Strategic Report for the Year Ended 31 December 2018

The Directors present their Strategic Report of GLID Wind Farms TopCo Limited (the company) and for the Group (comprising GLID Wind Farms Topco Limited plus fully owned subsidiaries Lynn Wind Farm Limited and Inner Dowsing Wind Farm limited) for the year ended 31 December 2018.

Review of the business

The GLID Wind Farms TopCo's Group ("the Group") financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union.

The subsidiary companies, Lynn Wind Farm Limited and Inner Dowsing Wind Farm Limited, have operated satisfactorily during the year. Generation was below plan due to low wind. Revenue was above plan due to high power prices and unforecast Triad income.

Principal risks and uncertainties

The GLID Wind Farms TopCo Group's principal risk which is a known feature of wind farms is revenue uncertainty. Revenue is dependent on wind speeds and the related power curve which together impact the potential revenue of the wind farms. The availability is driven by the technical performance of the wind turbines and ancillary equipment, and the physical access to the wind farms. The power generated is sold under power purchase agreements and the power price was dependent on market pricing subject to a cap and floor in respect of 75% of the generation. ROCs are awarded based on production and have an annual price published by OFGEM which is indexed from 1 April each year. Revenue uncertainty impacts the Group's cash flow and as such the ability to make loan repayments and to make distributions when appropriate.

The Directors have considered the nature and extent of risks and uncertainties arising from the result of the brexit referendum and the impact on the future performance and position of the business. The directors are reassured that there should be little or no impact and the risks are considered to be low.

Key performance indicators (KPIs)

The Directors formally convene regular board meetings. The board meetings' standing agenda items provide a review of key performance metrics covering health, safety and the environment, operations and maintenance activity and financial performance.

The key driver of financial performance is revenue. Revenue has increased by 14% (2018: £77,684,000) from prior year (2017: £68,065,000) which has resulted in an improved financial performance in 2018. This increase is due to a combination of high power prices and unforecast Triad income.

To create the maximum renewable energy the group monitors the effectiveness of the wind farms on a regular basis and endeavors to achieve a high level of performance.

Strategic Report for the Year Ended 31 December 2018 (continued)

Financial position

The financial position of the Group and Company are presented in the Statement of Financial Position on pages 11 and 12. Total shareholders' funds for the Group at 31 December 2018 was £1,003,000 (2017 deficit: £99,034,000) and for the Company were £18,824,000 (2017 deficit: £87,619,000). The deficit arose due to the company issuing a distribution policy in 2016 which created a contractual obligation to distribute free cash flow to the shareholders. The distribution policy was updated in April 2018 to remove this liability. Finance costs of £2,805,000 were incurred in 2018 prior to the change of policy, and the shares liability of £98,908,000 was fully removed. These adjustments had no impact upon the cash flows, tax related balances or distributable reserves of the group or company.

Future developments

Commercial generation is expected to continue from the two subsidiary wind farms for the foreseeable future. Decisions will be made towards the end of the wind farm's useful economic life, around 2033, to decide if the assets will be decommissioned or a repowering of the site will be undertaken.

There are no further plans to change the nature of activities in the foreseeable future.

Approved by the Board on 27 March 2019 and signed by order of the board.

Alexis Ulens

Director

Company registered in England and Wales, No. 06707821

Registered office:

Grimsby Renewables Operations Base North Quay Grimsby NE Lincolnshire DN31 3SY

Directors' Report for the Year Ended 31 December 2018

The Directors present their report and the audited consolidated Financial Statements for the year ended 31 December 2018.

Directors of the Company

The directors who were in office during the year and up to the date of signing the financial statements were:

P Raftery

C Reid (resigned 12 April 2018)

K Smith

A Ulens

K Mangan (appointed 12 April 2018)

Principal activity

The principal activity of the Company and its subsidiaries ("the Group") is the operation of the Lynn and Inner Dowsing wind farms for the year.

Results and Dividends

The results of the Group are set out on page 10. The consolidated profit for the financial year was £14,325,000 (2017 loss: £12,782,000). The consolidated profit on ordinary activities before income tax for the year was £18,499,000 (2017 loss: £9,579,000). The consolidated operating profit for the financial year was £38,391,000 (2017: £28,702,000). Dividends of £11,500,000 were paid during the year (2017: £13,250,000), the Directors propose a final dividend of £7,000,000 for the year ended 31 December 2018 (2017: £6,500,000). The company's distributable reserves as at 31 December 2018 were £18,324,000 (2017: £10,789,000).

Financial instruments

Objectives and policies

The Directors have established objectives and policies for managing financial risks to enable the Group to achieve its long-term shareholder value growth targets within a prudent risk management framework. These objectives and policies are regularly reviewed. Exposure to counterparty credit risk and liquidity risk arises in the normal course of the Group's business.

Interest Rate & Currency Risk

The Group has no significant exposure to currency risk. The Group's transactions and balances are denominated in sterling. The Group loans are at a fixed interest rate. In respect of decommissioning an increase in the interest rate will result in an increase to the discount rate applied to decommissioning in the future.

Price Risk

Price risk is based on power prices and ROC prices. To mitigate electricity price risk, the Group has entered into power purchase agreements ("PPAs") with British Gas Trading Limited to sell power until September 2024, with the power prices based on market prices subject to a cap and floor in respect of 75% of generation. ROC prices are set annually by OFGEM.

