Brexit has been considered and is not deemed to have a significant effect on this assessment.

Given the strong cash generation of the business, its debt maturity profile and available facilities, the directors believe the Group has sufficient liquidity to match its requirements for the foreseeable future.

Treasury activities

Treasury activity is managed centrally from London, New York and Hong Kong, and is principally concerned with the monitoring of working capital, managing external and internal funding requirements and the monitoring and management of financial market risks, in particular interest rate and foreign exchange exposures.

The treasury operation is not a profit centre and its activities are carried out in accordance with policies approved by the Board of Directors and subject to regular review and audit.

26 Risk management policies (continued)

The Group manages liquidity risk by ensuring continuity and flexibility of funding even in difficult market conditions. Undrawn committed borrowing facilities are maintained in excess of peak net-borrowing levels and debt maturities are closely monitored. Targets for average net debt are set on an annual basis and, to assist in meeting this, working capital targets are set for all the Group's major operations.

Capital risk management

The Group manages its capital to ensure that entities in the Group will be able to continue as a going concern while maximising the return to stakeholders through the optimisation of the debt and equity balance. The capital structure of the Group consists of debt, which includes the borrowings disclosed in note 10, cash and cash equivalents and equity attributable to equity holders of the parent, comprising issued capital, reserves and retained earnings as disclosed in the consolidated statement of changes in equity and in notes 28 and 29.

Given the significant uncertainty over the coming months generated by the emergence and spread of Covid-19, the Group continues to monitor its capital structure. Our bond portfolio at the 31 December 2019 had an average maturity of 8.2 years, with only a May 2020 €250 million Eurobond due in the next two years.

Credit risk

The Group's principal financial assets are cash and short-term deposits, trade and other receivables and investments, the carrying values of which represent the Group's maximum exposure to credit risk in relation to financial assets, as shown in note 27.

The Group's credit risk is primarily attributable to its trade receivables. The majority of the Group's trade receivables are due from large national or multinational companies where the risk of default is considered low. The amounts presented in the consolidated balance sheet are net of allowances for doubtful receivables, estimated by the Group's management based on prior experience and their assessment of the current economic environment. A relatively small number of clients make up a significant percentage of the Group's debtors, but no single client represents more than 5% of total trade receivables as at 31 December 2019.

The credit risk on liquid funds and derivative financial instruments is limited because the counterparties are banks with high credit ratings assigned by international credit-rating agencies or banks that have been financed by their government.

A relatively small number of clients contribute a significant percentage of the Group's consolidated revenues. The Group's clients generally are able to reduce advertising and marketing spending or cancel projects at any time for any reason. There can be no assurance that any of the Group's clients will continue to utilise the Group's services to the same extent, or at all, in the future. Clients can reduce their marketing spend, terminate contracts, or cancel projects on short notice. The loss of one or more of our largest clients, if not replaced by new accounts or an increase in business from existing clients, would adversely affect our financial condition.

26 Risk management policies (continued)

Following the emergence and spread of Covid-19 in 2020, the Group continues to work closely with our clients to ensure timely payment for the services we have provided in line with contractual commitments. The Group constantly reviewing cash outflows and receipts to monitor our position.

Sensitivity analysis

The following sensitivity analysis addresses the effect of currency and interest rate risks on the Group's financial instruments. The analysis assumes that all hedges are highly effective.

Currency risk

A 10% weakening of sterling against the Group's major currencies would result in the following losses, which would be posted directly to equity. These losses would arise on the retranslation of foreign currency denominated borrowings and derivatives designated as effective net investment hedges of overseas net assets. These losses would be partially offset in equity by a corresponding gain arising on the retranslation of the related hedged foreign currency net assets. A 10% strengthening of sterling would have an equal and opposite effect. There are no other material foreign exchange exposures which would create gains or losses to the functional reporting currencies of individual entities in the Group.

	2019	2018
	£m	£m
US dollar	125.2	192.2
Euro	162.5	232.5

Interest rate risk

A one percentage point increase in market interest rates for all currencies in which the Group had cash and borrowings at 31 December 2019 would increase profit before tax by approximately £22.6 million (2018: £7.2 million). A one percentage decrease in market interest rates would have an equal and opposite effect. This has been calculated by applying the interest rate change to the Group's variable rate cash and borrowings.

27 Financial instruments

Currency derivatives

The Group utilises currency derivatives to hedge significant future transactions and cash flows and the exchange risk arising on translation of the Group's investments in foreign operations. The Group is a party to a variety of foreign currency derivatives in the management of its exchange rate exposures. The instruments purchased are primarily denominated in the currencies of the Group's principal markets. The Group designates its foreign currency-denominated debt as hedging instruments against the currency risk associated with the translation of its foreign operations.

