Financial instruments

Financial assets and financial liabilities are recognised when the company becomes a party to the contractual provisions of the instrument.

Basic financial instruments

Basic financial instruments are those with relatively straight forward terms and would normally include cash, bank balances, trade debtors, trade creditors and uncomplicated bank loans.

Where the arrangement does not constitute a financing transaction, e.g. trade debtors on normal commercial terms, the debtor will be valued at transaction price (i.e. cost) and subsequently at transaction price less impairment (if any) due to concerns over recoverability.

Foreign currencies

Assets and liabilities in foreign currencies are translated into sterling at the rates of exchange ruling at the balance sheet date.