Credit Risk

Counterparty credit exposures are monitored by individual counterparty. Credit risk is limited to exposures with British Gas Trading Limited, and Npower Limited, both of which are on long term agreements. There is a Parent Company Guarantee in place in respect of the Npower Agreement.

Directors' Report for the Year Ended 31 December 2018 (continued)

Liquidity & Cash Flow Risk

In order to review available liquidity, cash forecasts for the Group are produced and reviewed regularly. Low generation due to low wind or low availability affect both revenue and cash flow. In order to generate the maximum renewable energy, the Group monitors the performance of the wind farms on a regular basis and endeavours to achieve a high level of availability. From April 2017 GLID entered into a service and maintenance agreement with Siemens Wind Power Limited (SMA). The SMA provides warranties on the availability yield and provides fixed price servicing costs.

Future developments

Future developments are discussed in the Strategic Report on page 2 to 3.

Going concern

The Directors believe that preparing the financial statements on the going concern basis is appropriate. The Board of Directors have concluded this is appropriate based on the approved Business Plan for 2019 (covering years 2019 to 2021) and this view is maintained based on actual results in 2019 to the date of signing the statutory financial statements.

Directors' liabilities

GLID Wind Farms TopCo Limited is jointly controlled and the Directors of the Company are nominated by the joint venture partners. The Directors are covered by their respective ultimate parent company's directors' and officers' liability insurance. The insurances do not provide cover in the event that the Director is proved to have acted fraudulently or unlawfully.

Post balance sheet events

There have been no significant events affecting the Group since the year end.

Statement of Directors' Responsibilities in respect of the financial statements

The directors are responsible for preparing the Annual Report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have prepared the group financial statements in accordance with International Financial Reporting Standards (IFRSs) as adopted by the European Union and company financial statements in accordance with International Financial Reporting Standards (IFRSs) as adopted by the European Union. Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the group and company and of the profit or loss of the group and company for that period. In preparing the financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- state whether applicable IFRSs as adopted by the European Union have been followed for the group financial statements and IFRSs as adopted by the European Union have been followed for the company financial statements, subject to any material departures disclosed and explained in the financial statements;
- make judgements and accounting estimates that are reasonable and prudent; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the group and company will continue in business.

Directors' Report for the Year Ended 31 December 2018 (continued)

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the group and company's transactions and disclose with reasonable accuracy at any time the financial position of the group and company and enable them to ensure that the financial statements comply with the Companies Act 2006.

The directors are also responsible for safeguarding the assets of the group and company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

In the case of each director in office at the date the Directors' Report is approved:

- so far as the director is aware, there is no relevant audit information of which the group and company's auditor are unaware; and
- they have taken all the steps that they ought to have taken as a director in order to make themselves aware of any relevant audit information and to establish that the group and company's auditor is aware of that information.

Independent auditors

Grant Thornton UK LLP, having expressed its willingness to continue in office, will be proposed for reappointment for the next financial year in accordance with section 489 of the Companies Act 2006.

The Directors' report was approved by the Board on 27 March 2019.

Independent Auditor's Report to the Members of GLID Wind Farms TopCo Limited

Report on the financial statements

Opinion

We have audited the financial statements of GLID Wind Farms Topco Limited (the 'parent company') and its subsidiaries (the 'group') for the year ended 31 December 2018 which comprise the consolidated income statement, consolidated statement of comprehensive income, consolidated and company statement of financial position, consolidated and company statement of cash flows and notes to the financial statements, including a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and International Financial Reporting Standards (IFRSs) as adopted by the European Union and, as regards the parent company financial statements, as applied in accordance with the provisions of the Companies Act 2006

In our opinion:

- the financial statements give a true and fair view of the state of the Group's and of the parent Company's affairs as at 31 December 2018 and of the Group's profit for the year then ended;
- the Group financial statements have been properly prepared in accordance with IFRSs as adopted by the European Union
- the Group financial statements have been prepared in accordance with the requirements of the Companies Act 2006.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the group and the parent company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

We have nothing to report in respect of the following matters in relation to which the ISAs (UK) require us to report to you where:

- the directors' use of the going concern basis of accounting in the preparation of the financial statements is not appropriate; or
- the directors have not disclosed in the financial statements any identified material uncertainties that may cast significant doubt about the group's or the parent company's ability to continue to adopt the going concern basis of accounting for a period of at least twelve months from the date when the financial statements are authorised for issue.

Independent Auditor's Report to the Members of GLID Wind Farms TopCo Limited (continued)

Other information

The directors are responsible for the other information. The other information comprises the information included in the annual report, other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of the audit:

- the information given in the strategic report and the directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the strategic report and the directors' report have been prepared in accordance with applicable legal requirements.

Matter on which we are required to report under the Companies Act 2006

In the light of the knowledge and understanding of the group and the parent company and its environment obtained in the course of the audit, we have not identified material misstatements in the strategic report or the directors' report.

Matters on which we are required to report by exception

We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept by the parent company, or returns adequate for our audit have not been received from branches not visited by us; or
- the parent company financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

Responsibilities of directors for the financial statements

As explained more fully in the statement of directors' responsibilities set out on pages 5 to 6, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the group's and the parent company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the group or the parent company or to cease operations, or have no realistic alternative but to do so.

Independent Auditor's Report to the Members of GLID Wind Farms TopCo Limited (continued)

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Use of our report

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

1 General information

GLID Wind Farms TopCo Limited (the 'Company') is a company limited by shares and incorporated and domiciled in England and Wales.