The Group also designates certain cross currency swaps as hedging instruments in cash flow hedges to manage its exposure to foreign exchange movements on its borrowings. Contracts due in March 2025 have receipts of €500.0 million and payments of £444.1 million.

At 31 December 2019, the fair value of the Group's currency derivatives is estimated to be a net liability of approximately £21.2 million (2018: net asset of £8.4 million). These amounts are based on market values of equivalent instruments at the balance sheet date, comprising £nil (2018: £8.4 million) assets included in trade and other receivables and £21.2 million (2018: £nil) liabilities included in trade and other payables. The amounts taken to and deferred in equity during the year for currency derivatives that are designated, and effective hedges was a credit of £29.2 million (2018: charge of £17.9 million) for cash flow hedges.

Changes in the fair value relating to the ineffective portion of the currency derivatives amounted to a loss of £nil (2018: £11.1 million) which is included in the revaluation of financial instruments for the year.

At the balance sheet date, the total nominal amount of outstanding forward foreign exchange contracts not designated as hedges was £151.7 million (2018: £296.1 million). The Group estimates the fair value of these contracts to be a net liability of £0.1 million (2018: £1.3 million).

These arrangements are designed to address significant exchange exposure and are renewed on a revolving basis as required.

Interest rate swaps

The Group uses interest rate swaps as hedging instruments in fair value hedges to manage its exposure to interest rate movements on its borrowing. During 2019 the Group terminated contracts that had a nominal value of \$812 million which had fixed rate receipts of 4.75% and floating interest payments averaging LIBOR plus 2.34% until November 2021. The Group also terminated contracts in 2019 that had a nominal value of \$500 million which had fixed rate receipts of 3.63% and floating interest payments averaging LIBOR plus 1.52% until September 2022.

The fair value of interest rate swaps entered into at 31 December 2019 is estimated to be a net liability of £nil (2018: £14.2 million). These amounts are based on market values of equivalent instruments at the balance that date, comparising £nil (2013: £14.2 million) liabilities included in trade and other any ables.

27 Financial instruments (continued)

Changes in the fair value relating to the ineffective portion of interest rate swaps amounted to a gain of £1.0 million (2018: £0.9 million) which is included in the revaluation of financial instruments for the year. This gain resulted from a £13.3 million loss on hedging instruments and a £14.3 million gain on hedged items.

The Group is party to certain cash pooling arrangements with its banks and has offset cash and short-term deposits and bank overdrafts where a legally enforceable right to set off exists. At 31 December 2019, £6,832.8 million (2018: £6,214.2 million) had been offset.

The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into levels 1 to 3 based on the degree to which the fair value is observable:

Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 fair value measurements are those derived from inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices);

Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Payments due to vendors and liabilities in respect of put options

Future anticipated payments due to vendors in respect of contingent consideration (earnout agreements) are recorded at fair value, which is the present value of the expected cash outflows of the obligations. Liabilities in respect of put option agreements are initially recorded at the present value of the redemption amount in accordance with IAS 32. After recognition, the liability is remeasured in accordance with IFRS 9 and is subject to the estimation of future performance of the business acquired. Changes in the estimation result in remeasurement of the liability through the income statement. Both types of obligations are dependent on the future financial performance of the entity and it is assumed that future profits are in line with Directors' estimates. The Directors derive their estimates from internal business plans together with financial due diligence performed in connection with the acquisition. At 31 December 2019, the weighted average growth rate in estimating future financial performance was 19.5% (2018: 22.7%), which reflects the prevalence of recent acquisitions in the faster-growing markets and new media sectors. The risk adjusted discount rate applied to these obligations at 31 December 2019 was 1.4% (2018: 2.9%).

A one percentage point increase or decrease in the growth rate in estimated future financial performance would increase or decrease the combined liabilities due to earnout agreements and put options by approximately £4.6 million (2018: £6.8 million) and £7.7 million (2018: £10.4 million), respectively. A 0.5 percentage point increase or decrease in the risk adjusted discount rate would decrease or increase the combined liabilities by approximately £5.6 million (2018: £7.1 million) and £5.7 million (2018: £7.2 million), respectively. An increase in the liability would result in a loss in the revaluation of financial instruments, while a decrease would result in a gain.

