NOTES TO THE FINANCIAL STATEMENTS

PERIOD ENDED 31 MARCH 2010

1. ACCOUNTING POLICIES

Basis of accounting

The financial statements have been prepared under the historical cost convention, and in accordance with applicable UK accounting standards

The financial statements have been prepared on a going basis which is dependent upon the continuing support of its parent C&C Alpha Group Limited

Consolidation

In the opinion of the directors, the company and its subsidiary undertakings comprise a small group. The company has therefore taken advantage of the exemption provided by Section 398 of the Companies Act 2006 not to prepare group accounts

Cash flow statement

The directors have taken advantage of the exemption in Financial Reporting Standard No 1 (Revised 1996) from including a cash flow statement in the financial statements on the grounds that the company is small

Financial instruments

Financial liabilities and equity instruments are classified according to the substance of the contractual arrangements entered into. An equity instrument is any contract that evidences a residual interest in the assets of the entity after deducting all of its financial liabilities

Where the contractual obligations of financial instruments (including share capital) are equivalent to a similar debt instrument, those financial instruments are classed as financial liabilities. Financial liabilities are presented as such in the balance sheet. Finance costs and gains or losses relating to financial liabilities are included in the profit and loss account. Finance costs are calculated so as to produce a constant rate of return on the outstanding liability

Where the contractual terms of share capital do not have any terms meeting the definition of a financial liability then this is classed as an equity instrument. Dividends and distributions relating to equity instruments are debited direct to equity

2. GOING CONCERN

The financial statements are prepared on the going-concern basis dependent upon the continued support from parent company C & C Alpha Group Limited. The company is expected to generate income from charging management service fees on two projects. One is a new diabetic treatment centre, which is being set up in Mumbai, India and expected to go into operation by December 2010 and the other is Cancer treatment centre in Lado Sarai, India, which is expected to go into operation in 2011. The directors therefore believe that the company is a going concern