The address of its registered office and principal place of business is:
Grimsby Renewables Operations Base
North Quay
Grimsby
NE Lincolnshire
DN31 3SY

The principal activity of the Group and Company is the operation of the Lynn and Inner Dowsing wind farms.

2 Accounting policies

Statement of compliance

These financial statements have been prepared in accordance with International Financial Reporting Standards and its interpretations adopted by the European Union ("adopted IFRSs").

Summary of significant accounting policies and key accounting estimates

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

Basis of consolidation

The Group's financial statements consolidate the financial statements of the Company and all of its subsidiary undertakings. Acquisitions of subsidiaries are dealt with by the acquisition method of accounting. Each company in the Group has adopted the same accounting policies and they are applied uniformly across the Group. The financial statements of each company in the Group have been prepared to 31 December 2018. All intra-group transactions and profits are eliminated in full on consolidation.

Basis of preparation

The Group's financial statements have been prepared in accordance with International Accounting Standards and in accordance with International Financial Reporting Standards and its interpretations adopted by the European Union ("adopted IFRSs"). In preparing the Group's financial statements the Group applies the recognition, measurement and disclosure requirements of adopted IFRSs, but makes amendments where necessary in order to comply with Companies Act 2006.

These financial statements are presented in pound sterling (with all values rounded to the nearest thousand pounds except when otherwise indicated), which is also the functional currency of the Group. Transactions conducted in currencies other than the functional currency are translated in accordance with the foreign currencies accounting policy set out below.

The financial statements are prepared on the historical cost basis except for derivative financial instruments and financial instruments designated at fair value through profit and loss on initial recognition. The carrying value of recognised assets and liabilities that are hedged items in fair value hedges, and are otherwise carried at cost, are adjusted to record changes in the fair values attributable to the risks that are being hedged.

Notes to the Financial Statements for the Year Ended 31 December 2018

2 Accounting policies (continued)

Going concern

After reviewing the group's business plan, the directors have a reasonable expectation that the group has adequate resources to continue in operational existence for the foreseeable future. The group therefore continues to adopt the going concern basis in preparing its consolidated financial statements.

Changes in accounting policy

New standards, amendments and interpretations adopted

There have been no change amendments or interpretations to the standards effective for the financial year beginning on 1 January 2018 that are considered to have a material effect on the financial statements.

New standards, amendments and interpretations not yet adopted

The following standards, amendments to standards and interpretations, which are effective for annual periods beginning after 1 January 2019, have not been applied in these financial statements and may have an effect on the Group's financial statements in future:

IFRS 16 'Leases' was issued in January 2016, and is effective from 1 January 2019. IFRS 16 'Leases' will have an effect on the Group's financial statements. IFRS 16, with certain exceptions, requires the Group, as a lessee, to recognise right of use assets and lease liabilities for all leases. There is no longer a distinction between operating and finance leases for lessees. The definition of a lease has also been modified which may change those contracts the Group accounts for as leases.

IFRS 9 'Financial instruments' is effective for periods beginning on 1 January 2018. The Group have concluded there is no impact on implementation of the standard on the financial statements.

IFRS 15 'Revenue from contracts with customers' is effective for periods beginning on 1 January 2018. The Group have concluded there is no impact of implementation of the standard on the financial statements. Power and ROC revenues are both recognised in line with generation, on a half hourly basis. ROC recycle and Triad revenues are recognised when the receipt is virtually certain. There are no contracts which could extend revenue over a long period of time.

Revenue recognition

Revenue relates to the sale of generated power and the associated Renewables Obligation Certificates ("ROCs") including Recycling Benefit. Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured. Revenue is recognised on the basis of power supplied during the period, together with associated ROCs, except that the ROC Recycling Benefit and Triad Revenue is recognised once the once the value of the benefit is certain. Revenue which has not been billed at the reporting date is included as accrued income.

Cost of sales

Cost of sales includes the depreciation of assets and operations and maintenance costs.

Notes to the Financial Statements for the Year Ended 31 December 2018

2 Accounting policies (continued)

Leases

The determination of whether an arrangement is, or contains, a lease is based on the substance of the arrangement and requires an assessment of whether the fulfilment of the arrangement is dependent on the use of a specific asset or assets and whether the arrangement conveys a right to use the asset or assets. Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases. Payments under operating leases are currently charged to the income statement on a straight-line basis over the term of the relevant lease.

IFRS 16 Leases

IFRS 16 Leases was issued in January 2016 and was endorsed by the EU in 2017. IFRS 16 introduces a single on-balance sheet lease accounting model for lessees. A lessee recognises a right-of-use asset representing its right to use the underlying asset and a corresponding lease liability representing its obligations to make lease payments. There are no optional exemptions for short-term leases and leases of low value items.

IFRS 16 replaces exiting leases guidance including IAS 17 Leases, IFRIC 4 Determining whether an Arrangement contains a Lease, SIC-15 Operating Leases-Incentives and SIC-27 Evaluating the Substance of Transactions involving the Legal form of a Lease. The Standard is effective for annual periods beginning on or after 1 January 2019.