Other investments

The fair value of other investments included in level 1 are based on quoted market prices. Other investments included in level 3 are unlisted securities, where market value is not readily available. The Group has estimated relevant fair values on the basis of publicly available information from outside sources using the most appropriate valuation technique, including all external funding rounds, revenue and EBITDA multiples, the share of fund net asset value and discounted cash flows. Certain investments are valued using revenue multiples. An increase or decrease in this multiple of one times revenue would result in an increase or decrease in the value of investments of £53.6 million, which would result in a credit or charge to the income statement of £3.3 million and equity of £50.3 million. The sensitivity to changes in unobservable inputs is specific to each individual investment

28 Authorised and issued share capital (continued)

Expected life is based on a review of historic exercise behaviour in the context of the contractual terms of the options, as described in more detail below.

Terms of share option plans

In 2015, the Group introduced the Share Option Plan 2015 to replace both the 'all-employee' Worldwide Share Ownership Plan and the discretionary Executive Stock Option Plan. Two kinds of options over ordinary shares can be granted, both with a market value exercise price. Firstly, options can be granted to employees who have worked at a company owned by WPP plc for at least two years which are not subject to performance conditions. Secondly, options may be granted on a discretionary basis subject to the satisfaction of performance conditions.

The Worldwide Share Ownership Program was open for participation to employees with at least two years' employment in the Group. It was not available to those participating in other share-based incentive programs or to executive directors. The vesting period for each grant is three years and there are no performance conditions other than continued employment with the Group.

The Executive Stock Option Plan has historically been open for participation to WPP Group Leaders, Partners and High Potential Group. It is not currently offered to parent company executive directors. The vesting period is three years and performance conditions include achievement of various TSR (Total Shareholder Return) and EPS (Earnings Per Share) objectives, as well as continued employment. The terms of these stock options with performance conditions are such that if, after nine years and eight months, the performance conditions have not been met, then the stock option will vest automatically.

The Group grants stock options with a life of 10 years, including the vesting period.

30 Acquisitions

The Group accounts for acquisitions in accordance with IFRS 3 Business Combinations. IFRS 3 requires the acquiree's identifiable assets, liabilities and contingent liabilities (other than non-current assets or disposal groups held for sale) to be recognised at fair value at acquisition date. In assessing fair value at acquisition date, management make their best estimate of the likely outcome where the fair value of an asset or liability may be contingent on a future event. In certain instances, the underlying transaction giving rise to an estimate may not be resolved until some years after the acquisition date. IFRS 3 requires the release to profit of any acquisition reserves which subsequently become excess in the same way as any excess costs over those provided at acquisition date are charged to profit. At each period end management assess provisions and other balances established in respect of acquisitions for their continued probability of occurrence and amend the relevant value accordingly through the consolidated income statement or as an adjustment to goodwill as appropriate under IFRS 3.

Goodwill arising from acquisitions represents the value of synergies with our existing portfolio of businesses and skilled staff to deliver services to our clients.

Non-controlling interests in acquired companies are measured at the non-controlling interests' proportionate share of the acquiree's identifiable net assets.

The contribution to revenue and operating profit of acquisitions completed in the year was not material. There were no material acquisitions completed in the year ended 31 December 2019 or between 31 December 2019 and the date the financial statements have been authorised for issue.

¹ Due to the adoption of IFRS 9 cumulative gains and losses on revaluation of available for sale investments have been transferred to retained earnings.

Notes to the consolidated financial statements (continued) For the year ended 31 December 2019

32 Accounting policies

The principal accounting policies of WPP Jubilee Limited (the Company) are summarised below. These accounting policies have all been applied consistently throughout the year and preceding year.

a) Basis of accounting

The financial statements of WPP Jubilee Limited have been prepared under the historical cost convention in accordance with UK accounting standards and the Companies Act 2006. The company meets the definition of a qualifying entity under FRS 100 (Financial Reporting Standard 100) issued by the Financial Reporting Council.

The financial statements of WPP Jubilee Limited have been prepared in accordance with Financial Reporting Standard 101 Reduced Disclosure Framework. As permitted by FRS 101, the Company has taken advantage of the disclosure exemptions available under that standard in relation to share-based payment, financial instruments, capital management, presentation of a cash-flow statement and certain related party transactions.

