#### d) Deferred Taxation

The charge for taxation takes into account taxation deferred as a result of timing differences between the treatment of certain items for taxation and accounting purposes. In general, deferred taxation is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date. However deferred tax assets are recognised only to the extent that the directors consider that it is more likely than not that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits. Deferred taxation is measured on a non discounted basis at the average tax rates that would apply when the timing differences reverse, based on tax rates and laws enacted by the balance sheet date