The Company has completed a detailed assessment to quantify the impact on its reported assets and liabilities of adoption of IFRS 16. On 1 January 2019 the Company will retrospectively recognise right-of-use assets of £9,767,369 cost, £3,333,794 accumulated depreciation, and lease liabilities of £10,461,092 for its operating lease in respect of Seabed and Pontoon rent. The nature of expenses relating to those leases will also change as the straight line operating lease expense will be replaced with a depreciation charge for right-of-use assets and interest expenses on lease liabilities. In the first year of adoption these are expected to be approximately £443,695 and £993,804 respectively and replace operating lease rental costs of approximately £1,217,252. The Company plans to adopt IFRS 16 in its financial statements for the year ended 31 December 2019.

Taxation

Current tax, being UK corporation tax, is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantially enacted by the balance sheet date. Tax is recognised in the Income Statement, except that a change attributable to an item of income or expense recognised as other comprehensive income is also recognised directly in other comprehensive income.

Deferred income tax is recognised on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements and on unused tax losses or tax credits in the group. Deferred income tax is determined using tax rates and laws that have been enacted or substantively enacted by the reporting date.

The carrying amount of deferred tax assets are reviewed at each reporting date and a valuation allowance is set up against deferred tax assets so that the net carrying amount equals the highest amount that is more likely than not to be recovered based on current or future taxable profit.

Property, plant and equipment ("PP&E")

PP&E is stated in the Statement of Financial Position at cost, less any subsequent accumulated depreciation and subsequent accumulated impairment losses. The cost of PP&E includes directly attributable incremental costs incurred in their acquisition and installation.

Notes to the Financial Statements for the Year Ended 31 December 2018

2 Accounting policies (continued)

Depreciation

Depreciation is charged so as to write off the cost of assets, other than land and properties under construction over their estimated useful lives, as follows:

Asset class

Plant and Machinery: Decommissioning asset:

Depreciation method and rate

Straight line, between 8 to 25 years Straight line, 25 years

Impairment

The carrying values of PP&E are reviewed for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of any impairment. The recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is immediately reduced to its recoverable amount. The carrying values of PP&E are tested for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable.

Inventories

Inventories are stated at the lower of cost incurred in bringing each item to its present location and condition and net realisable value. Provision is made where necessary for obsolete, slow-moving and defective inventories. Cost is determined on a FIFO (first in, first out) basis.

Provisions

Provisions are recognised when the group has a present obligation (legal or constructive) as a result of a past event, it is probable that the group will be required to settle that obligation and a reliable estimate can be made of the amount of the obligation.

Provisions are measured at the Directors' best estimate of the expenditure required to settle the obligation at the reporting date and are discounted to present value where the effect is material.

Decommissioning costs

Provision is made for the net present value of the estimated cost of decommissioning the wind farms at the end of their useful lives, based on price levels and technology at the balance sheet date.

When this provision relates to an asset with sufficient future economic benefits, a decommissioning asset is recognised and included as part of the associated PP&E and depreciated accordingly. Changes in these estimates and changes to the discount rates are dealt with prospectively and reflected as an adjustment to the provision and corresponding decommissioning asset included within PP&E. The unwinding of the discount on the provision is included in the Income Statement within interest expense.

Financial assets and liabilities

Financial assets and financial liabilities are recognised in the Group's Statement of Financial Position when the Group becomes a party to the contractual provisions of the instrument. Financial assets are de-recognised when the Group no longer has the rights to cash flows, the risks and rewards of ownership or control of the asset. Financial liabilities are de-recognised when the obligation under the liability is discharged, cancelled or expires.

Notes to the Financial Statements for the Year Ended 31 December 2018

2 Accounting policies (continued)

Trade and other receivables

Trade receivables are amounts due from customers for power sold or services performed in the ordinary course of business. If collection is expected in one year or less (or in the normal operating cycle of the business if longer), they are classified as current assets. If not, they are presented as non-current assets.

Trade receivables are recognised initially at the transaction price. They are subsequently measured at amortised cost using the effective interest method, less provision for impairment. A provision for the impairment of trade receivables is established when there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of the receivables.

Trade and other payables

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Accounts payable are classified as current liabilities if payment is due within one year or less (or in the normal operating cycle of the business if longer). If not, they are presented as non-current liabilities. Trade payables are recognised initially at the transaction price and subsequently measured at amortised cost using the effective interest method.

Share capital

Equity instruments are measured at the fair value of the cash or other resource received or receivable. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction from the proceeds received. Own equity instruments that are re-acquired are deducted from equity. No gain or loss is recognised in the Group's Income Statement on the purchase, sale, issue or cancellation of the Group's own equity instruments.

Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and call deposits.

Interest-bearing loans and other borrowings

All interest-bearing (and interest free) loans and other borrowings with banks or similar institutions and 'intercompany entities' are initially recognised at fair value net of directly attributable transaction costs (if any, in respect of 'intercompany funding'). After initial recognition, these financial instruments are measured at amortised cost using the 'Effective Interest Rate' method, except when they are the hedged item in an effective fair value hedge relationship where the carrying value is also adjusted to reflect the fair value movements associated with the hedged risks. Such fair value movements are recognised in the Consolidated Income Statement. Amortised cost is calculated by taking into account any issue costs, discount or premium, when applicable.

Dividends

Contractual obligations to distribute free cash flow is recorded as a share liability. Distributions paid to equity Shareholders are subsequently deducted from the shares liability. Any payment in excess of the forecasted amount is recognised as an interest charge in the Income Statement.