Where required, equivalent disclosures are given in the consolidated financial statements. The financial statements are prepared on a going concern basis, further details of which are in the Directors' report on pages 5 to 7.

b) Translation of foreign currency

Foreign currency transactions arising from operating activities are translated from local currency into pounds sterling at the exchange rates prevailing at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the year end are translated at the year-end exchange rate. Foreign currency gains or losses are credited or charged to the profit and loss account as they arise.

c) Investments

Investments in subsidiaries are stated at cost less provision for impairment.

d) Other assets and liabilities

Unless otherwise indicated all assets and liabilities are stated at nominal value.

	undertakings
Net book value	£m
At 1 January 2019	22,583.8
Additions	16,202.7
Disposals	(14,031.4)
Impairment	(535.5)
31 December 2019	24,219.8

The following significant additions and disposals occurred in the year:

On 19 September 2019 the Company acquired 100% of the issued ordinary shares of a nominal value of \$1 each in WPP UK Torre from a fellow Group company, WPP Luxembourg Turris S.à.r.l., for a cash consideration of £1,035,855,088 on 19 September 2019.

On 17 October 2019 the Company disposed of its entire investment in Lexington International B.V. to a fellow Group company, WPP 2005 Limited, for a consideration equal to the book value of the shares of £13,075,815,000. The transaction was settled by the issue of 15,000,000,000 ordinary shares of a nominal value of £0.0002 each to the Company. The amount settled for each share was £0.87, creating a share capital of £3,000,000 and creating a share premium balance of £13,072,815,000 in WPP 2005 Limited.

In accordance with the company's accounting policy, the company annually tests the carrying value of investments for impairment. The 2019 impairment review was undertaken as at 31 December 2019. The review assessed whether the carrying value of investments was supported by the net present value of future cash flows derived from the assets. An annual growth rate of 0.0% and a pre-tax discount rate of 7.10% has been assumed.

WPP Jubilee Limited has guaranteed the liabilities of the subsidiaries listed below under section 479A and C of the Companies Act 2006 (as amended). As such, these subsidiaries will take advantage of the audit exemption set out within section 479A for the year ended 31 December 2019.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF WPP JUBILEE LIMITED

Report on the audit of the financial statements

Opinion

In our opinion:

- the financial statements of WPP Jubilee Limited (the 'parent company') and its subsidiaries (the 'group') give
 a true and fair view of the state of the group's and of the parent company's affairs as at 31 December 2019
 and of group's profit for the year then ended;
- the group financial statements have been properly prepared in accordance with International Financial Reporting Standards (IFRSs) as adopted by the European Union;
- the parent company financial statements have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice, including Financial Reporting Standard 101 "Reduced Disclosure Framework": and
- the financial statements have been prepared in accordance with the requirements of the Companies Act 2006.

We have audited the financial statements which comprise:

- · the consolidated and parent company income statements;
- the consolidated statement of comprehensive income;
- the consolidated and parent company balance sheets;
- the consolidated and parent company statements of changes in equity;
- the consolidated cash flow statement; and
- the related notes 1 to 44.

The financial reporting framework that has been applied in the preparation of the group financial statements is applicable law and IFRSs as adopted by the European Union. The financial reporting framework that has been applied in the preparation of the parent company financial statements is applicable law and United Kingdom Accounting Standards, including Financial Reporting Standard 101 "Reduced Disclosure Framework" (United Kingdom Generally Accepted Accounting Practice).

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the auditor's responsibilities for the audit of the financial statements section of our report.

We are independent of the group and the parent company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the Financial Reporting Council's (the 'FRC's') Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

We are required by ISAs (UK) to report in respect of the following matters where:

- the directors' use of the going concern basis of accounting in preparation of the financial statements is not appropriate; or
- the directors have not disclosed in the financial statements any identified material uncertainties that may cast significant doubt about the group's or the parent company's ability to continue to adopt the going concern basis of accounting for a period of at least twelve months from the date when the financial statements are authorised for issue.

We have nothing to report in respect of these matters.

Other information

The directors are responsible for the other information. The other information comprises the information included in the annual report, other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in respect of these matters.

Responsibilities of directors

As explained more fully in the directors' responsibilities statement, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the group's and the parent company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the group or the parent company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the FRC's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Report on other legal and regulatory requirements

Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of the audit:

- Ithe information given in the Strategic report and the Directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the Strategic report and the Directors' report have been prepared in accordance with applicable legal requirements.

In the light of the knowledge and understanding of the group and of the parent company and their environment obtained in the course of the audit, we have not identified any material misstatements in the Strategic report or the Directors' report.

Independent auditor's report (continued) As at 31 December 2019

Matters on which we are required to report by exception

Under the Companies Act 2006 we are required to report in respect of the following matters if, in our opinion:

- adequate accounting records have not been kept by the parent company, or returns adequate for our audit
 have not been received from branches not visited by us; or
- the parent company financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- · we have not received all the information and explanations we require for our audit.

We have nothing to report in respect of these matters.

Use of our report

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.