Notes to the Financial Statements for the Year Ended 31 December 2018

3 Critical accounting judgements and key sources of estimation uncertainty

Useful lives of PP&E

Depreciation is charged so as to write off the costs of the assets over their estimated useful lives. The expected useful lives of the assets are anticipated to be 25 years, should the expected lives change then this will affect the annual depreciation charge. In 2016 the Group sought technical advice which determined that with appropriate maintenance of the wind farm asset the total useful economic life of the asset (from first commissioning) could be 25 years. Subsequently in the year ended 31 December 2016 the Group has changed the UEL from 20 years to a maximum of 25 years for plant, machinery and decommissioning assets, reducing group depreciation by £6.8m per annum.

Impairment of PP&E

The Group's wind farm assets comprise various property, plant and equipment. The Group makes judgements and estimates in considering whether the carrying amounts of these assets are recoverable. Should the recoverable amounts be less than the current carrying values then an impairment charge is made to reduce the assets down to their net recoverable amounts. There are no indicators that PPE is impaired based on performance during the year and post year end.

Decommissioning costs

The estimated cost of decommissioning at the end of the wind farm's life is reviewed periodically and is based on price levels and technology at the balance sheet date. The uninflated discounted cost of decommissioning is as per the latest (2019) report and is based on leaving the cables in situ. The report is updated every 5 years with the next review expected by the end of 2023. Provision is made for the estimated cost of decommissioning at the balance sheet date. The payment dates of total expected future decommissioning costs are uncertain but are currently anticipated to be 2033. Due to changes in relation to these items the future actual cash outflows in relation to decommissioning are likely to differ in practice.

Shares liability

As a result of the distribution policy in place up until 25 April 2018, the company had a contractual obligation to distribute free cash flow to its shareholders. The liability recorded was based upon the estimated net present value of all expected future payments to its shareholders and is remeasured at each balance sheet date. The amount and timing of future anticipated free cash flows is uncertain and dependent upon performance of the business, directors' approval as well as external factors such as energy prices and therefore future actual distributions are likely to differ in practice. The discount factor used to calculate the net present value is also subject to estimation.

4 Revenue

All turnover relates to the principal activity of the business and occurs wholly in the United Kingdom. The analysis of the Group's revenue for the year from continuing operations is as follows:

	2018 £ 000	2017 £ 000
Sale of generated electricity and associated environmental credits	77,684	68,065

5 Operating Profit

	2018	2017
	£ 000	£ 000
Operating profit is stated after charging:		
Depreciation of tangible assets (note 12)	17,883	17,864
Operating lease payments (note 22)	826	823

6 Employees' costs

The Group and the Company had no employees and therefore no staff costs (2017: £nil).

7 Profit on disposal of subsidiary

On 7 March 2016, immediately after the change of ownership GLID Wind Farms Topco Limited agreed to sell its 100% investment in Glens of Foudland Wind Farm Limited to RI Income UK Holdings Limited for consideration of £25,143,000, resulting in an estimated profit on disposal of £2,653,000 in 2016 and reduced downwards by £514,000 in 2017.

8 Net Finance costs

Finance income

Unwinding of discount on decommissioning provision	(544)	(508)
Total finance costs	(19,892)	(37,768)
Net finance cost	(19,892)	(37,767)

9 Directors' remuneration

The aggregate emoluments paid to directors in respect of their qualifying services is £nil (2017: £nil). GLID Wind Farms TopCo Limited is a jointly controlled entity and the Directors are nominated by the joint venturers in respect of services to the companies and all remuneration is paid by other group companies of the joint venturers. Accordingly, no emoluments are paid for their services to the Group and the Company.

Notes to the Financial Statements for the Year Ended 31 December 2018

10 Auditor's remuneration

Auditor's remuneration was £42,000 and relates to the audit of the Financial Statements, of which £18,000 relates to the audit of the Company and £24,000 relates to the audit of the subsidiaries (2017: £37,000, of which £10,000 relates to the audit of the Subsidiaries). Non-audit fees during the year amounted to £16,150 tax compliance and £8,650 advisory (2017, non-audit fees: £5,000).

11 Income tax

Tax charged in the income statement		•
	2018	2017
	£ 000	£ 000

Income tax on continued operations	4,174	3,203
Total income tax charge	4,174	3,203

Notes to the Financial Statements for the Year Ended 31 December 2018 (continued)

11 Income tax (continued)

Tax expense for the year is higher (2017: higher) than the standard rate of corporation tax in the UK for the year ended 31 December 2018 at 19% (2017: 19.25%). The differences are explained below:

•	2018	2017
	5.000	5 000
	£ 000	£ 000
Profit/(Loss) before tax on continuing operations	18,498	(9,579)
Profit/(Loss) multiplied by the standard rate of tax in the UK of		
19% (2017: 19.25%)	3,515	(1,844)
Effects of:		
Fixed asset differences	145	155
Expenses not deductible	1,266	5,236
Adjustments to brought forward values	-	(84)
Change in UK tax rates	(69)	(159)
Movement in decommissioning asset	(84)	(92)
Adjustments in respect of prior years	(110)	-
Amounts not recognised	(22)	(9)
Reactivation of deferred interest	(83)	-
Recognition of deferred tax asset on deferred interest	(384)	
Income tax charge	4,174	3,203

The main rate of corporation tax for the year to 31 December 2016 was 20%. The corporation tax rate reduced to 19% with effect from 1 April 2017 and will reduce to 17% with effect from 1 April 2020 following the enactment of Finance (No 2) Act 2015 and Finance Act 2016 respectively. These enacted rates have been reflected in these financial statements when providing for deferred tax.

12 Property, plant and equipment

	Plant and machinery	achinery asset	
	£ 000	£ 000	£ 000
Cost			
At 1 January 2018	518,918	13,386	532,304
Revisions (Note 18)	<u> </u>	(3,113)	(3,113)
At 31 December 2018	518,918	10,273	529,191
Accumulated Depreciation			
At 1 January 2018	246,021	5,793	251,814
Charge for the year	17,393	490	17,883
At 31 December 2018	263,414	6,283	269,697
Carrying amount			
At 31 December 2018	255,504	3,990	259,494
At 31 December 2017	272,897	7,593	280,490

A full impairment assessment was performed in 2016 with the current carrying value of the tangible fixed assets being deemed appropriate. In 2016 the group sought technical advice which determined that with appropriate maintenance of the wind farm asset the total useful economic life of the asset (from first commissioning) could be 25 years. Subsequently the group has changed the UEL from 20 years to a maximum of 25 years for both plant, machinery and decommissioning assets, reducing group depreciation by £6.8m per annum.

The company has the following property, plant and equipment:

	Plant and machinery £ 000	Total
Cost	1 000	2 000
At 1 January 2018	4,344	4,344
Additions	<u> </u>	
At 31 December 2018	4,344	4,344
Accumulated Depreciation		
At 1 January 2018	74	74
Charge for the year	99	99
At 31 December 2018	173	173
Carrying amount		
At 31 December 2018	4,171	4,171
At 31 December 2017	4,270	4,270

13 Investments in subsidiaries

The Company had the following investments in subsidiaries;

Subsidiaries	£ 000
Cost	
At 31 December 2017 and 1 January 2018	179,310
At 31 December 2018	179,310
At 31 December 2017	179,310
Provision	
At 31 December 2017 and 1 January 2018	83,314
At 31 December 2018	83,314
At 31 December 2017	83,314
Carrying amount	
At 31 December 2018	95,996
At 31 December 2017 and 1 January 2018	95,996

The Directors believe that the carrying value of the investments is supported by their underlying net assets.

At 31 December 2018, the Company held interests in the issued share capital of the following undertakings, both of which have been consolidated in these financial statements:

Name of subsidiary	Principal activity	Class of shares held	Country of incorporation and principal place of business	Propor owne intere voting he	rship st and rights Id
				2018	2017
Lynn Wind Farm Limited*	Operation of an offshore wind farm	Ordinary	United Kingdom	100%	100%
Inner Dowsing Wind Farm Limited*	Operation of an offshore wind farm	Ordinary	United Kingdom	100%	100%

^{*} indicates direct investment of GLID Wind Farms TopCo Limited

14 Trade and other receivables

	Group 2018	Group 2017	Company 2018	Company 2017
	£ 000	£ 000	£ 000	£ 000
Financial assets:				
Trade receivables	2,025	7,075	-	-
Accrued income	15,847	17,202	-	-
Value added tax	-	-	2,089	1,749
Other receivables	83	110	83	110
Amounts owed by group undertakings			162,813	176,227
	17,955	24,387	164,985	178,086
Non-financial assets:				
Prepayment	50	502	<u> </u>	
	18,005	24,889	164,985	178,086

Part of the accrued income balance at 31 December 2018 was subject to the terms of the Power Purchase Agreement (note 25).

The remaining amounts owed by Group undertakings to the company are repayable on demand and may be repaid at any time without penalty. The rate of interest is 9% per annum.

15 Inventories

	Group	Group	Company	Company
•	2018	2017	2018	2017
	£ 000	£ 000	£ 000	£ 000
Raw materials and consumables	20	-	20	

The write-up of stocks and consumables in the year amounted to £nil (2017 £220,000). Stock and consumables expensed to the Income Statement amounted to £nil (2017: £8,000). Stock of £nil was sold during the year.

16 Trade and other payables

:	Group	Group	Company	Company
	2018	2017	2018	2017
	£ 000	£ 000	£ 000	£ 000
Trade payables	122	254	122	254
Accrued expenses	5,323	1,622	4,526	260
Corporation tax	2,060	2,010	-	
VAT creditor	2,541	2,709	<u> </u>	
	10,046	6,595	4,648	514

17 Deferred tax liabilities

The movements in respect of the deferred income tax assets and liabilities for the Group that occurred during the financial year are as follows:

	Group	Group
	2018	2017
	£ 000	£ 000
At 1 January	16,932	15,739
Charged / (credited) to the income		
statement	178	1,193
At 31 December	17,110	16,932
	,	
		31
	31 December	December
	2018	2017
Deferred corporation tax		
Fixed Assets	19,241	18,504
Temporary differences	(2,131)	(1,572)
	17,110	16,932

A deferred tax asset was recognised based on the expected recovery in future years following the usual business model for a project-financed wind farm, with cash generated from operations used to repay interest and loans and hence successively reduce future financing costs.

18 Other provisions

	Group 2018 £ 000	Group 2017 £ 000	Company 2018 £ 000	Company 2017 £ 000
Decommissioning provision				
At 1 January	16,834	16,327	-	-
Revisions	(3,113)	-	-	-
Unwind of discounting	543	507_		
	14,264	16,834	-	-

Decommissioning provision

The decommissioning provision represents the future expected costs of decommissioning the Group's wind farms at the end of their useful economic lives, discounted to the present value. The payment date of the total expected future decommissioning costs is uncertain but is currently anticipated to be 2033. The uninflated discounted cost of decommissioning per the latest (2019) report is £15,745,000 (2017: £17,552,000) and is based on a probabilistic model which leaves the cables in situ. Due to changes in relation to these items the future actual cash outflows in relation to decommissioning are likely to differ in practice. The large vessel cost market has softened somewhat since the 2014 review and engineering day rates have been revised in line with market rates. Lifting configuration for removal of the turbines has also been updated in line with current technology and a 'bunney ears' configuration adopted. The above provision relates solely to assets held as at the date of these financial statements. In determining the provision, the cash flows have been discounted on a pre-tax basis using an annual risk-free interest rate of 3.15% (2017: 3.14%). The assumed rate of inflation is 2.5% (2017: 2.5%).

The shareholder loans consist of three debenture loan notes issued to the current parent undertakings in the form of parent loans with £147,318,000 to UK Green Investment LID Limited (2017: £163,351,000), £83,110,000 to RI Income UK Holdings Limited (2017: £92,155,000) and £12,054,000 to RI EU Holdings (UK) Limited (2017: £13,366,000). The notes bear interest on their outstanding principal amount at a rate of 6.5% per annum. The notes are due to be repaid in full on 30 September 2029. Total interest of £861,000 has accrued on these loan notes at 31 December 2018 (2017: £766,000).

The company's exposure to market and liquidity risk; including maturity analysis, in respect of loans and borrowings is disclosed in note 24.

19 Borrowings (continued) Share Liability

As a result of the distribution policy in place up until 25 April 2018, the Company had a contractual obligation to distribute free cash flow to its shareholders. The liability recorded was based upon the estimated net present value of all expected future payments to its shareholders and is remeasured at each balance sheet date. The amount and timing of future anticipated free cash flows is uncertain and dependent upon performance of the business, directors' approval as well as external factors such as energy prices and therefore future actual distributions are likely to differ in practice. The discount factor used to calculate the net present value is also subject to estimation.

The distribution policy was updated in April 2018 to remove the contractual obligation to distribute free cash flow and subsequently derecognised the shares liability.

20 Share capital

Allotted, called up and fully paid shares

,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,	2018	2018	2017	2017
	No. 000	£ 000	No. 000	£ 000
Ordinary A shares of £1 each	304	304	304	304
Ordinary B shares of £1 each	196	196	196_	196
	500	500	500	500

Ordinary A and B shares entitle the holders to participate in dividends and capital distributions, including on a winding up in proportion to the number and amounts paid on the shares held.

On a written resolution or on a show of hands the holders of the 'A' shares have, in aggregate, one vote and the holders of the 'B' share have, in aggregate one vote in either case irrespective of the number of shares held by them and irrespective of relevant proportions.

21 Reserves

Cash flow hedge reserve - represents the nominal value of the shares that have been issued Cash flow hedge reserve - represents gains / losses arising on effective portion of fair value movements on financial instruments used in a designated cash flow hedging relationship Retained earnings - includes all current and prior period retained profits and losses Other reserves - represents shares liability and has no effect on distributable reserves

22 Operating leases

At 31 December 2018 the Company had commitments under non-cancellable operating leases payable with the following maturity:

	2018	2017
	£ 000	£ 000
Within one year	664	648
In two to five years	2,654	2,591
In over five years	6,635	7,124
•	9,953	10,363

The operating leases are in relation to rent payable to The Crown Estate for the seabed rental for the wind farms. The amount of non-cancellable operating lease payments recognised as an expense during the year was £641,000 (2017: £618,000) and the amount of contingent rents was £185,000 (2017: £205,000).

22 Operating leases (continued)

Contingent rents relate to payments to The Crown Estate in respect of volumes in excess of the minimum output.

At 31 December 2018 the Company had commitments under non-cancellable operating leases receivable with the following maturity:

	2018	2017
	£ 000	£ 000
Within one year	-	238
In two to five years	-	-
In over five years		<u> </u>
•		238

The operating lease receivable is in relation to licence fee receivable from Centrica Renewable Energy Ltd for use of the Grimsby Renewables Base. The amount of non-cancellable operating lease receipts recognised as income during the year was £237,500 (2017: £712,500) and the amount of contingent rents was £nil (2017: £nil).

23 Other commitments and contingencies

Capital commitments

The total amount contracted for but not provided in the financial statements was £nil (2017: £nil).

24 Fair value of financial instruments held at amortised cost

The Group and Company's financial assets and liabilities measured at amortised cost comprise trade and other receivables, cash and cash equivalents, trade and other payables and loans and borrowings. Due to their nature and/or short term maturity, the fair values of financial assets and liabilities measured at amortised cost are estimated to approximate their carrying values.

Loans and receivables credit risk exposure

	2018	2017

Cash and cash equivalents credit risk exposure		
	2018	2017
	£ 000	£ 000
AAA to BBB-	7,386	4,495

Notes to the Financial Statements for the Year Ended 31 December 2018

25 Financial risk management and impairment of financial assets

The Group's normal operating, investing and financing activities expose it to a variety of financial risks: credit risk, market risk (including price risk, interest rate risk and currency risk) and liquidity risk. The Group's overall financial risk management approach aims to identify, manage and mitigate these risks.

On 7 March 2016 three loan notes were issued to the current parent undertakings in the form of parent loans. At 31 December 2018, the amounts outstanding were £147,318,000 to UK Green Investment LID Limited (2017: £163,351,000), £83,110,000 to RI Income UK Holdings Limited (2017: £92,155,000) and £12,054,000 to RI EU Holdings (UK) Limited (2017: £13,366,000). The notes bear interest on their outstanding principal amount at a rate of 6.5% per annum. The notes and interest are due to be repaid in full on 30 September 2029.

GLID Windfarms TopCo Limited has provided a letter of support to both Lynn Wind Farm Limited and Inner Dowsing Wind Farm Limited, such that amounts owed to the parent company will only be requested subject to the subsidiaries being able to meet their liabilities as they fall due.

Credit risk and impairment

Credit risk is the risk of loss associated with a counterparty's inability or failure to discharge its obligations under a contract.

The Group is exposed to credit risk in its sale of goods and services and on its treasury activities. Counterparty credit exposures are monitored by individual counterparty and by a minimum threshold credit rating.

There have been no material changes in the management of risk in the period or in the level of exposure to counterparties below investment grade.

Concentrations of credit risk

The Group sells all of its generated electricity and 50% of the associated environmental credits to British Gas Trading Limited.

The remainder of the associated environmental credits are sold to NPower Limited. There is a Parent Company Guarantee in place in respect of the Npower Agreement.

The Group's cash and cash equivalents are all held with a single financial institution.

Past due and impaired financial assets

No financial assets are past due at 31 December 2018 (2017: £nil) and no allowances have been made for impairment by credit losses (2017: £nil).

Market risk

Market risk is the risk of loss that results from changes in market prices (commodity prices, interest rates and foreign exchange rates). The level of market risk to which the Group is exposed at a point in time varies depending on market conditions, expectations of future price or market rate movements.

Notes to the Financial Statements for the Year Ended 31 December 2018

25 Financial risk management and impairment of financial assets (continued)

Commodity price risk

The Group is exposed to commodity price risk from the sale of electricity produced by the wind farms. The Group is also exposed to volumetric risk in the form of an uncertain production profile that is dependent on wind speeds and the physical availability of the wind farms. The availability is driven by technical performance of the wind turbines, physical access to the wind farm and distribution and transmission system availability.

To manage the price risk the Group has entered into power purchase agreements with British Gas Trading Limited to sell power and ROCs until September 2024 based on a market index and Npower Limited to sell ROCs until March 2026 based on a market index. The commodity price exposure is managed by terms in these agreements that provide both a cap and floor to the prices achieved in respect of 75% of output.

There is a concentration of price risk to the Group as all of the electricity produced has to be immediately sold at the day-ahead market price, subject to the cap and floor prices included in the power purchase agreements. Current day ahead prices are close to the power price floor and have during the financial year been close to the floor therefore there is a greater probability of upside than downside on power prices in future years for the 75% of generation covered by the floor price.

The volumetric risk is managed through operations and maintenance activities targeted to maximise commercial availability and yield from the available wind resource.

Sensitivity analysis

Sales of electricity represent approximately 30% of the Group's revenue, The impact to the Group on revenue of a +/- 5% change in UK power prices would be +/- £1.1 million.

Other price risk

The Group is exposed to price risk from the sale of Renewable Obligation Certificates ("ROCs") awarded based on electricity production. There is a variable price component within this revenue stream, but the prices are substantially linked to the movement in the UK Retail Price Index.

The Group is also exposed to regulatory risk in the form of ongoing governmental support for the issue of these certificates.

The Group's power purchase agreements provide for 100% of the ROCs to be sold on a long-term contracted basis between March 2016 and September 2024.

All of the certificates awarded have been contracted for sale based on the price set by government, which concentrates the price risk based on government actions to set industry targets for the supply of renewable power.

Sensitivity analysis

The main sensitivity is around the variable price component of ROCs, the Recycling Benefit ("ROC recycle"), which represents an incremental level of revenue above the basic price set by government (the "buy-out price"). The Group deems that a range for the ROC recycle of between 0% - 10% of the ROC buy-out price is reasonably possible. The impact of such movements on profit and equity, both after taxation, is not material to the Group.

Notes to the Financial Statements for the Year Ended 31 December 2018

25 Financial risk management and impairment of financial assets (continued)

Interest rate risk

In the normal course of business, the Group borrows to finance operations. Since 7 March 2016 the Group is no longer exposed to interest rate risk because the interest rates on the shareholder loans are fixed at 6.5%. In respect of decommissioning a 1% increase in interest rate will see an increase to the discount rate applied in the future resulting in a £2.5m reduction to the provision.

Liquidity risk

Liquidity risk is the risk that the Group is unable to meet its financial obligations as they fall due. The Group experiences movements in its liquidity position due to the seasonal nature of its business.

To mitigate this risk the Group holds cash on deposit.

Cash and cash equivalents		(7,386)	(4,495)
		216,099	342,587

Capital management

The Group's objective when managing capital is to safeguard its ability to continue as a going concern in order to provide returns for shareholders and benefits for their stakeholders.

The Group monitors its current and projected capital position on a regular basis through cash flow forecasts, which consider different inputs including significant movements in commodity prices. In order to maintain the capital structure, the Group may adjust future distributions to shareholders.
